1) Summary of Consultation Responses

Introduction

This report sets out a summary of the consultation responses received by Wyre Forest District Council for the consultation on the Local Plan Review Preferred Options consultation.

Background

As part of the Local Plan Review, the Council produced a 'Preferred Options' document for consultation which took into account the Issues and Options consultation carried out in late 2015 along with the body of evidence that the District has now developed. The Preferred Options document identified two potential approaches to how Wyre Forest District might meet its development requirements in the period up to 2034 along with proposed strategic, development management and allocations policies.

Preferred Options Consultation

The Local Plan Review Preferred Options Consultation took place between Thursday 15th June 2017 and Monday 14th August 2017. This was the second stage of the Local Plan Review.

During the consultation period the Council sought views on the Preferred Options document. The Preferred Options consultation is the main consultation opportunity for the community and other stakeholders to comment and influence the sites that the Council has identified as being the most suitable to allocate for development purposes. The consultation was in accordance with the Town and Country (Local Planning) (England) Regulations 2012, as set out in the Statement of Community Involvement (adopted February 2013). A total of 5029 responses were received to this consultation.

Preferred Options Call for Sites

A call for sites exercise was undertaken as part of the Preferred Options consultation. A total of 51 sites were submitted for consideration. A list of these sites with accompanying maps can be found at Appendix 1 of this document.

Next Steps

The next stage in the plan making process is for the Council to publish the pre-submission version of the plan – this is the version the Council intends to submit to independent examination. The consultation responses to the Preferred Options document will help shape the next version of the plan.

Prior to being submitted for examination the pre-submission plan will be subject to consultation and the representations made will be the focus of the examination. The pre-submission plan will be published in November 2018 for a minimum 6 week public consultation.

2) Publicity for the Preferred Options Consultation

Letter, Emails and Publicity

Over 919 emails / letters were sent out to all stakeholders on the Local Plan Consultation Database, including all those who had made submissions to the 'Call for Sites' exercise. This informed them of the Preferred Options consultation, detailed where to get further information (including dates of consultation drop-in sessions) and explained how to respond.

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

A publicity leaflet was delivered to households within the District by Royal Mail. The leaflet notified residents of the Local Plan Review Preferred Options consultation and outlined the dates and times of the consultation drop-in sessions where documents could be viewed and details of the consultation website where documents could be downloaded. It also gave details on how residents could respond to the consultation and the closing date.

People were given the option of responding to the consultation through an online consultation response portal, electronically by email or post.

The Preferred Options document and Sustainability Appraisal were available for public viewing at the Worcestershire Hub, Vicar Street, Kidderminster and local libraries within the District.

The Preferred Options document, Sustainability Appraisal and all the evidence base studies were made available for public viewing on the Council's website and were also made available at all of the consultation drop-in sessions.

Posters were taken for display to a wide range of accessible locations throughout the District, such as local supermarkets. The table below lists the locations:

Table: Poster Displays

KIDDERMINSTER
Kidderminster Library
Wyre Forest Hub/Town Hall
Wyre Forest Leisure Centre
Tesco
Sainsbury
Morrisons
Asda
Iceland
Hodge Hill Garden Nurseries
Barnetts Hill Garden Centre
STOURPORT
Stourport Library
Stourport Civic Hall
Tesco
Co-op
Lidl
Cooks Garden Centre
BEWDLEY
Bewdley Library
Bewdley Museum
Bewdley Leisure Centre
Co-op
Tesco
Hopleys Farm Shop
RURAL AREAS
Wyre Forest Discovery Centre
Cookley – Tesco and Post Office
Blakedown Post Office
Chaddesley Corbett Post Office
Wolverley Stores
Fairfield Shop

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Upper Arley Post Office
Rowberry Farm Shop
Far Forest Post Office/stores
Colliers Farm Shop
Clows Top Post Office

All Town and Parish Councils were sent a consultation notice and asked to display it on their notice boards for public viewing.

Summary leaflets were available at all of the consultation drop-in sessions.

Web-based Communication and Social Media

An interactive version of the Preferred Options Document was made available to enable electronic representations to be made. The response form could also be downloaded and printed or filled in and submitted online. Representations were also accepted by email or post. A copy of the response form can be found at Appendix 4 of this document.

A link to the Local Plan Review Preferred Options consultation was made available on the homepage of the Council's website.

The Local Plan Review Preferred Options document, Sustainability Appraisal and all the evidence base studies were available for viewing on the Council's Planning Policy web pages. The website also included full details of how to respond to the consultation, including the consultation response form and an online consultation response portal.

The Local Plan Review Preferred Options consultation was promoted through the Council's Facebook and Twitter accounts:

Facebook (number of people reached and the number of shares):

- 15 June – updated cover photo with Local Plan Review banner – 187 reached
- 15 June – 2,113 reached
- 7 July – 1,386 reached, 2 shares
- 10 July – 57 reached
- 17 July – 483 reached, 3 shares
- 19 July – 40 reached
- 21 July – 99 reached
- 24 July – 2,199 reached, 1 share
- 26 July – 114 reached
- 27 July – 100 reached
- 28 July – 52 reached
- 29 July – 53 reached
- 31 July – 181 reached
- 1 August – 918 reached
- 4 August – 378 reached
- 11 August – 844 reached

- 14 August – 64 reached

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Twitter:

- 16 tweets were sent out during the 8 week consultation period reaching a potential audience of many thousands.

Press Coverage

Press releases were issued by the Council on the following dates:

- 11th May 2017
- 15th June 2017
- 11th July 2017
- 15th August 2017

Statement to Shuttle

- 19th July 2017

News articles providing information on the Local Plan Review Preferred Options Consultation and potential site allocations were published in the Kidderminster Shuttle and the Express & Star during the course of the consultation period.

There was also coverage of the Local Plan Review Preferred Options Consultation on local radio stations and BBC Hereford & Worcester.

Engagement with Residents and Stakeholders

During the eight week public consultation on the Preferred Options document eight drop-in sessions were held. These were staffed at accessible locations in the three main towns of the District; Kidderminster, Stourport-on-Severn and Bewdley and in areas of impact of the proposals. Display boards were erected at the drop-in sessions. The drop-in sessions provided an opportunity for residents and stakeholders to raise questions regarding the proposals set out in the Local Plan Review Preferred Options document, Sustainability Appraisal and all the evidence base studies prior to making a formal response. This included weekday/weekend drop-in sessions at the following venues:

Date	Time	Venue
Monday 10 th July 2017	3:45pm – 8pm	Heronswood Primary School, Spennells, Kidderminster
Wednesday 19 th July 2017	2:00pm – 7:00pm	The Wyre Room, St George's Hall, Load Street, Bewdley
Friday 21 st July 2017	1:00pm – 5:30pm	Rowland Hill Centre, Kidderminster
Saturday 22 nd July 2017	10:00am – 4:00pm	Offmore Evangelical Church Hall, Kidderminster
Wednesday 26 th July 2017	1:30pm – 6:30pm	Areley Kings Village Hall, Stourport
Friday 28 th July 2017	2:00pm – 7:00pm	Cookley Village Hall
Saturday 29 th July 2017	10:00am – 4:00pm	Stourport Civic Hall
Friday 4 th August 2017	2:00pm – 7:00pm	St Oswalds Church Centre, Broadwaters Drive, Kidderminster

The drop-in sessions were attended by over 1800 people.

Duty to Cooperate

The Duty to Cooperate was created in the Localism Act 2011, and amends the Planning and Compulsory Purchase Act 2004. It places a legal duty on local planning authorities, county councils in England and public bodies to engage constructively, actively and on an ongoing basis to maximise the effectiveness of Local Plan preparation in the context of strategic cross boundary matters.

In order to fulfil the requirements of the Duty to Cooperate, all neighbouring authorities and consultation bodies covered by the Duty to Cooperate received a separate form to complete which allowed any concerns to be raised. Where there were no relevant issues the completed forms provided an audit trail to demonstrate that the Duty has been fully considered and complied with. Where cross-boundary issues were identified, met with each of the neighbouring authorities or organisations concerned to discuss the issues and how the Plan can best address them.

Processing of Comments Procedures

All responses submitted to the District Council online, by letter and email were acknowledged by the Council. The Planning Policy Team carefully analysed all comments and suggestions to prepare this report which is a summary of the consultation responses received. This report will be presented to and considered by the Local Plans Review Panel, Overview and Scrutiny Committee and Cabinet.

3) Respondents and Representations

There have been 1,809 respondents to the consultation. These respondents have raised 5,029 representations in total. Each individual or organisation making responses is known as a respondent. A single respondent can make multiple representations.

In addition the Council received 6 petitions in relation to the plan from the following groups:

- Burlish & Lickhill Friends
- Hodge Hill Farm Residents Association
- Offmore and Comberton Action Group
- S.A.F.E (Spennells Against Further Expansion)
- S.A.L.T (Summerfield Against Land Transformation)
- Save the Green Belt

More information on these petitions can be found at Section 4e of this document.

4) Summary of Consultation Responses from Statutory Consultees, Parish and Town Councils and Petitions

This section sets out a summary of the key issues raised by the following:

- 4a) Statutory Consultees
- 4b) Wyre Forest Parish and Town Councils
- 4c) Parish Councils outside of Wyre Forest District
- 4d) Other Non-Resident Representations
- 4e) Petitions

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Section 6 of this document covers the proposed site allocations and identifies the key issues raised by those who responded to us during the consultation period. These key issues can be found at Appendix 3b. Summaries of the responses are at Appendix 3c.

4a) Statutory Consultees – Key Issues

The following gives a summary of the key issues raised by the Statutory Consultees. A list of the statutory consultees consulted can be found at Appendix 5 of this document:

Worcestershire County Council – a summary of WCC comments are as follows:

Infrastructure – unlikely that development alone will pay for delivery of infrastructure and external funding will be required from different sources. Some of the infrastructure required may be outside WFDC area e.g. wider transport network.

Green Infrastructure – Support neither Option A or B but a hybrid. Sites need to be assessed - ecological assessment or biodiversity impact assessment in relation to green infrastructure (landscape assessment, biodiversity, blue infrastructure, historic environment). Worcestershire Green Infrastructure Partnership willing to work with WFDC to develop a green infrastructure approach to site allocations. Should aim to deliver 40% GI notwithstanding site by site viability.

Education – where there is a need for additional primary school places additional provision will be required to support level of housing in the Plan. Secondary schools may need to expand to accommodate pupil number growth from development (Kidderminster and Stourport).

Transport - No transport modelling has taken place, this will confirm if eastern relief road is needed and information regarding sites. A revised and improved approach to parking in Bewdley and Stourport needed.

Additional gypsy/traveller sites have not been identified. Policy states “further small scale sites to meet the indicative need of 21 pitches to 2034 will be allocated in LP” (Policy 8E).

Mineral resource – Housing and employment needs outweigh the long term economic value of the mineral resource. Opportunities should still be optimised for partial extraction. None of the Minerals Local Plan potential site allocations overlap with potential Wyre Forest Local Plan (WFLP) sites but some are in close proximity.

Existing waste management sites in Wyre Forest District should be safeguarded.

Recommend WFDC produce a health Supplementary Planning Document to support Policy 9 Health and Wellbeing, WCC wish to discuss this with WFDC.

Worcestershire Archive and Archaeology – no specific comments regarding site allocations. Believe none of proposed allocations would directly impact on a designated heritage asset.

South Worcestershire - Concerned that unmet housing need in Birmingham is not acknowledged. It is understood that some of this growth may need to be exported to adjacent Housing Market Areas, particularly those with a clear functional relationship with Birmingham and the Black Country, such as Wyre Forest. It is not clear how the additional growth addresses unmet need arising from outside of Wyre Forest District. Wyre Forest District may need to consider higher levels of growth to absorb some of this need.

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Housing and employment sites that border Wychavon and Malvern Hills District administrative boundaries could have cross boundary infrastructure delivery implications which will need to be considered.

Concerns about growth at Areley Kings under option B (approx 550 new dwellings). Adjacent to the MHDC boundary; MHDC has already approved development in this area. Infrastructure implications of any site allocations in this area need to be carefully considered to ensure that sufficient capacity exists. Impact of growth on the river Severn crossing within Stourport should be considered, particularly as there is no longer an intention to deliver the Stourport Relief Road in Local Transport Plan 4.

Wyre Forest District Local Plan should focus on improving the accessibility of and services to/from local stations within Wyre Forest District rather than emphasise park and ride from Worcestershire Parkway which could exacerbate congestion on routes such as the A449.

Clows Top for 30 dwellings - SWDP allocated 17 dwellings in Clows Top, Shropshire could also propose development. Would need to ensure that adequate infrastructure is provided and avoid an over concentration of development within the village.

South Worcestershire Councils welcome the opportunity for further discussions with Wyre Forest District Council as the Local Plan Review progresses in order to comply with on-going requirements associated with the Duty to Cooperate. Consequently the SWCs wish to continue to be consulted on subsequent stages of the Wyre Forest Local Plan review.

Bromsgrove and Redditch – Supports the aims and objectives of the plan and think that it has the potential to provide a strong base for planning in Wyre Forest once adopted, although a number of reservations do exist where clarity needs to be provided in order for their concerns to be allayed.

They have said that continued liaison will be important to ensure that if all the needs of the Birmingham Housing Market Area (BHMA) cannot be met within the currently identified geographic area, then it could be that those areas on the periphery may need to assist in meeting those needs if it can be done sustainably. It is suggested that the review of the Wyre Forest Local Plan will need to have sufficient mechanisms in place to be able to respond appropriately to any requests to meet the needs of the wider BHMA should a request be forthcoming.

Concerns:

- Preferred option not specified.
- Location of core sites east/north east Kidderminster.
- Impact of road network in Bromsgrove District

A Duty to Cooperate meeting was held in October 2017 to discuss these issues with Bromsgrove & Redditch Councils.

Birmingham City Council and Black Country Local Authorities – Shortfall in housing within Birmingham and the Black Country HMA. WFDC economic led figures will result in-migration particularly of working age from Birmingham. OAHN verifies ageing population and identifies in-migration as principal source of population growth.

Situation in South Worcestershire Authorities mirrors WFD as also seeking economic led growth which requires more people than demographic projections suggest and is reflected in adopted SWDP. Suggestion that WFDC may need to take some additional growth from Birmingham City and Black Country if they are unable to meet the demand in their own Housing Market Area.

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Duty to Cooperate meetings have been held with Birmingham City Council and the Black Country Local Authorities to discuss these issues.

South Staffordshire- They refer to the Peter Brett Associates Strategic Housing Needs Study work published in November 2014. This Study confirmed that whilst WFDC is not part of Greater Birmingham and Black Country Housing Market Area, it has close links with it. South Staffs also say that WFDC is best fit with the Worcester HMA along with the three South Worcestershire Authorities (Worcester, Malvern Hills and Wychavon), but as these authorities have an adopted plan, it follows that for the purpose of this round of local plan making, WFDC is a free standing HMA.

Situation in South Worcestershire Authorities mirrors WFDC as also seeking economic led growth which requires more people than demographic projections suggest and is reflected in adopted SWDP. Suggestion that WFDC may need to take some additional growth from Birmingham City and Black Country if they are unable to meet the demand in their own Housing Market Area.

Shortfall in housing within Birmingham and Black Country, WFDC economic led figures will result in migration particularly of working age from Birmingham and Black Country. OAHN verifies ageing population and identifies in-migration as principal source of population growth.

A Duty to Cooperate meeting was requested to discuss these issues in more detail with a view to signing a Duty to Cooperate Statement / Memorandum of Understanding between the relevant local authorities.

Duty to Cooperate meetings have been held with South Staffs, Birmingham City Council and the Black Country Local Authorities to discuss these issues.

Natural England – Natural England are concerned about sites which could affect nationally designated sites around the town. These were referred to in their consultation response back in 2016 and remain unaddressed in the Preferred Options document recently consulted on. They requested a meeting with the Council to discuss these concerns and to draw the Council's attention to the fundamental nature of these concerns and the need to ensure as far as possible that the plan can be judged 'sound' at the next stage of local plan making.

Natural England also gave the following advice regarding proposed site allocations:

- **Green Infrastructure** – Proposed allocations should maintain and enhance the green infrastructure resource by connecting with existing GI and providing new GI on site. NPPF para 114 refers.
- **Priority Species and Habitats** – Proposed site allocations should take account of records of these assets. NPPF para 117 refers.
- **Protected Species** – as above. Their standing advice refers.
- **Ecological networks** – Proposed allocations should set out how connectivity of the network will be maintained or enhanced.
- **Rights of Way** – Proposed allocations should protect and enhance public rights of way, incorporating them into new development in sympathy with their character and quality. NPPF paras 74 and 75 refers.

In particular, Natural England has concerns with the following sites:

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

- FPH/1, Settling ponds, Wilden Lane – concerns that development in this location could potentially impact on the Wilden Marsh & Meadows SSSI.
- BW/4, Hurcott ADR – this site is adjacent to the SSSI and a residual negative impact on landscape and biodiversity may result unless mitigation is in place. Natural England acknowledge that the local plan policy explains that extensive areas will be left undeveloped to protect the adjacent Hurcott Meadows SSSI.
- WFR/WC/15, Lea Castle – This site includes large tracts of woodland and acid grassland that needs to be protected and that fragmentation of ecological corridor should be avoided.
- BR/RO/7, New Road Far Forest and BR/BE/6, Land off Highclere – priority habitats should be considered within these allocations.
- AS/5, Victoria Carpets, Sports Ground – The potential impact on the Wilden Marsh & Meadows SSSI via the Hoo Brook should be considered.
- OC/13 East of Kidderminster – Natural England support the proposed enhancements to the watercourse and pools for this area but the potential impact on Wilden Marsh & Meadows SSSI should be considered.
- MI/3, Parsons Chain – The potential impact on the Hartlebury Common and Hillditch Coppice SSSI should be considered.
- FPH/10, British Sugar Phase 2 – the potential impact on Wilden Marsh & Meadows does not appear to have been fully considered.
- BW1, Churchfields & BW2 Lime Kiln Bridge – the impact on deciduous woodland, the River Stour and Wilden Marsh Meadows should be considered.

A meeting was held with Natural England in November 2017 to discuss the issues raised in their consultation response.

Environment Agency – Environment Agency advise that detailed modelling may be required to inform site specific FRAs for sites in flood zones 2 & 3. Recommend that caveat is included for those sites affected.

Concerns that River Stour/Severn confluence has not had modelling done to assess flood scenario on River Stour. Site specific FRAs should investigate this to ensure safe development.

Site allocations which include areas of Flood Zones 2 and/or 3, recommend there is sufficient land available within Flood Zone 1 to accommodate the proposed development (i.e. number of houses or hectares (ha) of employment land).

Recommend when assessing site allocations previous uses of site are assessed to ensure site is appropriate and viable for remediation. FPH/1 partially located over landfill, LI6/7 partially located upon landfill.

Expect review of groundwater vulnerability and SPZs and information on Water Framework Directive to further inform site consideration.

Water Cycle Study – the EA are satisfied that this evidence base study covers all necessary aspects. Evidence base document robust enough to inform Plan.

EA note that the Plan makes strong recommendations to utilise SuDS for surface water drainage from development, and EA support this approach. EA also support the fact that all aspects of sewerage network constraints, sewage treatment works capacity and related issues such as odour and flood risk from increased waste water discharges have been considered.

Local Plan Review Preferred Options Consultation (June 2017)
Summary of Consultation Responses

Historic England – Generally supportive. Suggestions for amendments to proposed policy wording and to add more relating to historic environment/landscape. Historic England are concerned that the proposed site allocations have not been considered properly against the historic environment implications. Historic England therefore offered to meet with the Council to discuss the proposed site allocations and to assist the Council in developing an assessment process. A meeting with Historic England was held in November 2017 to discuss their concerns in more detail.

Highways England – Highways England are responsible for the operation and maintenance of the Strategic Road Network (SRN). The network includes all major motorways and trunk roads.

Highways England has no preference as to which option should be brought forward. However, they note that there may be material implications for the network at M5 junctions 3, 4 and 6 arising from increased levels of traffic associated with development in Wyre Forest. In order to develop a clearer understanding of the implications of the proposed allocation of development for the SRN, Highways England has identified the need for more detailed traffic assessment of M5 Junction 4 as a priority. This junction is already affected by development arising from the plans of Bromsgrove District and Birmingham City Councils. Furthermore, the implications of development traffic at M5 Junction 3 are likely to be affected by traffic growth associated with the plans and strategies of Bromsgrove District Council, the Black Country Authorities and Transport for West Midlands.

Highways England seek to work in partnership with Wyre Forest District Council and Worcestershire County Council as the Local Highway Authority to consider these implications and identify if any mitigation measures are required to support the identified growth in Wyre Forest District.

Highways England therefore seeks to encourage on-going engagement with Wyre Forest District Council and Worcestershire County Council during the plan making process.

Network Rail – The Council are advised that there are level crossings at Blakedown Railway Station and Hartlebury Railway Station. The possibility of increased usage levels of pedestrians and vehicle users at the level crossing could increase the risk scores at both level crossings.

Development should include consideration of impact on level crossings and mitigation. Adequate parking is needed at Kidderminster and Blakedown Stations.

The Coal Authority – Wyre Forest District has had coal mining which can cause future problems. The Coal Authority High Risk Development Area covers approx 2% of WFD. Preferred option sites are not in these areas.

The Coal Authority welcomes paragraph 16.21 (Legacy of Minerals Extraction) in the emerging Local Plan which states that there is a mining legacy within the District and that where development is proposed in areas with a known legacy of minerals extraction, the developer will be expected to assess the site for ground contamination, ground stability and mining hazards and submit appropriate mitigation reports in support of their planning applications.

4b) Wyre Forest Parish and Town Councils – Key Issues

The following gives a summary of the key issues raised by the Parish and Town Councils:

Bewdley Town Council – Support for many policies in emerging Local Plan. Object to inclusion of Highclere (BR/BE/6) and proposed travelling showpeople site at land off Habberley Road (WA/BE/6).

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Support the other proposed sites in Bewdley; Stourport Rd Triangle (WA/BE/1), Land south of Habberley Road (WA/BE/5), and Catchems End (WA/BE/3).

Kidderminster Town Council – No representation received.

Stourport Town Council – Proceed with Option A not B.

Reasons:

- Use sites in town not in Green Belt – the sites LI/5 Burlish Crossing and MI/17 Stourport Manor are currently in the Green Belt. STC considers it unnecessary to extend into the Green Belt when there are a number of Core sites in the town which should be given priority.
- Development sites such as AKR/20 Carpets of Worth and/or AKR/2 Cheapside are not being brought forward for development by allegedly unrealistic assumptions of development value by the landowners. The Council might wish to consider Planning or Regeneration CPO powers to bring such landowners to a realistic expectation of land value.
- Sites AKR/14 Pearl Lane and AKR/15 Rectory Lane – STC considers that development of these sites would encroach into the open countryside and lead to further exacerbate the high level of traffic congestion across the bridge and add to air pollution in the town centre.
- Option B does not provide for any highway or other infrastructure improvements within and around Stourport. Option A proposes a new road which would link the A449 with the A448 which would provide new infrastructure to support the proposed new development around the Spennells Estate.

Chaddesley Corbett Parish Council - Generally supportive of the policies set out in the Preferred Options document. The Parish Council supports Option B as it considers this option will require the least amount of Green Belt to be lost. The Parish Council also consider the impact of Option B on the Western settlements could be reduced by using the Option A site close to Lea Castle, which may also assist in enabling infrastructure improvements.

The need for a solution to traffic volumes and congestion is understood by the Parish Council, but the proposals are not attractive in that the plan appears to be for a relief road running through the centre of an extensive residential development. Would this constitute ‘a desirable place to live’, or assist in improving air quality for residents?

The extensive area to the East, defined as ‘core sites’ represents a major challenge. The manner and timing for the release of sites, and controls over the character of the development will be critical to ensuring that the end results make a positive contribution to ‘quality design and local distinctiveness’ – rather than producing a characterless urban sprawl with no sense of place. The more dispersed development set out in Option B offers greater opportunities for delivering quality design and for working with the grain of local distinctiveness.

Both options A and B will have a major impact on traffic and other travel volumes heading East, toward Birmingham, the motorways and inter-city rail links. Wyre Forest must work closely with the County Council to address road locations that are already pinch points, such as Mustow Green and various junctions in Hagley.

Travelling showpeople preferred site – Clows Top as this is a brownfield site.

Churchill and Blakedown Parish Council - Proposed employment site on A456 in conflict with Churchill and Blakedown Neighbourhood Plan.

Very concerned with additional traffic travelling through Blakedown if proposed sites go ahead, eastern relief road would add pressure on A456. Oppose any threat to Hurcott SSSI. Lea Castle in catchment for Blakedown school which is oversubscribed. Parkway Station at Blakedown unwelcome, want to be involved in any discussions for parkway station. Multi storey at Kidderminster Station should be explored.

Overall, the Parish Council are disappointed with the lack of infrastructure proposals to support the plan. The proposal for an eastern relief road seems to have been ill thought through as it would add further pressure on the A456. If the junction of the A448 and the A450 was improved it would divert traffic from the centre of town and relieve pressure on the A456.

Rock Parish Council – Support Option A. The Parish Council wish to draw attention to the following points raised by residents of Far Forest:

- Potential loss of wildlife and harm to the landscape;
- Various protected species are located on the proposed development land;
- Harm to the Landscape Protection & Hedgerows;
- The Primary School at Far Forest cannot accommodate additional pupils;
- Concern at the increase of traffic in New Road especially after the last schools review;
- Road safety in and round Cleobury Road & New Road;
- No car park for Far Forest Church causes problems;
- Plough Lane used as Bus Stop for school children in morning;
- Sewage system in Far Forest is still a major ongoing issue as the upgraded system cannot cope with the current dwellings.

The Parish Council also oppose the site at Clows Top for travelling showpeople.

The Parish Council wish to support the idea that the new Local Plan contains a policy to encourage the refurbishment of the Bliss Gate Inn to be converted into units of accommodation together with the use of the rear car park immediately adjoining the former Inn. This site although seen a decade ago as a community asset has now fallen into a poor state of repair and really does great harm to the gateway into the Bliss Gate Village.

Rushock Parish Council - do not object to any of the content but concerned about the proposed erosion of the Green Belt, and the effects of the proposed residential developments on already overcrowded roads, medical services, social services and schools in the district.

Stone Parish Council - Support Option B. Stone Parish Council wish to make the point that they believe King Charles High School on Chester Road should be closed and the site developed for housing, moving the High School down onto the site adjoining the King Charles Lower School at Borrington Road thus having one large combined Education Establishment serving the needs of Eastern Kidderminster.

Upper Arley Parish Council – The Parish Council has made a comment regarding Policy 35 Villages and Rural Areas Site Allocations - Core Sites for Allocation.

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

The Parish Council has no issue at all with this proposal for 10 dwellings on allotment site in Upper Areley. However, the Parish would prefer that in the event of any development taking place, ALL the houses (not just some of them) should be affordable houses, of a smaller design, and for the people of the parish only and would request that this is a condition of any planning permission granted. Other than the site referred to the Parish Council does not wish to see any other development in the Parish.

Wolverley and Cookley Parish Council – Support development on Lea Castle Core Housing Site (WFR/WC/15) if infrastructure is in place to support this level of development. Totally opposed to development of Option A Lea Castle Hospital extension (South) (WFR/WC/16) as Cookley would be joined to Kidderminster and this would remove important Green Belt land and be contrary to retaining the local identity of Cookley.

The 3 ADRs in the Parish (Land off Hayes Road, Wolverley, Land off Lowe Lane, Wolverley, and Land off Kimberlee Avenue, Cookley) should be retained and safeguarded and not be used for housing development.

4c) Parish Councils outside of Wyre Forest District – Key Issues

The following gives a summary of the key issues raised by Parish Councils outside of Wyre Forest District:

Bayton Parish Council - Object to site at Clows Top for travelling showpeople, want affordable dwellings in Clows Top. Criticism that residents living on the MHDC side of Clows Top did not receive any information on this matter.

Hagley Parish Council – Concerns regarding traffic and any additional traffic on A456, loss of Green Belt, consider OAHN housing number too high, sites contributing to traffic problems. Want mitigation for Hagley.

Pensax Parish Council – Object to site at Clows Top for travelling showpeople, want affordable dwellings in Clows Top.

Shrawley Parish Council – No comments to Option A. Impact of Option B (Areley Kings) likely to be significant, traffic, no proposal for second bridge at Stourport, with already approved scheme and (possible Gladmans appeal) needs adequate infrastructure. Want WFDC, MHDC and WCC to work together on this.

4d) Other Non-Resident Representations – Key Issues

The following gives a summary of the key issues raised by other non-resident representations:

CPRE – non Green Belt sites should be considered before taking land out of the Green Belt. Housing need can be met without using Green Belt, housing figure too high.

RSPB - Favour Option B. Little to separate Option A or B in terms of impact on wildlife. Option A impact on wildlife likely to be greater. None of areas significant. Only exception corn buntings around Stanklyn Lane area they are of County importance and possibly regional importance (West Midlands). Corn buntings cannot be accommodated in housing area so off site compensation either:

- 1) Large-scale habitat compensation in the form of flower rich/species rich grassland creation for corn buntings (200 hectares), or
- 2) Manage remaining farmland better for corn buntings.

RSPB are happy to advise further when final option decided on.

Worcestershire Wildlife Trust – Objective to protect and enhance the District’s biodiversity should be added to the Plan’s Aims and Objectives.

Not able to support Option A or B in their entirety as both options likely to have significant implications for biodiversity; WWT recommend a blend of the two options where site allocation likely to lead to significant adverse impacts on biodiversity are removed. WWT object to the Wilden lane, settling ponds site. They have reservations regarding Kidderminster Urban Extension due to adverse ecological impact in particular on designated sites including Hurcott and Podmore Pools SSSI, Captains and Stanklyn Pools, Spennells Valley and Hoo Brook Local Wildlife Sites (LWS) and species of importance including Corn Bunting, Hornet Robberfly and Tower Mustard. Concern about information used in decision making process. Further work to determine impact of proposed allocations will be required to ensure Local Plan is based on sound advice. Biodiversity constraints have not been considered properly in the evidence base for the Plan on which allocations are based. Need to determine ecological constraints using up to date survey information, constraints other than SSSI and LWS have not been considered in the evidence base. WWT do not accept the findings of the Sustainability Appraisal (SA); this may render Plan unsound. Strongly recommend evidence base for sites is updated and the quantum of development proposed is made acceptable in terms of biodiversity constraints before the Plan is finalised.

Option B appears a less harmful option but currently does not offer a sustainable solution to development at present.

Impact of proposed eastern relief road will be severe unless significant mitigation. A clear understanding of the need for the road and costs for mitigation are important considerations if a meaningful assessment of the two options are to be undertaken. Alternative access arrangements including improvement to existing network may be better.

Recommend sites in well defined geographical clusters be pulled together to form cohesive groups so that major developments are delivered using the Green Infrastructure led approach championed by Worcestershire Green Infrastructure Partnership. Recommend travelling showpeople proposed site at Heath Lane Stone not be taken forward due to nesting corn buntings in hedges on site.

Welcome specific targets for GI but query levels, SWDP sets 40% GI for sites over 1ha, recommend that this figure is re-examined in the emerging Local Plan.

WFDC should work closely with the Worcestershire Green Infrastructure Partnership to deliver an overarching Green Infrastructure Concept Plan to achieve best GI outcomes possible.

4e) Petitions – Key Issues

A total of 6 petitions were submitted to the Council in relation to the plan. The petitions submitted are shown in the table below and includes the site it is in relation to.

Petition Group	Sites		Details
Burlish & Lickhill Friends	LI/2	Wyre Forest Golf Club	They spoke to 197 residents and submitted 64 response forms with this letter - the responses have been added as individual responses.
	LI/5	Burlish Crossing (Option B)	
	LI/6/7	Lickhill Road North	
Hodge Hill Farm	OC/5	Land at Husum Way	12 signatures

Appendix 4 - Summary of Consultation Responses to the Local Plan Review
Preferred Options (Reg 18) Consultation (June 2017)

Petition Group	Sites		Details
Residents Association	WFR/CB/7	Land off Birmingham Road	
Offmore and Comberton Action Group	OC/4	Baldwin Road	No signatures. Representing residents in the Offmore and Comberton Ward.
	OC/6	Land behind Offmore and Comberton	
	OC/13 (North)	Stone Hill North	
S.A.F.E. (Spennells Against Further Expansion)	AS/10	Rear of Spennells and Easter Park	Residents Group - no signatures. 692 members on Facebook plus 56 who are members by email.
	WFR/ST/2	Land off Stanklyn Lane	
	OC/13 (South)	Stone Hill South	
SALT (Summerfield Against Land Transformation)	AS/10	Fields between Spennells and Summerfield	No signatures - residents of Summerfield.
	WFR/ST/2 (South)		
Save the Green Belt	Cookley, Hurcott, Stone	North Worcestershire Green Belt	1773 signatures. This is an online petition in relation to the Green Belt around the villages in North Worcestershire. The signatures are a mix of local, national and international.

The following gives a summary of the key issues raised by the Petitions received:

Burlish & Lickhill Friends:

The Burlish & Lickhill Friends group are concerned with the following sites:-

- The field at the top of Kingsway, immediately adjacent to the nature reserve (L1/2)
- The field which runs parallel with Burlish Crossing and Bewdley Road North (L1/5)
- The area currently occupied by a garden centre and horse paddocks on Lickhill Road (L1/6/7)

The key concerns for these sites include; traffic congestion at Burlish Crossing, negative impact on wildlife and loss of Green Belt land. The group spoke to 197 people in these areas, the results being:

- 80 (40.5%) were completely unaware of any plans
- 95 (48%) had only recently become aware through social media, friends, neighbours, rumours
- 9 (4.5%) remembered seeing a WFDC leaflet
- 8 (4%) saw something in the Kidderminster Shuttle
- 10 (5%) remember a notification from the local councillor
- 1 (0.5%) saw a notice in the library
- 1 (0.5%) saw one of the fields being surveyed
- 184 (91%) expressed a concern for the plans to build on Greenfield sites
- 8 (4%) said they were not concerned (this figure includes 1 person who responded as “don’t know yet”).

Hodge Hill Farm Residents Association:

The residents of Hodge Hill Farm Barns object to the sites east of Kidderminster, which include Preferred Options OC/5 (Husum Way) and WFR/CB/7 (Land off Birmingham Road). Their reasons for objecting include:

- The extent of the proposals include a new Eastern By-pass from the A456 Birmingham Road to the A449 at the south of Kidderminster. This will cause a massive loss of amenity to the residents via noise, visual amenity, pollution and additional vehicle traffic.
- The Local Plan proposals are to build in Green Belt in Hurcott and around Hodge Hill Farm Barns (OC/4, OC/5, OC/6, WFR/CB/7), effectively becoming part of the town of Kidderminster. From the north passing to the east and south will be housing development culminating in a massive loss of Green Belt land.
- The land designated WFR/CB/7, over 7ha of prime agricultural land, sits alongside the Birmingham Road bordered to the east between Hodge Hill Nurseries and Hodge Hill Farm Barns. This is designated for a core employment use, i.e. industrial use.
- They believe the derelict brownfield sites – Sion Hill School, Sladen School, Swan Hotel / Working Men’s Club, Carpets of Worth, derelict factories and timber yard on Park Lane, the old Sarsons vinegar factory, Stourport Marina and plentiful sites on the A451 between Kidderminster and Stourport would be the correct areas to use for core mixed use sites and bring welcome regeneration and potential jobs to the community.
- The group claim that there are currently employment sites within the District that are underused and contain prime areas for re-development. These include the following:
 - Hoo Farm Industrial Estate
 - Hoo Brook Industrial Estate
 - Easter Park
 - Green Hills Industrial Estate
 - Rushock Industrial Estate
 - Lea Castle Hospital site
 - Former Forest Glades site and surrounding medical centre – ideal for mixed use.
- The use of WFR/CB/7 would not enhance the landscape and setting, neither would the use of OC/5 for housing. This would deprive everyone of the pleasant views across this rolling land with the hills beyond. This would constitute a severe loss of amenity.
- Hurcott and Podmore pools and Hurcott Woods is an area of Significant Scientific Interest (SSI). Noise, visual intrusion and pollution of developments in and around Hurcott village would have a negative environmental impact.
- Sufficient investigation of brownfield sites throughout the District has not been considered properly.

Offmore and Comberton Action Group (OCAG-LP):

The OCAG-LP represents residents across the Offmore Comberton Ward of Wyre Forest District. The group believe that there should be a presumption that major future development should have the aim of creating sustainable communities of a size capable of supporting, at least, its own Primary School, village centre with shops and community facilities, if possible some live work units and adequate recreational facilities, and not simply be an “add on” to existing communities.

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

The group object to the “Core Site” allocation of land to the east of Baldwin Road, the Offmore and Comberton estates and land behind properties on the A448 Comberton Road within the Kidderminster Town boundary.

The group object for the following reasons:-

- The Green Belt to the east of Kidderminster plays a vital part in separating the town from the West Midland Conurbation.
- The land in question includes Grade 2 Agricultural Land. With the uncertainty surrounding food prices post Brexit it is vital that such land is kept available for food production.
- There are endangered bird species: Corn Buntings, Yellow Hammers, Skylarks and Lapwings are present in this land. As well as the birdlife there are foxes, badgers, rabbits, muntjac and roe deer present across the area.
- Development of land behind Baldwin Road would be a serious visual incursion into the Green Belt and would impact on wildlife habitats on the buffer zones for the Hurcott and Podmore SSSIs.
- An Eastern by Pass would have to be built from the Wolverhampton Road to the Worcester Road to be of any use as anything shorter would cause roads around Hurcott Road / Birmingham Road to be used as rat runs.
- A linear development to the east of Kidderminster would not be a sustainable community. It would have no community “heart” and would not accommodate a neighbourhood centre.
- Offmore Primary School is full, is on a restricted site and can’t be extended.
- Land to the rear of Offmore and Baldwin Road is considerably higher than the rest of the area so development would be very visible.
- Drainage of the land to the rear of the existing Offmore estate is extremely poor.
- Hurcott Lane and the narrow extension of Hurcott Road into Hurcott Village are extremely dangerous roads with far too frequent serious road traffic accidents. Any development of land to the rear of Baldwin Road would have to somehow incorporate the existing Hurcott Lane / Birmingham Road junction.
- Industrial development at Hodge Hill would also need a by pass to avoid congestion.

The group have proposed an alternative suggestion at Lea Castle; the creation of a “sustainable village”. They propose extending the area of Lea Castle to include not only Options A and B but also extending the site to use the land up to the Wolverhampton Road and, at the rear of the Lea Castle site, extending the site up to Axborough Lane as well as across to the Stourbridge Road. This would provide an additional 37.73 hectares of land that could be brought into the Lea Castle site in this way.

They also believe that there might be a possibility of some development on the western side of Wolverley Road towards Sion Hill to link with development at the Sion Hill Middle School site.

They consider that the advantages to their proposal are as follows:-

- With the additional land at Lea Castle and including sites in that vicinity already identified by WFDC, including Hurcott ADR, they believe a sustainable community of around 2,000 – 2,500 houses could be created.
- It would be large enough to support a 2 form entry Primary School.
- It would support a village shopping centre and potentially some employment land.

- It would support a village centre which whilst within Cookley Parish would not produce a burden on that community.
- It would be capable of sustaining a bus service.
- It would potentially be able to provide live-work units.
- It would be within the catchment of Wolverley CE High School and would positively impact on the school's long term viability.

To conclude, the group believe that their alternative suggestion will create viable and sustainable communities, protect valuable, productive farmland, and preserve endangered bird species and other wildlife.

S.A.F.E. (Spennells Against Further Expansion):

Spennells Against Further Expansion (SAFE) is an association of residents and friends of Spennells fields, formed in June 2017. They have 692 members on their Facebook group, plus another 56 who signed up on email only.

SAFE oppose the proposed development of the fields adjacent to the Spennells estate, packaged as Option A in the Draft Local Plan. These Green Belt fields are 'Rear of Spennells & Easter Park (AS/10)', 'Land off Stanklyn Lane (WFR/ST/2)' and 'Stone Hill South (OC/13)'. In addition, the group oppose development upon the area described as 'Captain's and the Lodge (WFR/ST/1)' which has been included in the Draft Plan as a 'Core' area.

The main issues they raise are as follows:-

- The OAHN figure is too high. The need to use any Green Belt land is unnecessary.
- The group are against the proposal for the 'Eastern Relief Road'. Their reasons for not supporting this proposal include the following comments:
 - No definitive route or traffic model has been provided for this proposal, meaning that local residents are not being provided with sufficient details to make an informed judgement.
 - The idea that this would create the means for traffic to by-pass Kidderminster en-route to Birmingham or the M5 is misleading since the A450, less than 2 miles to the east, already provides this facility. Improving the A450 would provide relief to any congestion on the A449, without bringing increased air, light and noise pollution to the already heavily populated Spennells estate.
 - An Eastern Relief Road would not help to regenerate Kidderminster since any regeneration is desperately needed within the run-down town centre, not on the outskirts on Green Belt land.
 - A new road would create a whole series of dangers, hazards and disadvantages to local residents and wildlife. It would cause catastrophic effects by crossing existing wildlife corridors, i.e. Spennells Valley Nature Reserve and its green corridors.
- The Spennells fields are productive agricultural land which also serves as a popular recreational and social facility for walkers, joggers, cyclists, dog walkers, photographers and horse riders. There are a number of well-used Public Rights of Way and bridleways across the fields which allow fast and easy access to the open countryside.
- The area offers a number of different habitats for wildlife, including important nesting sites for corn buntings, larks and linnets (all of which are included on the red list as endangered

birds), badger setts and bats. The rare Tower Mustard Plant also thrives along the lanes adjoining Stanklyn Lane.

- Negative impact on the visual landscape in this area. The landscape around Spennells is an important part of people's lives, offering a wide variety of benefits in terms of quality of life, well-being and economic opportunity.
- Issues with drainage, flooding and loss of prime grade 2 agricultural land.
- Increased demand on infrastructure including medical facilities and schools.
- Social problems arising from increasing the size of the estate; evidence exists that large housing estates suffer more crime and anti-social behaviour.
- A new large residential development requires proper infrastructure to support its current and future residents. The group find no evidence of future funding to support this. In particular, they are concerned with: hospital services, GP & Dental surgeries, Schools, local shops, pharmacy and post office, local leisure such as a village hall, pub, and fitness centre/gym, traffic congestion on local roads.
- Loss of Green Belt land. Brownfield regeneration must take priority over the development of Green Belt land.
- Kidderminster town centre has at least 40 large shops and office blocks that stand empty, some for well over a decade. The town centre is in urgent need of regeneration; Compulsory Purchase Orders should be made on some of the larger shops that stand no chance of ever being filled due to their size.
- WFDC could request Government action in order to encourage Developers in the local area who have been given planning permission to build houses within a reasonable timeframe, not just to sit upon Land Banks for speculative purposes e.g. Cheapside in Stourport (AKR/2) and Sladen School.

SAFE group conclusions:

The SAFE group object to Option A. Of the two choices proposed in the draft Local Plan they would choose Option B because:-

- Less Green Belt land would be used.
- Ability to build a greater number of houses in areas where they are needed for local expansion.
- The dispersed nature of the development would result in less pollution and less strain upon Kidderminster's existing infrastructure which is already struggling to cope. This would spread the development more evenly around Wyre Forest, serving the needs of expanding local communities by creating the potential for more housing development, but without concentrating the development to the detriment of the Green Belt cushion between the Wyre Forest and the West Midlands conurbation.

However the SAFE group make the following suggestions for alternative proposals:-

Suggestion 1:

- Phase 1 (first 5 years): Use existing empty properties in the town centre e.g. Woolworths site for a leisure complex (cinema/bowling alley) and ideally the adjacent ex-Littlewoods building for a multi-storey car park. The remaining Lionfields site could then all be dedicated to housing/residential; plus other brownfield sites such as the Churchfields site. The group

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

suggested that if Worcester Street was not returned to through traffic, the Council would immediately save £500,000 of taxpayers' money to purchase the vacant Woolworths building.

- Phase 2 (5-10 years): Use Lea Castle hospital site (brownfield site) for 600-700 houses.
- Phase 3 (after reviewing housing need (10-15 years): Lea Castle Hospital and School site – use of Green Belt extension if absolutely necessary. Green Belt at Lea Castle only released at this stage if deemed necessary for increased housing.

Suggestion 2:

- Development of an entire rural village on Lea Castle Hospital and School site.

Summerfield Against Land Transformation (SALT):

The Summerfield Against Land Transformation (SALT) has been set up by a group of residents from the Summerfield area.

The key issues raised by the SALT group are as follows:-

- The Council should never again conduct such an important consultation exercise over the course of the summer months. This suggests a cynical attempt to compound citizen disadvantage.
- There is clear bias contained within the draft Local Plan, to the extent that Option A is portrayed as the only real choice.
- Given the scale of the proposed development, thought must be given to the key educational and health services to support the residents of the new housing stock. This will require an expansion of existing schools and the creation of a new health centre/GP practice.
- The SALT group reject the hierarchy of settlement argument as unfair and disproportionate; a fairer and more imaginative approach is required.
- The group accept and support the need for infrastructure development to reflect the ambition of the Local Plan. However, they see the draft Local Plan being cynically manipulated – via Option A – to justify the Eastern Relief Road, resolve pre-existing problems and to attract capital funding.
- The group encourage the Council to give a higher priority to stimulating the local economy (push strategy) and a more balanced approach to housing (pull strategy).
- The group believe that the OAHN study to be a deeply flawed piece of work and that the projected level of growth in housing need to be an unsafe basis for the Plan.
- The Option A proposal will damage irrevocably the social amenity of and biodiversity in the fields which separate The Spennells and Summerfield and undermine the integrity and unique identity of the Summerfield community.
- The SALT group accept the need for housing but reject the use of Green Belt land in favour of brownfield sites and in this regard, require the Council to show more ingenuity and resist developer preference for 'easy' sites.

5) Responses to Preferred Options Policies

The following tables and graphs show the level of support, objection or comments that the Council received for each of the policies within the Preferred Options consultation document. Summaries of responses to each section of the document can be found at Appendix 2.

Local Plan Review Preferred Options Consultation (June 2017)
Summary of Consultation Responses

Sections 1-4

These sections of the document did not contain any policies. These sections are:

1. Introduction and Context
2. Key Issues and Challenges
3. Vision for the Area in 2034
4. Core Policies Introduction

A summary of the responses received and Officer Comments for these sections can be found at Appendix 2 of this document.

Section 5 - Overarching Sustainable Development Principles

The policies contained within this section are:

- Policy 5A – Sustainable Development

The following graph indicates the level of support, objection or comments received for the policies within Section 5.

A summary of responses and Officer Comments for Section 5 can be found at Appendix 2 of this document.

Section 6 - A sustainable Future – Development Strategy

The policies contained within this section are:

- Policy 6A - Development Needs 2016-2034
- Policy 6B – Locating New Development
- Policy 6C – Kidderminster town as the strategic centre of the District
- Policy 6D – Kidderminster Urban Extensions
- Policy 6E – Role of Stourport-on-Severn and Bewdley as Market Towns
- Policy 6F - Role of the villages and rural areas

The following graph indicates the level of support, objection or comments received for the policies within Section 6.

In addition to the policies above, many responses were received to the consultation questions asked in paragraphs 6.54 – 6.57:

- **6.54** Do you prefer Option A or Option B? On what planning grounds?
- **6.55** Option A has the associated benefits of enabling the delivery of critical infrastructure including the Kidderminster Eastern Relief Road which will also reduce Kidderminster Town Centre traffic congestion and improve traffic volumes in the adjacent estates. It will enable more effective school provision. Do the benefits of this outweigh the disadvantage caused by the large-scale of expansion to the east of Kidderminster that would be necessary?
- **6.56** Whilst Option B removes slightly less land from the Green Belt it disperses development more widely across the District. Consequently it will not support the implementation of a Kidderminster Eastern Relief Road and the provision of sufficient, appropriately located education facilities will be more problematic. The absence of this additional infrastructure to support new development will impact on future traffic congestion, air quality, and educational provision in Wyre Forest. Do you consider the benefits of a more dispersed strategy outweigh these disadvantages?
- **6.57** Are there any other alternative Options you would like to suggest?

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Summaries of these responses and the key issues raised by respondents, together with Officer Comments, for paragraph 6.54 – 6.57 can be found in Appendix 2.

Paragraph 6.57 Alternative Options

The table below lists the alternative sites suggested:

Additional Sites Suggested	Officer Comments
Kidderminster	
Kidderminster Town Centre	Large numbers of residential flats have been provided on upper floors of town centre buildings in recent years, especially in the Worcester St/Oxford St area. Plans are underway to convert the vacant upper floors of Tower Buildings in Blackwell St into flats.
Crown House	Demolition of this building is expected during late 2018/19. A temporary car park will be provided whilst plans are drawn up for the site. Some residential uses may be possible on upper floors depending on what proposals are put forward.
Job Centre, Mill Street	These modern offices remain vacant following relocation of the job centre to the library building. If marketing fails to find a new office occupier, they could come forward for a residential conversion under Prior Notification rules.
Former Glades Leisure Centre	Plans are well-advanced to bring a leisure use onto this cleared site.
Ceramaspeed Factory	This building is being partially redeveloped to raise the roof height in order to attract a new employment use.
Old Law Courts Worcester Street	This building has recently been listed Grade II. Potential uses being considered include residential conversion.
Rear of Ferndale Estate	This Green Belt site has been promoted for housing development but ruled out as it would intrude into a very open rural landscape where it would be hard to define a robust defensible boundary. This part of town is also further away from key services and transport facilities.
New Road	Several sites along New Road have recently been converted or redeveloped for residential uses.
Woolworth Building	This empty building should be retained for retail uses and ground floor but would be suitable for residential uses at upper floors.
Littlewoods Building	There are plans to relocate Sports Direct and a gym to this site. This will help to regenerate this part of town.
Blackwell Street (empty shops)	Plans are in place to convert Tower Buildings to residential uses on the upper floors. It is anticipated that this will help to kick-start refurbishment in other buildings.
Harriers Ground, Hoo Road	This site would be suitable for residential redevelopment if a suitable and viable scheme was proposed for the stadium and associated facilities to relocate elsewhere within the town.
Industrial Estate at Aggborough	There are a small number of reasonably modern premises at Stadium Close which will be retained in employment use.
Park Lane	A number of sites on Park Lane are being considered for redevelopment to residential uses including the timber yard, the cleared site of The Parkers Arms and some of the land opposite.
Worcester Street – Redevelop	Worcester Street is planned to be reopened to traffic in one direction with additional on-street parking. It is hoped that this will further revive the street. Any proposals to redevelop

Appendix 4 - Summary of Consultation Responses to the Local Plan Review
Preferred Options (Reg 18) Consultation (June 2017)

Additional Sites Suggested	Officer Comments
	/convert empty shop units will be assessed on their merits. Much of the eastern end of the street has been converted to residential uses on upper floors / to the rear.
Horsefair – Redevelop	There are approvals in place for more residential units on upper floors. Potential uses for the former Post Office site are also being explored.
Green Street	It is proposed to allocate the empty Boucher Building for residential use. Frank Stone building is better suited to an employment use. Elgar House has been refurbished for offices and the residential approval is no longer being implemented.
Meadow Mill Industrial Estate	This is a thriving industrial estate and will be retained for employment.
King Charles 1 School	Previous proposals to relocate the school to the Borrington Road site would have seen this site come forward for residential use. Building Schools for the Future Funding ceased and this was not taken forward. It is agreed that the Comberton Road site would be suitable for residential use if in the future the school decided to relocate.
Sion Hill School	A planning application has been received for residential redevelopment for housing.
Sladen School	This site is currently allocated for redevelopment with a mix of family dwellings and supported housing the most likely end use.
Churchfields	An application for redevelopment of this site for up to 270 dwellings has been received.
Rear of The Range, Crossley Park	This piece of land is not considered suitable for housing. Access is required through the site by the Environmental Agency for flood bund maintenance.
Former Brinton Golf Driving Range, Stourport Road	This site is part of the Outdoor Sports Allocation and is in the Green Belt. It is adjacent to the Finepoint Business Park and is not considered a suitable location for housing.
Low Habberley	This large expanse of open Green Belt land stretches up towards Trimpley and it would be hard to define a firm defensible new Green Belt boundary at this location. However, the smaller parcel adjacent to High Habberley could be brought forward for limited development and a robust boundary could be created using existing hedgerows.
Former Sealine Worcester Road	This complex of buildings is now reoccupied by employment uses. It is part of the Worcester Road Employment Corridor.
Debenhams, Weavers Wharf	This building is fully occupied by retail at lower floors with a hotel on upper levels.
Kidderminster Golf Club	This land is occupied by the golf club and has not been put forward for redevelopment by the Club.
Lionfields	This site is allocated for a mix of town centre uses including residential uses.
Silverwoods	Further residential uses are proposed on this site on the Stourport Road frontage (extra-care apartments) with more housing towards the rear of the site adjacent to existing dwellings. Other parcels will be retained for employment uses.
Severn Grove	This site is currently allocated for redevelopment. This allocation will be taken forward into the next Local Plan.
Rock Works, Park Lane	This site is proposed as an employment allocation to conversion to workshops. It is not considered suitable for residential use

Appendix 4 - Summary of Consultation Responses to the Local Plan Review
Preferred Options (Reg 18) Consultation (June 2017)

Additional Sites Suggested	Officer Comments
	owing to its lack of natural daylight.
Victoria Carpets	The former sports ground has approval for residential development.
Weavers Wharf, canal side.	This location should be retained for commercial uses.
Timber Yard, Park Lane	The former timber yard will be allocated for a residential –led scheme.
Easter Park	This location is not considered suitable for residential development. It is zoned for employment.
Corner of Coventry Street / Blackwell Street	Tower Buildings has approval for residential use on the upper floors
Lad adjacent to Hoo Farm and Industrial Estate and Summerfield	This site is allocated for employment uses and may be released for development beyond the plan period.
Adjacent to Ceramaspeed	This site is proposed as a site for travelling showpeople.
Old Medical Hall, Bull Ring	The building is proposed for residential conversion.
Vicar Street, above shops	Approvals are in place for residential conversion .
The old Riverboat building Blackwell Street	Approvals are in place for flats to be provided in Tower Buildings.
Land South of Bernie Crossland Walk	A ransom strip is likely to prevent this Greenfield site coming forward for development .
Land North of Bernie Crossland Walk	A ransom strip may prevent this Greenfield site coming forward for development
Chester Road Service Station	Approval is in place for residential redevelopment of this site.
Land at 78 Cherry Orchard	Approval is in place for residential redevelopment of this site.
Comberton Place	Residential redevelopment of this site is underway.
Lea Street School	It is proposed to allocate this site for residential development.
Form Polish Club	Approval is in place to convert this site for residential use.
Rear of McDonalds Hoo Brook	This area is not considered suitable for residential use.
Swan Centre	This building should be retained for retail use.
Selba Drive - Objections	This site should be retained as open space.
Stourport-on-Severn	
Parsons Chain	This site is currently allocated for mixed uses. It is proposed to allocate the site for a mix of employment and C2 uses (care home).
Burlish Park Golf Course	This site is currently in the Green Belt. It is proposed to release part of the land to the south of Kingsway for housing and retain the rest for informal recreation.
Land at Astley Cross	Land at Astley Cross is mostly outside of the District boundary. It is not considered suitable due to adverse landscape impact.
Stourport High School surplus land	It is proposed to allocate part of this site for residential redevelopment.
Carpets of Worth	This site is currently being marketed for housing development and is expected to come forward in the next few years.
Bridge Street	A residential proposal is being drawn up for the former Lloyds Garage site.
Queens Road	This site is allocated for redevelopment and a scheme will be brought forward in the next few years.
Yew Tree Walk	This Green Belt site is expected to be brought forward for residential development through the Local Plan.
Former Leisure Centre	Much of this site is within the flood zone and is not considered suitable for residential development.

Appendix 4 - Summary of Consultation Responses to the Local Plan Review
Preferred Options (Reg 18) Consultation (June 2017)

Additional Sites Suggested	Officer Comments
Land off B4195 Bewdley to Stourport opposite Cooks Nursery	This site has been ruled out for development due to capacity issues with Burlish Crossing junction.
Bewdley	
Grey Green Lane	Part of this Green Belt site could potentially be brought forward in the future if access could be secured via the former school site on Shaw Hedge Road.
South East of Highclere	Site not considered suitable for development due to biodiversity, landscape and hydrological issues.
Workhouse, High Street	This site is expected to come forward for a small residential scheme shortly .
Dog Lane	Any proposals for infill development will be assessed on its merits.
Fire Station, Load Street	This site will be allocated for residential development with no habitable rooms at ground floor level.
Bridge House and Rowing Club	Access to these sites is not ideal. Land also in flood zone.
Ribbesford House	This Grade II* building has recently been sold.
Retail units, Bewdley	Any unused upper floors would be suitable for conversion.
Adjacent All Saints Church, Wribbenhall	This land will be allocated as open space with a pedestrian /cycle link opened up alongside Riddings Brook. Residential development is not suitable – impact on setting of Church, flooding.
Land between New Road and The Heath Hotel	The area known as The Gardens is proposed for allocation for up to 35 dwellings.
Field between Blackstone car park and the Leisure Centre	Green Belt site not considered suitable as partially in flood zone. Development would impact on views into Conservation Area and open landscape.
HSBC Bank, Load Street	Residential conversion of upper floors would be acceptable
Bunkers Hill	This land is part of the Safari Park and has a permission for a water park, hotel and conference centre.
Rural and Villages	
Extended Lea Castle, Cookley	It is intended to develop the wider area around the former hospitable as a sustainable village complete with school, shop, community facilities, employment, sports facilities and up to 1400 dwellings.
Kimberlee Avenue, Cookley	This site will be brought forward via the Neighbourhood Plan.
Wolverley High School	This land should be retained as playing fields for the high school. Development would have adverse impact on Conservation Area. Not considered to be a sustainable location for large scale housing development.
Former Army Hospital, Brown Westhead, Wolverley	Development would have adverse impact on setting of Canal Conservation area and nearby heritage assets.
Quarry opposite Brown Westhead Park, Wolverley	This site is not considered suitable to residential development as landscape is one of scattered wayside dwellings.
Bliss Gate Inn	Proposals have been drawn up for redevelopment of this site.
Blakedown	Station parking is being proposed at Blakedown as part of Network Rail's plans which also include proposals to extend the platform length to cater for longer trains so that more services can call at the station. A site will be allocated through the Local Plan for a station car park. The housing needs survey undertaken as part of the neighbourhood plan also showed a housing need

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

Additional Sites Suggested	Officer Comments
	within the parish and it is expected that a suitable housing site will need to be brought forward during the plan period or through the neighbourhood plan process.
Chaddesley Corbett	A small site is proposed for allocation in the village.
Wolverley	Sites are proposed for allocation in Farifield to be brought forward via a neighbourhood plan.
Land at Callow Hill	The settlement boundary will be slightly amended to allow for small infill plots to come forward.
Mustow Green	This area is washed over Green Belt and not considered suitable for further residential development as there are few facilities
All Rural Villages	A number of small allocations to meet local need are proposed. Those in Fairfield and Cookley will be brought forward via a Neighbourhood Plan.
Land between Kidderminster and Wolverley (B4190)	It is important to retain a green gap between the settlements and keep their separate identity.

A summary of responses and Officer Comments for Section 6 of the Preferred Options document can be found at Appendix 2.

Section 7 – A Strategic Green Belt Review

The policies contained within this section are:

- Policy 7 - Strategic Green Belt Review

The following graph indicates the level of support, objection or comments received for the policies within Section 7.

A summary of responses and Officer Comments for Section 7 can be found at Appendix 2 of this document.

Section 8 – A Desirable Place to Live

The policies contained within this section are:

Appendix 4 - Summary of Consultation Responses to the Local Plan Review Preferred Options (Reg 18) Consultation (June 2017)

- Policy 8A - Housing Density & Mix
- Policy 8B - Affordable Housing Provision
- Policy 8C - Addressing Rural Housing Needs
- Policy 8D - Specialist Housing Requirements
- Policy 8E - Gypsy and Traveller Site Provision
- Policy 8F - Site Provision for Travelling Showpeople

The following graph indicates the level of support, objection or comments received for the policies within Section 8.

Policy 8F sought provision of a site for Travelling Showpeople. The table below details the number of responses received to the sites suggested:

Site Ref	Site description	Support	Object	Comment
Policy 8F	-	0	2	3
Travelling Showpeople Sites				
WA/BE/6	Land off Habberley Road, Bewdley	0	85	4
	Land accessed from Zortech Avenue, Kidderminster	0	0	2
MI/21	Land within Wilden Top Area of Development Restraint, Wilden	1	11	3
WFR/ST/6	Land at Heath Lane, Stone	2	9	0
BR/RO/1	Land at former Clows Top Garage, Clows Top	0	60	5

The following graph indicates the level of support, objection or comments received for the proposed Travelling Showpeople site allocations.

A summary of responses and Officer Comments for Section 8 can be found at Appendix 2 of this document.

Section 9 Health

The policies contained within this section are:

- Policy 9 -Health and Well Being

The following graph indicates the level of support, objection or comments received for the policies within Section 9.

A summary of responses and Officer Comments for Section 9 can be found at Appendix 2 of this document.

Section 10 – A Good Place to do Business

The following policies are contained within this section:

- Policy 10A - A Diverse Local Economy
- Policy 10B - Town Centre Development
- Policy 10D - Sustainable Tourism

The following graph indicates the level of support, objection or comments received for the policies within Section 10.

A summary of responses and Officer Comments for Section 10 can be found at Appendix 2 of this document.

Section 11 – A Unique Place

The policies contained within this section are:

- Policy 11A - Quality Design and Local Distinctiveness
- Policy 11B - Historic Environment
- Policy 11C - Landscape Character
- Policy 11D -Protecting and Enhancing Biodiversity and Geological Conservation
- Policy 11E - Regenerating the Waterways

The following graph indicates the level of support, objection or comments received for the policies within Section 11.

A summary of responses and Officer Comments for Section 11 can be found at Appendix 2 of this document.

Section 12 – Strategic Infrastructure

The policies contained within this section are:

- Policy 12 - Strategic Infrastructure

The following graph indicates the level of support, objection or comments received for the policies within Section 12.

A summary of responses and Officer Comments for Section 12 can be found at Appendix 2 of this document.

Section 13 – Transport and Accessibility

The policies contained within this section are:

- Policy 13 - Transport and Accessibility in Wyre Forest

The following graph indicates the level of support, objection or comments received for the policies within Section 13.

A summary of responses and Officer Comments for Section 13 can be found at Appendix 2 of this document.

Section 14 – Strategic Green Infrastructure

The policies contained within this section are:

- Policy 14 - Strategic Green Infrastructure

The following graph indicates the level of support, objection or comments received for the policies within Section 14.

A summary of responses and Officer Comments for Section 14 can be found at Appendix 2 of this document.

Section 15 – Water Management

The policies contained within this section are:

- Policy 15A - Water Conservation and Efficiency
- Policy 15B - Sewerage Systems and Water Quality
- Policy 15C - Flood Risk Management
- Policy 15D - Sustainable Drainage Systems (SuDS)

The following graph indicates the level of support, objection or comments received for the policies within Section 15.

A summary of responses and Officer Comments for Section 15 can be found at Appendix 2 of this document.

Section 16 – Pollution, Minerals and Waste

The policies contained within this section are:

- Policy 16A - Pollution and Land Instability
- Policy 16B - Minerals
- Policy 16C – Waste

The following graph indicates the level of support, objection or comments received for the policies within Section 16.

A summary of responses and Officer Comments for Section 16 can be found at Appendix 2 of this document.

Section 17 – Development Management Introduction

No responses were received to Section 17 of the document.

Section 18 – A Desirable Place to Live

The policies contained within this section are:

- Policy 18A - Financial Viability
- Policy 18B - Residential Infill Development
- Policy 18C - Space Standards for New Residential Developments
- Policy 18D - Flat Conversions
- Policy 18E - Residential Caravans and Mobile Homes

The following graph indicates the level of support, objection or comments received for the policies within Section 18.

A summary of responses and Officer Comments for Section 18 can be found at Appendix 2 of this document.

Section 19 – Providing Accommodation for Gypsies, Travellers and Travelling Showpeople

The policies contained within this section are:

- Policy 19 - Site Standards for Gypsies, Travellers and Travelling Showpeople

The following graph indicates the level of support, objection or comments received for the policies within Section 19.

A summary of responses and Officer Comments for Section 19 can be found at Appendix 2 of this document.

Section 20 – Community Facilities

The policies contained within this section are:

- Policy 20A - Built Communities
- Policy 20B - Green Space
- Policy 20C - Provision for Green Space and Outdoor Community Uses in Development

The following graph indicates the level of support, objection or comments received for the policies within Section 20.

A summary of responses and Officer Comments for Section 20 can be found at Appendix 2 of this document.

Section 21 – Employment Land

The policies contained within this section are:

- Policy 21A - Urban Employment Land
- Policy 21B - Rural Employment
- Policy 21C - Small Firms/Start-ups
- Policy 21D - Live work units and Homeworking
- Policy 21E - High Quality Offices

The following graph indicates the level of support, objection or comments received for the policies within Section 21.

A summary of responses and Officer Comments for Section 21 can be found at Appendix 2 of this document.

Section 22 - Retail

The policies contained within this section are:

- Policy 22A - Town Centre development
- Policy 22B - Out of Town development
- Policy 22C - Change of use from retail to alternative uses
- Policy 22E - Local Shops
- Policy 22F - Specialist Retailing
- Policy 22G - Food and Drink Retailing
- Policy 22H Hot Food Takeaways

The following graph indicates the level of support, objection or comments received for the policies within Section 22.

A summary of responses and Officer Comments for Section 22 can be found at Appendix 2 of this document.

Section 23 – Sustainable Tourism

The policies contained within this section are:

- Policy 23A - Supporting Major Tourist Attractions
- Policy 23B - Supporting Tourist Attractions
- Policy 23C - Tourist Accommodation

The following graph indicates the level of support, objection or comments received for the policies within Section 23.

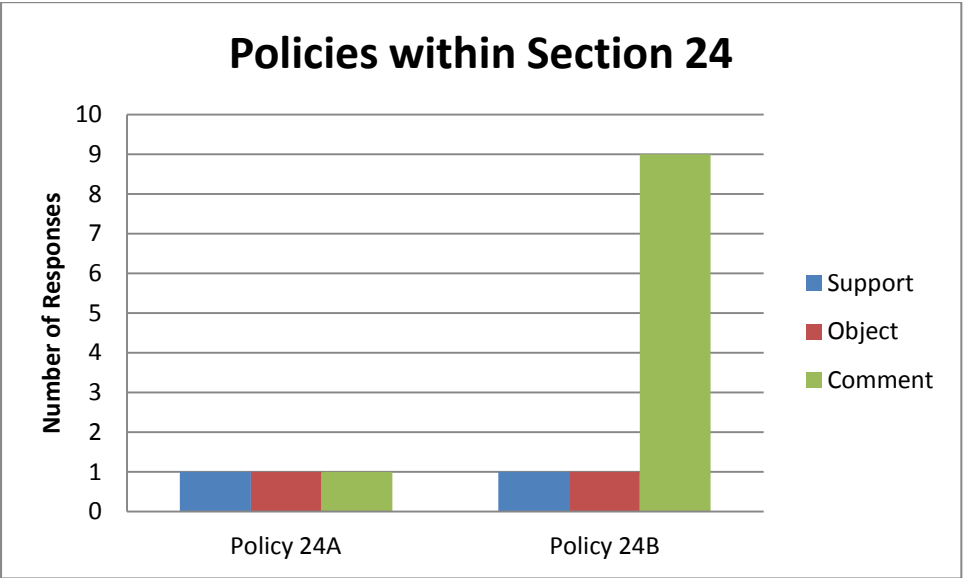

A summary of responses and Officer Comments for Section 23 can be found at Appendix 2 of this document.

Section 24 – Telecommunications and Renewable Energy

The policies contained within this section are:

- Policy 24A - Telecommunications and Broadband
- Policy 24B - Renewable and Low Carbon Energy

The following graph indicates the level of support, objection or comments received for the policies within Section 24.

A summary of responses and Officer Comments for Section 24 can be found at Appendix 2 of this document.

Section 25 – Safeguarding the Green Belt

The policies contained within this section are:

- Policy 25 - Safeguarding the Green Belt

The following graph indicates the level of support, objection or comments received for the policies within Section 25.

A summary of responses and Officer Comments for Section 25 can be found at Appendix 2 of this document.

Section 26 – Safeguarding the Historic Environment

The policies contained within this section are:

- Policy 26 - Safeguarding the Historic Environment

The following graph indicates the level of support, objection or comments received for the policies within Section 26.

A summary of responses and Officer Comments for Section 26 can be found at Appendix 2 of this document.

Section 27 – Quality Design and Local Distinctiveness

The policies contained within this section are:

- Policy 27A - Quality Design and Local Distinctiveness
- Policy 27B - Design of Extensions and Alterations
- Policy 27C - Landscaping and Boundary Treatment
- Policy 27D - Advertisements
- Policy 27E - Wyre Forest Waterways

The following graph indicates the level of support, objection or comments received for the policies within Section 27.

A summary of responses and Officer Comments for Section 27 can be found at Appendix 2 of this document.

Section 28 – Rural Development

The policies contained within this section are:

- Policy 28A - Re-use and adaptation of rural buildings
- Policy 28B - Chalets, Caravans, Mobile Homes
- Policy 28C - Equestrian Development
- Policy 28D - Agricultural Land Quality

The following graph indicates the level of support, objection or comments received for the policies within Section 28.

A summary of responses and Officer Comments for Section 28 can be found at Appendix 2 of this document.

Section 29 – Site Allocations Introduction

There are no policies within this section. A summary of these responses with Officer Comments can be found in Appendix 3a of this document.

Sections 30 – 35 – Proposed Allocations

Most of the responses in these sections were made directly against the proposed allocated sites. Analysis of these comments are detailed within Section 6 of this document. The Policies within Sections 30-35 are:

- Policy 30 – Kidderminster Town Allocations
- Policy 31 – Kidderminster Urban Extensions
- Policy 32 – Stourport-on-Severn Site Allocations
- Policy 33 – Bewdley Site Allocations
- Policy 34 – Previously Developed Sites in the Green Belt proposed for allocation
- Policy 35 – Villages and Rural Area Site Allocations

The following graph indicates the level of support, objection or comments received for the policies within Sections 30-35.

Summaries of responses and the key issues arising can be found within Appendix 3 of this document.

Section 36 – Monitoring and Implementation

There are no policies within this section. A summary of these responses with Officer Comments can be found in Appendix 3a of this document.

6) Responses to Preferred Options Document Part C - Proposed Allocated Sites

The following tables and graphs show the level of support, objection or comments that the Council received for each of the proposed allocated sites in the Preferred Options document. The key issues raised by respondents and summaries of the responses can be found within Appendix 3 of this document. The Sections of the document are:-

- Policy 30 – Kidderminster Town
- Policy 31 – Kidderminster Urban Extensions
- Policy 32 – Stourport on Severn
- Policy 33 – Bewdley
- Policy 34 – Previously Developed Sites in the Green Belt
- Policy 35 – Rural Wyre Forest

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION - CALL FOR SITES

There were 51 sites formally submitted during the Preferred Options consultation.

Location	Current Land Designation	HELAA Ref.	Officer Comments
KIDDERMINSTER			
East Field, Bewdley Hill	Green Belt	Part BHS/21	Any development would encroach into strategic Green Belt gap between towns. Access possible from The Lea but would severely limits numbers. Lies on potential wildlife corridor linking areas of acidic grassland. Mitigation difficult.
Railway Corner, Stanklyn Lane	Green Belt	AS/9	Surface water flooding against embankment after heavy rain. Potential to bring forward if adjacent site (AS/10) is allocated.
Land off Ferndale Crescent	Green Belt	WA/KF/2	Would have unacceptable impact on open landscape and Green Belt and would not give easily defensible boundary to Green Belt.
164 & 165 Sutton Park Road	Greenfield	FPH/19	Could potentially bring forward very limited development if highways objections on visibility grounds can be overcome.
Football Ground and Stadium Close car park	Brownfield	AS/2 & AS/22	This is a sustainable and suitable location for residential development but is reliant on an alternative location being agreed for the Harriers with a viable business.
Harriers Training Ground	Green Belt	MI/37	If the built development is located immediately to the rear of Finepoint on the former golf driving range and Gilt Edge Social Club site and a viable business case is put forward and justification made for releasing relocation site from Green Belt, then these proposals could be supported.
Land at Low Habberley (Phase 1)	Green Belt	WA/KF/3	If a strong defensible boundary can be made, then this site could potentially be released from the Green Belt.
Land at Low Habberley (Phase 2)	Green Belt	WA/KF/3	Detrimental impact on openness of Green Belt. Would extend built development north of Habberley Road into open countryside. No strong defensible boundary at this location.
Land at Habberley Road, Kidderminster	Green Belt	WA/BE/13	Would extend built development into gap between Kidderminster and Bewdley; access near entrance to Habberley Valley. Detrimental visual impact and highways difficulties. Site lies between 2 known areas of acidic grassland. Site likely to function as wildlife corridor.
Severn Grove Shops, Rifle Range, Kidderminster	Brownfield	FPH/15	Currently allocated for redevelopment. If a viable scheme can be found, this site could still come forward.
Land off Selba Drive, Kidderminster	Greenfield	BHS/22	Sensitive site setting with rural views from existing Selba Drive properties and mature trees contained within a remnant historic field

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION - CALL FOR SITES

Location	Current Land Designation	HELAA Ref.	Officer Comments
			boundary. Well-used open space. Should not be developed.
Wolverley Camp, Brown Westhead Park	Green Belt	WFR/WC/20	Highly sensitive site – development would have detrimental impact on mature woodland and be contrary to dispersed settlement patterns seen to north of Wolverley Road.
North of Marlpool Estate, Wolverley Road	Green Belt	FHN/7	Borders a sensitive rural landscape and greenbelt corridor between Kidderminster and Fairfield. The northern woodland should be retained and enhanced as screening and the B4190 buffered. Allocate as Reserved Housing Site to be brought forward in a future Local Plan if required.
Land off Mill Lane (Fairfield)	Green Belt	WFR/WC/21	Any development would be limited by access from Mill Lane (private road). Could allocate for around 6 dwellings on eastern paddock as a Reserved Housing Site.
Lea Castle (Strong Farms)	Green Belt	WFR/WC/39	Site would be highly sensitive to development due to its intact rural character, topography, impact on the setting of mature woodland character. Built development will impose substantial harm to landscape character.
Stour Corridor (Strong Farms)	Green Belt	WFR/WC/40	Very sensitive landscape with setting of canal and local wildlife sites. Potential for ecological harm from large-scale dredging.
Hayes Road, Wolverley ADR	Greenfield	WFR/WC/23	Existing Area of Development Restraint owned by Wyre Forest Community Housing. Potential to bring forward for housing in 2 distinct blocks working with gradient.
Land off Lowe Lane, Fairfield ADR	Greenfield	WFR/WC/22	Potential to bring forward part of this existing Area of Development Restraint for housing – treat as extension to affordable housing development at Attwood Close.
Land south of Fairfield Lane (off Franche Rd)	Green Belt	WFR/WC/38	This site will encroach into a sensitive landscape within the Honey Brook corridor The scale of the proposed development would harm landscape and also reduce strategic gap between Kidderminster and Fairfield. Development would be very prominent.
Land south of Cookley	Green Belt	WFR/WC/13	Very sensitive to development due to open views to the south, impact on the setting of mature woodland character and high risk of coalescence between Kidderminster and Cookley.
Land adjacent to Hurcott Kennels, Kidderminster	Green Belt	WFR/WC/35	A sensitive site that will impact on the setting of Wood House and Woodhouse Farm. Land to the south of A451 should be kept open to protect setting of Hurcott village, wood and pools.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION - CALL FOR SITES

Location	Current Land Designation	HELAA Ref.	Officer Comments
Rock Tavern Car Park, Caunsall	Green Belt / Brownfield	WFR/WC/36	Potential for small infill development at this junction. Surface water flooding issues will need to be addressed.
Land at Gaymore Farm, Cookley	Green Belt	WFR/WC/5	Significant impact to the setting of Gaymore Farm and the historic character of dispersed settlement.
Land at Caunsall Road	Green Belt	WFR/WC/37	Wayside frontage development would be possible at this location to fit in with settlement pattern.
Land at Wolverhampton Road (2 parcels)	Green Belt	WFR/WC/16	This is a very open, rural landscape currently distinct from the northern suburban fringe of Kidderminster. Development of any part of this site will result in a substantial impact to the landscape character.
Land north of Stone Hill	Green Belt	WFR/ST/3 (majority)	Highly sensitive rural landscape that should not be developed in order to protect and to maintain the visual rural character of the western approach towards Kidderminster and the setting of Glebe House / Farm and the western edge of Stone, which is a very low density dispersed settlement character.
Land west of Stanklyn Lane	Green Belt	WFR/ST/4	The woodland corridor and setting of Stanklyn Lane are vulnerable to the impact of development here.
Land north of Birmingham Road	Green Belt	WFR/CB/6	Development will affect the character and setting of Hurcott Lane and Hurcott Hall Farm. The character of the western approach to Kidderminster will be affected.
Extension to land at Stone Hill North	Green Belt	WFR/ST/10	Development of this site would represent major encroachment into open rural landscape.
STOURPORT-ON-SEVERN			
Yew Tree Walk, Stourport	Green Belt / Brownfield	AKR/18	Any development should be kept to the plateau of made land only with woodland retained to help screen development from across River Severn. Additional landscaping will be required.
Queens Road shops, Stourport	Brownfield	AKR/10	This is an existing allocation and should be retained. Unused land will be brought back into beneficial use.
School site Coniston Crescent	Green Belt / Brownfield	MI/38	Opportunities to buffer and enhance the boundaries to provide screening of the development. Existing trees should be enhanced to develop a buffer between the development and Coniston Crescent that will also enhance urban GI.
Firs Yard Wilden Lane	Green Belt	MI/36	Much of site is affected by flooding so all pitches will need to be positioned adjacent Wilden Lane entrance.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION - CALL FOR SITES

Location	Current Land Designation	HELAA Ref.	Officer Comments
Land at Wilden Top	Green Belt	MI/20	Not considered suitable for development as would have detrimental effect on open rural landscape and setting of 19 th century houses along historic former roadway. Not a sustainable location.
Land at Areley Common, Stourport (mostly in Malvern Hills DC)	Greenfield	AKR/13	Application refused. Main reasons – unallocated site in open countryside; adverse impact on landscape. Surface water discharge problem. Majority of site falls within Malvern Hills DC. Transport issues also likely this side of River Severn.
BEWDLEY			
Land off Snuff Mill Walk, Bewdley	Greenfield	BR/BE/15	Site drains into Snuff Mill Brook system which is at capacity. Complex topography, hydrology and biodiversity issues. Listed Building adjacent site. Steeply sloping site. Not suitable
Crundalls/Hoarstone Lane	Green Belt	WA/BE/14	Landscape impact; potential biodiversity issues. Impact on setting of nearby heritage assets. Impact on openness of Green Belt as no housing development on this side of lane. Site at higher level than housing opposite.
Grey Green Lane, Bewdley	Green Belt	WA/KF/1	Flood storage area on northern section of site. Potential to develop small part of site to rear of former school site with access from Arlington Court. Propose as Reserved Housing Site for future development beyond plan period.
The Lakes, Dry Mill Lane	Greenfield	Part of BR/BE/10	Development of this site will impose substantial harm to the historic setting of Bewdley and Wyre Forest. Appeal dismissed.
Northwood Lane, Bewdley	Greenfield	WA/BE/4	Poor access, amenity issues for future residents as immediately below SVR and possible overlooking issues for existing bungalows opposite.
VILLAGES AND RURAL			
Oxleys, Clows Top	Greenfield	BR/RO/27	Open pasture land – outside of village. Drainage issues- would require connection to Rock pumping station. Poor access and not considered a sustainable location.
Land at Pound Bank	Greenfield	BR/RO/14	Remote from settlement. Other more sustainable sites available in Parish.
Adjacent Wain House, Lye Head	Greenfield	BR/RO/29	Too small and remote. Adjacent Gladderbrook. Not sustainable location.
Fingerpost Cottage, Callow Hill	Greenfield	BR/RO/30	Adjacent to SSSI and poor access. Highways safety issues near junction. Severe biodiversity constraints.
Rectory Lane, Rock	Greenfield	BR/RO/22	Potential issues with surface water discharge need to be overcome. Look to amend settlement boundary to allow for limited

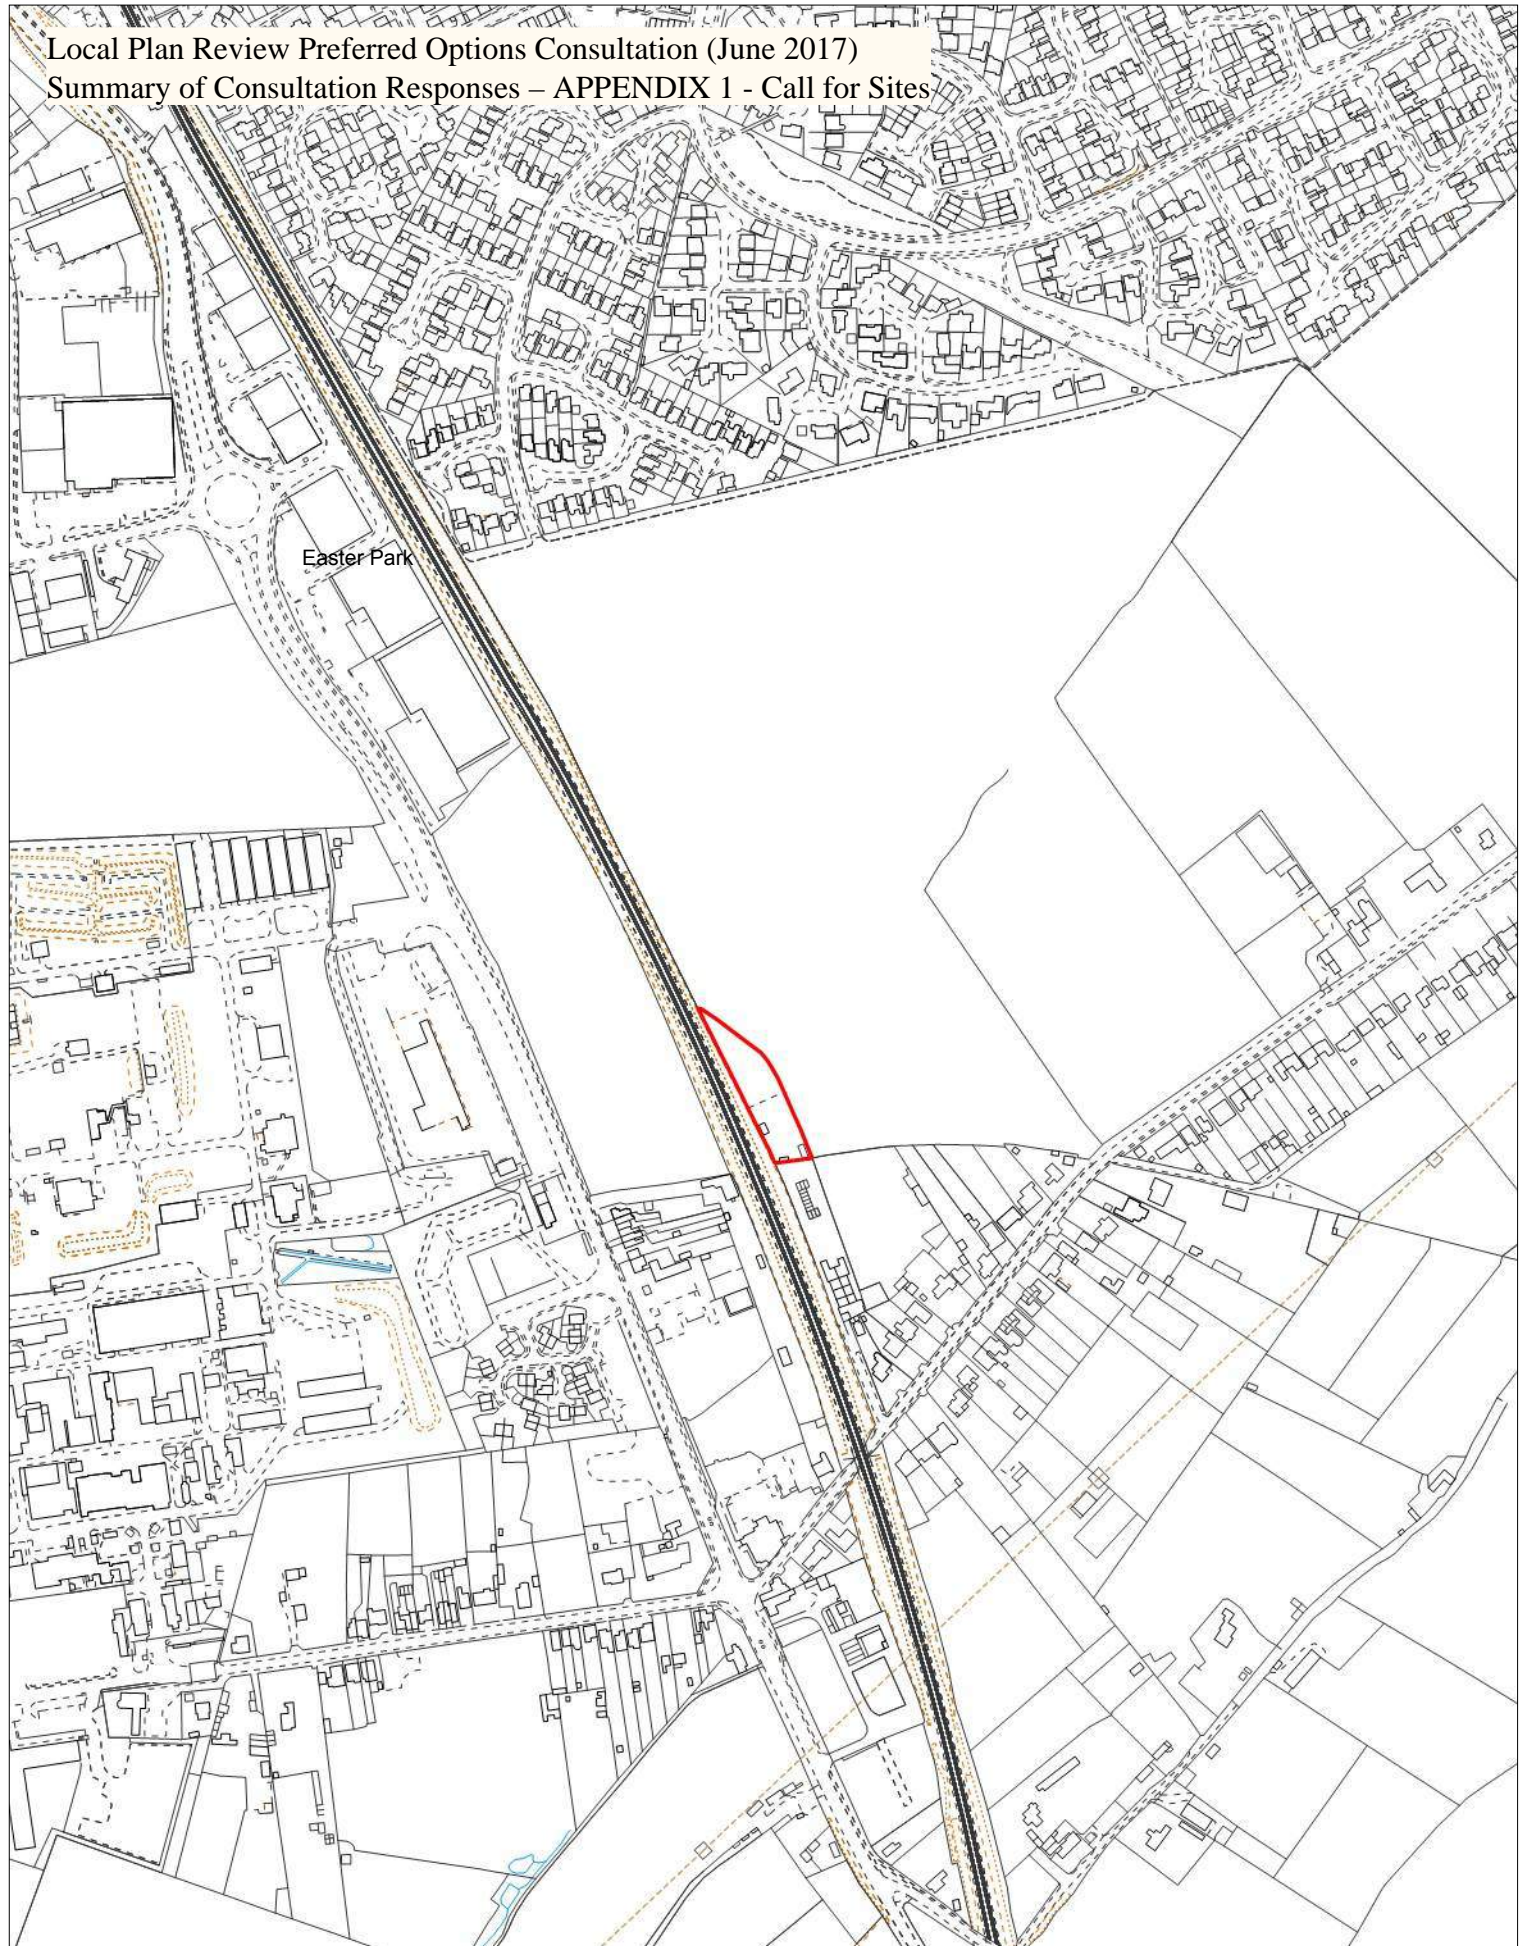

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION - CALL FOR SITES

Location	Current Land Designation	HELAA Ref.	Officer Comments
			development at this site.
Hill House Farm, Arley Lane, Shatterford	Green Belt	WA/UA/5	Site slopes down towards stream running along boundary. Not considered to be sustainable location. Open landscape. Site at much lower level than ex-council houses opposite. Adverse impact on openness of Green Belt as limited development on this side of lane.
Station Yard, Blakedown	Brownfield	WFR/CB/2	Not considered suitable for housing on amenity grounds. Potential site for station parking.
Cursley Distribution Park	Green Belt / Brownfield	WFR/ST/9	Not considered a sustainable location for residential development. Allocate as a Previously Developed Site in the Green Belt for employment.
Adj. Bentley Grove Mustow Green	Green Belt	WFR/CC/11	Would extend development away from Mustow Green into open countryside characterised by scattered farmsteads and large dwellings. Adverse impact on openness of Green Belt and setting of adjacent Listed Building.
Adj. Chaddesley Corbett School	Green Belt	WFR/CC/10	Substantial surface water flow through site after heavy rains. Remote from other residential development and would not be in keeping with settlement pattern.
Adj. Red Lion Court, Bridgnorth Road, Arley	Green Belt / Brownfield	WA/UA/6	Small former car park to pub which has been redeveloped for housing (in Shropshire). Allocate for 2 dwellings.
Land at Fold Farm, Chaddesley	Green Belt	WFR/CC/8	Small paddock on edge of Conservation Area. Potential to release for small elderly person bungalow scheme.

				be read in conjunction with 1-12. & 1-14. This would clarify the legal requirements from the inspectorate. As the NPPF is not a statutory instrument. However the CORE STRATEGY is.	<p>national planning policy, and therefore the emerging Local Plan must be in conformity with it.</p> <p>Note that planning applications are assessed against the NPPF as well as the Development Plan for the area.</p> <p>The Local Plan Review will be replacing the currently adopted Core Strategy. At Examination, the emerging Local Plan Review will be tested against the soundness test as set out in the NPPF para 182.</p>
CORE11	LPPO140	1-5	Support	Support for paragraph 1.5.	Support is noted.
CORE11	LPPO141	1-6	Comment	After (e.g. roads, schools, utilities) Add, Open Spaces	Comment is noted.
CORE11	LPPO142	1-7	Support	Support for paragraph 1.7.	Support is noted.
Wyre Forest Green Party	LPPO1495	1.8	Comment	Planning must have strong community involvement. Unfortunately, this Local Plan Review has been conducted during summer holidays and many residents have claimed that they do not have adequate time to understand the documents and discuss it with their communities. As mentioned elsewhere The Draft Local Plan offers up a simplistic “Option A” and “B” to residents where many areas are in both (so-called “Core”).	The minimum requirement for a Local Plan consultation event is 6 weeks; the Preferred Options consultation ran for 8 weeks. This gave members of the public an extra 2 weeks than normal to respond. We will however take your comments on board and will consider these issues next time we undertake a consultation event.
	LPPO1570	1.8	Comment	We are a small group who have come together with a	It is disappointing to read that you are

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>common goal, which is to raise awareness within Burlish and Lickhill Estates, about the proposals Wyre Forest District Council (WFDC) have recently released to build a significant number of houses on greenfield sites in the immediate area, these being:</p> <ul style="list-style-type: none"> • The field at the top of immediately adjacent to the nature reserve (LI /2) • The field which runs parallel with <u>Burlish Crossing and Bewdley Road North (LI/5)</u> <p>The area currently occupied by a garden centre and horse paddocks on <u>Lickhill Road LI/6/7)</u></p> <p>We canvassed a number of our immediate neighbours to determine if they were aware of these proposals and it was clear they were not. Our primary aim was to gauge the extent of knowledge residents had about the plans and whether they were concerned sufficiently to wish to raise an objection or to comment formally to WFDC. We spoke to 197 people in these areas. Many residents were unaware of the consultation and nearly all canvassed expressed concern for the plans to build on Greenfield sites.</p> <p>It is clear the method of communicating the impact of the Local Review Plan falls far short of those expected by a local authority. The consultation period also took place during school holidays and factory shutdown, when many people would have been away from home and therefore not in a position to either see any information</p>	<p>not entirely satisfied with how the Local Plan Review Preferred Options consultation was conducted. There was a full 8 week public consultation which closed on Monday 14th August at 5pm. During this 8 week consultation period we held 8 drop-in sessions across the District for members of the public to come along and have their say. In particular, the two drop-in sessions held within Stourport were very well attended. Leaflets advertising the consultation and the drop-in sessions were posted to households within the District, there were also posters displayed in public areas throughout the District and it was advertised on the Council's website, Facebook and Twitter. There were several articles about the consultation in the Shuttle and the Express & Star, and it was also on local radio stations and on the TV news.</p> <p>We therefore do not agree that the consultation period should have been extended as this consultation had been agreed by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet. We will however take your comments on board and will consider</p>

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				regarding the plans or comment upon them. We therefore formally request an extension of the consultation period to 30 September 2017, to allow wider communication and communication to local residents, to include communication with schools, GP surgeries, dentists. We would also urge the Council to further communicate with residents within the Wyre Forest district, perhaps by individual letters to homes including the plans with proposed housing numbers, and/or use of local newspapers such as the Kidderminster Shuttle and Express and Star. We look forward to receiving a positive response to our request.	these issues next time we undertake a consultation event.
	LPP01583	1.8	Comment	We were only notified of the proposed changes to the Local Plan when invited to attend a public meeting in June 2017, despite there being a published SA scoping report of May 2015 and the revised scoping report of September 2015. The failure to notify the residents of the proposed alterations to both Green Belt and loss of amenity of a proposed new northeast to south road does not show the Council in a good light. There is very little time for residents to prepare a response in the full detailed way we would have liked.	It is disappointing to read that you are not entirely satisfied with how the Local Plan Review Preferred Options consultation was conducted. There was a full 8 week public consultation which closed on Monday 14 th August at 5pm. During this 8 week consultation period we held 8 drop-in sessions across the District for members of the public to come along and have their say. The drop-in sessions were all very well attended. Leaflets advertising the consultation and the drop-in sessions were posted to households within the District, there were also posters displayed in public areas throughout the District and it was advertised on the

					<p>Council's website, Facebook and Twitter. There were several articles about the consultation in the Shuttle and the Express & Star, and it was also on local radio stations and on the TV news.</p> <p>The consultation event was approved by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet. We will however take your comments on board and will consider these issues next time we undertake a consultation event.</p>
	LPP03955	1.8	Comment	<p>We have never received any leaflets from either WFDC or the developers Barberry proposing to build on the Baldwin Road site. We were informed by residents in Greenhill. Other residents received the leaflet from Barberry developers and attended the Rose theatre meeting but were not aware about the Local Plan Review. This may account for the poor attendance. Commenting on the WFDC local plan is more important but I fear many people will not be aware of this because they did not receive the WFDC leaflet. Why is this?</p>	<p>The leaflet produced by Barberry developers was nothing to do with the Council.</p> <p>In terms of the Council's Preferred Options consultation, leaflets were sent out to households within the District and advertising and press releases were issued throughout the consultation. There were also eight drop-in sessions.</p>
	LPP03762	1.8	Comment	<p>Having had an opportunity to view the Plan A and B options at the Stourport Civic Centre I would like to put forward the following comments.</p> <p>Firstly, I very much appreciate the authorities setting up an opportunity for local people to view and comment on</p>	<p>Thank you for your positive comments. We will also take on board the issues you have raised to help us improve our next consultation event.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>the proposals. It was extremely useful to be able to view the diagrams of all the proposed sites – some of which I was previously aware of, and some I was not aware of.</p> <p>It is excellent that the local authority is looking to plan for the future rather than just react to the NOW situation. This would appear a very sensible way to prevent issues and prepare for coming generations.</p> <p>Overall the proposals do seem to be addressing key elements laid out in the full Preferred Options document.</p> <p>However, there are situations where remote people involved in putting together the reasoning for the plan will not be aware of all the specifics of individual locations.</p>	
	LPPO3390	1.8	Comment	<p>I was concerned that at the consultation I attended the emphasis seemed very much biased towards Option A, with little said about Option B, or other alternatives. This cannot be right, particularly when coupled with the knowledge that, without the intervention of our excellent local independent councillor, the planners had no intention of holding a consultation on Spennells.</p>	<p>8 drop-in sessions were held throughout the District during the consultation event and all were very well attended. The drop-in sessions were also held at different times of the day including evenings and weekends to give people the opportunity to attend.</p> <p>The consultation event had been agreed by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet. We will however take your</p>

Summerfield Against Land Transformation	LPPO1610	1.8	Comment	<p>We are concerned about:</p> <ul style="list-style-type: none"> the timing and limitations of the consultation the influence of developers, land owners and their agents upon the plan. <p>The overall length of the planning <u>process</u> is problematic. Many members of the public lose track of, or fail to appreciate the significance of, key stages of the process. There is an overreliance on the 'evidence' to emerge from earlier consultation, much of which came from landowners and developers. Much more should have been done to consult earlier on key elements such as the Green Belt Review. The Council needs to do much more to inform, engage with and stimulate an <i>active</i> discussion — <u>at each stage</u> - of such far reaching proposals. Consultations should not be undertaken during the peak holiday period as this disadvantages the public.</p>	<p>The minimum requirement for a Local Plan consultation event is 6 weeks; however, the Preferred Options consultation ran for 8 weeks to take account of the school holidays. This gave members of the public an extra 2 weeks than normal to respond. We will however take your comments on board and will consider these issues next time we undertake a consultation event.</p> <p>The consultation event had been agreed by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet. We will however take your comments on board and will consider these issues next time we undertake a consultation event.</p> <p>The Green Belt study was undertaken by consultants who have extensive</p>

					<p>experience of producing these types of studies. Using consultants also meant that it was an 'independent study' and less open to criticism than if the Council had undertaken the study themselves.</p> <p>Pre-application discussions are confidential discussion that a developer or landowner can request from the Development Management Planning team. It is up to the developer if they want to request pre-application advice before submitting a planning application to the Local Authority.</p>
	LPPO4878	1.8	Comment	<p>At the consultation event I attended there was nothing in detail, it was a struggle to actually get to the tables, and I felt, maybe erroneously, that there was an element of hoodwinking going on. Is there a road to build, if so where and why? Is one example of questions asked and not coherently answered. The timing of this consultation is inappropriate. Schools are now closed, the holiday season is upon us, and there is very limited time for residents to properly digest the full implications of this plan and respond thoughtfully. I feel distressed, rushed, and that matters which affect the town are being pushed through. I sincerely hope that our elected members listen to what is being said, that the plans and future consultations are open, honest, and based on fact.</p>	Comments noted.

				<p>demonstrate the positives of living in Wyre Forest, especially Kidderminster.</p> <p>I've only lived in Kidderminster a short period of time, and it doesn't take a great deal of imagination to realise Kidderminster is a deprived, run down under invested town, with basically nothing going for it other than beautiful local country side, which you now intend to decimate and to encourage more people to come and live here.</p> <p>Your colleagues from the Planning Office were asked numerous question regarding the proposed plans and the options being put forward, the general consensus was "they were unable to answer many of the question asked, people found this very frustrating and annoying as YOU the council will be making decisions which will have an enormous impact on all of us living within this proposed development area.</p>	
	LPPO273	Local plan review housing development options	Object	<p>I would like to comment / object regarding P194 the proposed development of Lea Castle.</p> <p>I object to Options A & B on the grounds that there is a lack of local infrastructure to support this. In terms of schools, doctors' surgery, shops and transport Cookley is already at capacity. The access and highways infrastructure would also not cope with the additional traffic and some additional visibility splays and traffic</p>	Objection and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>lights will not do anything to help this.</p> <p>600+ houses in the Lea Castle area would need an additional School and Dr's surgery. Cookley Sebright is full and has no room for expansion. It has no usable playing field, to expect it to take more children is ludicrous. Additionally the Dr's surgery is so busy it is hard to get appointments. The nearest High School is the smallest in the district - how will these schools cope with the proposed additional demand these options suggest??</p> <p>I would like to object to Option A in that it would effectively link Cookley to Kidderminster making it an extension of Kidderminster. In the local plan Cookley is referred to as an extension of Kidderminster, it is not, it is a village. As a separate village it should be allowed to expand in line with its own needs. In being asked to accommodate 600+ houses it is expanding to Kidderminster's needs and being expected to carry this burden on its already stretched infrastructure.</p> <p>While I agree that a development of the Lea Castle site is needed this needs to be done more sensitively with a view to supporting local infrastructure and need. The current plans do not do this.</p> <p>Local action groups are recommending development of Lea Castle but Cookley is a village. It is not an extension of Kidderminster and it should not be sacrificed to</p>

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				holidays and in August when most people are away on holiday. It all gives the impression that planning options have already been decided and the public's views and residents of Spennells views are unimportant to the process.	anticipated. However, as it was our first drop-in session we did learn from this experience and provided more officers at the next drop-in sessions which ran a lot smoother.
	LPPO4748	1.8	Object	I do not feel the consultation process to be fair, inclusive or within the spirit of the NPPF. I have had to actively seek access to all documents that have helped shape my opinion – even requesting that documents were correctly, chronologically ordered on WFDC portal. The language and terminology used can be at best described as ambiguous. This would have negated many residents being able to fully comprehend the magnitude of the proposed options.	The Preferred Option Plan and the supporting evidence base documents were made available on the Council's website for public viewing throughout the whole of the consultation period, and remain on there now. The documents were also available at the eight drop-in sessions held throughout the District during the consultation event. Hard copies of the Preferred Options Plan were also available at the Council Hub and local libraries in the District.
	LPPO4772	1.8	Object	<p>This consultation has not been forthcoming with any detailed information. No clear information, detailed road plans and answers to questions raised by the local population have been forthcoming.</p> <p>With ref to the roadshow at Heronswood School no representative was available from the Highways to discuss the proposed road, the layout and effect on the local population. The local planning officers did not know or was unwilling to pass on any information, the only reply was "it's only a draft plan at the present time"</p>	As the Preferred Options was only the second stage of plan-making, not all the information was available as further evidence base studies needed to be undertaken, such as the Transport Modelling. The next stage of plan-making which is known as the Pre-Submission stage will provide further detail. The Transport Modelling work will also be available at this next stage.

				well we need to know.	
	LPPO2693	1.8	Object	<p>Flawed Nature of the Consultation</p> <p>a. When the Consultation commenced, there was no intention to hold a drop-in session for Spennells. Even though potentially most affected group. This omission cannot be accidental.</p> <p>b. Consultation deliberately timed to include the end of July and half of August. Can only be assumed to be timed to reduce the opportunity for those who will be affected to scrutinise the plans.</p> <p>c. The Draft Local Plan and the OAHN are extremely complicated and not designed to allow ordinary people to understand them and have a fair opportunity to agree or disagree. The figures in them are mixed and different figures for the same item appear in different places. The figures that I have chosen to use seem fair but I could have chosen others from within the documents.</p> <p>d. The Consultation is very much aimed at getting a response from the question – ‘Do you want plan A or plan B?’. This is a totally flawed approach attempting to bludgeon people to accept what they consider to be the least worst option. The third option of rejecting the entire plan should have been made crystal clear.</p> <p>e. At drop-in session, officials were loath to discuss the relief road. They insisted that a plan does not exist. The Chair of Planning then added that we had no right to see the road plan as it wasn’t part of this Consultation. This is an utterly incorrect approach. It is impossible for citizens to give their backing to the destruction of the</p>	<p>It is disappointing to read that you are not entirely satisfied with how the Local Plan Review Preferred Options consultation was conducted. There was a full 8 week public consultation which closed on Monday 14th August at 5pm. 				that my comments should relate to a particular page number of a 195 page document beggars belief; I have however been to a consultation meeting, talked with officers and perused the documentation.	of responses we have received proves that this has been successful.
	LPPO4745	1.8	Object	Having spoken at the drop in session with planning officers I felt that they preferred Option A as it is the cheapest and I felt that we were not getting a fair and open choice. They were unable to answer specific questions, felt the road would not be used by trucks or as a cut through, both of which are a given, in order to avoid the Black Bridge and most staggeringly nobody from the Highways was available to discuss these issues. It was also sounding as if the Council had decided but were following protocol in order to say they had listened to the residents and concerned parties, although it had been noted that until the Local Councillor spoke up Spennells were not deemed important enough to even be given a drop in session to see the proposals. This again looks as if a deal has been struck and we have no say. I may like to point out that the Council are elected by the people and can easily be unelected, especially after hearing some of the County Councillors remarks. I also feel that we have not been given all the relevant facts and details which points to a flawed consultation.	The consultation event had been agreed by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet. We will however take your comments on board and will consider these issues next time we undertake a consultation event.
	LPPO4873	1.8	Object	I think I speak for many when I say that these proposals have come as quite a shock to the local residents, there has been talk of the Council informing us with a leaflet or a mention in the local paper. This appears to have gone unnoticed by the majority of locals, and it seems	It is disappointing to read that you are not entirely satisfied with how the Local Plan Review Preferred Options consultation was conducted. LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
Land Research & Planning Associates Ltd	LPPO536	1.18	Comment	<p>The PO should take better account of the lack of affordable homes and introduce a Policy where if land owners are willing to provide land near or adjacent to smaller rural settlements to accommodate a minimum of 50% affordable homes and/or starter homes this land should be designated in the PO particularly on the western side of the WFDC area which is not in Green Belt.</p> <p>It is not in compliance with the fully objectively assessed needs for market and affordable housing as the provision. Of the latter has not been properly addressed in the PO land/sites designation.</p>	As part of the Local Plan Review process we are considering affordable housing and there will be policies in the Local Plan which stipulate the affordable housing requirement expected from sites. This will be based on evidence, which includes the revised OAHN study and the Viability Assessment.
Environment Agency	LPPO1187	Water Cycle Study	Comment	<p>It is imperative that a robust WCS is in place to inform a 'sound' plan that fully recognises the timings and costs associated with infrastructure planning in the water environment. Securing effective water resource policies and allocating development in appropriate areas, with adequate infrastructure in place (or planned), is an important element of the strategic planning remit.</p> <p>Site BR/RO/1 at Clows Top has issues with mains drainage connection and we have previously raised concerns with Severn Trent about the appropriateness of a non-mains foul drainage scheme in this location.</p> <p>We note table 10-1 of the WCS highlights some physical wastewater infrastructure capacity constraints in red. Whilst this does not appear to imply a significant barrier</p>	<p>The Water Cycle Study will be updated following the preferred options consultation and as part of the pre-submission plan stage. These comments from the EA will be considered as part of the WCS update.</p> <p>As part of the WCS update we will consider changes to the policy / guidance and plans, which will include the adoption of TAL as mentioned in this consultation response.</p> <p>We are not proposing to undertake any additional water quality modelling at this stage.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>to development, we trust Severn Trent Water Limited will confirm following their further assessment. On this basis we have no significant cause for concern in relation to environmental infrastructure matters, related to water quality, as a result of the proposed development growth. We therefore consider the evidence base document robust enough to inform the Plan.</p> <p>In section 6.1.8 of the report, reference is made to the phosphate (P) treatment trials due to be completed in 2017. Wording in section A.10.8 and 6.1.8 could be amended. Although TAL is 0.25 is it could still be possible to achieve the required P limit; so this should not prove a barrier to proposed growth.</p> <p>In Table 7 the WwTW future growth concentration is still reported as 4.94. We question whether this should have been updated to reflect the current observed P concentration of 0.63 (as in table 8). Note this has not impacted on the River Quality Planning (RQP) result.</p> <p>We would also question whether the BOD River target in table 13 should be 'high' rather than 'good' status.</p> <p>We note strong recommendations are made to utilise SuDS for surface water drainage from development, and we support this approach. We also support the fact that all aspects of sewerage network constraints, sewage treatment works capacity and related issues such as odour and flood risk from increased waste water</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
	LPPO471	1.19	Comment	We are part of the Greater Birmingham and Solihull LEP and we need to ensure any development is in keeping with the uniqueness of Wyre Forest District, I think that the need to increase our housing stock by such a large amount is to attract commuters from Birmingham and surrounding areas. This I think is not the best way forward for Wyre Forest District. Commuters will not bring income into our shopping centres or our tourism activities as they will be spending where they work and spending their leisure time in town.	Comments noted.
	LPPO418	1.19	Comment	<p>Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collectively review overall brown field site availability and plan housing development accordingly.</p> <p>Many people commute into / and out of Kidderminster now (hence the railway station development) - and have done so for many years;</p> <p>Whilst economic development in Kidderminster will be welcome - past experience shows this will take time</p> <p>Artificial borders should not apply when making decisions to destroy the Green Belt.</p>	<p>Comments noted. The Black Country Local Authority areas are undertaking a joint Local Plan Review. Solihull Council is also undertaking a review of its Local Plan. Birmingham City Council adopted their Local Plan in January 2017. The other Worcestershire Local Authorities have started a review of their Local Plans. All of these Local Authorities will be looking at what brownfield sites they have in their Local Plan Reviews.</p> <p>In terms of the emerging Local Plan for Wyre Forest, we have looked at brownfield sites but we don't have enough deliverable brownfield sites to accommodate all of our housing need.</p>
	LPPO433	1.18 (d)	Comment	What percentage buffer will WFDC have to incorporate into the plan? What has the past performance of WFDC	The Inspector's report for the Gladman appeal public inquiry (published March

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				been?	2018) concluded that a 20% buffer should be applied to the Council's 5 year housing land supply calculation. However, the Council will follow National Planning Policy guidance on this matter which has been published since the appeal case.
	LPPO4897	1.19	Comment	The proposed Option A (and also Option B to a large extent), concentrates development along the eastern side of Kidderminster. A requirement of the Local Plan is that development should be proportionate to the capacity of the district. The potential of several thousand dwellings being built along this corridor is surely disproportionate.	Comments noted.
	LPPO3718	1.19	Object	It is preposterous to state that the two LEP's provides Wyre Forest with a range of opportunities to further enhance its economic position, access funding streams and ensure that the area is able to continue to look both towards the rest of Worcestershire and the conurbation in the same way that it has done for many years. It also brings a range of challenges in terms of ensuring that development is balanced, proportionate to the capacity of the District. This is the reason why Easter Park has laid 50% empty since construction, many of the shops in Oxford Street, Worcester Street and Coventry Street and others lay empty creating an eye sore of unattractive town centre environment and security problem at night. This is evidence that the planning team are not in tune with reality and how to address what is really required	Objection is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>for the town of Kidderminster. There is little confidence in this plan and to the level of development planned for the area when they have struggled in the past to achieve ambition.</p> <p>I take note of the statement ‘...and does not undermine the unique character of the area’ which certainly would be the case if the proposed level of development goes ahead. There is evidence of a disconnect between what is proposed and what happens in practice. I object to the plan as proposed, the development should be scaled down to meet realistic demand and not to undermine the character of the area to become sole-less like Redditch.</p>	
	LPPO2933	1.19	Object	<p>Policies of the Local Plan Review do not seem to require flexible design and layouts ‘future proofing’ development so as to take account of important population changes such as ‘ageing’ over the plan period.</p> <p>Although the LPR states (1.19) that Wyre Forest housing market ‘constitutes a self contained Housing Market Area’, considering the statistics at table 8.0.4 and 2.9 the social issues of</p> <ul style="list-style-type: none"> • static population growth; • a very high proportion of resident aged 65+ • the need to ensure that residential development 	Objection and comments noted.

				Previous attempts to build an Eastern relief road have failed - the plan fails to present evidence based data that supports it in economic or environmental terms - at the consultation session I was informed this would be a single carriageway 40 mph limit road following the same route as the current road routed from the Worcester Road through Mustow Green to the Birmingham Road - is it really a relief road at all?	Submission Plan will establish what road improvements the proposed new development will require and if an eastern relief road is necessary.
	LPPO395	1.19	Comment	<p>Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collectively review overall brownfield site availability and plan housing development accordingly.</p> <p>Many people commute into / and out of Kidderminster now (hence the railway station development) - and have done so for many years;</p> <p>Whilst economic development in Kidderminster will be welcome - past experience shows this will take time.</p> <p>Artificial borders should not apply when making decisions to destroy the Green Belt.</p>	Comments noted.
Gladman Developments Limited	LPPO1572	1.21	Comment	Any issues of unmet housing need arising from relevant neighbouring and near-by local authorities must be fully considered through the preparation of the Local Plan, working under the auspices of the 'duty to cooperate'. This should involve all other LPAs in the HMA plus any others that there is a clear functional relationship with.	Comments noted. We continue to have Duty to Cooperate meetings with our neighbouring Local Authorities throughout the Local Plan making process.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Where necessary, a strong policy mechanism will be required within the Local Plan to demonstrate that unmet housing needs arising from relevant neighbouring authorities and those with a clear functional relationship will be met during the plan period.</p> <p>In order to fulfil the objectives of the Plan it is essential that the relationship of the area with its neighbours is carefully considered and that the housing and economic development requirements of the wider area are fully explored and given appropriate consideration through the plan making process.</p>	
	LPPO4469	OAHN	Comment	Concern over the Housing figures - District stated as having stagnant population growth yet the Consultants have identified the need for so many new houses?	Comment is noted. The Objectively Assessed Housing Needs Study will be updated using the Government's new standardised methodology for calculating housing need. The latest population and household projections will also be used.
Taylor Wimpey West Midlands	LPPO4948	LI/5 - Green Belt Review	Comment	In Green Belt Review site is identified as making a 'contribution' to the purposes of the GB. "The site is part of large tract of land forming a substantial part of the open countryside between Stourport, Kidderminster and Bewdley which makes a significant contribution to preventing sprawl, merger of towns, encroachment and the identity of towns. Thus, in principle, development would constitute harm to the Green Belt, although the local geography modifies this. Overall the land does make a contribution	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>to Green Belt purposes, specifically in respect of sprawl and protection against encroachment into open countryside. The enclosed character of this site and its close relationship with the existing urban edge means that damage to the purposes of the Green Belt is reduced.”</p> <p>TW has considered release of site from GB within context of 5 GB purposes.</p> <p><i>1) To check the unrestricted sprawl of large built-up areas</i></p> <p>Site has strong defensible boundaries which would round-off town at this location. Northern part of site is not proposed for development so any development would be contained well within existing building line. It will ensure visual separation of Stourport and Bewdley.</p> <p><i>2) To prevent neighbouring towns merging into one another</i></p> <p>Considerable green gap between Stourport and Bewdley. Development would not close this gap.</p> <p><i>3) To assist in safeguarding the countryside from encroachment</i></p> <p>Site offers opportunity to provide strong and defensible</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>boundaries.</p> <p><i>4) To preserve the setting and special character of historic towns</i></p> <p>Stourport's conservation areas and associated Listed Buildings are not located in vicinity of site. Release of site will not compromise setting of heritage assets.</p> <p><i>5) To assist in urban regeneration, by encouraging the recycling of derelict and other urban land</i></p> <p>Release of this site would not prevent derelict and urban land coming forward. It can be phased in the housing trajectory to take account of availability and deliverability of brownfield sites.</p> <p>TW assert that site makes a 'limited contribution' to Green Belt purposes. Given the enclosed nature of the site and the prevailing building line and development limit to the north-east, the development of the site would not result in increased sprawl towards Bewdley.</p>	
Taylor Wimpey West Midlands	LPPO4950	Sustainability Appraisal AKR/15	Comment	<p>The site represents a sustainable location for development as evidenced within SA which forms part of Local Plan evidence base. The site has been scored against 13 objectives.</p> <p>TW broadly support the SA findings but feels SA objective 5 (reduce need to travel etc.) should not be '-'</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				but '+' as site is in sustainable location and a travel plan will be submitted for the development. Objective 8 (to protect/enhance landscape) - do not agree that development will have negative impact on landscape - no scheme details yet. There is more than enough space to provide significant landscape enhancements to improve relationship between urban edge and landscape. Suggest score is changed to '0' or '?'. Objective 13 (maintain/enhance settlement identity) - scores '-'. Disagree as scale of development is small within context of larger settlement. Development is capable of reflecting local character and identity through layout and use of materials.	
Campaign to Protect Rural England	LPPO956	1.22 HELAA	Comment	We have looked at all sites assessed as indicated by the Assessment sheets on the website. We have not commented on every site, particularly not those with an active planning consent or which are urban brownfield. The comments appear in alpha-numeric order by settlement. The views expressed range from supportive of the Council's position to hostile to it. Comments attached in separate document.	Comments noted.
Taylor Wimpey West Midlands	LPPO2249	Sustainability Appraisal site LI/5	Comment	The site represents a sustainable location for development, as evidenced within Sustainability Appraisal (SA), which forms part of the Local Plan evidence base. Taylor Wimpey broadly supports the findings. However, objective 5 (to reduce need to travel etc.), should be either a '+'. Feel that development can reduce need to travel as is in sustainable location.	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Development will include submission of travel plan.</p> <p>Objective 8 - TW feel do not agree that site would have minor impact on landscape and townscape as no details of scheme are known at this stage. Significant landscape enhancements are likely. Suggest score should be '0' or '?'.</p> <p>Objective 13 - disagree with '-' score. Scale of development within context of Stourport is not significant so will not erode identity. Development is capable of reflecting local character through layout and use of materials. Consider site should score '0' or '?' at this stage.</p>	
Taylor Wimpey West Midlands	LPPO4920	OC/13 - Green Belt Review	Comment	<p>Green Belt: Land at Comberton Road lies within West Midlands Green Belt. Review of Green Belt undertaken by Amec Foster Wheeler assesses different parcels against Green Belt purposes.</p> <p>In response to this analysis, the LPRPO includes significant reinforcement of western boundary of site including large amounts of open space and landscaping.</p> <p>TW has considered the release of the site from the GB in context of 5 purposes of GB and concludes that sites makes a limited contribution:-</p> <p><i>1) To check unrestricted sprawl of large built-up areas</i></p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Site boundaries would be reinforced by 30m planting buffer along length of development. This would strengthen urban edge. It would not encourage sprawl.</p> <p><i>2) To prevent neighbouring towns merging into one another</i></p> <p>Gap of >10km between Kidderminster and Bromsgrove. Site is located immediately adjacent to existing built-up area and is clearly separated from nearby settlements by extensive agricultural land.</p> <p><i>3) To assist in safeguarding the countryside from encroachment</i></p> <p>Site offers opportunity to provide strong defensible boundaries to protect countryside and maintain visual and physical separation between Kidderminster and surrounding settlements.</p> <p><i>4) To preserve the setting and special character of historic towns</i></p> <p>Kidderminster's conservation areas and associated listed buildings are not located close to site. Listed buildings scattered within village of Stone are closer and their sensitivity will be taken into consideration. Release of this site will not compromise setting or character of historic towns.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>5) To assist in urban regeneration, by encouraging the recycling of derelict and other urban land</p> <p>Release of this land would not prevent recycling of derelict and other urban land. Supply of brownfield sites is now reducing and development of this site can be appropriately phased within housing trajectory to take account of availability and deliverability of brownfield sites.</p>	
Taylor Wimpey West Midlands	LPPO4946	Sustainability Appraisal site OC/13	Comment	<p>Sustainability: Site represents sustainable location as evidenced in SA. SA has assessed site against 13 objectives. TW do not agree with scoring for objective 8- no details of a scheme are known so cannot assert that development would have minor impact on landscape and townscape. Scheme could provide significant landscape enhancements - score should be '0' or '?' at this stage.</p> <p>Taylor Wimpey supports the notion that the development of the site would enhance the provision and accessibility of local services and facilities as well as reducing the need to travel by unsustainable modes.</p>	Comments noted.
Taylor Wimpey West Midlands	LPPO4947	Sustainability Appraisal site OC/6	Comment	<p>Sustainability: Site represents sustainable location as evidenced in SA. SA has assessed site against 13 objectives. 				<p>this stage.</p> <p>Site scores single negative against objective 9b - but with no scheme details known impact on protected species cannot be known at this stage.</p> <p>Taylor Wimpey supports the notion that the development of the site would enhance the provision and accessibility of local services and facilities as well as reducing the need to travel by unsustainable modes.</p>	
	LPPO4139	1.22 HELAA	Comment	<p>The HELAA Report draws on Government policy and makes a clear statement of how important it is to protect open green space for the health of the community. The report also shows that if the actual need for new houses was less than 3697, no Green Belt land would be required, and if the actual need were less than 4476, only brownfield Green Belt land would be required.</p> <p>8378 Green field Green Belt sites have been identified! This number obviously shows the absolute need to protect the Green Belt immediately and permanently.</p>	<p>The HELAA shows that if all the non-Green Belt sites came forward for development at the capacity stated, then 3696 dwellings could be provided. However, the HELAA also states at paragraph 3.1 that many of the urban brownfield sites are likely to come forward for a mix of uses and until further viability work is undertaken, the exact mix cannot be determined. Many of the site capacities are likely to be lower than shown. Also, not all of the listed urban brownfield sites will necessarily be available for residential development. Some may be retained for commercial uses.</p> <p>Open space, sports and recreational land is protected by policy. These are sites</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					outside of the Green Belt. The Green field Green Belt sites listed have almost all been submitted by landowners. In most cases, capacity has been calculated using a standard methodology as set out in the HELAA report. There is no suggestion in the report that these sites should be developed. All sites will be assessed against the full set of evidence studies and a decision on whether to propose allocation or not will be taken once the results of these different studies have been assessed. It should be noted that Greenfield Green Belt sites are not the same as open space, sports and recreational land.
	LPPO4838	1.22 Green Belt Review	Comment	<p>My knowledge and interest are in the “Option A” proposals relating to the following areas:</p> <ul style="list-style-type: none"> • Rear of Spennells & Easter Park (AS/10) • Land off Stanklyn Lane (WFR/ST/2) • Stone Hill South (OC/13) – Part, the field to the south bounded by Stanklyn Lane, a PRow to the west, a hedge to the north and a field locally known as “The Gallops” to the east. Carrots are currently being grown in this field. <p>The AMEC report commissioned by WFDC appears to be balanced although some of the detail is questioned. This</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>is not reflected in the in the WFDC Preferred Options Document (POD) which seems to lean towards Option A. The POD does not acknowledge the full input and importance of this AMEC report as it is clearly a major piece of work identifying the sites. It is briefly referred to and does state that ‘these studies demonstrate that across the District the Green Belt fulfils its intended strategic purpose as part of the West Midlands Green Belt with many instances of more than one Green Belt purpose being fulfilled’.</p> <p>The AMEC Report clearly identifies significant encroachment and impact on the Green Belt, which, it claims, can be dealt with by “Masterplanning”. This is a very vague argument.</p> <p>There is no justification for demand based upon projected population increase as shown in the Worcestershire County Council research.</p> <p>The AMEC report notes that: ‘The most significant impact on the Green Belt is to the south east and north east of Kidderminster, the two locations which are the focus for much of the development. In each case the scale of development means that a new relationship between town and country will need to be created through comprehensive masterplanning. What is meant by the statement that ‘ ... a new relationship between town and country will need to be created through comprehensive masterplanning’ in my opinion can be</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>interpreted any way required and as such is not a useful argument for or against option A.</p> <p>Land at Stone Hill (Part as described previously) OC/13: I cannot disagree with the statement that ‘.....although the scale and topography of the site means that a new relationship between town and country would be created, extending development into visually exposed land where thus far development has used the topography to limit such exposure. This is particularly the case for land extending towards Stanklyn Lane, in combination with proposed land immediately to the southwest, although further work on long and medium distance visual receptors would be needed’. It is not clear what is meant by the statement that ‘visual receptors would be needed’. If this part was developed on it’s own it certainly would be a rectilinear intrusion and sprawl into the Green Belt. The report fails to note the presence of National Grid electricity power lines and pylons crossing the site from Stanklyn Lane. These would inhibit development. The site falls towards Stanklyn Lane causing drainage problems but not in the Council or AMEC Reports. Successful crops of potatoes, onions and currently carrots are grown here.</p> <p>Land off Stanklyn Lane WFR/ST/2: I agree with the statement made by the AMEC report that ‘the site slopes from the plateau at 60m, which holds and conceals the urban edge, down to Stanklyn Lane and has extensive views south eastwards across open</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>countryside’. It goes on to say that ‘the site has substantial hedgerow boundaries, apart from that abutting the urban edge which comprises garden fences, but is visually exposed to Stanklyn Lane because of its sloping aspect’. This last statement gives the impression that the urban boundary is exposed to Stanklyn Lane but it is not. In fact, this boundary is the boundary of the old Municipal Borough of Kidderminster as shown on historic OS maps The AMEC Report has already stated that it is concealed behind the plateau. In its existing form there is complete connection with the wider open countryside and the impression of urban sprawl is concealed. The statement that ‘...there is a degree of connection with the wider open countryside’ appears to me to be misleading. There is complete connection with Stanklyn Lane in the valley of the rolling countryside each side. I strongly disagree with the statement that ‘landscape character and condition is of average quality, but with some evidence of the withdrawal of active land management evidenced through poor crop growth (in contrast to arable cultivation on land immediately to the north east)’. The photographs in the report evidencing this were clearly taken some time ago. Some attempts at organic farming had taken place with what appeared to be limited success and there had been crop failures. The farmer currently working the land is having a successful crop of Barley and there have been other successful crops of sugar beet in particular. It is my understanding that the current farmer rents the land from the landowner and it must therefore be commercially viable.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>I would say that the character of the landscape is very good and not average as stated in the AMEC Report. I have seen flocks of linnets and the occasional yellowhammer and corn bunting amongst others. I understand these species of birds are endangered.</p> <p>Views from the plateau are magnificent with Brown Clee to the north, St Mary's Church, Stone, and the Clent Hills beyond to the east and Abberley and Woodbury Hills to the west. The latter being the site of the encounter in 1405 between the armies of Owen Glendower and Henry IV.</p> <p>The AMEC Report goes on to state 'that development would create a new urban edge to the town on south easterly facing site, although in combination with adjacent sites, masterplanning could mitigate the direct visual impact of development and hence perception of spillage of the town into open countryside'. In my view the use of the word "masterplanning" can mean anything you want and does not contribute to the argument one way or the other.</p> <p>The AMEC report continues: 'overall the site makes a contribution to Green Belt purposes by virtue of its role in containing the southern edge of Kidderminster and having a strong visual connection with the wider countryside across Stanklyn Lane'. If the statement is referring to the current Green Belt I cannot disagree</p>

				<p><i>that flood risk is not increased elsewhere. Sites which suffer from fluvial or surface water flooding will only be considered suitable where it can be shown that development would not increase flood risk.'</i></p> <p>OAHN:</p> <p><i>'the latest 2014 mid-year population estimate (MYE) for Wyre Forest suggests a population of 98,960, a 2.1% increase since 2001. This rate of growth is lower than the West Midlands regional average of 8.2% and the average England growth rate of 9.8%'</i></p> <p>1. <u>Brief Summary</u></p> <p>The Draft Local Plan is based on the OAHN. This document is totally flawed in that it fails in its legal duty to use the latest statistical data in its calculations. Specifically the Vacancy rate used is out of date. It assumes that a further 1.3% of houses will become vacant after the plan is completed. This will be a disaster for Kidderminster as it will cause a collapse in house values. Whilst this will not help people who simply cannot afford to buy houses it will damage current house owners and the developers who are to build the houses. The draft local plan states that the population of Wyre Forest is static and it then allows the OAHN to use a population growth of 8%. This is evidently incorrect. It is very difficult to understand why Wyre Forest District Council has accepted this number when it is obviously</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>II. <u>Rounding – Justification?</u></p> <p>If the OAHN report is accepted, then the requirement is calculated at 284 dwellings per year. The report then rounds up this number to 300 dwellings per year. This simple unjustified action requires the building of 240 houses over the 15-year period</p> <p>A section of Green Belt land will be used for building 240 houses purely because of a rounding up. Who does the rounding up benefit? It allows developers to build more executive houses and therefore increase their profits. Is the Council not here to serve the residents?</p> <p>III. <u>Vacancy rate</u></p> <p>The OAHN report says that the number of vacant properties in Wyre Forest is 3.2%</p> <p>It says that there are currently 44490 dwellings in Wyre Forest</p> <p>It then increases the allowance for vacant properties to 4.5 %. Whilst the 4.5% figure is taken from the 2011 census, Wyre Forest District Council is legally obliged to use the most up to date data available, i.e., the current Council Tax data. There is no logical reason to use the 4.5% figure instead of 3.2%</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>The difference between 3.2% and 4.5% is 1.3%</p> <p>There are 44490 dwellings in Wyre Forest</p> <p>This means that extra 44490 x 1.3% dwellings will be built or 578 dwellings (39 per year).</p> <p>In other words, because the OAHN consultants have chosen, without statistical justification, to increase the vacancy rate by 1.3%, 578 houses will be built on the Green Belt in order to allow for them to remain vacant.(I have based the vacancy rate on 44490 making it an underestimate)</p> <p>IV. <u>The main OAHN calculation of housing requirement.</u></p> <p>It is impossible for a mere mortal to analyse the OAHN report and discover how the housing requirements were calculated making it impossible to analyse and challenge.</p> <p>I have tried to replicate the calculations using data provided by the OAHN report.</p> <p>I have looked at 2 population growth figures, 8.2 % which is a national average that obviously doesn't apply to Wyre Forest, and 2.1% which is the actual growth</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response												
				<p>figure of population in Wyre Forest since 2001.</p> <p>Whilst I have used this figure it is my understanding that the population growth was all weighted to before 2011 and there has been nil growth since 2011. The figures also make no attempt to factor in potential population decline as the considerable number of European citizens in Wyre Forest falls post Brexit.</p> <p>I will try to explain my calculations as I do them: Latest population figure for Wyre Forest: 98960</p> <p>Number of occupied dwellings: 43086</p> <p>Average number of occupants per dwelling (98960/43086): 2.2968</p> <p>(note: I have not made any attempt for allowing this average to decrease)</p> <table><tr><td></td><td>Population Growth</td></tr><tr><td></td><td>2.1%</td></tr><tr><td>Population Growth from 98960</td><td></td></tr><tr><td></td><td>2078</td></tr><tr><td>Dwellings required</td><td></td></tr><tr><td>(growth divided by 2.2968)</td><td>904</td></tr></table>		Population Growth		2.1%	Population Growth from 98960			2078	Dwellings required		(growth divided by 2.2968)	904	
	Population Growth																
	2.1%																
Population Growth from 98960

				<p>Dwellings per year</p> <p>(over 15 yrs) 60</p> <p>As a check as to whether my calculations work, if I add together the increased number of houses to be left vacant and the houses required for increased population at 8.2% it comes to $235 + 39 = 274$ per year. This is so close to 284 that I feel that my simplistic calculation is somewhat less flawed than the number by which the consultants have rounded their calculation up.</p> <p><u>V. Conclusion</u></p> <p>The figures used to calculate the housing requirement have been deliberately maximised to produce the highest possible number of houses required.</p> <p>There is absolutely no need to round the figures upwards.</p> <p>The use of 4.5% vacancy is out of date and should not have been used.</p> <p>The population growth figure taken by the OAHN has no basis in the reality of Wyre Forest. 2.1% is a far more realistic figure.</p>	235

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				This means that the housing requirement over the 15 year period of the local plan is far closer to 904 than 6000. The plan is totally flawed and must be totally withdrawn. There is absolutely no requirement to build on the Green Belt in Wyre Forest.	
	LPPO2805	Housing Numbers	Object	The statistics used are unfounded. 284 homes per annum are needed but this has been rounded up to 300 by Wyre Forest District Council is slap dash. That not all these houses would be affordable homes is unbelievable. To use statistics based on other parts of the country is deliberately misleading. The population of Wyre Forest & Kidderminster is static or likely to fall in the light of Brexit.	Objection is noted. The Objectively Assessed Housing Needs Study will be updated using the Government's new standardised methodology for calculating housing need. The latest population and household projections will also be used.
	LPPO4591	Green Belt Review	Object	In the Green Belt review, some of the assessment is wrong and coalescence will occur if Option A were to be pursued.	Objection is noted.
	LPPO3269	Evidence base	Object	Conflicting statistics available that state the number of new dwellings required and associated infrastructure is considerably less than is proposed in the Local Plan review. Figures from the ONS suggest that the additional population requirement is more like 100-200 homes per year. The 6,000-home target is completely unnecessary.	The 6,000 figure was calculated from the Objectively Assessed Housing Needs (OAHN) Study which concluded that 300 new dwellings per annum would be required over the plan period. In addition to this there is a requirement for C2 use (i.e. care homes for the elderly). However, since the Preferred Options document was published, the Government has introduced a

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					standardised methodology for calculating housing need. The OAHN study is therefore being updated to use the new standardised methodology and will also use the most up-to-date population and household projection data available. This revised housing need requirement will be used to inform the emerging Pre-Submission Plan.
	LPPO3719	1.22	Object	The evidence presented within the OAHN is flawed as it is not objective but subjective in core areas. The text states that the information has simply been taken into account and does not say how this has been checked, challenged or audited in anyway and exposes the Council to development that is overly stated and unsustainable. Again, the plans are unsustainable and based upon subjective rather than objective evidence.	Objection is noted. The Objectively Assessed Housing Needs Study will be updated using the Government's new standardised methodology for calculating housing need. The latest population and household projections will also be used.
	LPPO3938	1.22 OAHN	Object	<p>The OAHN is fundamentally flawed and ambiguous. It concludes: In conclusion a review of Market Signal data suggests that the housing market across Wyre Forest is relatively stable and that currently there are no indicators prompting a need for adjusting the housing dwelling requirement. However, the Council should monitor comparable data on a regular basis to ensure it has up to date information from which to review dwelling targets.'</p> <p>The Housing and Economic Development Needs Assessments (GOV.UK) states 'There is no one</p>	Objection is noted. The Objectively Assessed Housing Needs Study will be updated using the Government's new standardised methodology for calculating housing need. The latest population and household projections will also be used.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>methodological approach or use of a particular dataset (s) that will provide a definitive assessment of development need. The use of this standard methodology set out in this guidance is strongly recommended because it will ensure that the assessment findings are transparently prepared. The assessment should be thorough but proportionate.</p> <p>In my view, further investigation into the process by which Wyre Forest District Council have arrived at their assessment of housing needs, should take place, in order to comply with the above.</p> <p>The OAHN Report states that the census is a relevant source, which would be the most accurate measurement of growth within Wyre Forest over the past 15 years. This data is then discarded and in replacement it uses arbitrary national and regional figures to arrive at the final growth rate. WFDC are able to utilise census data to inform a growth rate of 3000, which could be accommodated within brownfield sites.</p> <p>8.6 quote ‘We propose that the OAHN should be 300 dwellings per year. The figure sits at the upper end of the dwelling requirements’</p> <p>If the lower end figure of required dwellings were accepted, it could result in up to 100 fewer dwellings required per annum, and could possibly meet anticipated housing need, whilst reducing the</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>requirement for release of Green Belt land. It would also comply with the Council's duty to regularly monitor housing need, as concluded in OAHN Report.</p> <p>The OAHN Report recommends that dwelling requirements per annum are in the region of 199 — 326. WFDC are using the worst case scenario. A further in-depth examination of the figures suggests that the need for land could be reduced.</p> <p>I am concerned that, given the static, ageing population, current available housing stock of 1400 plus dwellings, why a more conservative figure cannot be considered by Wyre Forest District Council. It would appear that, further challenge of the data is required.</p> <p>The Office for National Statistics Sub National Population Projections (SNPP) evidences a growth in population for the period of 4.75 and a requirement of 199 dwellings per annum. This would bring about a reduction of 1818 dwellings over the period bringing the total down from 5400 to 3582. The plan figure of 300 dwelling per year seems to be based on a population growth of 7.7%, which is considerably higher than the last 14 years.</p> <p>8.12 quote 'No cross boundary demands from neighbouring authorities have been identified in current plans. However, discussions are on going regarding a shortfall of provision in Greater Birmingham HMA'</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Is there financial gain for WFDC from Government or other sources to release and trade Green Belt land in order to supply an unknown quantity of dwellings to satisfy an unknown greater than 'local' need?</p> <p>It would seem that the Council have been misinformed by the independent Amion Report and a further review of housing need, at a clearly reduced level of need is imperative, to minimise loss of Green Belt, and provide a robust analysis of housing need.</p> <p>It would appear also that central government require that 'Planning Authorities are required to demonstrate a 5 year land supply for the delivery of housing'. Why therefore is there a need for a 15 year defined supply? Compare Bromsgrove Local Plan timescales.</p> <p>Is therefore the OAHN a report designed to provide an estimated forecast of Wyre Forest District local needs and inform the Wyre Forest Draft Local Plan or has the interpretation of the term 'Local' come to have an entirely different meaning?</p> <p>In conclusion, the OAHN Report is not fit for purpose, is flawed and not objective. It requires further scrutiny and revisiting.</p>	
	LPPO3941	1.22 HELAA	Object	The Wyre Forest Strategic Housing and Economic Land Availability Assessment, 2016 identifies all sites regardless of the amount of development need to provide an audit of available plan.	The HELAA is a technical study which demonstrates the locations and potential capacity of available development sites. In terms of Green Belt sites listed, these reflect (in the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Table J Green Belt Greenfield sites deliverable beyond 5 years and further tables report non deliverable sites beyond 5 years.</p> <p>No reference is made to this data in the Draft Local Plan, or during discussions at ‘drop ins’. There has been insufficient information to provide residents with an audit trail of supporting documents, in order to inform their consideration of preferred options.</p> <p>If the availability of sites is totalled, as referenced in the HELAA, several scenarios can be considered. If the actual need were less than 3697, no Green Belt land would be required.</p> <p>If the OAHN is accurate, then the requirement is calculated at 284 dwelling per annum. The report then rounds up this number to 300 dwellings per year.</p> <p><i>This simple unjustified action requires the building of 240 dwelling over a period of 15 years. It would appear that a section of Green Belt could be used for housing purely as a result of ‘rounding’ exercise.</i></p> <p>The OAHN Report suggests an annual dwelling requirement of between 199 and 291 (Table 3.2) with further flexing there is partial return to 2008 Headship rates giving 239-332 (Table 3.4) 199 is derived from the Office for National Statistics Sub National Populations</p>	<p>main) those pieces of land that have been put forward by landowners. The sites listed in Table J are Greenfield sites in the Green Belt which could only be released for development if taken out of the Green Belt via the Local Plan process. The totals given for each category of HELAA site are estimates (other than those sites with permission in place) and there is no guarantee that all these sites could come forward for residential uses. In fact, the status of a number of sites listed has changed and an updated HELAA document will be available alongside the draft submission. This will also include additional sites submitted at Preferred Options consultation.</p> <p>The HELAA is just one of a number of pieces of technical work used to select sites to go into the final submission document. A site selection paper will be submitted alongside the final document which will explain how the many different factors were weighed up in order to come up with a final list of sites.</p> <p>The OAHN is being refreshed using the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Projections (SNPP) 2014.</p> <p>Our population is acknowledged as 'static'. In the Draft Local Plan Section 6A, 300 dwellings is assumed, but if we take PG Short Term data which indicates a population increase of 5.8%, this equates to more than double the rate in recent times and requires only 229 dwellings per year, 1278 less than figures suggest. There would therefore be no need to sacrifice the Green Belt to the rear of Spennells.</p> <p>Section 4.16 indicates that due to ageing population, economic activity and employment are projected to decline.</p> <p>Cambridge Econometrics suggest an increase in jobs of 76 per year. Oxford Economics suggest increase in jobs of 2 per year.</p> <p>Experian suggest -61 per year.</p> <p><i>The above, seemingly inconsistent findings would suggest they do nothing to inform the process and should be discounted.</i></p> <p>It would appear that, even if we assume population growth figures equating to more than double, when compared with trends from 2001-2015, we do not need to consider the use of the Green Belt land, with particular reference to the fields at the rear of Spennells. By assuming this growth level and in reducing the vacant dwelling % to current levels, there would be a need for</p>	Standardised Methodology and the latest population data.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>3243 dwellings over the period, which would equate to 180 per year.</p> <p>It is my view that, after careful consideration of information sources available, that WFDC should undertake a comprehensive review of the Draft Local Plan. There are inconsistencies within the OAHN, which if accepted without challenge, could result in discriminatory sacrifice of our of Green Belt areas of the district.</p> <p>Whilst I strongly object to Option A, I believe no presently offered options should be considered or pursued, until further scrutiny and review of housing development need is conducted.</p>	
	LPPO4144	1.22 Issues and Options Responses	Object	<p>Regarding the LPR Issues and Consultation Paper – Responses September 2015 which informed the Draft Local Plan, little was made of this important consultation paper in the Draft Local Plan. Indeed the only reference to it was Under Section 6 – Summary of Issues and Options Responses there is just one point. This does not represent the weight of objections to Option 3 (now Option A): ‘Local opposition from local residents (particularly the Spennells Housing Estate) in respect of an Eastern Kidderminster extension (Option 3) although some support for this approach was expressed from other quarters’.</p> <p>In the opening comments 7 out of 18 were from building</p>	Objection and comments are noted. The consultation responses from the Issues and Options consultation undertaken in 2015 have been used by the Local Authority to inform the emerging Local Plan. The results of the Issues and Options consultation responses were made available on the Council's website during the Preferred Options consultation. However, your comments are noted and it is helpful to have feedback on our consultations so we can make improvements for future consultation events.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>contractors (39%). Only 4 were made by members of public (22%) and comments about difficulty in ordinary people accessing the consultation were made– WFDC comment about leaflet drops. All other questions at least 20% comments are from builders.</p> <p>For Option 1 – all in support of brownfield regeneration</p> <p>For Option 3. Brownfield regeneration focussed on the main towns and expansion of Kidderminster to the south-east via a sustainable urban extension. There were 21 responses, 15 objected and 2 commented negatively – 81%.</p> <p>Question 14 is leading and an example of a leaning towards the WFDC own preferences: Do you think a Sustainable Urban Extension to the south east of Kidderminster is the most sustainable location for greenfield development? If so, do you have any views or suggestions on appropriate development sites in this area?</p> <p>Regarding the actual Draft Local Plan, the “on-line survey of key stakeholders” and interviews with estate and lettings agents, the space in the document allocated to this gives the impression that it was a substantive piece of work, whereas it was not. The survey population is not numerically defined, so a response rate cannot be determined and so the value of the exercise and the representativeness of the answers is limited.</p>	<p>In terms of the various options considered at the Issues and Options stage, the Sustainability Appraisal Report and the Site Selection Paper consider these options in detail and explain why some options were taken forward and others were not in the plan making process.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				Given “25 individuals replied” and confusingly “16 responded to the survey questions” - and anything less than 30 is a ‘small number’ statistically - it is hard to justify the author’s view that it represents “an invaluable view on the current housing market and related issues in Wyre Forest”. This is compounded by 4 interviews conducted with local estate and letting agents. Whilst qualitative information is of value in support of a quantitative survey, the quality of the work on both fronts is so flawed as to render the findings meaningless.	
	LPPO4872	1.22 Green Belt Review	Object	I challenge the validity of the Green Belt Review and the consequences this has, in respect of Option A for the fields between Spennells and Summerfield. These fields have a massive impact upon social amenity, biodiversity and the integrity and identity of the hamlets of Summerfield and Stone	Objection noted.
	LPPO495	1.24	Object	I don't believe that this plan will work. Not sure where the economic growth will come from? Some of the units on Worcester Road that were built a few years ago are still empty. We are in a downturn. The only people that will benefit the development of Green Belt are the developers not people on the housing waiting list.	Objection is noted.
	LPPO3720	1.24	Object	The previous plans from the Council have not achieved sustainable economic growth and this one is no different. It contains unrealistic thinking, takes no account of Brexit with the risk of slowdown in investment together with other wider impacts and risks. There has been no sensitivity analysis conducted to	Objection is noted. A number of evidence base studies have informed the emerging Local Plan, these include the Objectively Assessed Housing Need Study, and the Employment Land Review.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				determine how sensitive each economic factor is to wider impacts to gather a risk appraisal of setting up a grossed up scale of development that will turn out to be damaging to the towns.	
Land Research & Planning Associates Ltd	LPPO537	1.24	Object	<p>Not in terms of proper consideration of adequate or sufficient land for affordable homes. The only way to address this is to release more land around the rural settlements to ensure economic growth is sustained in those areas.</p> <p>Our clients have land at Far Forest that would accommodate this.</p>	Objection is noted.
	LPPO396	1.24	Comment	<p>The plan fails to recognise changes in shopping habits - in particular the failure to 'tidy up' following the migration of Kidderminster town centre to Weavers Wharf and Crossley Retail Park.</p> <p>Many retail premises left behind have been empty for 8 /9 years - half the life of the proposed new plan!</p> <p>There is a need for fresh thinking that enables Kidderminster to become a modern, contained and attractive town centre that incorporates retail leisure and residential opportunities rather than pursue outdated models from the past - 'mixed use' communicates little other than the elements of 'wishful thinking' so often reported in the local press.</p>	Comments noted.
Land Research &	LPPO534	1.25	Comment	Noted. The present Local Plan is becoming increasingly	Comment is noted.

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
Planning Associates Ltd				out of date in terms of housing requirement (5 HLS) because it does not encourage or provide sufficient land to accommodate affordable homes.	
	LPPO157	Whole document	Object	I did not receive official notification of this development planning process, I am not the only one, and the consultation process as it stands is fatally flawed. I received a notification from another local resident who said there was a development planning consultation in process. I suggest that the whole of the notification process be reviewed and the consultation should be re-run when correct open and transparent notifications have taken place.	<p>It is disappointing to read that you are not entirely satisfied with how the Local Plan Review Preferred Options consultation was conducted. There was a full 8 week public consultation which closed on Monday 14th August at 5pm. During this 8 week consultation period we held 8 drop-in sessions across the District for members of the public to come along and have their say. The drop-in sessions were all very well attended. Leaflets advertising the consultation and the drop-in sessions were posted to households within the District, there were also posters displayed in public areas throughout the District and it was advertised on the Council's website, Facebook and Twitter. There were several articles about the consultation in the Shuttle and the Express & Star, and it was also on local radio stations and on the TV news.</p> <p>The consultation event was approved by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet.</p>

					We will however take your comments on board and will consider these issues next time we undertake a consultation event.
	LPPO2310	Preferred Options	Object	<p>My objection is in letter form as your response form is not fit for purpose!</p> <p>A flawed plan with so many inaccuracies and heavily weighted in one direction (totally unfair).</p>	Objection is noted.
	LPPO566	Various	Comment	<p>I accept additional dwellings have to be built however:-</p> <ol style="list-style-type: none"> 1. I understand there is sufficient land already 'available' to satisfy the building needs for the next 10 years, I suggest this stock be exhausted before any additional land be released from the Green Belt. Green Belt land will be easier, cheaper, more profitable for developers thus will be developed before the existing stock of available land. 2. Any affordable dwellings should be reserved for people with connections to the district, i.e. currently live in the district, have close family ties, work in the district etc. 3. A plan that just concentrates on the dwellings is unacceptable. I realise the district council does not have responsibility for roads, schools etc. but plan does not include COMMITMENTS to how the impact on these services is to be met 4. Possibility of an eastern relief road has been mentioned, do not use this as a carrot to 	<p>Comments are noted. Infrastructure providers have been consulted in the Local Plan process. Details of the infrastructure requirements for the Local Plan can be found in the Infrastructure Delivery Plan (IDP).</p> <p>Worcestershire County Council, the highways authority, has also been consulted and they are preparing a Transport Modelling evidence base study. This will inform the site selection process and will help to evidence what highways improvements will be required, and whether an eastern relief road is necessary.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>persuade people to accept the plans only to conveniently forget it in the future, as has happened in the past. I understand the county council has done virtually no work on this proposal therefore it should not be included unless it is a strong PROBABILITY of it happening.</p> <p>5. With regards to the areas of Green Belt to be released, especially the rear of Baldwin Road and to the eastern fringes of Comberton, Offmore and possibly round to the A449, this will be a relatively narrow development with no heart to the development and will therefore place an unrealistic load existing overstretched primary schools, doctors surgeries etc. I can understand the benefits of building to the eastern side of Kidderminster to attract commuters from Birmingham and Wolverhampton. A more centralised development would justify a new primary school, doctors, and have less impact on the surrounding people. The obvious place is Lea Castle.</p> <p>6. Any plan must specify how people are to travel from the new dwellings to the various places they need to visit and their place of work. Not just how they get in and out of the development.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
	LPPO178	Foreword	Comment	<p>Before any future new developments are ever considered, important factors must be resolved now.</p> <p>Hospital care will only increase with an increased population, plus other health provision i.e. doctors surgeries etc. How will hospitals cope?</p> <p>Education provision should be firmly planned for now, not left for a future thought.</p> <p>All on going sites that have been left and not developed should be finished before any green fields are even touched e.g. Sion Hill School, Yew Tree Pub, Broadwaters and Lee Castle Hospital. Sion Hill feeling that the developer hopes he can use Green Belt behind the school.</p> <p>The centre of Kidderminster is a disgrace, now is time have a complete rethink. Many empty retail premises will never ever change back. The area should be developed for both residential and commercial use bringing life back into a dying town, making it a young vibrant area.</p> <p>All roads and transport infrastructure must clearly defined and planned for before any future development go ahead.</p>	<p>Comments are noted.</p> <p>Worcestershire ACUTE NHS trust has been consulted as part of this planning consultation. Any future infrastructure needs for the hospitals will be identified by them as the provider. Policy 12 enables future infrastructure needs to be met.</p> <p>Worcestershire County Council as a statutory consultant has provided evidence on all school place requirements.</p> <p>A number of the sites referred to have been proposed as site allocations, i.e. Sion Hill, Lea Castle former hospital site.</p> <p>In terms of roads and transport infrastructure, we have consulted with the infrastructure providers as part of the Local Plan process to identify their infrastructure requirements. This is evidenced in the Transport modelling work and also the Infrastructure Delivery Plan (IDP).</p>
Shrawley Parish	LPPO1418	Foreword	Comment	WFDC consulted Malvern Hills District Council (MHDC) It	Comment is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
Council				is extremely disappointed that MHDC has not cascaded this down to those villages, such as Shrawley, which have a specific interest in some of the proposals. This remains a concern.	
	LPPO331	AKR/15 and AKR/14	Object	<p>Saddened to see the above fields suggested for development. The views are superb & used by walkers to relax from the hustle & bustle and enjoy the fauna/flora. Dunley Road is already becoming increasingly congested, on Friday mornings especially with the car boot, traffic comes to a standstill as it enters Bridge Street. I fear another high air dioxin area being created. I have witnessed the floods on the fields of Pearl Lane, a known flooding black spot, which is bound to be increased with more housing and hard surfacing. The view from Areley Kings church conservation area will also be worsened if housing sprawl is allowed to encroach along the Ribbesford Road into grade 3 agricultural land.</p> <p>Please make more use of un-kept and run down premises in Kidderminster and Stourport town centres. In Areley Kings the Squirrel Inn, Areley Common, is abandoned as is the former sports centre. Areas around the Tesco Store in Stourport town centre are still unused. The former Parson Chain premises and the "shopping mall" in Bridge Street are not being used. In Kidderminster, there are endless opportunities all along Worcester Street & with the former sugar beet premises and lea castle sites the area is blessed with so many</p>	<p>Objection is noted. The emerging Local Plan has considered the brownfield sites available for development in the District. Evidence of this can be found in the HELAA document and also the Brownfield Land Register. Unfortunately, we do not have enough available and deliverable brownfield land to accommodate all of our development needs.</p> <p>A number of these sites mentioned are already being considered as possible allocation sites, i.e. Parsons chain site, Bridge Street Basins, Lea Castle, and the remaining sites in the former sugar beet premises.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				brown field sites. Please retain the fields for future generations to enjoy.	
	LPPO267	Detailed response	Object	Why build on the Green Belt. There is plenty of 'Brown' land to use i.e. the old power station site in Stourport and the ex British Sugar corp. site in Kidderminster. Indeed there many sites in KR which have derelict and unused buildings which could be used.	Objection is noted. The emerging Local Plan has considered the brownfield sites available for development in the District. Evidence of this can be found in the HELAA document and also the Brownfield Land Register. Unfortunately, we do not have enough available and deliverable brownfield land to accommodate all of our development needs.
	LPPO460	Potential site for travelling showpeople Habberley Rd	Object	<p>I object to the potential use of the site at Habberley Rd, Bewdley on following grounds:</p> <p>I don't consider that the site satisfies the criteria of the council's policy as the requirement is not an exceptional circumstance, it is not suitable for storage and would harm the appearance of the area. An earlier attempt to include an adjacent site was dismissed at an early stage a few years ago on the grounds of Highways concerns re large vehicles accessing the site in an accident black spot close to the Mercure Hotel.</p> <p>The site is currently in a good state and in current use and being close to the afore mentioned hotel and Pines Golf Club could impact on tourism.</p>	Objection and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>There are potential environmental issues - planning permission on adjacent sites have been refused on grounds of proximity of potential bronze age burial mound and encroachment on area separating Kidderminster/Bewdley.</p> <p>Use could not be restricted to one user.</p> <p>Other proposed sites are more suitable.</p>	
	LPPO517	Appendix A	Object	<p>Objection to Use of Green Belt land for housing developments to the of rear Baldwin Road & Spennells Fields, REFERENCE NUMBERS: OC/4, OC/5, OC/6, OC/13, Hurcott BW/4, WFR/ST/2 & AS/10</p> <p>PRECIS</p> <p>Object to the use of Green Belt land for housing development to the rear of Baldwin Road and Spennells fields etc. This would irrevocably destroy the appeal and beauty of the area and bring with it added health, pollution and social problems.</p> <p>Alternative brown field sites are available along with pockets of derelict land ripe for redevelopment.</p> <p>The amount of development required has been vastly overestimated, the actual amount needed could be sustained on alternative brown sites (Lea Castle, disused pubs, disused factories such as those in Park Lane,</p>	<p>Objection and comments are noted. The Objectively Assessed Housing Needs Study will be updated using the Government's new standardised methodology for calculating housing need. The latest population and household projections will also be used.</p> <p>The Preferred Options consulted on a number of site options. The Pre-Submission Local Plan will identify the Council's final proposed list of site allocations. These will then be considered by the Planning Inspector during the examination of the Local Plan.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Sladen/Sion Hill schools).</p> <p>POPULATION</p> <p>For Kidderminster & Stourport the Local Plan seeks to bring in population from outside areas. Such a population would no doubt work outside the area adding to traffic pollution. New affordable houses should be earmarked for local people trying to get on the property ladder.</p> <p>Restrictions should apply so the intended “local people” actually become the purchasers as opposed to those not intended for when built. Instead we predict the bulk of development will be 4/5 bedroom houses with tiny gardens, ignoring what local people want. These developments provide little green space for community wellbeing and habitats for nature. Conversely, Bewdley, Chaddesley & other villages are required to provide "housing to meet local needs." Why the difference?</p> <p>We question the need for 300 houses p.a. which is based on a growth rate of 7.7% & not the actual 2.7% (2001-15) which is way below the national average used to arrive at the large figure required. The true figures based on Kidderminster's census figures could easily be accommodated in brown sites like Lea Castle.</p> <p>These growth rates figures are based on assumptions prior to the Brexit vote which will impact reducing the</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>migration of European people to this county that would have had a housing requirement. The predicted growth rates are fundamentally flawed in many ways meaning the migration to this area will be greatly reduced therefore the growth rates cannot be used to predict the requirements for housing growth required in the WFDC area.</p> <p>POLLUTION</p> <p>Development of these areas would substantially increase the already heavy traffic pollution. We have seen a steady increase in an unacceptable level of traffic (including a lot of very large commercial vehicles) on these residential roads to avoid the lights at Birmingham Road. We have monitored the traffic and the amount of use is large and mainly by non residents travelling to the West Midlands! Also the speed of this traffic is seriously dangerous, especially to children, the vulnerable and animals. This development would further impact on air quality and is contrary to National Planning Policy Framework especially para. 109-124. Add to this an increase in the already incessant traffic noise levels.</p> <p>The proposed development to the rear of Baldwin Road infers that Hurcott Lane will require the road to be blocked for vehicle access at either the Birmingham Road or Stourbridge Road ends but this will not prevent traffic flow just divert more traffic into Hurcott Road increasing pollution and volumes of traffic on roads only</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>designed for local residential traffic which have inadequate flow characteristics.</p> <p>This is not a healthy and community spirited decision to develop the area and increase traffic on our already overused residential roads which are being used akin to A roads. Baldwin Road is similarly treated like a rat run and as for the Horsefair how much more can this bottle neck sustain? We are trying to improve the look of this run down area not destroy it and end all hope of engendering a happy community spirit. Extra housing would require a by-pass to be built as the aforementioned roads just cannot sustain more traffic and the pollution it brings.</p> <p>WILDLIFE</p> <p>The area is known and loved for its beauty and wildlife. It is treasured by local folk and visitors. Green Belt plays an aesthetic role in separating the town from the West Midlands conurbation and these green fields are the first introduction to Kidderminster on the A451 and A456. Do not bulldoze this asset as safeguarding the district's Green Belt preserves its attractiveness to both locals and visitors. Consider the importance of recreational activities in terms of health, wellbeing and tourism. People need space to thrive but its unlikely developers would provide sufficient open spaces or parks as there's no money in it! Compared with neighbouring towns like Stourbridge we are lucky to</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>have such big green spaces. Don't destroy it for future generations when alternative brown or derelict sites are available.</p> <p>Endangered species and wildlife in general would be threatened. In our garden we have seen bats, newts, badgers, a heron and dragonflies. Development would seriously impact and cause irrecoverable change to wildlife habitats especially on buffer zones for Hurcott and Podmore SSIs.</p> <p>Some proposed development sites have steep gradients which could raise the risk of potential flooding. The proposed development behind Baldwin Road has the potential to flood, on one side with run off towards the Birmingham Road with a natural hollow in the main road and on the other side run off towards the lower end of Hurcott Road where it is a narrow lane which in turn would run off into the outfall from Hurcott Pool and transfer to Broadwaters with the potential for flooding the adjacent main road.</p> <p>Land to the rear of Offmore and Baldwin Road is generally much higher than the rest of the area so any development would be very visible and not blend in spoiling the beauty of the area. The field height to the rear of Baldwin Road means that the proposed properties would adversely overlook the existing properties & their gardens at the lower end of Baldwin</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Road.</p> <p>The Government's own policy regarding planning decisions is to prevent harm to biodiversity and geological interests. In brief all planning decisions must consider location on alternative sites to green fields.</p> <p>AMENITIES and COMMUNITY SPIRIT</p> <p>We suffer from a lack of amenities in this area. One shop in which our post office was taken off us. A smattering of shops in Spennells and Offmore. Can local schools accommodate extra housing on this level? Offmore is already full and can't be developed. We no longer have an acute hospital so all this extra population would place more pressure on Worcester Royal already facing special measures. This also raises questions with regards the existing level of doctors, dentists and opticians in the area. Public transport is poor and infrequent.</p> <p>Big developments generally have no community spirit. Building on smaller pockets of land fosters integration. Large sprawling estates increase social isolation, antisocial behaviour and crime rates as acknowledged by the WFIDP. Doubling the size of Spennells would not be a wise move.</p> <p>CONCLUSION</p> <p>We need smaller numbers of houses proposed which</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 1: INTRODUCTION AND CONTEXT

Company / Organisation	ID	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>can be sustained by brown sites like Lea Castle. Smaller pockets of once used land should be considered like factories on Park Lane, closed pubs (The Broadwaters?) closed schools like Sladen and Sion Hill.</p> <p>We need to reinvigorate existing eyesores such as disused schools & factories which are frequently vandalised and this will improve some of the more rundown areas rather than permanently erode Green Belt sites, which once gone they are gone forever.</p> <p>Don't bulldoze Green Field sites prior to using up every brown field or derelict site in the locality.</p>	
	LPPO634	Foreword	Object	You state that the Council believes that it is very important that everyone responds to this consultation	Objection is noted.
CORE11	LPPO135	Foreword	Support	Support for Foreword.	Support is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
	LPP0345	2.1	Comment	If we extend planned developments to our Green Belt areas, you are going against what you have said in this paragraph and not continuing to make the most of brownfield regeneration; an example of this is Westhead, which I can find no mention of any plans for.	Previous policy has concentrated development on brownfield land, however, much of the brownfield land has now been developed. The policy of the Council is for the development of brownfield sites however, the amount of housing required within Wyre Forest District is much greater than the availability of brownfield land. Therefore greenfield sites and Green Belt land needs to be considered.
	LPP0397	2.1	Comment	Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collectively review overall brownfield site availability and plan housing development accordingly. Artificial borders should not apply when making decisions to destroy the Green Belt.	The authorities are all separate authorities who are at different stages in the local plan process. Wyre Forest District has its own housing market which is separate from the other authorities housing market areas. In Wyre Forest District there has been as assessment of brownfield sites and there is a brownfield land register.
	LPP0420	2.1	Comment	Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collectively review overall brown field site availability and plan housing development accordingly. Artificial borders should not apply when making decisions to destroy the Green Belt.	The authorities are all separate authorities who are at different stages in the local plan process. Wyre Forest District has its own housing market which is separate from the other authorities housing market areas. In Wyre Forest District there has been as assessment of brownfield sites and there is a brownfield land register.
	LPP0346	2.2	Comment	The relatively static population would suggest	The Local Authority has evolved their strategy

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
	LPPO348	Transport	Comment	I would disagree and say that Cookley does not have reasonable transport as this service is temporary and does not run after 6pm. The continuation of the existing bus service is vital to numerous residents who feel isolated due to lack of transport facilities. The continuation of a temporary bus service is vital to numerous residents who already feel isolated and cannot visit or go for a night out away from the village for fear of missing the last bus home.	Cookley is not as well served as Kidderminster in terms of bus services however it is much better served than the villages in the west of the district. Cookley is very well served in terms of facilities including retail.
Land Research & Planning Associates Ltd	LPPO539	2.7	Comment	<p>The reason that areas like Far Forest and similar rural settlements have fewer facilities is because the local plan structure of the past Local Plans has continued for over three decades containing each of these settlements with a tightly drawn settlement boundary or none at all. This has had an unhealthy constraint and discouraged growth so that young people can remain locally.</p> <p>PPG001 has not been followed in this PO document. Rural settlements growth should be encouraged. This document particularly Option A does not deal with this.</p>	Comments noted.
	LPPO2410	2.9	Object	Para 2.9 notes the poor air quality at Welch Gate Bewdley, yet this apparently intractable and severe problem does not appear to have been considered in the Council's preferred options. Until, or if, the air quality is improved	Both the AQMA's and Green Belt are taken into consideration when assessing sites. A comprehensive Green Belt review has been carried out as part of the evidence base studies for the emerging Local Plan.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>to at least acceptable standards, there is no scope for increasing housing in Bewdley on the west of the river, as this will inevitably increase traffic (regardless of the nature of the housing) and hence exacerbate the poor air quality.</p> <p>This paragraph also notes the importance of protecting, conserving and, where it is possible to do so, enhancing the District's rich natural environment and historic assets. This does not appear to have been taken into account sufficiently in relation to proposed development of Green Belt. In my view, it is also important, for maintaining the distinctiveness of each of the two towns, to preserve the current area of Green Belt between Bewdley and Kidderminster.</p>	
	LPPO2934	2.9	Object	<p>Policies of the Local Plan Review do not seem to require flexible design and layouts 'future proofing' development so as to take account of important population changes such as 'ageing' over the plan period.</p> <p>Although the LPR states (1.19) that Wyre Forest housing market 'constitutes a self contained Housing Market Area', considering the statistics at table 8.0.4 and 2.9 the social issues of</p> <ul style="list-style-type: none"> • static population growth; 	<p>Design and layout of residential sites will form part of the planning application for a site.</p> <p>Comments noted.</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<ul style="list-style-type: none"> • a very high proportion of resident aged 65+ • the need to ensure that residential development caters for all groups in society’, <p>It makes limited proposals for how this apparent lack of appropriate housing mix could be achieved (8.16, beyond bungalows for the 65+ age group). Higher quality homes and those that 65+ might be prepared to downsize to are not represented in any detailed way, although affordable housing is mentioned. Para 6.9 only refers to what ‘might’ happen, rather than what ‘will’ happen-seeking to address the management of supply in all its house-type range/ownership, via approved policies that follow through from the comments of 8.16. Where are adaptability for the future and building codes?</p>	
	LPP03670	2.9	Object	<p>2.9: How can you ensure that working age people will work in Kidderminster? You have shown no evidence of the employment for these people. Their employment will continue to lie outside of the area. How can you ensure that there will be the professional, manufacturing, employment needs required other than small retail outlets which will not be sufficient to grow the town as you suggest.</p> <p>The evidence you provide will not create</p>	<p>It is not possible to ensure that residents work in Kidderminster however by allocating land for employment purposes means job creation within the District which may encourage residents to work in the District.</p> <p>The 2016 Employment Land Review found that the majority of residents living in Wyre Forest District also work in the District.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				enough quality employment in the key areas to enhance the town as you suggest.	
	LPPO398	2.9	Comment	<p>This section describes attempts to 'engineer' the make up of the population rather than address residents' needs.</p> <p>The focus needs to be on recreating the attractive Kidderminster town centre we once had - and thereby present Kidderminster to potential investors as a proactive and forward thinking authority rather than one in denial e.g. a council member recently describing Kidderminster as having a 'thriving' town centre when interviewed by Central News.</p> <p>The council would benefit from independent advice on how to regenerate to meet modern needs.</p>	<p>The Local Authority has considered alternative uses to retail in the town centre to enhance vitality.</p> <p>Policies consider alternative uses in the town centres. Policy 22A - In secondary shopping areas, support will be given for change of use of retail units to alternative uses such as leisure, recreation, employment and residential.</p>
Wyre Forest Friends of the Earth	LPPO1306	Public Transport	Comment	In the previous consultation the respondents' highlighted "Very poor public transport" Developing sustainable transport over the plan period will be difficult because of the current low levels of investment in public transport particularly the bus service.	Comments noted.
Wyre Forest Green Party	LPPO1407	2.10	Comment	The previous consultation highlighted respondents' issue with "Very poor public transport" Developing sustainable transport over the plan period will be difficult because of	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				the current low levels of investment in public transport particularly the bus service.	
	LPP02729	2.10	Comment	Comment - Key Issues and Challenges - paragraph 2.10, page 16 - A lot of people will resist the development of Green Belt sites as long as there are brownfield sites which haven't been built on. A policy needs to be put into place that ensures that all brownfield sites have been built on prior to any construction on Green Belt land. Brownfield sites simply being 'earmarked' for construction is not enough since many sites have been earmarked for development for some time without much in the way of progress being made.	Wyre Forest District Council has to allocate greenfield or Green Belt sites as there are not enough brownfield sites left, however, it is not within the power of Wyre Forest District Council to make developers develop brownfield sites before greenfield.
	LPP01756	2.10	Object	<p>Objects to building on Green Belt. Concerned about traffic, pollution, impact on health, animal habitats and the natural environment.</p> <p>Concerned about being saturated with continual housing that has an impact on crime rates and house prices.</p> <p>Strongly objects to both Plan A and Plan B.</p>	<p>Wyre Forest District Council has to allocate land for development. If the Local Plan was not reviewed and the Council did not have a 5 year housing land supply developers could apply for planning permission anywhere in the District.</p> <p>The Local Authority has evolved their strategy for development based on evidence. This includes an Employment Land Review (ELR) and Objectively Assessed Housing Need (OAHN) both in 2016 and updated in 2018 and supported by the Sustainability Appraisal.</p> <p>The policy of the Council for many years has been to build on brownfield land but there is not</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					enough left and so greenfield and Green Belt sites have to be considered.
	LPP02726	2.10	Object	Table 2.10 details that there are very poor public transport services and high traffic density. Therefore whichever option is provided, these need to be addressed, otherwise it is not local planning but letting local market demands drive developments.	2.10 are the comments received from respondents from the Issues and Options consultation. Sites in the emerging Local Plan have been considered by the highways department at Worcestershire County Council.
	LPP0289	2.10	Support	Support for para 2.10	Support for paragraph 2.10 is noted.
CORE11	LPP0149	2-10	Support	Support for paragraph 2.10.	Support for paragraph 2.10 is noted.
	LPP036	Leisure facilities	Comment	<p>If more people are to be encouraged to use the swimming pool and gym, why was it</p> <p>a. Built in such an out of way place with no public transport facilities and</p> <p>b. a small car park. The only way people can get there is to use their cars, and if the car park is full, the only option is to park on the road.</p> <p>At least in the centre of town it was easily accessible to all people, including children who could walk or use public transport to get to it, but now they haven't any means to accessing it.</p>	<p>The position of the leisure centre is serviced by the Route 1 Kidderminster circular service, a half hourly service, from Kidderminster bus station. Passengers are able to flag down a bus immediately opposite the leisure centre.</p> <p>The Council have sought planning permission for the car park at the leisure centre to be extended to increase the parking available to users of the leisure centre.</p>
	LPP02165	Social and	Comment	The district council seems to be indicating that	Comment is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
		Economic Issues		<p>in order for the area to prosper, we as a community need to encourage working age families to the area so that there is a better balanced 'Circle of Life' in the area.</p> <p>This makes sense. There does need to be room to allow younger generations to come through and make Wyre Forest an aspirational place for them to live.</p>	
Wyre Forest Green Party	LPP01406	Table 2.0.1	Comment	The Horsefair Air Quality Management Area (AQMA) extends well beyond the Horsefair. It includes the Ringway to its junction with Coventry Street and includes Coventry Street to the junction with Radford Avenue. This is important when considering the impact of additional traffic.	Both proximity to the AQMA's and traffic impact are considerations that are taken into account when assessing sites.
	LPP0288	Table 2.0.1	Comment	<p>Population age profile is not surprising given the lack of work and training opportunities. Opportunities need to be created to address this issue.</p> <p>Looking at the retail profile, Wyre Forest is seen as a low wage area and therefore one generally has to travel to other areas for better quality options.</p>	<p>The age profile shows that the District has an ageing population and fewer numbers of young people due to the lower birth rates.</p> <p>Wyre Forest District does have a lower wage area, employment land will be allocated through the Local Plan which may give more employment options within the District.</p>
	LPP0474	Table 2.0.1	Comment	I wish to highlight the phrase "Virtually static population growth".	The Local Authority has evolved their strategy for development based on evidence. This includes an Objectively Assessed Housing Need

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					<p>(OAHN) in 2016 and updated in 2018.</p> <p>Between 2001 and 2011 the population in Wyre Forest District increased by 1.1%, the population increased by a further 1.1% from 2013 to 2015, and a further 1.1% between 2015 and 2017. The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036[1].</p> <p>[1] ONS 2016-based Subnational Population Projections</p>
	LPPO502	2.9	Comment	<p>Why do we need 5400 houses built as the population is static? Older people do not want to move from their homes where they have lived in for many years. I work with older people and it becomes very important that people with memory loss stay as long as possible in familiar surroundings.</p> <p>As Weavers Wharf was developed the rest of the older town centre has started to die. New developments do not mean that the Town improves it just shifts the money from older established retail outlets to those that have a national feel and a tight marketing strategy behind them.</p>	<p>The Local Authority has evolved their strategy for development based on evidence. This includes an Objectively Assessed Housing Need (OAHN) in 2016 and updated in 2018.</p> <p>Between 2001 and 2011 the population in Wyre Forest District increased by 1.1%, the population increased by a further 1.1% from 2013 to 2015, and a further 1.1% between 2015 and 2017. The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036[1].</p> <p>The Local Authority has considered alternative uses to retail in the town centre to enhance</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				Once you allow the development of the Green Belt on the Eastern part of the town it will not suddenly give higher grades to students, lower body mass index of school children or raise wages. It will give developers more money, it will cause even greater transport problems as most people work outside of Kidderminster, And the Green Belt will be lost to all for ever. The environmental 'look' driving in to Kidderminster from Blakedown will be very different. Biodiversity will be reduced.	vitality. Policy 10B and Policy 22A consider alternative uses in the town centres. Policy 22A - In secondary shopping areas, support will be given for change of use of retail units to alternative uses such as leisure, recreation, employment and residential.
Worcestershire County Council, Planning Economy & Performance	LPPO1075	Table 2.0.1 2.9	Comment	<p>Table 2.0.1 in section 2.9 correctly highlights that population growth in Wyre Forest district is not going to be high over the next 20 years, and that a high proportion of residents are aged 65+.</p> <p>Between 2016 and 2026, there is likely to be a significant increase in people aged 75+. Due consideration therefore needs to be given to the needs of an ageing (and elderly) population and their needs particularly as people are not only living longer but are also living longer with poor health or complex health issues.</p>	<p>Comments noted.</p> <p>The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036^[1]. There will be a marked increase in the number and proportion of older residents. The population aged 65+years is expected to increase by 28.1% from 24,200 in 2016 to 31,800 in 2036^[2].</p> <p>A major strategic challenge for the Council is to ensure a range of appropriate housing provision, adaptation and support for the District's older population. The number of people across the Wyre Forest aged 65 or over is projected to increase significantly during the Plan Period, from 24,200 in 2016 to 31,800 by 2036 (31.4%</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					increase) The increase in the population aged 80 or over is considerable, rising from 5,900 to 11,200 persons during the period 2016-2036 (89.8% increase). [1] ONS 2016-based Subnational Population Projections [2] ONS 2016-based Subnational Population Projections
Historic England	LPP01262	Table 2.0.1	Comment	Within the table relating to environmental issues we would recommend that 'historic assets' is amended to 'heritage assets' to comply with National Planning Policy Framework (NPPF) terminology.	This has been amended in line with the comments.
Wyre Forest Friends of the Earth	LPP01305	Environmental Issues	Comment	The Horsefair AQMA extends well beyond the Horsefair. It includes the Ringway to its junction with Coventry Street and includes Coventry St to the junction with Radford Avenue. This is important when considering the impact of additional traffic.	Both proximity to the AQMA's and traffic impact are considerations that are taken into account when assessing sites.
	LPP0324	2.0.1	Comment	No plan seems to account for social issues. We need parks and open space to encourage activity for all age groups.	Comments noted.
Land Research & Planning Associates Ltd	LPP0533	2.8 - 2.9	Comment	There is a substantive area to the west of WFDC area that is not Green Belt that could accommodate some more housing around the	Comments will be considered.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>smaller settlements where landowners are willing to allow say at least 50% affordable homes or starter homes. This would accommodate a considerable amount of the shortfall and help sustainability to rural areas.</p> <p>PPG 001 states that Rural Settlements should be allowed development in order to remain alive and sustainable. This does not appear to be the case in this PO document either for OPTION A or B.</p>	
	LPP0350	Aging population	Comment	<p>As you state, we have an aging population and these residents may need smaller affordable accommodation. Large scale developments could put them in danger of being priced out of the market and a low level supply of affordable rented accommodation.</p> <p>Therefore not catering for our communities needs.</p>	Wyre Forest District Council wants to ensure that developments have a range of size of dwellings to cater for communities including an ageing population. The Council also wants a range of affordable accommodation including affordable rented accommodation.
	LPP0354	Table 2.0.1	Comment	<p>If the population growth is 'virtually static', why the need for so much development?</p>	<p>The Local Authority has evolved their strategy for development based on evidence. This includes an Objectively Assessed Housing Need (OAHN) in 2016 and updated in 2018.</p> <p>Between 2001 and 2011 the population in Wyre Forest District increased by 1.1%, the population increased by a further 1.1% from 2013 to 2015,</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

					and a further 1.1% between 2015 and 2017. The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036[1]. [1] ONS 2016-based Subnational Population Projections
Land Research & Planning Associates Ltd	LPP0540	2.0.1	Comment	Needs thinking in how to ensure young persons are and can be accommodated in local rural areas/settlements. The opportunity exists to allow rural settlements away from the Green Belt to expand and thrive. We are now starting the age of the ELECTRIC CAR and transport or similar types of energy to promote this. Electric charging can now take place at home. The majority of the population use a motor car. The need of the use of the motor car meaning development is not sustainable is now outdated and is not good argument in respect of the lack of sustainability and fresh thinking on this is urgently needed.	There is a cost involved owning an electric vehicle or a petrol/diesel vehicle, many people cannot afford a car and are dependant on public transport so sustainability is relevant.
	LPP02935	East of Kidderminster (S)	Comment	The LPRPO document states "Virtually static population growth", so why is the plan suggesting an extra 6000 plus houses?	An Objectively Assessed Housing Need (OAHN) to assess the number of dwellings required was carried out in 2016 and updated in 2018. The population increased by 1.1% (2001-2011), however the population increased by a further 1.1% from 2013 to 2015, and a further 1.1%

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					<p>between 2015 and 2017.</p> <p>The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036^[1]. There will be a marked increase in the number and proportion of older residents. The population aged 65+years is expected to increase by 28.1% from 24,200 in 2016 to 31,800 in 2036^[2].</p> <p>Agree that the elderly may want to downsize and this would free up larger family homes, however this does mean that some suitable accommodation for the elderly may need to be built.</p> <p>^[1] ONS 2016-based Subnational Population Projections</p> <p>^[2] ONS 2016-based Subnational Population Projections</p>
	LPPO2962	Table 2.0.1	Comment	<p>Loss of recreational land/long-term air pollution will put further stress on the local healthcare system</p> <p>Building on large areas of the Green Belt will also increase the possibility of flash floods and drainage problems</p>	<p>The Local Authority seeks to protect Green Belt as much as possible, however, however additional development is required based on evidence which includes an Employment Land Review (ELR) 2016, updated 2018 and Objectively Assessed Housing Need (OAHN)</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 2: KEY ISSUES AND CHALLENGES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					<p>studies 2016, updated 2018.</p> <p>The location of Air Quality Monitoring Areas (AQMA's) are considered when possible sites are assessed.</p> <p>The emerging Local Plan seeks to ensure that residents can access open space by footpaths and cycle ways for their health, well being and fitness.</p>
	LPP04048	Table 2.0.1	Comment	<p>Page 14, Para 2.9 Table 2.0.1 <i>“Although population static, there has been a 9% increase in the number of households as the number of residents per unit of accommodation is falling”</i>. Over what period of time? What where is the evidence?</p>	<p>The information is from household projections (2012-based) which show that in Wyre Forest District, the number of households is predicted to grow by 9% 2012-2037.</p> <p>Over the same period, the average household size in Wyre Forest is projected to fall from 2.25 to 2.12. 2.32 to 2.18.</p>
	LPP04171	Table 2.0.1	Comment	<p>The WFDC Consultation Document states that the district has “virtually static ‘population growth’ and ‘. Has a low level of in-migration’ This is confirmation that there is no strong demand for the proposed quantity of new housing. This lack of demand is further confirmed by the fact that the average paid house price in Worcestershire is £244,562, whereas in Kidderminster it is only £201,124. The document later states that there is a</p>	<p>Between 2001 and 2011 the population in Wyre Forest District increased by 1.1%, the population increased by a further 1.1% from 2013 to 2015, and a further 1.1% between 2015 and 2017.</p> <p>The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036[1].</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				growing population. As there is little or no natural growth, in my opinion, any sudden increase would have to be fuelled by in-migration from an undisclosed agreement with Birmingham to accept overspill.	[1] ONS 2016-based Subnational Population Projections
	LPP04710	2.0.1	Comment	<p>From Table 2.0.1 - Virtually Static Population Growth.</p> <p>This means that there is no need for large developments of housing to satisfy local need. Although conceding that some development may be needed to accommodate the 9% increase in the number of households due to the number of residents per unit of accommodation falling. However this would be nothing like on the scale that is envisaged. If large developments are constructed it is inevitable that the majority of the houses will be sold to people moving in from outside the area. These will most likely already have jobs outside the immediate local area in places such as Birmingham and Worcester. This will inevitably lead to more commuting, largely by car. There is, quite rightly, much concern at the moment about pollution and air quality a high proportion of which is from motor vehicles. Environmentally this is very bad. We should be encouraging people to live close to their places of work, where sustainable means</p>	<p>An Objectively Assessed Housing Need (OAHN) to assess the number of dwellings required was carried out in 2016 and updated in 2018.</p> <p>The population of Wyre Forest District increased by 1.1% from 2013 to 2015, and a further 1.1% between 2015 and 2017. It is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036[1].</p> <p>Changes in retail patterns have had a detrimental effect on Kidderminster town centre. The Local Authority has considered alternative uses to retail in the town centre to enhance vitality.</p> <p>Policy 10B and Policy 22A consider alternative uses in the town centres. Policy 22A - In secondary shopping areas, support will be given for change of use of retail units to alternative uses such as leisure, recreation, employment and residential</p>

				<p>outside the area currently in employment elsewhere increasing out of district commuting.</p> <p>Under Key Issues and Challenges Economic Issues for Wyre Forest it states</p> <p>“Other areas of the town centre which have been traditionally retail could change to other uses and the primary shopping area could be redefined.”</p> <p>Since the development of Weavers Walk the main retail centre has shifted and much of the old retail area is run down and underused. I would strongly support some of this having change of use from retail to either residential, or mixed use residential/commercial and the construction or adaption of existing buildings either completely or partially (above retail/commercial) outlets into flats. This could at least partially meet the 9% extra predicted local need. As this increase is due to the occupancy rate of existing accommodation falling much of this increase would be for couples or single people who would not need larger family homes. Many of these are likely to be older people who would appreciate being within walking distance of the amenities and facilities that a revitalised town centre could</p>

				provide.	
	LPP02724	Table 2.0.1	Object	<p>Table 2.01 highlights the social and economic issues affecting the district.</p> <p>Clearly the economic issues impact the social issues, and therefore these should be given priority when considering district planning. Therefore planning for businesses should be given paramount attention. West Midlands Safari Park and Severn Valley Railway being high profile businesses that can create inward migration that will cascade to the smaller local businesses. It is also paramount that strategic planning takes full advantage of HS2 investment, as if not fully planned and delivered initially there is no second chance. So high profile lobbying needs to be done now, so we don't miss out on this huge national investment.</p> <p>This is particularly relevant when the qualification levels at GCSE and above require improvement. This can only be done with commitment in the form of structure educational planning and resources provision.</p>	Social, economic and environmental issues are all linked so these three issues all need to be taken into consideration in the emerging Local Plan.
	LPP01682	Table 2.0.1	Object	<p>1. states “Virtually static population growth” which negates the need for a massive number of houses. Smaller numbers as identified by table 2.0.1 for</p>	The Local Authority has evolved their strategy for development based on evidence. This includes an Objectively Assessed Housing Need

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
CORE11	LPP0150	3-1	Support	Support for paragraph 3.1.	Support is noted.
	LPP0435	3.0.1. Para iii	Comment	<p>Kidderminster town centre has a large proportion of retail outlets that remain unoccupied and are not maintained - this has been the case for a number of years.</p> <p>Are there any plans to convert unused town centre retail or unoccupied property to housing use? If not, why not?</p>	Comments noted. The council works with Empty Property owners who want to bring properties back into use and would support conversion of units where it is appropriate to do so.
CORE11	LPP0151	3-3	Support	Support for paragraph 3.3.	Support is noted.
Land Research & Planning Associates Ltd	LPP0544	3.4	Comment	Insufficient land is proposed to satisfy the severe critical shortage of affordable homes.	Comments are noted. The OAHN Study published in April 2017 identified the housing need for Wyre Forest District for the plan period. This study informed the level of new housing development that would be required in the district, including affordable housing. The proposed site allocations presented in the Preferred Options document were informed by the evidence in the OAHN study. Since the Preferred Options consultation, the Government has published their new Standardised Methodology for calculating housing need. The OAHN study is therefore being revised and will use the Governments new Standardised Methodology. The final selection of site allocations in the emerging Local Plan will be based on this revised

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
					OAHN study.
	LPP02413	3.4	Object	Para 3.4 makes clear that the plan should set out a clear economic vision and strategy for the area, which positively and proactively encourages sustainable economic growth. I cannot see such a vision and strategy reflected in the preferred options. And, again, recent developments have shown WFDC to be too ready to accept developments offering only poor quality, low paid employment while sacrificing other objectives. I cite again the planning approval for the water park on Green Belt at the Safari Park as an example here. The plan provides rhetoric of a limited ambition for the area, but fails to convince that even these modest aims would be likely to be achieved.	Comments are noted.
	LPP0436	3.4 para d)	Comment	What is the percentage buffer to be incorporated into the 5 year housing plan by WFDC? How have WFDC performed in the past?	The percentage buffer is set out in the NPPF, para 47 where it states that in order for LPAs to boost significantly the supply of housing LPAs should “identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5% (moved from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to

				programme of insulating older properties and building energy efficient new homes would reduce fuel bills and bring energy demand to a level which could be substantially locally generated.	
Persimmon Homes Limited	LPP01598	Table 3.0.1	Comment	<p>The vision and objectives should relate to the local area and aim to meet the expectations of national policy and guidance. The NPPF is clear about boosting housing supply in Local Planning Authorities areas to ensure that areas can continue to grow in a sustainable way.</p> <p>Aim should be an aspirational but realistic vision of how the Council wish to promote sustainable growth in the District. First bullet point to “maintain their distinctive and separate identities.” could be more positively worded to allow for the idea that growth can occur in the District in a planned and sustainable way.</p> <p>Fifth objective states that Bewdley will remain a thriving market town which meets the local community need. The overall vision for Bewdley needs to be more positive towards growth of housing to attract the people that it needs.</p>	Comments are noted.
Taylor Wimpey West Midlands	LPP01711	Table 3.0.1	Comment	Vision broadly supported. The Vision envisages that new development is properly supported by the timely provision of suitable infrastructure. Taylor Wimpey recognises that the delivery of	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				new infrastructure will be necessary to support new development to mitigate for needs arising from new residents and the opportunities that may exist for assisting in delivering strategic infrastructure projects that have a far wider benefit to businesses and residents within the District and could assist in addressing a number of the highlighted issues.	
	LPP037	2034	Comment	Nobody can tell how Wyre Forest will look in 2034. I have been here 36 years and have seen Kidderminster transformed from a well established, pleasant living area to a run down and derelict slum.	Local Plan documents always include a vision for the area that they are aiming to achieve by the end of the plan period. The NPPF in para 150 states: “Local Plans are the key to delivering sustainable development that reflects the vision and aspirations of local communities.” It should reflect a collective vision for the sustainable development of the area. It should be aspirational but also realistic.
	LPP0251	question	Comment	Great vision! But will it happen? Not if you carry on with your present methods i.e. compulsory purchase of an old established business (Lloyds Garage) then knock it down and do nothing with the land! Except turn it into the most expensive rubble car park in the midlands. Do something about Buftons/the shopping mall on the north side of bridge street, this building has been empty for about 20 years, it looks an	The Lloyds Garage site that is referred to in this response is the proposed site allocation AKR/1 – Bridge Street Basins. The Buftons site is in the HELAA document and has therefore been considered as part of the Local Plan Review process.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				eye sore that and the rubble car park make a complete mockery of your so called plans for improvement to the area.	
	LPP0399	3.1	Comment	This is nothing short of what I'd expect in 2017.	Comments are noted.
	LPP0421	3.0.1	Comment	This is nothing short of what I'd expect in 2017	Comments are noted.
Land Research & Planning Associates Ltd	LPP0541	3.0.1	Comment	<p>Part (i.)</p> <p>In respect of "The outlying villages have grown organically to meet their own needs"</p> <p>Unless settlement boundaries are expanded to facilitate further housing this will not happen. Where landowners are willing to provide land for up to 50% affordable homes and/or starter/self build homes to allow outlying villages to remain sustainable, and/or could incorporate further facilities such as a local shop/primary school or similar included then a Policy should be considered and adopted to allow such expansion.</p>	The emerging Local Plan has sought to identify possible sites for future housing allocations. Policy 18B also considers small scale residential developments on infill plots within the settlement boundaries of the three main towns and villages.
The Woodland Trust	LPP0531	Vision	Comment	We welcome the reference to the importance of green infrastructure in the vision for Wyre Forest. We would like to see the importance of trees and woods, as an important component of green infrastructure, recognised in the vision. Trees, in a variety of locations (e.g. street trees,	Comments are noted. Trees and woodland have been recognised in our emerging policy on Green Infrastructure (i.e. Policy 11D and Policy 14).

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				trees in parks and housing areas and in woodland) can also make an important contribution to tackling climate change, both in absorbing carbon and in enabling adaptation to the impacts of climate change (e.g. by alleviating the urban heat island effect or by reducing surface water flooding, providing shade for farm animals etc)	
Horton Estates Ltd	LPP0842	Vision	Comment	<p>Bullet point viii. within Table 3.0.1 relates to the economy. We consider that specific reference should also be made to the contribution that existing industrial estates in the rural area, such as Cursley Distribution Park, will make during the plan period to the District's economy. We request that the final sentence be reworded as follows: "...they are supported by the rural economy including several existing and significant industrial estates where sustainable growth will have occurred, and sustainable tourism."</p> <p>We also request an additional bullet point be added to refer to the effective reuse of PDL throughout the District in accordance with paras. 17 and 111 of the NPPF (where it is not of high environmental value). This would be supported by Objective 5 within Table 3.0.2: "Previously-developed land, which is not of high environmental value, will have been prioritised to meet development needs."</p>	Comments are noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
North Worcestershire Water Management	LPP0900	Section 3.1 Table 3.0.1	Comment	<p>Objective ii) in Table 3.01 needs rewriting as there is no programme of floodplain management as such and the impact of increased water efficiency upon the risk of flooding is questionable. This objective currently reads: "The risk of flooding is reduced due to a programme of floodplain management, increased water efficiency, softer landscaping and extensive use of SuDS in new developments."</p> <p>Suggested wording: "The risk of flooding is reduced due to flood management and the extensive use of SuDS both in new developments and retrospectively"</p> <p>OR</p> <p>"Water management forms an integral part of the planning and design of developments. This includes the mitigation of flood risk, water efficiency and widely used SuDS."</p>	Comments are noted.
Kidderminster Harriers Football Club	LPP0927	Table 3.0.1	Comment	<p>The proposed 'Vision for the area' should also include stronger support for improved sports, academic and cultural facilities in the district.</p> <p>To support the NPPF (para. 7) requirement that the planning system performs a social role including supporting health, social and cultural well-being.</p>	Comments are noted.

				<p>routes.</p> <p>The plan to have a bus interchange at Kidderminster Rail Station seems to have been dropped. The latest plan publicised in the local papers has no area for buses.</p>	
	LPP02411	Table 3.0.1	Object	Table 3.0.1 lists an interesting set of descriptors for the district in 2034, but there is insufficient information on how the proposed developments would achieve these descriptors, even if all were desirable. This vision is further undermined by recent developments, such as the large KFC near to WFDC's headquarters, which would seem to discourage, rather than enhance, the likelihood of reducing obesity, one of the increasingly negative features of the area.	There is further work to do on the emerging Local Plan, but the Vision is what the Plan as a whole is aiming to achieve by the end of the plan period. The policies within the Plan will help to achieve the vision.
	LPP03721	Table 3.0.1 viii	Object	<p>Paragraph 3.1 table 3.0.1 part viii</p> <p>I object to the unrealistic vision for the South Kidderminster Enterprise Park to become 'the main focus for employment' The idea to 'industrialise' a traditional market town to compete with West Midlands is not based upon competitive advantage to which industrialists look for viability. Unless there is cheap land, cheap building, low business rates, low wages these aspects will not compensate for the costs of route to market for products from a town lacking connectivity to national transportation and</p>	The Vision in viii states "The urban areas of Kidderminster and Stourport-on-Severn and the South Kidderminster Enterprise Park are the main focus for employment but they are supporting by the rural economy and sustainable tourism." Therefore, the Vision is not just referring to 'South Kidderminster Enterprise Park'. Employment development is an important element of making a place sustainable.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				communication infrastructure. These aspects will all needs to be addressed before investors are attracted to a viable business model. The Council is operating beyond practical attainment with occluded thinking. The focus for employment should be dispersed throughout the town to avoid areas becoming run-down.	
	LPP03722	Table 3.0.1 x	Object	<p>Paragraph 3.1 table 3.0.3 part x</p> <p>This statement is completely at odds with the current planning proposals to pave over large swathes of green belt and conflicts with vulnerable users, healthier lifestyles. It is also inconsistent with 3.2 table 3.0.2 Objective 6.</p>	Comments noted. Green Belt release will be required to provide enough land to meet the Districts development requirements. The Local Authority has a statutory duty to meet housing and employment need for the District.
	LPP0443	3.0.1	Object	<p>Your plans do not support your vision. You foresee "...outlying villages have grown organically to meet their own needs..." and "...the larger villages of Cookley and Blakedown continue..." but your plans are to double the size of Cookley with the core site at Lea Castle. Doubling the size of a village is most certainly NOT growing organically. Should Option A at Lea Castle be selected, Cookley will be annexed to Kidderminster (you will be able to walk from Kidderminster centre to Cookley centre without passing through any fields, greenbelt etc). Cookley will not be a village, it will be a suburb of Kidderminster.</p>	Disagree. The Lea Castle site does not form part of Cookley village.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

	LPP04755	3.0.2	Comment	<p><u>Objective: To encourage economic diversification and make sufficient high quality sites available</u></p> <p>The definition of ‘high quality site’ depends on the use to which that site is to be put. Economically, small industrial /commercial units in small towns are likely to be more attractive to business, although previous experience does appear to suggest that Kidderminster has probably got an excess of such units. The availability of more than enough unoccupied units is unattractive to potential purchasers/tenants and will detract from property values/rental values in the District.</p> <p><u>Objective: To maximise the use of previously developed land.</u></p> <p>This, together with the sensitive redevelopment of Kidderminster town centre and other existing</p>	Comments are noted. Green Infrastructure Concept Plans are being prepared for the larger urban extension sites.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>sites, has to be the most important aspect of the Council's priorities, in order to avoid the temptation of taking the easy, cheaper and less acceptable option of unnecessarily developing countryside and, more importantly, Green Belt sites.</p> <p><u>Objective: To maximise the inclusion of green infrastructure and heritage assets into well designed developments to provide a good quality of life and encourage walking and cycling.</u></p> <p>So far as this relates to the south-east of Kidderminster, the wholesale destruction of Green Belt would make these objectives difficult to achieve, irrespective of design. It beggars belief that such proposals can in any way be considered to encourage walking and cycling (or any of the other healthy, countryside activities presently enjoyed by local residents). Improvement in the "quality of life" as an objective is, quite frankly, unrealistic and, one has to assume that "green infrastructure" is an objective reserved for other parts of the district?</p> <p>Wyre Forest has few heritage assets but it is accepted that these have to be protected. It is however unlikely this consideration will have had much relevance to the choice of development</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				sites and will have little relevance to a choice between Options A or B.	
Worcestershire Wildlife Trust	LPPO1030	Table 3.0.2 Aims and Objectives	Object	We would strongly recommend that a specific objective to protect and enhance the district's biodiversity be added to the list. Protection and enhancement of biodiversity is an important component of sustainable development and is captured in legislation and planning policy to such a degree that it ought to be reflected in the main objectives of the local plan (see for example Section 40 of the Natural Environment and Rural Communities Act 2006 and NPPF paras. 9 and 109 for justification). Such an objective would also link to the first line of Aim ii of the overall Plan vision, which is otherwise not captured in the objectives.	Comments are noted.
	LPPO3723	Table 3.0.2 Objective 7	Object	Paragraph 3.2 table 3.0.2 Objective 7 The alternative route for though traffic will encourage an increase on undesirable use of road transport for Worcester traffic which will bypass the town core and bring no business to Kidderminster. Possible traffic calming measures would reduce benefits of the business case for the new road.	Comments noted. The Transport Modelling study will inform what road improvements are needed for the District. We also seek advice on transport issues from the Highways team at Worcestershire County Council.
	LPPO2412	Table 3.0.2	Object	The plan objectives in 3.0.2 do not address important factors such as air quality in Bewdley, even though the air quality at Welch Gate is	Comments noted. Air pollution and Air Quality Management Areas (AQMA) is addressed in Policy 16A.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				already well below the allowed standard. While this may be a difficult problem to address, a local plan that ducks this issue is weak, inappropriate and unsupportable.	
Bromsgrove & Redditch DC	LPP0896	Table 3.0.2	Support	The Bromsgrove Council supports the aims and objectives of the plan and think that it has the potential to provide a strong base for planning in Wyre Forest once adopted, although a number of reservations do exist where clarity needs to be provided in order to the Council's concerns to be allayed.	Support and comments are noted.
Kidderminster Civic Society	LPP01173	Table 3.0.2 Aims of the plan	Support	Fully Support the aims of the plan.	Support is noted.
Sport England	LPP0208	Table 3.0.2	Support	Welcome last bullet. Note active lifestyles can be promoted more widely than just via green infrastructure and heritage assets and in particular would advocate embedding 'Active Design' in local plan policy to increase opportunities for physical activity. https://www.sportengland.org/facilities-planning/active-design/	Support is noted.
Land Research & Planning Associates Ltd	LPP0543	3.0.3	Comment	Parts B & C should ensure that sufficient housing land is allocated as per sections 28 and 35 to allow expansion of rural areas to provide social and economic benefits as per 2 of the bullet	Comment noted. The proposed sites continue to be evaluated to identify the most suitable sites and the final proposed site allocations will be included in the pre-submission documents.

				<p>points in the NPPF.</p> <p>The present PO document is deficient and does not provide for this. It is therefore not in accordance with the advice in the NPPF and that of PPG 001.</p>	
	LPP01757	Sections 8, 9, 11, 13	Object	<p>Objects to building on Green Belt. Concerned about traffic, pollution, impact on health, animal habitats and the natural environment.</p> <p>Worried about being saturated with continual housing hat has an impact on crime rates and house prices.</p> <p>Strongly objects to both Plan A and Plan B.</p>	<p>Objections noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Report sets out what our housing need is for the District.</p> <p>Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p>
Gladman Developments Limited	LPP01196	Paragraph 3.1	Comment	<p>Recommend that the vision is amended at point vii to include a positive reference that makes clear that the identified needs of the housing market area will have been met in full by 2034. This is in line with NPPF.</p> <p>Point v on Bewdley highlights that this will be a 'thriving market town which meets the local community's needs'. This should mean both market and affordable housing needs. Bewdley Housing Survey Report (2016) should be taken</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>into account. In summary house prices are seen as unaffordable with a shortfall of 213 affordable homes in the next 10 years, especially 2 bed. over 18 years of the plan period this would equate to 383 dwellings. Vision needs to be clarified to explain that Bewdley will meet its market and affordable housing needs in full.</p> <p>Welcome recognition in objectives that Plan will address key challenges in terms of housing employment and transport. This objective would be bolstered further through recognition that these challenges can only be met by positively planning to meet objectively assessed development needs in full.</p> <p>A suitably positive vision must be fully reflected through policies that are capable of securing its delivery. Issues faced in the wider West Midlands area should not be forgotten when considering the context for Wyre Forest through its local plan vision and objectives.</p>	
	LPPO4814	Vision	Comment	There is no vision in this plan. Why not develop new villages around the district with modest enlargements of exiting villages? This is what people want. The Consultants report commissioned by Wyre Forest District Council talks of Masterplanning. Although this is a Local planning review, I see no signs of Masterplanning	Chapter 3 sets out the Vision for the Plan area and sets out the Plan Aims and Objectives. The NPPF requires us to locate new development in the most sustainable locations. The most sustainable locations in the District are the three towns, i.e. Kidderminster, Stourport and Bewdley. The

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				in the overall approach. Wyre Forest District Council has a chequered history with Masterplanning. There was a Masterplan for the Spennells development which was excellent, but was silently dropped when the Head of Planning retired.	majority of the new development is therefore focussed on these three towns. For further information, please refer to the Sustainability Appraisal and the Site Selection Topic Paper.
	LPPO3671	Section 3	Object	<ul style="list-style-type: none"> You have not shown evidence how the distinctiveness will remain as the town becomes a commuter town. The varied landscapes and rural nature will be threatened, you have not shown enough evidence to ensure they will be protected. The remaining areas will become crowded, at increased risk of fly tipping, flooding as you build over Green Belt and remove natural barriers to flooding; trees land. Kidderminster has not to date benefited from existing regeneration. What evidence is provided to ensure that this will differ? There are empty homes, on previous developments and retail outlets in the town plus on the Worcester Street remain vacant. By removing fields and greenfield sites you will increase potential for poor health as you remove facilities such as dog walking, cycling, and walking in open countryside. You have not shown any evidence as to how the air quality will 	<p>Objection is noted. The emerging Local Plan is based on evidence – this is known as the evidence base documents in which there is a whole range of documents, including in particular the Objectively Assessed Housing Need Study, Employment Land Review, Green Belt Study, Retail study, etc.</p> <p>The emerging Plan has also been informed by the Strategic Flood Risk Assessment study which has helped to identify the sites which would be more susceptible to flood risk.</p> <p>The council works with Empty Property owners who want to bring properties back into use and would support conversion of units where it is appropriate to do so.</p> <p>The OAHN study tells us what the District requirement is for C2 use, i.e. care homes for the elderly, during the plan period.</p> <p>The Employment Land Review study tells us</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 3: VISION FOR THE AREA IN 2034

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>be improved with the onset of increased traffic flows, congestion, and removal of green field sites and destruction of the countryside.</p> <ul style="list-style-type: none"> • There are currently a large number of care homes with vacancies - What evidence is provided to ensure care home will not be surplus to requirements. You have talked of regeneration however this is contradictory to your plans to build more homes for the elderly. • You have shown no evidence to confirm how the jobs of sufficient number to meet the needs of the 6000 homes in Kidderminster. To suit what is effectively a new town, there needs to be a much wider range of jobs than tourism, minor manufacturing and small retail outlets. 	what the employment requirement is for the District during the plan period.
Historic England	LPP01263	Vision	Support	We support the vision and the reference to heritage throughout.	Support for Section 3 Vision for the Area noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 4: CORE POLICIES INTRODUCTION

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
Land Research & Planning Associates Ltd	LPPO545	4.1	Comment	<p>The drastic need of land to provide the critical shortage of affordable homes has not been addressed in this document.</p> <p>Simply sacrificing the shortage of affordable homes by attempting to say the plan is sound in that there may be sufficient land to accommodate normal market homes is not acceptable, nor is it in accordance with 47 - 49 of the NPPF. So the plan is not sound as it stands.</p>	Comments are noted. The OAHN Study has identified the housing need for Wyre Forest District during the plan period. This study informs the level of new housing development that is required in the district, including affordable housing.
CORE11	LPPO152	4.2	Support	Support for paragraph 4.2.	Support is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 5: OVERARCHING SUSTAINABLE DEVELOPMENT PRINCIPLES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
Land Research & Planning Associates Ltd	LPP0546	Policy 5A	Comment	<p>Recent Case Law (03 July 2017) gives rise to the argument that if land is within a settlement boundary the premise of "the presumption of sustainable development" should apply. Generally means that any planning application on any land outside a settlement boundary is considered not sustainable.</p> <p>Development is "Plan Led" and provides a framework to assess planning applications. Unless rural settlement boundaries are relaxed during the plan making process the amount of development within them is limited to the extreme. Settlement boundaries hierarchy began in the 1980s, many rural settlements have had little or no expansion to their boundaries since. This situation leads to a massive social division. There is no properly considered expansion of rural settlements in this PO document during the plan assessment process and consequently this document is not in accordance with PPG001 nor the NPPF.</p>	Policy 6B sets out the Settlement Hierarchy for the District. As this is a Green Belt District we have undertaken a Green Belt review which has helped to inform which areas of the Green Belt should be released. Many of our villages are washed over by Green Belt and the Study has advised that this should remain the case.
Worcestershire County Council, Planning Economy & Performance	LPP01077	Policy 5A	Comment	<p>Item (v) under sub-section (c) in paragraph 5.4 refers to</p> <p><i>"Protecting important historic buildings, monuments, sites of archaeological significance and the integrity of local planning designations".</i> This</p>	Comments noted and amendments agreed.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 5: OVERARCHING SUSTAINABLE DEVELOPMENT PRINCIPLES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>raises the question of what the definition of <i>"important"</i> is, as used here? What will constitute an important heritage asset? The NPPF consistently uses <i>"significance"</i>, although <i>"importance"</i> is mentioned once in NPPF paragraph 128. In any event, what level of significance or importance does this policy imply is required to render these heritage assets and designations worthy of protection? Use of the word <i>"important"</i> here may unintentionally result in conflict/debate about the importance of any heritage assets that are affected by development proposals and, while the NPPF does specifically make reference to determining the <i>"value"</i> of heritage assets that would be affected by development proposals in paragraph 129, this is again couched in terms of <i>"significance"</i>. We therefore suggest that consideration is given to either omitting the word <i>"important"</i>, substituting it for <i>"significant"</i>, or perhaps introducing some form of weighting/value in the reasoned justification as to what constitutes important. As an example, in this context important sites and designations could potentially include designated heritage assets (e.g. listed buildings, scheduled monuments, registered parks and gardens, or conservation areas), non-designated heritage assets of archaeological interest that are demonstrably of equivalent significance to scheduled monuments,</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 5: OVERARCHING SUSTAINABLE DEVELOPMENT PRINCIPLES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>and heritage assets included on a Local List.</p> <p>Part B of Policy 5A states that:</p> <p><i>"Planning applications that accord with the policies in the Plan (and where relevant, with policies in Neighbourhood Plans) will be approved unless material considerations indicate otherwise".</i> We consider that the wording of this policy point requires some adjustment to reflect the fact that the Waste Core Strategy and Minerals Local Plan also form part of the Development Plan covering Wyre Forest District. We would suggest rephrasing the policy point as follows (additions in bold, deletions in strikethrough):</p> <p>"Planning applications that accord with the policies in the</p> <p>Development Plan (and where relevant, with policies in Neighbourhood Plans) will be approved unless material considerations indicate otherwise", and referencing the Waste Core Strategy, Minerals Local Plan and Neighbourhood Plans in the supporting Reasoned Justification. For the same reasons, part C should also refer to the Development Plan.</p>	
Taylor Wimpey	LPP01459	Policy	Comment	Policy 5A is consistent with the presumption of	Comments on Policy 5A are noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 5: OVERARCHING SUSTAINABLE DEVELOPMENT PRINCIPLES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
West Midlands		5A		sustainable development as in the NPPF. Policies and proposals in the Local Plan need to positively seek opportunities to meet the development needs of Wyre Forest, including the OAHN and provide flexibility to adapt to rapid change.	
Taylor Wimpey West Midlands	LPPO1715	Policy 5A	Comment	Policy 5A is consistent with the presumption of sustainable development as in the NPPF. Policies and proposals in the Local Plan need to positively seek opportunities to meet the development needs of Wyre Forest, including the OAHN and provide flexibility to adapt to rapid change.	Comments on Policy 5A are noted.
	LPPO3963	Development	Comment	Overall, the plan does not require enough of prospective developers. Some of the sites are significant areas and masterplans, guiding principles and 'green infrastructures' should be required at this stage in the Local Plan and at Outline. Specifying the need for future-proofing designs, layout principles so as to drive uniqueness in Landscape, access, housing and open space, as well as providing for housing designs adaptability for future purposes, with regard to new technologies as well as existing green ones, should be made explicit in the Local Plan. It would set a standard that reassures local communities that new areas will add	Comments are noted. Green Infrastructure Concept Plans and Masterplans will be required for the larger site allocations as the Local Plan evolves. This will include green infrastructure proposals.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 5: OVERARCHING SUSTAINABLE DEVELOPMENT PRINCIPLES

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				to their betterment in living near to it- it will have direct benefits for them- by green routes connected open spaces and clear identities by block designs and legibility. Such broad principles have to be set out in the Local Plan now so as to be sustainable for the future and deliver excellence where there is already a presumption of approval by NPPG guidance.	
Campaign to Protect Rural England	LPP0920	Policy 5A	Object	The emphasis of the policy is inappropriate. It seems to imply that any proposal that a developer may bring forward can potentially be made acceptable. There is no point in having a plan, if it is not made clear that proposals for major development of unallocated sites will be refused. If that is not done, developers will argue that sites that have been considered in the course of the site selection process and rejected are also sustainable, so that planning consent should be given. A further clause should be added to Policy 5A to make it clear that such applications will be refused.	Comments noted. However, if we are unable to maintain our Five Year Housing Land Supply in the future then it is important that we have a policy such as Policy 5A in the Local Plan. Also, the NPPF sets out a presumption in favour of development.
	LPP03672	Policy 5A	Object	The plan is not sustainable. Green Belt land cannot be used indefinitely. I do not agree with 5A and do not believe the report has reasoned justification as the Housing Need report does not back this up.	Objection is noted.
Worcestershire	LPP01031	Policy	Support	Support policy.	Support is noted.

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				years have seen crops of wheat, peas, potatoes and beets	
	LPP03731	5.6	Support	The 'well designed buildings and places' should also consider multi-story apartments to make efficient use of scarce land and suit the lower dwelling occupancy rate sighted in paragraph 2.9 table 2.0.1 bullet 7	Support and comments noted.
	LPP0504	5.6	Support	The Land is used as farm land why build on it?	It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Report sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Barratt Homes West Midlands	LPPO814	policy 6A	Object	We believe the plan period should be extended beyond 2034 by at least 2 years to allow for potential delays and still be NPPF compliant. Development requirements should be adjusted accordingly. The emerging plan does not make provision for growth requirements from outside of Wyre Forest. It is possible that Wyre Forest will be asked to help with need from Birmingham and the Black Country. The development requirements of Policy 6A should be referred to as a 'minimum' requirement. This will help to foster sustainable development.	Agree that the plan period should be extended by 2 years. For the pre-submission plan we have extended the plan period by 2 years to 2036, giving a 20 year plan period (2016 to 2036). We continue to have Duty to Cooperate discussions with our neighbouring local authorities. These discussions have included the Black Country LAs and Birmingham City Council.
Horton Estates Ltd	LPPO845	Policy 6A	Comment	RPS has made separate and detailed representations on the proposed housing requirement under this Policy on behalf of Persimmon Homes South Midlands. Our Clients support these representations, which assert that the Council's current housing target of 300dpa is not reflective of the evidence presented within the 2017 Objective Assessment of Housing Need (OAN) Study. The Council's own evidence indicates that, when adjusted to account for migration trends and suppression of household formation, the demographic need for housing increases to 332dpa, which is already higher than the Council's proposed requirement figure. Furthermore, when taking market signals and affordable housing into account, this need increases further to 468dpa. RPS considers that the minimum OAN that should be considered by the Council in Policy 6A is 468dpa, which would significantly increase the	The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. The OAHN study will be updated in line with changing guidance in the NPPF / PPG and will use the Government's new standardised methodology.

				<p>housing allocations contained within the plan should be capable of meeting and exceeding this minimum requirement whilst maintaining a rolling five year housing land supply.</p> <p>Still awaiting publication of Government's proposed methodology for calculating housing needs. Question whether figures in Policy 6A are appropriate. A revised approach is likely to be required at the next stage of the Local Plan.</p>	
Persimmon Homes Limited	LPPO1421	Policy 6A	Object	<p>Plan Period should be extended beyond 2034, by at least two years to introduce flexibility should any delays in its preparation occur. As a consequence, the development requirements should be adjusted to take account of the extended time period.</p> <p>The emerging plan does not currently make provision to accommodate development to meet the growth requirements of Birmingham, the Black Country or any other Local Authority area. It is suggested that Wyre Forest District forms its own Housing Market Area (HMA), notwithstanding the robustness of this claim. However, ongoing discussions will need to be held with the neighbouring authorities in order to consider the strategic priorities and the delivery of new homes.</p> <p>No agreed distribution of Birmingham City housing need shortfall of 37,900 dwellings and the Black</p>	<p>Agree that the plan period should be extended by 2 years. For the pre-submission plan we have extended the plan period by 2 years to 2036, giving a 20 year plan period (2016 to 2036).</p> <p>We continue to have Duty to Cooperate discussions with our neighbouring local authorities. These discussions have included the Black Country LAs and Birmingham City Council.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Country Authorities shortfall which is understood will be at least 22,000 dwellings. It is suggested that Wyre Forest forms its own HMA, it is extremely close to the administrative area of Dudley, which is part of Black Country area. In addition, Wyre Forest is in relatively close proximity to Birmingham City and is easily accessible by road and rail to the West Midlands conurbation. As a consequence, it is entirely possible that Wyre Forest will be asked to assist with meeting the growth requirements of the conurbation.</p> <p>This has two potential impacts. First, it could delay the preparation of the emerging Wyre Forest Local Plan, and this supports the extension of the plan period as suggested. Second, it could result in the housing requirement in the plan being increased. As a consequence, the overall housing requirement should be kept under review and policy 6A will need to be substantially revised following the publication of the Black Country Core Strategy.</p> <p>NPPF supports housing in sustainable locations. It requires Local Authorities to “boost significantly” the supply of housing land. It also supports sustainable economic development. The development requirements of Housing Policy 6A should be referred to as “minimum” development requirements that can be exceeded through sustainable development proposals. This approach has been adopted by a</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				<p>significant number of authorities elsewhere in order to support and foster the delivery of sustainable development.</p> <p>The SHMA identifies an OAHN requirement for 5,400 dwellings during the plan period. It is good practice to over allocate to ensure that the OAHN figure is met. There is some uncertainty regarding delivery of some brownfield allocations. Plan should allocate 15% more housing than the OAHN figure (6,210 dwellings), in order to ensure that the need for housing is met. If WFDC need to accommodate housing need from the Black Country, it will be necessary to increase the housing provision in Wyre Forest by some 2200 so overall need will be 8,410 for the plan period to 2034 (i.e. 467 pa) and to 9,344 if the plan were to be extended by 2 years. These figures do not include the allowances for C2 uses.</p> <p>This increase will also help to accommodate some of the Birmingham's overfill. The existing rail link between Birmingham and Kidderminster, together with the direct road link via the A456, means that the Wyre Forest area also has a functional link with the Birmingham conurbation. Positive planning to accommodate housing pressures will help to reduce house price inflation and ensure that houses are provided for local people too. This will ensure that the workforce can be accommodated in order to fulfil the</p>

				economic aspirations of the plan area.	
Persimmon Homes Limited	LPP01571	Policy 6A	Comment	<p>Evidence underpinning this assessment is the 2017 OAN Study. This supersedes the previous 2016 OAN Study, which identified a range of scenarios for the determination of housing need, before settling upon a midpoint of 254dpa. The Council's latest evidence indicates an uplift in the housing need for the District, led in part by the inclusion of newer population and household projections (2014-based).</p> <p>We offer comments on the existing methodology in the context of consistency with the NPPF and NPPG.</p> <p>As part of the Council's modelling, a number of scenarios have been tested to consider what the impact of varying assumptions will have on the determination of the Council's housing need.</p> <p><i>Demographic Uplifts</i></p> <p>Table 3.2 of the Council's 2017 OAN Study indicates a number of sensitivity tests undertaken to the 2014-based population projections to consider the impacts of longer term migration trends than those used in as part of the government forecasts. The short term forecasts (PG-Short Term/PG-Short Term X) broadly follow the migration profile of the 2014-based projections, whereas the long term scenarios (PG-Long</p>	The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. 				<p>Term/PG-Long Term X). These scenarios indicate that when using longer term trends than those of the 2014-based population projections, there are increases to the total population change, and consequently, increases to the baseline dwelling stock. As indicated in Table 3.3 of the 2017 OAN Study, the longer term migration profiles draw on population estimates from the previous years which include higher proportions of working age population. This presents a population profile which serves to narrow the old age dependency ratio (percentage of 16-64 against 65+ population), thus responding to the notable ageing of the population in Wyre Forest. RPS is of the view that for Wyre Forest, the longer term population scenarios offer a more appropriate population profile than the 2014-based projections. The 2017 OAN Study has not modelled a 10-year migration scenario and on this basis, the PGLong Term X is considered the most appropriate scenario, which takes a 14 year migration profile, excluding Unattributable Population Change (UPC). This would present an annual household change of 291dpa.</p> <p>In addition to modelling alternative migration profiles the 2017 OAN Study has also considered making adjustments to the household formation rates which underpin the 2014-based household projections. This scenario (modelled under Table 3.4 of the 2017 OAN Study) takes into account suppression to household</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>formation for the 25-34 and 35-44 age cohorts and proposes that these are returned to levels expressed in the 2008-based forecasts. Making adjustments to household formation rates is supported through the PPG and underpinned by academic research¹ in the area. RPS considers that this is an appropriate adjustment to make which, under the PG-Long Term X migration scenario, would increase the OAN to 332dpa.</p> <p><i>Labour Force and Employment Implications</i></p> <p>This section of the 2017 OAN Study seeks to demonstrate an alignment of the population and labour force, taking into account projections from Cambridge Econometrics, Experian and Oxford Econometrics. RPS agrees that these are appropriate sources of information to draw from though would also encourage the Council to consider how the growth in housing aligns with the proposed targets for employment growth.</p> <p>The three employment forecasts have been derived through a combination of past trends in the District and an assessment of future economic activity which would impact on the projections of growth. The Council's 2017 OAN Study indicates that the highest job forecast (Cambridge Econometrics) can be met through the adjusted long term migration scenarios,</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>however consideration does not appear to have been given to whether the OAN is capable of supporting the Council's employment growth target of 40ha included within emerging Policy 6A. This assessment should also be undertaken to ensure that the Council's approach is thorough and robust.</p> <p>The 2017 OAN Study indicates that the demographic adjusted figure of 332dpa is capable of meeting the expected employment growth in the District through the plan period. Although RPS has not tested this in detail, for the purposes of this assessment, the figure of 332dpa has been taken forward in the OAN calculation process, albeit it should be treated as a minimum, given the Council may need to revisit this assessment in light of the employment growth targets as part of emerging Policy 6A.</p> <p><i>Market Signals</i></p> <p>Section 6 of the 2017 OAN Study reviews information associated with market signals in Wyre Forest, taking the view that the housing market in the District is relatively stable and there is no need for further adjustment to the OAN (paragraph 6.14 refers). RPS does not agree with this view and considers that the relationship of affordability pressures in the District warrant the need for further uplifts.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>The 2017 OAN Study makes a number of references to the recommendations of the Local Plans Expert Group (LPEG), which have been taken on board as part of the approach for the adjustment to household suppression. The LPEG recommendations also propose a methodology for the consideration of market signals, based on two indicators; median quartile housing affordability and lower quartile rental affordability. The LPEG recommendations (Appendix 6) indicates four brackets of potential market signals uplift ranging from 0% to 25% depending on the severity of affordability issues, which are replicated below:</p> <p>i. House Price Ratio less than 5.3 and Rental Affordability less than 25% = No uplift</p> <p>ii. House Price Ratio at 5.3 - 6.9 and/or Rental Affordability between 25% - 29% = 10% uplift</p> <p>iii. House Price Ratio at 7.0-8.6 and/or Rental Affordability between 30% - 34% = 20% uplift</p> <p>iv. House Price Ratio at 8.7+ and/or Rental Affordability is +35%= 25% uplift</p> <p>In terms of the median House Price Ratio, the latest data published for 2016 has been published by ONS, having taken over responsibility from the DCLG. ONS has provided two data sets for median affordability,</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>based on ‘workplace’ and ‘residence’ based earnings. The workplace figures for Wyre forest indicate a ratio of 7.26 for 2016 compared to the residence based ratio of 6.35 Under the care of the DCLG the information that was gathered on affordability ratios was residence based earnings to house prices. The residence based dataset is considered a more appropriate dataset to use, which aligns with the historical projections provided by DCLG. The figure of 7.26 is therefore the most appropriate to use.</p> <p>In terms of rental prices, this can be calculated using lower quartile wages taken from ONS data, aligned with monthly rental data from the Valuation Office Agency (VOA). Set against a monthly lower quartile rental price of £475, this indicates that the rental affordability ratio for Wyre Forest is 33.2%.</p> <p>Relating this data to the LPEG methodology, it is clear that market signals do exist in Wyre Forest and an uplift of 20% should be attributed to the adjusted projections. When taking into account the migration adjusted profile and household formation rates, this increases the OAN from 332dpa to 398dpa.</p> <p><i>Affordable Housing</i></p> <p>The 2017 OAN Study acknowledges that the net annual affordable housing need is 229 dwellings per annum.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Paragraph 8.11 of the study indicates that any new build required to meet this need can be accommodated within the OAN. Over the plan period 2016-2034, this equates to 4,122 dwellings. RPS does not consider that the Council has taken an honest appraisal of what the plan is expected to deliver.</p> <p>Draft Policy 8B of the consultation Local Plan indicates that the Council expect a minimum of 30% affordable housing to be delivered on schemes of 11 or more. Under the optimistic assumption that all of the 5,400 dwellings planned by the Council triggered this policy, this would only deliver 1,620 affordable homes, only 39% of the total affordable housing need. Even under the policy approach advocated under the market signals (398dpa), this would still only be capable of meeting 52% of the overall affordable housing need. It is clear that the affordable housing need in the District is severe and is not capable of being met under the current housing requirements.</p> <p>Paragraph 7.9 of the 2107 OAN Study once again considers the recommendations of the LPEG report to Government as a way of considering an appropriate uplift to the OAN, indicating that an adjustment should be made to the OAN where the total number of homes necessary to meet the affordable housing need is greater than the adjusted OAN. The same paragraph of the study indicates that where this is the case, the OAN</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>should be uplifted by a further 10%. This is only partially true, as the LPEG study indicates that in such cases an adjustment of 10% can be made or an uplift which will allow for the affordable need to be met in full. Under the Council's current affordable housing target, this would require 763dpa to be built, in order to address the affordable need of 229dpa and set against the 10% uplift, the OAN would increase to 468dpa. RPS considers that whilst the Council should aim to meet the OAN for market and affordable need in full, a 10% figure appears to be more realistic at this point in time.</p> <p><i>Summary</i></p> <p>Consider that the Council's current housing target of 300dpa is not reflective of the evidence presented in the 2017 OAN Study. The Council's own evidence indicates that the when adjusted to account for migration trends and suppression of household formation, the demographic need for housing increases to 332dpa, which is already higher than the Council's proposed requirement. When taking market signals and affordable housing into account, this need increases further to 468dpa. RPS considers that the minimum OAN that should be considered by the Council in Policy 6A is 468dpa, which needs to be factored into the later stages of plan making. A</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				Enterprise Partnership for £1,8 million. A 'Deal' implies action by both parties. Is the other side of the 'Deal' that Kidderminster makes overspill housing available for Birmingham? Have Birmingham council also indicated that they will help to fund the eastern link road? Birmingham needs 89,000 new homes in the next 15 years, their Development Plan has been given the go-ahead to build 51,100. (Birmingham Mail 21 April 2016) Birmingham and Solihull Local Enterprise Partnership lists the names of its overspill satellite towns and names Wyre Forest as the one remaining area not at present a dormitory town.	<p>deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfields sites within the Green Belt.</p> <p>Wyre Forest District does not form part of the wider Black Country or Birmingham Housing Market Areas and therefore does not directly need to accommodate any additional growth needs arising from these local authority areas. However, Duty to Cooperate discussions continue to be had with these neighbouring LAs as the Local Plan Review process progresses. Duty to Cooperate discussions between neighbouring local authorities are a requirement of the NPPF.</p>
	LPPO1830	Housing Need	Object	<p>I disagree that we need to use this Green Belt at all. You quite clearly state that there is only need for 199 dwellings per annum according to The National Statistics Sub National Population Projections (SNPP) 2014 . Why then have you escalated this to 300 per annum when you also quite clearly state that the population growth in our area is virtually static!</p> <p>Is this to take advantage of the governments incentive of £9000 per dwelling? along with the extra income of council tax? If so then I would point out that the 33%</p>	The housing need is based on population data which includes births and death rates. It is also based on household projections. As the plan period is for 20 years, there will be an increase in population over this time. Also, there is an increasing elderly population in the district which means people are living longer and therefore staying in their homes for longer. In addition to this, the family unit is changing with more single parent families occurring. This puts pressure on the current housing stock.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				of social housing will attract an element of housing benefit clients and this will of course force up your overall expense.	<p>There simply isn't enough housing to cater for all these different needs over the plan period. In addition to this, people migrate into the area as well as moving out.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO3030	Policy 6A - OAHN	Comment	<p>1.) The OAHN, based predominately on the Amion Report, appears to have been accepted and the figure of 300 new houses a year has now become fact. In reality the 300 is at the upper end of all the projections and at best is a guess based arguably on historic evidence.</p> <p>2.) I understand that it is necessary to give a definite figure for the number of new houses required to satisfy some bureaucratic obligation, but that does not mean that we should commit to building this number whether we need the houses or not.</p> <p>3.) Kidderminster has been identified as a "self contained housing market" and as such, any new housing will depend largely on an increasing need for</p>	<p>Comments noted.</p> <p>The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. The OAHN study will be updated in line with changing guidance in the NPPF / PPG and will use the Government's new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>employment. However, there does not currently appear to be any employer requiring a large increase in the work force in the area. So any future employment growth will depend on relatively small business requirements. I know that Kidderminster is endeavouring to attract new business, but it is also apparent that there is a limit to how many small businesses Kidderminster can support. Looking around the area there are a lot of empty business premises, so I would suggest that we are approaching that new business limit. Indeed, the Amion Report in Section 4 shows no appreciable increase in employment over the period being considered. Also, just recently 2 of the remaining carpet factories have made significant redundancies.</p> <p>So where are all these new jobs for people requiring all this extra housing?</p> <p>4.) The Amion Report refers to the increasing relatively large number of retired generation, but in the longer term the effect of the “baby boomers” will disappear. Also, the latest report shows that the UK’s increasing longevity has considerably slowed down. This, together with the raised pension age should in time lessen the increase in the number of retired people.</p> <p>5.) Since the economic recession of 2008 we are now understandably going through a “catch up” of new</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>house building everywhere. But, this will surely slow down once we have caught up with the current needs.</p> <p>6.) If the statement in the conclusion by Amion of “8.13 It is not envisaged that available land supply will inhibit achievement of the OAHN figure” is true, then why do we need to even consider releasing Green Belt Sites for building?</p>	
	LPPO4141	Policy 6A	Comment	<p>I am in favour of the council having a long term plan for the Wyre Forest, and recognise the need for some additional affordable housing in the future. However, I believe that the plan as it currently exists is desperately wrong in many aspects, inaccurate, and misjudged.</p> <p>I would like to know on what basis or accurate analysis the suggested growth of the future population has been based. What outreach and analysis has been to objectively look at what the future may look like in terms of revitalising Kidderminster overall? What are the alternatives for replacing the carpet and manufacturing base of our town? Without a planned and costed attempt to bring good jobs to the area I feel that planning for thousands of houses is futile. I desire to see a vibrant lively town, attracting a diverse population, with a properly planned coherent infrastructure to support them in every way. Both my children have now moved away to well paid jobs in</p>	<p>Comments noted. The housing requirement is base on the Objectively Assessed Housing Need (OAHN) study. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>The emerging Local Plan does include policies for affordable housing and will also look to provide a mix of housing types to cater for the needs of the community, i.e. 2 bed, 3 bed, 4 bed family homes. There will also be a C2 use requirement to cater for the needs of the elderly population.</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				other areas of the country where the opportunities are better. I imagine I will not be alone within the projected time scale of this plan in needing to downsize my property, or be in need of care. Has any allowance been made for the age profile of the WF population with increased mortality rates and so many youngsters, like my own, moving away? My feeling is that the town will not require the number of houses planned, and I would welcome serious evaluation of indigenous population growth. This would more actually reflect actual future need.	
	LPPO4223	Policy 6A - OAHN	Object	I do not consider there is a proven need for 300 houses per year as Kidderminster population rate is below the national average. The countryside should be safe guarded by the Council and not used for housing.	Objection noted. The housing requirement figure was based on the OAHN study published in April 2017.
	LPPO4249	Policy 6A - Housing Needs	Comment	Having read LTP4, Green Belt Review and now the Local Plan Review I must conclude the statistics for housing requirement quoted within the documents commissioned are not accurately substantiated and, as such, should be challenged by WFDC before any decision on release of any Green Belt made. Wyre Forest has had a 'virtually static population growth' since 2001-2015 (2.2% at most using ONS statistics). Looking at the population of Kidderminster alone, from 2001 -2011 it dropped by 0.14%. An increase from 2011 Census to current estimate of population set in 2016 of 2.1% at most. If the figures were accurately reviewed and if the true objective of the LPR is to meet	Comments noted. The statistics used for the OAHN are statistics published by the Government from the Office of National Statistics. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG. Since the Preferred Options document was consulted on, the Government have published

				<p>future housing needs of Wyre Forest in line with current projected growth figures – all development could be achieved on brownfield sites. It is therefore the duty of WFDC to ensure developers are not allowed to sit on brownfield sites and that all development of brownfield sites are completed before approving plans for Green Belt development.</p> <p>I believe the Local Plan Review to be a cynical attempt to provide a quick, unsustainable fix for the failing local economy. The LPR identifies a ratio imbalance of elderly to young and the increased impact that is having on services and ultimately finances of WFDC. The LPR identifies that educational standards within Wyre Forest are below that of national average – thus leading to low paid jobs and zero hour contracts, with very little opportunity for home ownership and personal development. Health within Wyre Forest is generally poor and a proactive stance on high levels of obesity is required. The LPR should identify these problems as core issues that need addressing and not covering over with a temporary influx of cash. The LPR promotes actively pursuing in-migration to resolve such issues.</p> <p>Whilst the new homes allowance of £9,000 per unit is an attractive incentive and 1735 units will generate £15,615,000 for WFDC, this is a shortsighted answer to the long-term problems facing Kidderminster and</p>	<p>their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

				<p>Wyre Forest as a whole. The introduction of new residents alongside the initial flush of cash will place a burden on already over stretched services. Even considering additional council tax, the proposed development of 3 & 4-bedroom family homes will not help balance the books.</p> <p>It is disingenuous to assume much of the aging population are not contributing to the local economy or are tying up family homes. My own family home will support three generations very shortly. My husband and I both work and run a small business, paying taxes at every level, not least business rates. We fall outside the optimum demographics laid bare within the LPR – which WFDC and their 'Pro Growth Agenda' are chasing. Are we to then interpret the LPR as saying in-migration (affluent) is the answer to supporting low paid, zero hour contracts and benefits, rather than WFDC addressing the root cause.</p> <p>Cala homes at Hagley are offering 100% exchanges for their Wychbury Fields development. The homes are within a perfect commuter corridor; have great access to rail links and outstanding schools – yet can't sell.</p> <p>It is understandable that WFDC are scratching their heads whilst looking for an answer to the issues surrounding the economy of Wyre Forest. However, in only actively pursuing in-migration I believe you are</p>

				<p>relatively close proximity to Birmingham City. As a consequence it is entirely possible that Wyre Forest will be asked to assist with meeting the growth requirements of the conurbation.</p> <p>This has two potential impacts. Firstly it could delay the preparation of the emerging Wyre Forest Local Plan, and this supports the extension of the plan period as suggested. Secondly, it could result in the housing requirement in the plan being increased. As a consequence, the overall housing requirement should be kept under review and policy 6A require substantial revisions following the publication of the Black Country Core Strategy.</p> <p>Also it is a clear objective of Framework to support the delivery of housing in sustainable locations. Paragraph 47 of the Framework requires Local Authorities to “boost significantly” the supply of housing land. The Framework is also clear that sustainable economic development should be supported. The planning system should not act as an obstacle to sustainable economic growth. As a consequence, it is our view that the development requirements of Housing Policy 6A should be referred to as “minimum” development requirements that can be exceeded through sustainable development proposals. This approach has been adopted by a significant number of authorities elsewhere in order to support and foster the delivery</p>

Hagley Parish Council	LPPO777	Policy 6A Development Needs	Object	<p>Housing Numbers</p> <p>NPPF requires WFDC to meet its Objectively Assessed Housing Need (OAHN). A paper was produced in 2016 indicating that the need was 254 dwellings per year, which exactly matched what had actually been delivered in recent years. 254 is greater than the old target under WFCS, which suggest that WFDC has not refused any applications on housing supply policy grounds. It follows that 254 represents unrestricted housing demand, which ought to be a very good indication of housing need. It thus seems that the target in the Consultation Document, far from being Objectively Assessed Need is a highly subjectively selected target. The target should only be $254 \times 18 = 4572$.</p> <p>Mitigation</p> <p>If WFDC pursue a target above its OAHN to meet Birmingham's housing needs, and makes a contribution to its alleged housing land deficit, some very substantial offsite expenditure will be required to mitigate the damage to Hagley:</p> <p>A bypass round Hagley, or link road past it between A456 and A491, south of Hagley.</p> <p>Measures to make rail commuting more</p>	<p>The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. The OAHN study will be updated in line with changing guidance in the NPPF / PPG and will use the Government's new standardised methodology.</p> <p>The Infrastructure Delivery Plan (IDP) sets out the infrastructure requirements for the emerging Local Plan.</p>

Rentplus	LPPO1107	Policy 6A and Development Strategy	Comment	<p>This policy rightly sets a clear annual target for affordable housing, which is fully supported as this sets a clear ambition for the Council to deliver housing to meet local needs. It is important to meet the full range of housing needs in order for the District's residents to thrive, as encouraged by the recent White Paper. Crucially, that Paper made widening the definition of affordable housing a central theme to planned tweaks to the NPPF and it is this that will need to inform the future direction of the Local Plan Review. Once those changes have been published (as we expect later this year) it will be important to review the evidence base</p>	Support and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				once more to ensure the maximum level of affordable housing can be delivered through an appropriate policy base. In addition to those points referenced at paragraph 6.9, we recommend that a specific mechanism be included in Policy 6A to require specific measures to be taken if housing supply falls below (or rises above) a set point. This should prioritise measures and specific sites (dependent on the preferred option that is chosen for the Development Strategy) that may bring forward a greater supply of housing, and particularly schemes with a high proportion of affordable housing.	
	LPP0496	Policy 6A	Object	Plan states Insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” This only arises if Wyre Forest District need to allow land for developing 6,000 properties, due to the historically low changes to the number of residents in the Wyre Forest District then I do not believe we need this at all.	Objection noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.
Taylor Wimpey West Midlands	LPP01464	Policy 6A	Comment	Market Housing Wyre Forest District Council has commissioned an objectively assessed needs (OAN)	The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. 				<p>to the supply to allow for under delivery, if the higher dwelling requirement of 332 is needed as forecasted the excess will be wiped out resulting in a very lean land supply.</p> <p>The OAN evidence is a good baseline assessment of the housing requirements in Wyre Forest, the local planning authority should further consider published economic past trends against those put forward by the independent forecasting houses to determine, which is more accurate. Further work to identity if, in the context of Wyre Forest, it is appropriate or not to include UPC in the projections of the scenarios tested.</p> <p>There is unmet need arising from neighbouring HMAs. There is a shortfall in excess of some 50,000 homes in the Greater Birmingham HMA, which must be provided for. It is important that given the close relationship Wyre Forest has with the nearby authority Dudley (which is in the Greater Birmingham HMA), as evidenced by Figure 2.3 (migration flows) and 2.4 (labour flows), that appropriate provision for the unmet need is made available.</p> <p>Wyre Forest is within the Greater Birmingham & Solihull and Worcestershire Local Enterprise Partnership area. The level of housing provision proposed needs to be consistent with the aspirations of the LEPs. Having reviewed the evidence, it appears</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>that such economic aspirations have not been tested and it is unclear whether the level of dwelling provision is appropriate to meet those needs. It is suggested that further work is commissioned to test whether the dwelling requirement is fit for purpose and is joined up with other strategies and plans to achieve wider strategic aspirations.</p> <p>Affordable Housing</p> <p>Requirement for 1,620 affordable homes or 90 dwellings per annum, which is 30% of the overall dwelling requirement. When comparing this to the affordable housing need evidence, the 90 dwellings per annum is far less than the 229 dwelling affordable need identified by Table G1 within Appendix G: Affordable Housing Need Calculations within the Amion OAN Report of April 2017. The reason for the reduced policy requirement is potentially due to the fact that affordable housing delivery has been quite poor in previous years (as set out in Table G4) achieving an annual average of 47 dwellings per annum over the last four years. It is advised that in order to ensure the affordable housing requirement is deliverable, affordable housing viability work should be undertaken by the Council.</p> <p>C2/ Institutional/ Care Home</p>

				<p>540 bed spaces for C2/ Institutional/ Care Homes categories is supported and will assist to ensure the specific needs of the population are met. The principle of separating the C2/Institutional/Care Home requirement from the C3 requirement is supported, any consideration of housing land supply position contained within the housing trajectory should also exclude the C2 provision.</p> <p>Employment Land</p> <p>The 40ha requirement of employment land is informed largely by the June 2016 ELS by Lichfields, which notes that the Wyre Forest District economy has been behind regional and national trends in jobs growth over the period 1997-2015. The baseline forecasts, labour supply scenarios and subsequent analysis of past development rates lead the ELS to arrive at employment land requirements up to 2032 of between 31ha and 37ha. The 40ha requirement in the Local Plan looks to be broadly in line with these estimates, given it looks at requirements for a period up to 2034 – two additional years compared to the ELS timeframe. This analysis all seems logical and is a fair reflection of what future land demand could look like in Wyre Forest if past trends continue.</p> <p>A concern with the 40ha employment land requirement is that it does not appear to take into</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –

				<p>account what could be needed if Wyre Forest District saw stronger economic growth under a “policy -on” scenario. Such a scenario is discussed in the ELS, which specifically mentions the importance of the Hoo Brook Link Road Phase 2 project and the impact this will have on employment land requirements in the District. The resulting land requirements under this scenario could see Wyre Forest need around 60ha of employment land. By taking the lower figure of 40ha, there is a risk that the economy of Wyre Forest District remains stagnant over the period of the Local Plan and falls behind other parts of the region. For example, the Worcestershire Local Enterprise Partnership’s Strategic Economic Plan has a vision to grow the LEP economy by 25,000 jobs by 2025 and to support growth sectors such as advanced manufacturing. It is unlikely that Wyre Forest District will make much of a contribution to this target if its economy only grows under baseline conditions. Consideration should therefore be given to increasing the quantum of employment land brought forward by the Local Plan.</p> <p>2.23 If employment growth is increased, the level of housing need should be reconsidered accordingly to ensure a jobs balance ratio that ensures a level of self-sufficiency and sustainability.</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO1981	Policy 6A	Object	<p>Policy 6A - Development needs 2016 - 2034.</p> <p>The amount of dwellings proposed seems to be vastly overestimated when correlated with figures for population projections from the ONS. WFDC state that 5400 dwellings will be required. Taking the ONS average household occupancy of 2.4 people per dwelling, this equates to a population growth of 12960 people between 2019 and 2034. ONS projections indicate that Wyre Forest population will grow from 100,000 in 2019 to 104,000 in 2034. This projected growth of 4000 people equates to a requirement for 1667 dwellings or just 31% of the 5400 stated in the proposal.</p> <p>The Wyre Forest District is effectively stagnant in terms of economic development and population growth and has been for several decades. Therefore the District Council have an obligation to facilitate change in these circumstances, but even if economic regeneration was to lead to a requirement for <u>double</u> the population growth projected by the ONS this would still only require an additional 3300 properties, nowhere near the 5400 anticipated in the proposal.</p> <p>Given that Objective 12 of the SA Framework is "To Maintain the integrity of the Green Belt within the District", all housing requirements could be easily accommodated without encroaching on any Greenbelt</p>	<p>Objection noted.</p> <p>The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. The OAHN study will be updated in line with changing guidance in the NPPF / PPG and will use the Government's new standardised methodology.</p> <p>It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p>

				<p>land as proposed under Policy 30. Using your figures from Table 30.0.1 to 35.0.1, and removing all sites that would require removal of the land from Green Belt, 2190 dwellings could be built on identified sites, many more than would be required using the ONS figures of projected population growth. There are also other possible sites within the Wyre Forest District not currently within the Green Belt that could be considered for residential development not identified in the proposal - the current town centre zombie streets of Worcester Street, the lower end of Coventry Street and much of the pedestrianized area being one in particular. No-one would particularly miss either The Swan Centre or Rowland Hill centre. The possibilities for urban regeneration here, combined with green spaces are tremendous.</p> <p>Therefore I object to all proposed residential development on existing Green Belt detailed in sections 30 to 35. Justification 31.1 is also invalid as no development on Green Belt is required.</p> <p>In summary this plan is fundamentally flawed with unrealistic anticipated population growth. The Council need to go back to the drawing board and, using realistic figures based, make a new proposal.</p>	
Summerfield Against Land	LPPO1621	Development	Object	<ul style="list-style-type: none"> If the 2016 OAHN is accepted that would fulfil the combination of the Core need and <i>all</i> the 	The OAHN study published in April 2017 followed the government guidance on OAHNs

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Further Expansion				<p>The National Statistics Sub National Population Projections (SNPP) 2014 evidences a growth of population for the outlook period at 4.7%. Using this growth figure the need is 199 dwellings per annum (2985 in total to 2034). This negates the need to take Green Belt land.</p> <p>Even the PG Short Term Data shows an increase of 5.8% which is twice the growth of the last 15 year period and still only has a need for 229 dwellings per annum. We firmly believe that growth figures will be less than 5.8% based on national projections. With the forthcoming government attempts to reduce net immigration, this will bring the figure much closer to the 2.7% experienced over the last 15 years.</p> <p>The Amion Report assumes a much higher rate of population growth than the actual growth over the past 15 years and we believe it is therefore flawed.</p> <p>Increasing the allowance for vacant properties to 4.5% and the vacancy rate by 1.3% means that the housing demand has been unnecessarily increased by 578 dwellings (or 39 per annum).</p> <p>The need for new dwellings in Wyre Forest up to 2034, is realistically around the 3000 number and therefore the need to use any Green Belt land is unnecessary.</p>	<p>The OAHN study published in April 2017 followed the government guidance on OAHNs available at the time. The OAHN study will be updated in line with changing guidance in the NPPF / PPG and will use the Government's new standardised methodology.</p>

				required by each potential business – from a one employee one through to possibly a 500+ one. How can such vast requirement be addressed – no doubt by leaving ‘land for industrial building’ untouched for years on end.	climate of the economic market. For the district to be sustainable, it needs both housing and employment sites so people can live and work in the district.
	LPPO4308	Policy 6A	Comment	<p>Quote from Government news:</p> <p>"Getting the right homes built in the right places</p> <p>Consulting on the principle of a new, standardised way of calculating housing demand to reflect current and future housing pressures. Every local area will need to produce a realistic plan and review it at least every 5 years.</p> <p>Currently 40% of local planning authorities do not have an up to date plan that meets the projected growth in households in their area. Fixing this will help make sure enough land is released for new homes to be built in the parts of the country where people want to live and work and ensure developments take heed of local people’s wishes, while continuing with maximum protections for the Green Belt.</p> <p>Councils and developers will also be expected to use land more efficiently by avoiding building homes at low density and building higher where there is a shortage of land and in locations well served by public transport</p>	Comments noted. The NPPF Para 83 states that “Local planning authorities with Green Belts in their areas should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.” As the Council is undertaking a Local Plan Review, it can amend the Green Belt boundaries through this process. This will be tested at examination stage by the Planning Inspector.

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>such as train stations."</p> <p>I do hope you will listen to all the information you receive during the consultation period, especially since your plan does not meet the government guidelines to protect Green Belt.</p>	
	LPPO4461	Development Needs	Comment	<p>It seems that the main thrust behind this Plan is the stated Government requirement for Wyre Forest DC to provide 6000 houses by 2034. If there is any direct evidence for this number in the review then it is not shown clearly. What is clear is that the population of the Wyre Forest District is, and has been, practically static for a number of years. So why does the district require such a large amount of additional housing? Is this something being driven by the GBSLEP? If so why? Would this be accompanied by jobs or would Wyre Forest become a 'dormitory district' with all the attendant problems of a large commuting population.</p>	<p>There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO4442	Development Needs	Comment	<p><u>Housing Needs and Numbers</u></p> <p>I believe that the Council's projections for the population growth of Wyre Forest in the local plan are unrealistic. Over the last 10 years, the population growth has virtually been static and has only risen by approximately 1000, which is below the national average. Our population is also described as "ageing". We do not have the industry to attract younger workers to the area.</p>	<p>The housing need is based on population data which includes births and death rates. It is also based on household projections. As the plan period is for 20 years, there will be an increase in population over this time. Also, there is an increasing elderly population in the district which means people are living longer and therefore staying in their homes for longer. In addition to this, the family unit is changing with more single parent families occurring. This</p>

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
					<p>puts pressure on the current housing stock. There simply isn't enough housing to cater for all these different needs over the plan period. In addition to this, people migrate into the area as well as moving out.</p> <p>The emerging plan will also be allocating employment sites. This is so people can live and work in the district, creating a more sustainable place.</p>
	LPPO4637	Housing need	Comment	<p>Finally it seems to me that the new build for Lea Castle is not designed to meet the needs of the local population but that of those further afield who would like to live in a semi rural area but commute to their employment in Birmingham and Worcester. Please understand that commuters bring little to their residential areas, often using eateries and retail outlets either close to their work place or in large retail parks such as Merry Hill.</p> <p>It would be beneficial to the local population if the housing met our needs and also include such organisations as care homes, sheltered housing and hospice to meet the needs of our expanding ageing population.</p>	Comments noted. The proposed site allocations in the emerging Local Plan are to meet the needs of the District in terms of housing and employment. The evidence for this need is shown in the OAHN study and the ELR study – both of which are being revised and updated for the pre-submission plan in light of Government changes to national planning policy.
	LPPO4898	Policy 6A	Comment	Puzzled by the figures used for deciding on the required number of new builds. In 6.8 of the plan it states 'The housing requirement reflected by this plan	The housing need is based on population data which includes births and death rates. It is also based on household projections. As the plan

				<p>with the core planning principles of NPPF rather than seeking to safeguard such areas.</p> <p>Avi - urban focus of plan broadly reflects services and facilities provision. However, market towns and rural centres are also sustainable locations where development should be promoted inline with NPPF. This will help to maintain vitality of rural communities.</p> <p>C - neighbourhood plans will need to be consistent with Local Plan as a whole and have a role to play in supporting district in meeting development needs in full.</p> <p>D - open countryside is defined as land beyond a development boundary where development should be strictly controlled. However, this is not consistent with presumption in favour of sustainable development and would restrict development coming forward on edge of settlements. The policy approach taken through the Plan should more closely follow the Framework's emphasis on the need to recognise the intrinsic nature and beauty of the countryside as part of the wider consideration of sustainability (alongside other core planning principles), rather than an out of date approach of protecting the countryside for its own sake.</p> <p>Bewdley - is highly sustainable and offers wide range</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				of services as well as being close to Kidderminster's services and employment opportunities. Current plan seeks to deliver 10% of overall housing requirement to Bewdley. No explanation in emerging plan as to how housing has been allocated. No justification for level of Green Belt land proposed for release in Bewdley and whether this is enough to meet needs. Policy 6B seeks to meet local needs in Bewdley but proposed allocations would not do this. Bewdley Housing Study Report says affordable housing requirement over plan period will total 383 dwellings, whilst proposed allocations only total 251 dwellings. If the Local Plan fails to tackle affordable housing needs over the plan period current housing inequalities will get even worse for the next generation.	
Persimmon Homes Limited	LPP01585	Policy 6B	Comment	<p>Bewdley is named as a Market Town and is third in the settlement hierarchy, there appears to be a negative stance within the Plan for development within this area, being described as a settlement with “fewer services”. However, as Bewdley is named as a Market Town the Plan should be more positively worded in order to encourage the much needed growth which is required in the area.</p> <p>As the amount of brownfield land available has reduced the Council now needs to look at appropriately located sites so may need to adopt a more flexible approach towards greenfield sites if the</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>OAN is to be met in full. As Bewdley is third in the settlement hierarchy it is necessary that development is undertaken and encouraged in this area.</p> <p>Within the Wyre Forest Settlement Hierarchy Technical Paper (2009) Bewdley was ranked very similarly to Stourport. Whilst Stourport received a score of 21 Bewdley was awarded a score of 20 which saw Bewdley have many of the same facilities as Stourport. However, whilst Stourport is in line to receive a significant amount of housing, Bewdley has been marginalised for growth. Due to the lack of potential development land within the District it is considered that a fresh approach needs to be taken for development in Bewdley in order to satisfy the local and wider need.</p>	
	LPP01878	Brownfield sites.	Comment	Run down areas with empty building, develop them such as The old law courts and Glades.	Comments noted. These sites are being considered.
	LPP02592	Policy 6B	Object	It is very important that every effort is made to use the considerable brownfield sites still available for development before greenfield sites are considered. Developers will always prefer to develop on green field land because it is easier and cheaper. However this is no reason to zone large areas of the Green Belt for housing just for this reason. Are there any existing industrial or retail areas that could be rezoned for high density housing? For example, Worcester Street in	<p>Objection noted.</p> <p>It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District.</p>

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Kidderminster has ceased to become a viable retail zone and could be redeveloped for high density housing instead of poor quality shopping. The Crown House site in central Kidderminster could also be similarly rezoned for high density housing. Both these opportunities would go some way to revitalising the Town Centre especially at night and would be highly sustainable close to transport and other facilities.</p> <p>If Green Belt land is required for housing I reluctantly accept that land east of Kidderminster may be the best option as it is the closest to transport links to the economic hub of the West Midlands conurbation where most economic activity takes place. Locating development here will mitigate further traffic growth through Kidderminster. However, I feel that it is disingenuous to attempt to sell the Council's preferred options for housing development on the basis that they will fund a by pass for Kidderminster. The proposed road through the development is not a by pass but a single carriageway 40mph (at most) access road to the new development. What is really needed is a rejuvenation of previous proposals for a proper dual carriageway by pass starting from the Bewdley by pass and running south of Kidderminster and Blakedown to reach the A456/A491 island at Hagley. This would hugely improve access to Wyre Forest district and therefore the economic performance of the area.</p>	<p>We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p> <p>Transport modelling work is being undertaken to inform the final site allocations. This evidence based work will be made available at pre-submission consultation stage for public viewing on our website.</p>

				ugly homes.	
	LPPO3587	Policy 6B - Locating new development	Object	<p>Has the council thoroughly checked that brownfield sites have been identified and that these be used for development and that instead of offering green belt land to developers.</p> <p>Grade A agricultural land or any agricultural land and green belt, must never be built on, this land is very productive and employs many people during and before harvest, consider food miles and sustainability.</p> <p>Wild life will also suffer at the loss of their habitat.</p>	<p>Objection noted.</p> <p>It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p>
	LPPO3655	Policy 6B	Object	<ul style="list-style-type: none"> Green Belt, though not sacrosanct, is there for good reason – creeping urbanisation from the Birmingham conurbation only makes sense in <u>exceptional</u> circumstances. A requirement of the Local Plan is that development should be proportionate to the capacity of the district. The potential for around 4000 dwellings being built along this eastern corridor is surely disproportionate? 	<p>Objection noted.</p> <p>Comments noted. The housing requirement is based on the Objectively Assessed Housing Need (OAHN) study. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>The emerging Local Plan does include policies</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<ul style="list-style-type: none"> The Provisional Local Plan states that there is virtually static population growth due to an ageing population and a higher proportion of residents being over 65. As well as a requirement for more care home places surely there is a need to look at the likely housing needs of an ageing population. Many may be looking to live near to amenities in the town centre – close to shops, transport etc. and not on housing estates on the periphery. Movement to the town centre would free up family homes and reduce the need for more ‘housing estate’ type of new builds. Young people coming into the area to work would also be attracted to town centre living with all facilities on their doorstep e.g. affordable housing in the form of town centre apartment 	for affordable housing and will also look to provide a mix of housing types to cater for the needs of the community, i.e. 2 bed, 3 bed, 4 bed family homes. There will also be a C2 use requirement to cater for the needs of the elderly population.
	LPP02916	Policy 6B	Comment	<p>Empty properties in Green Street and Worcester Street could be turned into apartments to provide affordable housing.</p> <p>The town needs to be regenerated to attract people to live in the area. There are a lot of empty shops and unemployment in the area.</p>	<p>Comments noted. Brownfield sites have been considered as part of the plan process – the site next to Tesco in Stourport is included in the Plan (AKR/20 – Carpets of Worth, and AKR/2 – Cheapside). The Sladen School (BW/3) site is also included.</p> <p>The council works with Empty Property owners</p>

				<p>Also there is the old Sladen school site could also provide housing.</p> <p>The old Sarsons vinegar site could be used for housing as the road network is there and it is close to local amenities.</p>	who want to bring properties back into use and would support conversion of units where it is appropriate to do so.
	LPPO3366	Policy 6B	Object	<p>The green belt plays a vital job in separating the town from the W.M conurbation. This land is highly regarded locally, as it supports much wildlife, birds, mammals and invertebrates including endangered species, hedgehog, skylarks etc. The impact on the habitat the impactand on the buffer zones for Hurcott and Podmore SSI's would be very damaging.</p> <p>Because we are a small town is doesn't mean that we need to spread so far into large areas of green belt. Open countryside is important to everyone, wildlife and the existing population. These areas are the green lung to eastern Worcestershire.</p>	Objection noted.
	LPPO4126	6B	Object	<p>Any development to the west of the river Severn would carry such massive infrastructure costs.</p> <p>Creating approx 1000 new homes to the west of Stourport, must inevitably require a new Severn crossing. Currently going from the west, crossing the river at Stourport can easily take 30 minutes.</p> <p>The schools, Doctors and other requirements, must</p>	Objection and comments noted.

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>surely make the whole concept run into many Millions.</p> <p>Increasing traffic would make the situation far, far worse.</p> <p>Population levels in Wyre Forest are below the national average. The same is true of housing stock, where prices have struggled to get near the national average increases over the past few years.</p>	
	LPPO3579	Green Belt	Object	I would like to raise an objection to the use of green belt sites to build houses as there is insufficient jobs to sustain the number of people, and insufficient infrastructure to support them.	Objection noted.
	LPPO4133	6B	Comment	<p>We are mystified by the total lack of explanation of the total failure to look into and comment on why the proposals have not included any land whatsoever to the north, south or the west of the town. Not bothering to mention these areas and the reasons for the omission shows a complete lack of regard for the electorate.</p> <p>Our initial comment is that developing towards Hartlebury would present no danger of linking the village to Kidderminster, this is certainly not the case with extending the town towards Blakedown and thence to Hagley.</p> <p>This is also clearly not a problem with extending</p>	Comments noted. Sustainable locations are sought when identifying site allocations in the emerging Local Plan. The site selection process is informed by a number of evidence base documents, which include the HELAA, Employment Land Review, Strategic Flood Risk Assessment, and the Green Belt study to name but a few. The Local Plan Review is also informed by the Sustainability Appraisal. A Site Selection Paper will also be published at pre-submission stage – this paper gives further details as to why some sites have been chosen as opposed to other sites.

				towards Bridgnorth. This begs the question as to why one quarter of the town must bear the whole impact, whilst three quarters, with less danger of negative impact, are not even looked at.	
Anonymous	LPPO5093	6B - Locating new development	Comment	<p>It would be naive to believe Kidderminster, Stourport & Bewdley will not be forced at some point to build on Green Belt. I believe it would be constructive is to engage with Wyre Forest District Council about how the Green Belt land is developed in a more sensitive and thought through manner (i.e. not another Spennells stuck on the edge of the community increasing the already present traffic issues and meaning the location of existing services need to be moved rather than improved).</p> <p>See response LPPO5094 re types of dwellings – that could be spread out in more of a lane fashion retaining adjacent fields to be used for cycling, dog walking and the general enjoyment of the whole community. In terms of traffic, the lanes should access more than one major road. The hope would also be that the majority of target residents (65+) would not add to the existing morning commute traffic issues in the area as they are already retired, or over the next decade, would be reaching retirement age. This is not to say traffic would not increase in general, hence the reason for providing many routes to the major roads already in place.</p>	Comments noted.
Worcestershi	LPPO1085	Site	Comment	With regards the specific sites proposed for allocation,	Comments noted and welcomed. We look

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
re County Council, Planning Economy & Performance		allocations policy - Policy 6B		<p>we are concerned that we have been unable to identify a background evidence base or work to consider these sites in relation to green infrastructure or its constituent elements of landscape assessment, biodiversity, blue infrastructure or historic environment, whether individually or holistically. It is therefore difficult to assess the potential for the sites individually or collectively to deliver sustainable development or for the plan to meet the requirement of NPPF paragraphs 109 and 110.</p> <p>We recommend that ecological site assessment should be undertaken as early as possible in the planning process, prior to site allocation, and should be used to inform both the final site allocation and to develop a comprehensive and holistic approach to consideration of the impacts of the proposed development. The Worcestershire Green Infrastructure Partnership would welcome the opportunity to work with WFDC to develop a green infrastructure approach to site allocations within the plan, including desk based assessment and to discuss more detailed site assessment as appropriate.</p> <p>With regards to green infrastructure we support neither option A or B, but instead a hybrid approach which removes from the final allocation those sites which have significant environmental constraints upon deliverability. This should be informed by further work</p>	forward to working with WCC on this suggested approach.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>including desk based assessment. The final allocation should cohesively treat the remaining sites in a manner which will facilitate the sustainable development aspirations as set out within the Plan's vision for the area.</p> <p>We'd suggest this maximises the development quanta via the key strategic areas of: the East Kidderminster Corridor (including Option B); Urban Kidderminster and Stourport; the Kidderminster and Stourport Waterfront Sites; and the larger Lea Castle Complex (Options B).</p> <p>In order to realise the quanta of development within such a 'hybrid' approach, it will be necessary to cohesively treat groups of sites which naturally sit together. The advantages of this approach go beyond securing an ecologically functional landscape and would facilitate a quanta of growth required to trigger essential accompanying infrastructure as advocated by the Worcestershire Green Infrastructure Partnership.</p> <p>This approach would work well if each cohesive 'cluster' of allocations were supported by tailored Green Infrastructure Concept Plans designed to maximise the environmental benefits for each group of allocations. Additionally, this would help achieve the aspirations of Policy 14.</p>	
Stourport	LPP01130	Policy	Comment	Support a number of the aspirations of Policy 6B in	Comments noted. Agree that employment

High School		6B Locatin g New Develo pment		<p>terms of its approach to the location of new development. However, concerned that the proposed approach to distributing development outlined by Policy 6B is not reflected by the allocations included within the emerging Plan.</p> <p>A number of the proposed allocations are on existing employment land. It is our view that employment sites should not be allocated for residential development unless there is clear market evidence presented to demonstrate that the sites will not come forward for an employment purpose.</p> <p>Support the recognition that it is necessary to facilitate the delivery of sufficient accessible housing to meet objectively assessed needs. As part of this, it is necessary to ensure that the proposed housing sites are in suitable and deliverable locations. In addition, if the housing requirement is to be met, it must be ensured that there is a sufficient variety of sites available to meet the needs of the market. Concerned that the Kidderminster allocations in particular will result in a market saturation on the eastern edge of Kidderminster. Such a significant amount of development in this location will not be deliverable during the course of the plan period as the market will not support the delivery rates required. Furthermore, housing should be distributed so that it reflects the settlement hierarchy..</p>	<p>sites should not be allocated for housing where possible, but these particular sites had remained unused for a long period of time. As they were brownfield sites suitable for housing development they needed to come forward for housing. The NPPF Para 22 states: “Planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. Land allocations should be regularly reviewed.”</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Worcestershire County Council, Planning Economy & Performance	LPO1133	Policy 6B - Locating New Development	Comment	The Worcestershire Archive and Archaeology service has no specific comments regarding the site allocations. A brief examination of the proposed allocations against the Worcestershire Historic Environment Record suggests that none of the proposed allocations would directly impact upon a designated heritage asset. On this basis any issues regarding the presence/absence of any undesignated heritage assets of archaeological interest, and any design or mitigation works that may be required as a consequence, could be dealt with as part of the normal planning and development process.	Comments noted. A Heritage Impact Assessment evidence base study has been produced to inform the pre-submission plan and will be published for the pre-submission consultation.
Kidderminster Civic Society	LPO1166	Policy 6B - re-use of brownfield	Support	Supports the re-use of brownfield sites, thus reducing the need to use Green Belt.	Support is noted.
Kidderminster Civic Society	LPO1167	Policy 6B - Locating New Development	Comment	Suggest that the new housing requirements would best be distributed over the three towns and outer areas.	Comments noted.
Wyre Forest District Council - Development	LPO1204	Policy 6B	Comment	Within table 6.0.2, under both Kidderminster & Stourport there is a bullet point that simply reads "Utilisation of appropriate brownfield and greenfield sites". Does this require further clarification, as this	Comment noted. This will be considered in policy update.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
t Control				implies that any development (housing/commercial/retail) might be appropriate.	
Taylor Wimpey West Midlands	LPPO1468	Policy 6B	Comment	<p>The principles, upon which the Development Strategy is based are sound. The principles align to the delivery of the overarching Vision and the Plan's Aim and Objectives, ensuring the delivery of homes, jobs and focusing development to the most accessible locations whilst having regard to the provision of infrastructure.</p> <p>Kidderminster is identified as the 'Main Town' within the District. As the highest order settlement within the District, its role as the administrative centre of the District and focus for public services and employment is supported.</p>	Comments noted.
Hurcott Village Management Committee	LPPO1630	Policy 6B - Locating New Development	Comment	A requirement of the Local Plan is that development should be proportionate to the capacity of the district. The potential for around 4000 dwellings being built along this eastern corridor is surely disproportionate when compared to the required 5100 homes predicted requirement for 2034?	The NPPF Para 6 states: "The purpose of the planning system is to contribute to the achievement of sustainable development." There are three dimensions to sustainable development: an economic role, a social role, and an environmental role. As Kidderminster is the main town for the District and is served by a railway station with trains running to Worcester, Birmingham and London, it is considered to be the most sustainable location for future development.
Wyre Forest Community	LPPO1647	Policy 6B	Support	We support the principles set out in the policy, but emphasise the need to bring forward schemes in	Support is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Housing				villages and rural areas. This would support us to be more proactive in meeting the rural housing needs across the District.	
	LPPO1941	Brownfield Use	Comment	Please use brown building sites first even if they are more difficult and expensive to develop. Is it possible to use sites such as Lea Castle, Sladen School, Crown House, and the site of the old swimming pool? Also use fill-in sites for smaller pockets of development that have less impact on surrounding areas.	Comments noted.
Victoria Carpets	LPPO1499	Policy 6B	Comment	The principles underpinning the development strategy and the site allocations in the emerging Plan are in accordance with the NPPF in relation to supporting economic development, creation of accessible housing and effective provision of infrastructure.	Comments noted.
Stanmore Properties Ltd	LPPO1505	Policy 6B	Comment	Kidderminster as focus for development is supported. Kidderminster has the greatest housing need, easy access to the most extensive range of services and facilities and the provision of infrastructure and cost of public service delivery is low. In addition, Kidderminster is well connected by public transport, notably train, to higher order settlements of the conurbation. Growth should be focused in the most sustainable locations in accordance with the Core Planning Principles set out in paragraph 17 of the NPPF. This	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>supports:</p> <ul style="list-style-type: none"> the transition to a low carbon future, taking account of flood risk, encouraging the reuse of existing resources; encouraging the effective use of land that has been previously developed; actively managing patterns of growth to make fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable. <p>The main towns, particularly Kidderminster offer the most sustainable option for growth.</p>	
Offmore Comberton Action Group - Local Plans	LPP01569	Policy 6B	Comment	Whatever final sites are decided we believe that NO land should be released from the existing confirmed Green Belt (i.e. excluding previous ADR sites) until ALL Brown Field sites have been developed.	Comments noted.
Summerfield Against Land Transformation	LPP01612	Policy 6B	Comment	<p>We reject the hierarchy of settlement argument as unfair and disproportionate, a fairer and more imaginative approach is required.</p> <p>The plan contains many underlying assumptions which we challenge. The settlement hierarchy has face validity in terms of population distribution but your proposals result in some 77% (Option A) or 61% (Option B) of the proposed housing development</p>	Comments noted. Sustainable locations are sought when identifying site allocations in the emerging Local Plan. The site selection process is informed by a number of evidence base documents, which include the HELAA, Employment Land Review, Strategic Flood Risk Assessment, and the Green Belt study to name but a few. The Local Plan Review is also informed by the Sustainability Appraisal. A Site

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				falling upon Kidderminster and its environs. This is an unfair distribution and undue burden on the population. This approach is further justified by the limitations imposed by the rivers and canal that flow through the District. Whilst these features do pose challenges to development they do not, in our view, exclude development, or, justify the scale and distribution of development you propose in Option A.	Selection Paper will also be published at pre-submission stage – this paper gives further details as to why some sites have been chosen as opposed to other sites.
Taylor Wimpey West Midlands	LPP01716	Policy 6B	Comment	<p>The principles, upon which the Development Strategy is based are sound. The principles align to the delivery of the overarching Vision and the Plan's Aim and Objectives, ensuring the delivery of homes, jobs and focusing development to the most accessible locations whilst having regard to the provision of infrastructure.</p> <p>Stourport-on-Severn (including Areley Kings) is identified as a 'Large Market Town' within the District. As the second highest order settlement within the District, its role in supporting the provision of large scale housing is supported.</p>	Comments noted.
Spennells Against Further Expansion	LPP01738	Policy 6B - Locating new development	Object	<p>When using the SNNP figures of 199 p.a. there is sufficient brownfield land (including previously developed land at Lea Castle) and Greenfield land available to meet the 15 year land supply (2985) without the need to use Green Belt at all.</p> <p>Kidderminster town centre has at least 40 large shops and office blocks that stand empty, some for well over</p>	It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>a decade. Compulsory Purchase Orders should be made on some of the larger shops that stand no chance of ever being filled due to their size. There are also sites at Sladen School and Sion Hill School. Why are there plans for a cinema on the old Glades site when WFDC claim that land for housing is the priority.</p> <p>WFDC could request Government action in order to encourage Developers in the local area who have been given planning permission to build houses within a reasonable time frame, not just to sit upon Land Banks for speculative purposes e.g. Cheapside in Stourport (AKR/2) and Sladen School.</p> <p>Stourport also has a number of brownfield sites which are in need of development. The now defunct Wyre Forest golf course has released some land and there is no reason why the rest should not be released for housing development.</p> <p>Brownfield regeneration MUST take priority over the development of Green Belt. We contest that there is any need to build on Green Belt within the next 15 years of the plan, and therefore no Green Belt review or land (except Lea Castle) is required for housing.</p>	<p>sites to be able to meet our housing requirements. This will include some greenfields sites within the Green Belt.</p> <p>The sites referred to have already been considered and suggested as potential allocation sites in the emerging Local Plan, i.e. Sladen School site (BW/3), Sion Hill School site (WFR/WC/18), Cheapside (AKR/2) and Carpets of Worth (AKR/20).</p>
	LPPO1854	Policy 6B Brownf	Comment	Consider brownfield sites like large building in the town centre rear of Matalan that has been empty for years before greenbelt land is used	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
		ield Sites			
	LPPO1912	Brownfield sites	Comment	There are Brown field sites available which could cater for a more accurate assessment of the real housing needs plus Kidderminster town centre has empty shops/offices/building which could provide the required need.	Comments noted.
	LPPO1948	Development	Comment	<p>Many people will object on the important ecological grounds. Everyone talks about global warming and we talk about destroying the countryside. It seems like a ploy to get funding for an eastern bypass, with no thought to wildlife.</p> <p>My major concern relates to the amount of traffic on the A456 to Birmingham. If you currently travel at rush hour, you will understand the problem. Not understanding means that your alternative will be to do so before confirmation of the options is completed.</p> <p>The irony of the whole situation is that we are not allowed to have a mobile phone mast at the bottom end of Offmore Farm, but you can contemplate these measures.</p> <p>School places are already under pressure. Appointments with the doctors, likewise. Fire services are down to a minimum and parking is already at a</p>	Comments noted. Transport modelling is being undertaken to help inform the site selection for the pre-submission version of the emerging Local Plan. The Infrastructure Delivery Plan (IDP) is also being produced alongside the Local Plan. The IDP sets out the infrastructure requirements for the emerging Local Plan.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				premium. Sounds like a well thought out plan.	
	LPPO3320	Policy 6B	Comment	Removal of potential employment sites will add to the significant loss of employment through out the area. Stourport has had no improvements in infrastructure despite the current increase in population of in excess of 10% including both sides of the river. These proposals will increase the population by a further 10% over current numbers still with no infrastructure improvements. It will become a dormitory town with no access to major roads, railway or dependable bus services. The whole area will become a point from which people will travel elsewhere for work.	An Employment Land Review study has been undertaken to inform the Local Plan. Transport Modelling is also being undertaken to inform the final site allocations. This evidence based work will be made available at pre-submission consultation stage for public viewing on our website. The Infrastructure Delivery Plan (IDP) is also being produced alongside the Local Plan. The IDP sets out the infrastructure requirements for the emerging Local Plan.
	LPPO3443	Locating new development	Object	Building all of these houses will cause major environmental damage over the upcoming years. Some of the sites proposed are very near SSSI's (sites of scientific and special interest e.g. sites near Hurcott). They will also be threats to public rights of way. Adding more people to the communities will push GP surgeries.	Objection noted. The Infrastructure Delivery Plan (IDP) is also being produced alongside the Local Plan. The IDP sets out the infrastructure requirements for the emerging Local Plan.

				<p>medium and long term plans to solve the traffic issues of the district?</p> <ul style="list-style-type: none"> • Schools, hospitals etc are also at breaking point. The plan appears just to add more burden in order to tick a Government housing requirement box. • What plans are there in place to support, improve and protect the local environment? In the last 40 years plus, wildlife numbers have nose dived, habitat lost and there are now more red listed wildlife species then ever before. What is being done to halt this decline and reverse it? • What plans are in place for future housing developments? Bird boxes should be required to be built into the brick, corridors of hedgerow for wildlife movement incorporated into the plans. Trees / ponds, meadows and fruit bearing shrubs should all be required to be incorporated into any developments. The answer that this cannot be afforded is wrong, it is in fact that we cannot afford not to reverse the trends and errors of the past. What plans for new trees to be planted, areas restored for wildlife? <p>You need to plan for today, tomorrow and the next 50 years. The plan appears to be for today and then lumber the problems this creates onto future</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>generations.</p> <p>Solve the current problems first and then plan to benefit all (including our natural environment).</p> <p>You have an opportunity to lead, don't follow the past and repeat the same mistakes. I see no vision for the next 30-50 years.</p> <p>Let's have proper visibility, no smoke and mirrors. We require honesty, clarity and true long term planning.</p>	
	LPPO2604	Locating new development	Comment	<p>When deciding where to build the new houses, special regard should be taken of the social and employment needs of the people who will be living in the new houses and these fall into two categories.</p> <p>Category one: those people who choose to live in the Wyre Forest but their employment is within the surrounding towns and cities.</p> <p>Category two: those who do not work, or choose to walk, cycle or use public transport to get to work.</p> <p>For those who fall into category one, and we believe this is the vast majority of the adult population, it is essential that their houses are built within easy access of the major arterial roads of the A449 (North), A451, A456, A448, A442 and the A449 (South). It is</p>	Comments noted. Transport modelling work is being undertaken to inform the final site allocations. This evidence based work will be made available at pre-submission consultation stage for public viewing on our website.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				essential that they are not built in areas that will cause extra traffic to be routed through the known major congestion areas of the Wyre Forest, such as Stourport: Gilgal/Mitton Street, Burlish Crossing, Vale Road and Kidderminster: Foley Park and Bewdley Hill.	
	LPPO3380	Policy 6B	Object	<p>The green belt land plays a vital role in separating the town from the West Mids conurbation, it is home to many bird/animal and invertebrate species, including endangered and priority species: hedgehog, small tortoise shell butterflies, skylarks, corn bunting, house and town sparrows, starlings to name a few. The impact on wildlife habitats on the buffer zones for Hurcott and Podmore SSIs would be tremendously damaging in a time when we are trying to maintain and increase wild habitat recovery.</p> <p>Sir David Attenborough, who wrote the foreword to the State of Nature report, said: “The natural world is in serious trouble and it needs our help as never before. We continue to lose the precious wildlife that enriches our lives and is essential to the health and well-being of those who live in the UK.” I believe these proposals negate this.</p>	Objection noted.
	LPPO4050	Locating development	Object	The allocation of housing in the two “preferred options” provide Stourport with a choice of either a 10% (Option A) or 20% (Option B) rise in population by 2034 — some choice! Whereas the equivalent figures for Kidderminster are 8% & 7% and for Bewdley 5% &	Objection noted. As the District’s strategic centre and the largest town within the district, it is the most sustainable location for future housing growth.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

				8%. The overall figures for Wyre Forest are under 6% for both Options. This is a totally unfair allocation and would result in infra-structure problems in Stourport where the current roads and bridge are already over stressed.	
	LPPO4194	Planning decisions/options	Comment	<p>Planning decisions/options should be informed by the following principles, a number of which I recognise are implicit if not explicit in the options you offer:</p> <ul style="list-style-type: none"> • The individuality/personality of the three towns in the District must be sustained and protected. • The existing and in some cases already diminishing/threatened/remaining open space between the must be protected. • No greenfield sites should be considered/built on when brownfield/derelict sites are still available (e.g Power Station land adjacent to Tescos in Stourport, Timber Yard by canal in Kidderminster, Workhouse site, part of Dog Lane site in Bewdley etc.) • Empty/underused retail spaces in centre of towns should be converted into housing. • The capacity of Kidderminster to support additional housing/population e.g in relation to availability of brownfield sites/proximity to often underused and therefore vulnerable 	<p>Comments noted. Brownfield sites have been considered as part of the plan process – the site next to Tesco in Stourport is included in the Plan (AKR/20 – Carpets of Worth, and AKR/2 – Cheapside). The Timber yard site in Kidderminster is also included (BHS/16 – Timber Yard).</p> <p>The council works with Empty Property owners who want to bring properties back into use and would support conversion of units where it is appropriate to do so.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				retail capacity and main line rail links is greater than that of the other two towns. Keeping additional housing close to existing transport and underused retail capacity would also reduce pollution/traffic congestion across the Wyre Forest District.	
	LPPO4471	Churchill and Blakedown	Comment	No sites in Churchill & Blakedown were put forward in the Call for Sites. The Churchill & Blakedown Neighbourhood Plan only provides for small scale housing to meet identified local need.	Comments noted.
	LPPO4746	Policy 6B	Comment	This consultation has not been in my opinion unbiased or transparent. I do not see why Wolverley, Chaddesley Corbett, Blakedown along with other outlying areas have not been included.	Comments noted.
	LPPO4899	Policy 6B	Comment	It is stated in the plan that there is virtually static population growth, with an ageing population, and a high proportion of residents being over 65. As well as a requirement for more care home places, surely there is a need to look at the likely housing needs of this ageing population, I would suggest that many of these would be looking to live in a town centre, close to shops and transport facilities, and not on housing estates on the periphery. Movement to the town centre would free up homes for families and lessen the	Comments noted. Housing provision in the town centre is being considered as part of the Local Plan Review process. We also have an emerging Policy on housing for older people.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				need for more 'housing estate' new builds. Likewise young people coming to the area to work would also be attracted to living in a town centre with all facilities on their doorstep. There would obviously be a higher density than that provided on a housing estate, negating the need for committing so much Green Belt land for development.	
	LPPO3712	6C	Comment	COMMENT ON Policy 6C We do not believe there is evidence to support Kidderminster as the 'tourist hub' for the area; Bewdley and Stourport are the tourist attractions in the Wyre Forest.	Agree with these comments. The emerging Local Plan does recognise Bewdley and Stourport as having important tourist attractions also.
Summerfield Against Land Transformation	LPPO1622	Town Centre Regeneration	Support	We support Wyre Forest DC's ambition to develop and regenerate Kidderminster town centre. This is best served by building in and close to the town centre, promoting the use of sites such as The Glades, Crown House and the Park Lane timber yard. This would address housing need, revitalise the town centre and offer opportunity for small businesses.	Support and comments noted. The former Glades site and the Timber yard site are already included as possible site allocations. There are also future plans for Crown House which the Council's Economic Development & Regeneration team are exploring.
Taylor Wimpey West Midlands	LPPO1472	Policy 6C	Support	Kidderminster's role as the strategic centre of the District is supported. As the existing 'centre' for commercial, employment, retail, office and leisure facilities it is the most sustainable location for meeting future housing needs. The reference to sustainable urban extensions to	Support and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				Kidderminster are welcomed and considered necessary to ensure the sustainable growth of the town and to support future commercial and leisure development to support Kidderminster's role as a strategic centre, promoting the town as a tourism 'hub' and assisting in the creation of a diverse evening/night time economy.	
West Midland Safari Park	LPPO1325	Policy 6C	Comment	<p>Generally support the general essence of this policy, particularly in relation to seeking sustainable transport links and infrastructure to promote ease of access to among other places, West Midland Safari Park. However, we object to the policy as currently drafted, and request that it be amended to more closely reflect paragraph 32 of the National Planning Policy Framework.</p> <p>The policy as presently drafted gives rise to the possibility that the transport links and infrastructure will be in part or wholly funded by developer contributions in the absence of a CIL charging schedule. Such an approach should be proportionate to the scale of the impact on the transport network, and the viability of the scheme for which contributions are sought should be a key consideration in the determination of planning applications. The last sentence should therefore be amended as follows: "Where the residual cumulative impacts of development are severe, sustainable transport links and infrastructure to promote ease of access to the</p>	<p>Objection noted.</p> <p>The Infrastructure Delivery Plan (IDP) is also being produced alongside the Local Plan. The IDP sets out the infrastructure requirements for the emerging Local Plan.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				Wyre Forest, Stourport-on-Severn, Bewdley, West Midlands Safari Park and Kidderminster Railway Station will be sought, where practical and viable.”	
Kidderminster Harriers Football Club	LPPO933	Policy 6C	Comment	Additional text; This includes the provision of supporting facilities such as <u>sports</u> , hotels, conferencing facilities and developments that improve the evening / night time economy and cultural offer of the town.	Comments noted.
Miller Homes	LPPO928	Policy 6C	Support	<p>Support Policy 6C for Kidderminster to be the strategic centre for the District and for Kidderminster’s role in providing a focus for new housing, commercial, employment, retail, office and leisure development to be enhanced, including through the use of sustainable urban extensions.</p> <p>The Local Plan Review Preferred Options consultation document identifies that Wyre Forest District Council (WFDC) considers that “<i>the urban areas of the District have the greatest housing needs and are the locations where the cost of public service delivery is relatively low</i>”¹. Kidderminster is the largest settlement (urban area) in the District and already plays an important role in providing a considerable quantum of retail, leisure and employment uses, along with mainline rail links. It is also noted that the WFDC Settlement Hierarchy Technical Paper proposes that Kidderminster is classified as a Strategic Centre², at the top of the District settlement hierarchy, and accordingly is</p>	Support and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				considered to be the most sustainable settlement in the District ³ . It is therefore entirely appropriate for Kidderminster to continue to be the focus for the majority of the additional housing growth and other uses required to meet the needs of the District over the next plan period, which in turn will also support the vitality and viability of the town.	
Gladman Developments Limited	LPPO1343	Policy 6C	Support	Gladman support the broad intention for Kidderminster to be a focus for regeneration and new development. However, this should not be at expense of the sustainability of other settlements. It is vital that the delivery expectations across the portfolio of previously developed sites and urban extensions is suitably evidenced in order to support the preparation of a realistic housing trajectory to accompany the Local Plan and demonstrate the availability of a robust housing land supply. Intention to further develop sustainable transport links between Kidderminster / Kidderminster railway station and other settlements such as Stourport and Bewdley is welcomed.	Support and comments noted.
Gemini Properties	LPPO1193	Policy 6C	Comment	generally supportive of policy as it supports growth of Kidderminster as strategic centre and aspires to regenerate sites within and adjacent to the centre. Policy seeks to make Kidderminster a tourism hub and encourage overnight stays. in order to do this, the retail and leisure offer needs to be enhanced. A flexible approach to site development in and around the centre should be taken.	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO130	6c	Comment	Supportive of development plans for Kidderminster being linked to improving access to the town centre - links to Paragraph 5.4.iii (making travel easier around the area generally for non car owners) and health improvement. Currently access on foot to the town from the North and East via Blackwell Street, Birmingham Road or Comberton means using subways which feel unsafe, unpleasant and do nothing to promote Kidderminster as a place to visit or work in.	Comments noted.
	LPPO4493	6.19 Kidderminster Town Centre	Comment	<p>Believes that Kidderminster is not an attractive town due to the following reasons:</p> <ul style="list-style-type: none"> • The monstrosity of Crown House together with empty shops, broken windows, broken beer bottles in the street gives the impression of an impoverished slum town. The money spent on opening up Worcester St must be spent on taking Crown House down. Is this building to be left until it is unsafe? • Empty shops will never be occupied by retailers unless large incentives offered by the Council do not encourage visitors. • Town centres will never be what they were 50 years ago. There is nothing in Kidderminster to attract young people to shop, they shop mostly on line and in shopping malls. They are only attracted to pubs and coffee shops. • Depressing grey paving outside the Town Hall 	Comments noted. Kidderminster town is the main town for the District and is a focus for regeneration and new development in the plan.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>and shared space, is not attractive and does not complement some very nice brick buildings in Vicar St. "record" seats already look as if they have been in situ for the past 30 years!</p> <ul style="list-style-type: none"> • Drunken behaviour throughout the day is intimidating • Empty and broken beer bottles littering pavements; smashed windows • Green Belt land should be there for the health and well being of residents. The nation is becoming more obese, not helped by Councillors and planners agreeing to more "Take Aways" and "Coffee Shops" We should be encouraging private enterprise. • We worry about obesity in the young and pollution but the Council allowed a drive in coffee shop . • The area where the coffee shop and Kentucky Fried Chicken have been built should have been for accommodation 	
Taylor Wimpey West Midlands	LPPO1474	Policy 6D	Support	<p>Urban extensions at Kidderminster are supported as insufficient amount of sustainably located, readily available land within the town, to support the necessary level of development growth to meet the objectively assessed housing and employment needs.</p> <p>Taylor Wimpey has significant land interests within the</p>	Support is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				proposed 'East of Kidderminster' Urban Extension and would welcome ongoing proactive discussions with the District Council in bringing forward these land interests within the Plan period.	
Stourport High School	LPP01131	Policy 6D Kidderminster Urban Extensions	Comment	Policy 6D is superfluous as there is a specific policy (Policy 31) that provides guidance on the Kidderminster's proposed urban extensions. Our response to Policy 31 should be read in conjunction with this representation.	Comments noted.
Worcestershire Wildlife Trust	LPP01032	Policy 6D Kidderminster Urban Extensions	Object	We have significant reservations about Section ii of this policy. There are likely to be considerable adverse ecological impacts associated with the proposed allocations to the east of Kidderminster and additional work to understand these will be required prior to finalising the allocations here. In particular the likely impact of development on designated sites including Hurcott and Podmore Pool Site of Special Scientific Interest (SSSI); Captains and Stanklyn Pools, Spennells Valley and Hoo Brook Local Wildlife Sites (LWS); and species of principle importance listed under Section 41 of the NERC Act 2006, including Corn Bunting, Hornet Robberfly and Tower Mustard, must be fully	Objection noted. Ecological appraisals of sites have since been undertaken to help inform the final site selection process. We have also worked with the Green Infrastructure Partnership who has since prepared a number of Green Infrastructure Concept Plans, including a GI Concept Plan for the eastern corridor area.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>understood prior to allocation of any of the sites set out in the consultation. So far as we can ascertain no such information has been used in the decision-making process to date and so we are concerned that the allocations may be unsound. Whilst mitigation for some of the biodiversity issues may well be possible it will require land take that is likely to have implications for the net developable area (and accordingly the number of dwellings allocated) set out in the plan. Rigorous consideration of this is essential and we cannot find anything in the evidence base to suggest that this has been undertaken to date.</p> <p>This is a particular problem to the east of Kidderminster because the designated sites in question generally run in an east-west orientation and so the impact of the proposed eastern relief road (shown on the Proposals Map) will be particularly severe unless significant mitigation can be put in place. A clear understanding of the need for the road and the costs associated with mitigation will therefore be important considerations if a meaningful assessment of the two proposed plan options are to be undertaken. Given the high degree of corridor severance likely to be caused by the indicative relief road route we would strongly advocate that it be deleted from the plan and a reduced level of development brought forward in this part of the district. It follows that for this area Option B appears to be the less harmful option but as yet we do</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>not believe there is sufficient clarity to fully inform that decision. Given the very significant environmental issues likely to arise from the relief road it may be better to seek alternative access arrangements, including improvement to the existing network of local roads, to serve a reduced quantum of development in this area.</p> <p>Regardless of the final Option chosen in this area we would strongly recommend that allocations here are grouped together and that the council works closely with the Worcestershire Green Infrastructure Partnership to deliver an overarching Green Infrastructure Concept Plan for the area so that the extension to eastern Kidderminster achieves the best GI outcomes possible. We would be pleased to discuss this further with the council if that would be helpful. Please see our response in relation to paragraphs 6.54 – 6.56 and Policy 31 for further comments on the matters set out above.</p>	
Gladman Developments Limited	LPP01344	Policy 6D	Support	Gladman acknowledges role that strategic sites such as urban extensions can play in contributing to development needs. However, it is essential that well developed assumptions are applied when determining timing and extent of delivery that are expected to be achieved over the plan period.	Support is noted.
Persimmon Homes	LPP01439	Policy 6D	Object	Elements of Option A are to be preferred as will achieve the most benefits in terms of infrastructure	Objection noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Limited				<p>provision and will enable the entire Kidderminster East expansion to be planned as a comprehensive basis. For this reason Option A should be included in its entirety.</p> <p>Some elements of Option B may be deliverable, to provide continuity of supply, but does not favour the Lea Castle site or its proposed extension. Have commented on other sites which should be excluded from the plan for policy, technical and environmental reasons. Option A should be included together with those elements of Option B which are not objected to. The sites can contribute to the increased housing requirement which will be needed to meet the overspill requirement from the Black Country and Birmingham.</p>	
Churchill and Blakedown Parish Council	LPP01022	Policy 6D	Comment	Only one proposed site in the Parish (employment site at Hodge Hill) so proposals not wholly in conflict with Neighbourhood Plan (July 2017). However, serious concerns re traffic implications of proposed developments, especially core sites proposed east of Kidderminster.	Comments noted.
Miller Homes	LPP0949	Policy 6D	Support	Support the principle of an urban extension to the east of Kidderminster. Whilst it is recognised that the proposed composition of the urban extension(s) to Kidderminster is not yet fixed, due to the fact that there is a choice between Option A and Option B sites within the consultation document, our client supports	Support is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				the approach set out for having a number of key Core Sites which will form the basis of the urban extension(s) irrespective of which additional Option sites are chosen. As part of this process, and for the reasons set out in the response to proposed Policies 7 and 31, our client also endorses the decision to include the Hurcott Area of Development Restraint (ADR) as one of the Core Sites.	
Barratt Homes West Midlands	LPPO770	Policy 6B	Comment	Policy 6D is superfluous given that there is a specific policy included within the plan (Policy 31) that provides guidance on the Kidderminster's proposed urban extensions. We consider the proposed urban extensions to be inappropriate. See response to Policy 31.	Comments noted.
Homes England	LPPO801	Policy 6D	Comment	Policy 6D proposes two urban extensions at Kidderminster to deliver a significant proportion of the housing required for the Town. One of these is the former Lea Castle Hospital site, which the HCA supports. Redevelopment of this brownfield site will deliver up to 600 new homes, employment and community facilities, providing publically accessible open space. The site is within the Green Belt, but it is a brownfield site, and its redevelopment would better use of the site, which currently lies redundant and in a derelict state.	Comments and site options noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>The site is in a sustainable location on the north-eastern edge of Kidderminster, providing good access into the Town and surrounding areas. The site is enclosed by woodland, its redevelopment would not harm the character of the landscape. The inclusion of this site as a proposed urban extension and a core housing site, and inclusion of the site within the Council's housing supply, is supported. The site is available for development and a planning application has been submitted for its redevelopment.</p> <p>The second urban extension is 'East of Kidderminster'. It is noted that the composition of this urban extension is to be determined through this Preferred Options consultation. It is considered that further development around the former Lea Castle Hospital would provide an appropriate location for further large scale development, such as land to the east of the hospital site, included as potential housing site Lea Castle Hospital Extension (East) under Option B. High level technical work has been undertaken in relation to this site to demonstrate how the site could be developed for around 360 dwellings. This is set out in the accompanying Supporting Document which is to be read in parallel with this representation. It should also be noted that the HCA owns the land to the west of the Lea Castle Hospital site which could also support the Council's objectives of delivering housing should the Council consider the site to be appropriate for</p>

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Barratt Homes West Midlands	LPP0771	Policy 6E	Support	We support the recognition in Policy 6E that Stourport-on-Severn should make an “important” contribution to meet the District’s requirement for new homes. Stourport-on-Severn is the second largest settlement within the District. It accommodates approximately 20% of the District’s population. It should, therefore, be a focus for growth. We are, however, concerned that the emerging plan fails to make a sufficient number of allocations at the town to meet its growth requirements. Indeed, under Option A only 13.89% of the housing requirement will be delivered in Stourport. We comment on this matter further in our response to a Key Choice for Development Strategy and our response to Policy 32.	Support is noted. The Site Selection Paper provides detail on the decisions that have been made in terms of the development growth strategy for the District. This is also evidenced in the Sustainability Appraisal report.
Chaddesley Corbett Parish Council	LPP01036	Policy 6E	Comment	The acceptability of any green belt release should be determined against the criteria for rural exception sites.	Green Belt release has been informed by the Green Belt study. Policy 8C sets the criteria for rural exception sites.
Stourport on Severn Civic Society	LPP01293	Policy 6E	Comment	<p>We question some of the assumptions behind this Review:</p> <ul style="list-style-type: none"> Local retail sector in Stourport does not just cater for local needs, as in Bewdley. We have three large supermarkets which cater for a district-wide market. The comment in 6E that “New retail development proposals should be appropriate to the town’s position in the District’s settlement hierarchy” reflects an 	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>inaccuracy about the town’s true position.</p> <ul style="list-style-type: none"> Stourport has a significant, and growing, night-time economy including the Civic Hall, The Swan, The Wharf together with a number of eating places and live music. Why should night-life be centred on Kidderminster? This assumption does not accurately reflect the reality. Stourport has as much night-life as Kidderminster and is a safer environment. <p>Stourport is developing a significant offering of night-time entertainment and food and this should be recognised and supported by appropriate facilities.</p>	
Stourport on Severn Civic Society	LPP01294	Policy 6E	Comment	<p>Frequent mention is made of promoting heritage tourism in Stourport but this requires adequate provision of public toilets in the town centre, sufficient parking and provision of “set down” points for coaches together with coach parking. We see no mention of the provision of such facilities in your Review.</p> <p>We welcome comments about maintaining the heritage environment of Stourport and developing heritage tourism. Part of the attraction of the town is the surrounding rural environment and care needs to be taken to maintain this.</p>	Comments noted.
Gladman Developments Limited	LPP01345	Policy 6E	Object	Gladman object to the intention to limit Bewdley’s contribution towards the District’s housing needs. This conflicts with the presumption in favour of sustainable	Objection is noted. The Site Selection Paper provides detail on the decisions that have been made in terms of the development growth

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				development. Bewdley has a good level of service provision and is well placed to benefit from Kidderminster's offer. The plan should not ignore Bewdley's housing needs.	strategy for the District. This is also evidenced in the Sustainability Appraisal report.
Persimmon Homes Limited	LPP01586	Policy 6E	Comment	<p>Not much potential development land within Bewdley, however this should not limit the ability of the town to grow and to allow continued support to its local services, facilities and residents. It will be necessary for focused Green Belt land releases to take place, on sites that do not significantly contribute to the purposes of the Green Belt.</p> <p>Enough land is needed for local needs for Affordable Housing. Further land will need to be released to allow for Affordable Housing which is needed within the area.</p> <p>The Council should consider the release of Green Belt land around the settlement in order to provide the necessary sites over the period of the plan.</p> <p>Development Strategy</p> <p>Concern with having Options A and B, also the way they have been presented and the lack of a preferred option.</p> <p>Table 6.0.3 sets out the availability data for the District</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>in order to calculate the residual requirement for housing. RPS disagrees that lapsed planning permission should be included within this calculation and should not contribute towards the potential supply at the time of the calculation. As these have lapsed they no longer hold a valid planning permission and cannot be relied upon as part of the Council's supply of housing. The Council has not distinguished between the existing and lapsed planning permissions and so it is not possible to calculate accurate availability data with the information provided. However, it is likely that this would result in a significant increase in the current shortfall in housing for the District.</p> <p><i>Options for Growth</i></p> <p>Do not consider that the Local Plan has looked fairly or reasonably at the options for growth as part of the development strategy for Wyre Forest District. The options presented are not balanced and do not allow for an honest discussion of the ways in which Wyre Forest can grow. As such the Council has merely presented its preferred option set against a less favourable strategy that is not a genuine alternative option.</p> <p>We do not consider that the options should be mutually exclusive and that a preferred option may be a mixture of the two stated options. If Option A or B</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>were chosen it may not be the most suitable and acceptable way forward for a given settlement. Bewdley is considered for future development in option B where Catchem's End is proposed. If Option A was chosen this would result in Bewdley only having marginal growth in housing which would be unacceptable and result in unsustainable growth.</p> <p>Bewdley accounts for 10% of the population within the District and requires a proportionate amount of housing. Option A for Bewdley would mean that the settlement would have a total of 175 dwellings allocated across the plan period, only 3.2% of total housing requirement. If Catchem's End were to be included this would only rise to 4.6% of the housing requirement which is not commensurate to the size and capacity of the settlement.</p> <p>Realistic options for the future growth in Bewdley should be presented which can give an honest appraisal of sites and development locations in the town.</p> <p>Local Plan is inconsistent with the Bewdley Neighbourhood Plan. The emerging Neighbourhood Plan is indicating higher levels of housing growth for Bewdley, in keeping with the positive principles for growth in the NPPF. If Option A were to be chosen it would be inconsistent with the Neighbourhood Plan</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>which has proposed Catchem's End for a housing allocation. The Council should align with the emerging Neighbourhood Plan.</p> <p>No clear evidence why two Options were chosen. The two options appears to be engineered to produce Option A as the preferred option but doesn't favour the Core Settlements of Kidderminster, Stourport and Bewdley. A fairly justified preferred option with each settlement having a direction of growth is required.</p> <p>Sites should be considered and proposed individually depending on the settlements need rather than as a whole district. Catchem's End was included in the Sustainability Appraisal (May 2017) which identified no significant constraints. whilst also identifying a number of economic and social benefits by providing housing to support the growth in the local workforce and by providing a large area of public open space. The site is not mentioned in the settlement summary within the SA (part of appendix G.8) it performs strongly against other sites.</p> <p>There are a number of shortcomings with the current plan which need to be addressed not only in calculating the current supply and shortfall of housing within the District but also within the consideration of options for housing growth. Whilst no evidence based has been shown which shows how the Council have</p>

				derived the two options it is clear that they are not mutually exclusive and the presentation has been engineered from the offset. RPS considers that the process of choosing sites should be based on the individual settlements needs which does not seem to have occurred and should be revisited.	
Stourport High School	LPPO1175	Policy 6E The Role of Stourport on Severn	Object	We support the recognition in Policy 6E that Stourport-on-Severn should make an “important” contribution to meet the District’s requirement for new homes. Stourport-on-Severn is the second largest settlement within the District. It accommodates approximately 20% of the District’s population. It should, therefore, be a focus for growth. We are, however, concerned that the emerging plan fails to make a sufficient number of allocations at the town to meet its growth requirements. Indeed, under Option A only 13.89% of the housing requirement will be delivered in Stourport. We comment on this matter further in our response to “Key Choice for Development Strategy” and our response to “Policy 32”.	Objection noted. The Site Selection Paper provides detail on the decisions that have been made in terms of the development growth strategy for the District. This is also evidenced in the Sustainability Appraisal report.
Bewdley Civic Society	LPPO821	Policy 6E??	Comment	<p>The Bewdley Civic Society (BSC) supports the general statements and description in the Review of Bewdley's role as a Historic Market town and popular tourist destination, particularly in its drive and desire to...</p> <ul style="list-style-type: none"> Continue the role of the Green Belt and other Landscape Protection Policies to protect the town's identity, historic setting and the 	Comments noted.

					preserve or enhance those areas"
West Midland Safari Park	LPP01326	Policy 6E	Object	Policy 6E looks to enhance the role of Bewdley as a sustainable tourist destination through a particular focus on transport links to among other places, West Midland Safari Park. The policy could be used to justify requests to developers to make off-site provision or financial contributions. We object to this Policy as currently drafted. As with Policy 6C, this policy and/or the supporting text should be amended to more closely reflect paragraph 32 of the National Planning Policy Framework so that it is made clear that such provision or such contributions will only be sought where the residual cumulative impact of developments are severe, and where it is practical and viable so to do. The amendments should be as 6C.	Objection noted.
Wyre Forest Community Housing	LPP01650	Policy 6E	Support	We are in support of this policy and we particularly support small-scale Green Belt release and green field development.	Support is noted.
	LPP03677	Policy 6E	Object	6E - It appears you have changed the nature and characteristic/distinctiveness of Kidderminster as it is now not mentioned as a Market town, whilst Stourport and Bewdley maintain this title. When was this characteristic changed?	Objection is noted. Kidderminster was not identified as a 'market town' in the currently adopted Local Plan (see para 5.33 of adopted Core Strategy.) Both Stourport-on-Severn and Bewdley benefitted from their status as 'market towns' under the Advantage West Midlands (AWM) Market Towns Initiative.
Wolverley & Cookley	LPP01156	Rural Develo	Comment	Wolverley and Cookley Parish Council are supportive of the need for housing development but want to ensure	Comments noted.

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Parish Council		pment		it happens in the right places and want to ensure that the identity and integrity of our individual villages is retained as this is vitally important to the local communities.	
Historic England	LPP01268	Policy 6F	Comment	Under Policy 6F for Villages and Rural Areas we would recommend including a clause on protecting historic farmsteads.	Comment on Policy 6F noted. ACTION: Policy 6F The Rural Economy to have the following clause added: "Historic farmsteads will be protected from inappropriate development: for details refer to Policies 26 and 28A".
Taylor Wimpey West Midlands	LPP01477	Policy 6F	Support	Support Policy 6F to limit new residential development in the rural villages to meet local housing needs only. This is reflective of the settlement hierarchy where the most sustainable locations meet identified development needs.	Support noted.
	LPP01591	Policy 6F	Comment	The land designated WFR/CB/7 has over 7 ha of prime agricultural land. This is proposed as core employment use.	Comment noted.
Land Research & Planning Associates	LPP0550	6F	Object	Policy that restricts provision of affordable homes as "exception sites" requires urgent modification. There is a 'District Wide' deficit and where a landowner is willing to provide land adjacent to or close by existing	Objection noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Ltd				rural settlements and allow at least 50% affordable homes and /or Starter Homes, then this should be supported by the LPA to pave the way of reducing this serious deficit. The Policy should be modified to assist.	
Worcestershire County Council, Planning Economy & Performance	LPP01134	Policy 6F - Role of the villages and rural areas	Comment	<p>In practice, would the second bullet point under 'The Rural Economy' heading be too restrictive, given the amount of best and most versatile agricultural land in the district? 'Adverse impact' on best and most versatile could be argued for many different development proposals, and could be better expressed as direct and significant impact or a changing of the policy wording to reflect the need to look first to lower quality land wherever possible?</p> <p>Also under 'The Rural Economy', it is not clear what "small scale" means in part (i) of the third bullet point. In part (iii), we question the use of use wording that differs from that used in the NPPF, which does not mention "integrity as this may result in intended debates over the nature of the Green Belt and its function and appearance.</p>	Comments noted. These points raised will be considered in policy update.
Gladman Developments Limited	LPP01346	Policy 6F	Object	Although the 3 towns must play a key role in accommodating future development, this must not be at expense of ensuring needs of smaller settlements are met. Para 55 of NPPF seeks to promote sustainable development in rural areas to maintain and enhance rural vitality and viability. The development strategy	Objection noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				must allow such settlements to thrive. The proposed approach in the emerging local plan risks smaller settlements being considered as unsustainable in principle. It contains no mechanism to allow them to improve their sustainability.	
Horton Estates Ltd	LPP0850	Policy 6F	Comment	This draft policy fails to acknowledge draft Policy 34 which permits certain forms of development at PDL sites in the Green Belt and rural areas. It is requested that this policy be cross-referenced in the final sentence of draft Policy 6F (where there is currently a cross reference to Policy 35).	Comment noted. This suggestion will be considered in policy update.
	LPP0415	Section 6	Object	<p>I wish to object to the development proposals particularly those relating to options A and B involving the extensive housing and industrial development to the east of Kidderminster. It would be a mistake to allow building in these areas for many reasons:</p> <ul style="list-style-type: none"> • The proposed development would be too close to existing housing and merely enlarge the urban reach without any character. • The area is valuable as a green space which is used by existing residents/council tax payers who would be deprived of an amenity which contributes to a healthy life. The Council does has a responsibility to safeguard the quality of life and health of residents. • The area concerned is agricultural and wildlife habitats whose loss would impact on Hurcott 	Objection and comments noted. The Issues and Options consultation stage informed the growth options for the Preferred Options document.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Wood. We cannot afford to lose farming especially if there is an increasing population.</p> <ul style="list-style-type: none"> • An eastern bypass would be impossible if the area to the east of Kidderminster is already built on. • There would be too much strain on existing medical surgeries and it is unlikely that new practices would be set up. <p>The plan envisages increasing the population of Kidderminster by 6000 houses, 10-20,000 people. There is little movement in, so really no need. Many will have to commute to Birmingham to work. The town will become a city and an urban satellite.</p> <p>If the expansion has to go ahead then I would support the proposal of OCAG-LP for a Lea Castle sustainable village to the north. This has many benefits as it could be self-sufficient and not deprive residents of important services and amenities. The grand plan does not evaluate various options for Kidderminster so it is not clear how the present plan was arrived at. If this was to be done (and published) then the relative advantages of a Lea Castle Village may be seen.</p>	
Wyre Forest Friends of the Earth	LPP01311	Paragraph 6.1	Comment	In the Summary of Issues and Options Response there is again concern about poor public transport along with traffic congestion. Implementing a modal shift away from car use needs to be planned and implemented	Comments noted. The emerging Local Plan has been informed by Transport modelling work. We also consult with the Highways Authority, Worcs County Council in terms of the highways

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>during the plan period.</p> <p>For Bewdley, the summary states that new developments on brownfield sites in or adjacent to the town centre is limited by various factors including the Welch Gate air quality management area. This AQMA has been in place since 2003. Despite an action plan the only measure implemented has been a change in priority at the junction of Welch Gate with Dog Lane. The only effective action would be changing Welch Gate to a one way traffic flow or other traffic management measures in Bewdley town centre.</p>	improvements required.
	LPPO3934	6.1	Object	<p>The Draft Local Plan excludes the areas of Blakedown, Churchill and Wolverley. Blakedown having the advantage of a railway station could provide ideal commuter opportunities to Birmingham and the West Midlands. However, given the objectives in the recently adopted Blakedown and Churchill Neighbourhood Plan, it would suggest that objectives within that Neighbourhood Plan, protecting tree scape, paths and green space, are not equally prioritised in other areas of the Wyre Forest District.</p> <p>Guidance on the Housing and Economic Development Needs Assessments, 2015 states 'Assessing development needs should be proportionate and does not require local councils to consider purely hypothetical future scenarios, only future scenarios</p>	<p>Objection noted.</p> <p>The Bromsgrove District Local Plan is having to undertake an early Local Plan Review which includes a Green Belt Review to meet its housing shortfall.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>that could be reasonably expected to occur’.</p> <p>This would suggest that objectively assessing housing need in the shorter term, as referenced in the Bromsgrove Local Plan, would alleviate the need for Green Belt land release.</p> <p>The absence of Blakedown and other areas within the Draft Local Plan, results in a plan that is neither in accordance with the guidelines for public consultation but also fails to meet requirements of both YouGov and Rural and Town Planning Institute best practice.</p>	
Wyre Forest Green Party	LPPO1410	Para 6.1	Comment	In the Summary of Issues and Options Response there is again concern about poor public transport along with traffic congestion. Implementing a modal shift away from car use needs to be planned and implemented during the plan period.	Comments noted. The emerging Local Plan has been informed by Transport modelling work. We also consult with the Highways Authority, Worcs County Council in terms of the highways improvements required.
	LPPO358	6.1	Comment	As a professional Biologist I can tell you that continued growth of the population (local and national) is not sustainable: politicians appear not to understand that population growth (note: I am not singling out migration or immigration, but 'population' as a whole) is not linear. Therefore, a pro-growth agenda for population is a terrible mistake.	Comments noted.
CORE11	LPPO200	6-1	Support	Support for paragraph 6.1.	Support is noted.
	LPPO4482	Summa	Comment	<i>“Local opposition from local residents (particularly the</i>	The source of the information in the ‘Summary

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
		ry table - Issues and options		<i>Spennells Housing Estate) in respect of an Eastern Kidderminster extension (Option 3) although some support for this approach was expressed from other quarters-</i> “What support is this from and under what reason?	Of Issues and Options Responses’ is from the Issues and Options consultation responses; a public consultation undertaken in 2015.
	LPPO3732	Paragraph 6.1	Object	The summary is biased and selective and is not supported by evidence within the report. I objected to option 3 and live outside of the Spennells yet there is no mention that some residents outside of this area also rejected the eastern Kidderminster extension – the document is flawed.	Objection noted.
	LPPO3734	Paragraph 6.3	Object	The amount of development that the Council says is required is completely fictitious and does not take into account the three independent analysis carried out by Oxford Economics, Cambridge Econometrics and Experian, which are dismissed by the OAHN report. Instead, the contracted Edge Analytics based upon a high unrealistic growth rate that is un-characteristic of Why Forest is taken forward. I object strongly to the methodology used, the bias that is systematically infused within the report and the conclusions reached. This is an attempt by the Council to grow the district un-naturally and completely alien to historic data without consideration to neighbouring competing areas nor what history has made obvious. The Council appears to remain oblivious to what people actually do	Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				and remains tranced by an idealised model of the future based upon perfect scenarios that simply will not become reality. The Council has not learned lessons from more recent development at Easter Park where green belt was used to provide empty units that remain vacant since construction to the present date.	
	LPP03678	6.3	Object	6.3 There is not good transport links between Stourport and Bewdley as you state. The bus network is not sufficient and is not reliable. And there is no train network. Please advise your evidence.	Objection noted.
	LPP03679	6.4	Object	6.4 This contradicts your proposals as you will be destroying good agricultural land which the country needs more than ever as Brexit approaches. Has Brexit been factored into these proposals.	Objection noted.
	LPP01949	Para 6.4	Comment	<p>Shocked and disappointed re plans to build on green field and green belt sites on any proposal. Have noticed how many new builds in Wyre Forest area over recent years have been done on brown sites which is understandable -such as old factory sites -sugar beet/bottom of Clensmore/old garage sites / car parks etc. So am disappointed to see green sites now targeted.</p> <p>The area has had many new builds of late, e.g. Clensmore; Silver woods. Fail to see how eastern by pass would ease increase of projected traffic if plan A taken as traffic still to get around town which is already</p>	Comments noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>congested. Plan B will cause total gridlock on Stourbridge road, Broadwaters, Horsefair roads.</p> <p>Appreciate Lea Castle a brown site, but fail to see how our town can cope with traffic, pollution, lack of hospital. Can't see shops, new coffee bars and restaurants thriving as too much traffic to get there - not enough parking -not enough local employment to be able to afford.</p> <p>Building so near to Hurcott Woods is totally unacceptable re wildlife fauna and flora -and unfair on villagers. As is building back of Spennells is spoiling residents walking and well being. How does that serve to reduce obesity and encourage healthy lifestyle?</p> <p>Can't see the point of building more cafes; restaurants and cinema re Bromsgrove St area. Maybe new care homes better sited there.</p> <p>Please respect our wildlife and environment and give nature a chance. DO NOT SPOIL OUR GREEN FIELDS AND BELT.</p>	
	LPPO3935	6.4	Object	In 2012 the NPFF requires 'relevant planning authorities should take into account the economic and other benefits of the best and most versatile land' The fields bordering the Spennells estate are good quality grade 2 agricultural land, but there is no reference to	Objection noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				this grading in the Draft Local Plan. The single non specific reference is 6.40 'the quality of agricultural land is generally very high in the area, rising from the east and south east of Kidderminster to the district boundary'	
	LPP04716	6.4	Comment	6.4 (page 25) The 'Key Diagram' mentioned in this paragraph says it supports the Development Strategy. It is indicated that it can be found on page 104 but that doesn't appear to be the case in this document. Is it somewhere else? Is it the diagram on page 108?	Comment noted. Agree - the Key Diagram is on page 108 in the Preferred Options document.
	LPP0505	6.5	Object	House prices here are lower than in other parts of the West Midlands, a lot of houses for sale can take a while to sell. I can't see why we need so many new build houses in the next 17 years. to take away the green belt which provides a sense of openness and space.	Objection noted. We have to plan for future population growth and the housing need for the District.
	LPP0469	paragraph 6.5	Object	In my opinion we do not need 300 new homes p.a.	Objection noted.
	LPP0280	Housing	Comment	The area needs extra housing, but it should be carefully planned. Some existing developments cram in too many properties EG the Bellway estate. No attention has been given to the adjacent canal - it has been ignored. Has any thought been given to converting Crown House to flats rather than demolition or leaving it empty?	Comments noted There are plans to demolish Crown House and regenerate that area of Kidderminster.
CORE11	LPP0201	6-5	Comment	At 6-5 paragraph line 3 This line could be broadened to	Commented noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				identify that" green infrastructure" is being recognised.	
	LPPO477	paragra ph.6.5	Object	I do not believe that Wyre Forest District needs 300 more properties per annum. Also as there is a need for 540 elderly persons accommodation, I believe that a development like some of the developments in Birmingham which are more like village communities where there is a Doctors surgery on site would be more suitable on the Lea Castle Hospital site than 600 houses/flats.	Objection noted.
	LPPO3735	Paragra ph 6.5	Object	For the reasons sighted in paragraph 6.3, the level of development is completely inappropriate for the district what is based upon flawed analysis. It is obvious that the Council is simply trying to justify Government investment to build its Eastern Bypass by belligerently building houses. A strategy from the past that simply will not deliver the benefits the Council thinks possible. The Council is trying to build virtually a new town on the outskirts of Kidderminster that will become a sole-less place of cheap housing boxes.	Objection and comments noted. The housing requirement is based on the Objectively Assessed Housing Need (OAHN) study. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.
	LPPO4715	6.5	Comment	I am concerned the figures given on the plan for the number of houses required each year to 2034 seems to be very high compared with the actual growth of Wyre Forest's population in recent years. I believe that we need more 1 and 2 bedroom properties locally in order that young people can get a foot on the property ladder or rental market and older people can downsize to free up family homes. The mention on the plan of	Comments noted. The housing requirement is based on the Objectively Assessed Housing Need (OAHN) study. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.

				meet a need that simply doesn't exist.	
Wyre Forest Friends of the Earth	LPO1312	6.5 Housing Provision	Comment	Housing Provision. The population has been relatively static over the period 2001-2015 with a rise of 2.7%. The draft local plan assumes 300 dwellings are required p.a which would equate to an annual population growth of 7.7%. It is difficult to see how such a high growth rate is justified and it is likely that the actual growth rate is similar to the recent historical average. Consequently the total of new dwellings required is likely to be less than 3000 removing any need to build on the Green Belt.	The housing requirement is based on the Objectively Assessed Housing Needs (OAHN) study which uses population projections and household projection data published by the Office of National Statistics.
	LPO172	6.5, point d	Comment	Infrastructure: development to the West must take into account increased traffic flow to employment (motorway, railway, Worcester). Traffic from Bewdley either goes passed the Safari park/hospital/Sutton Park road, or Stourport (Gilgal/switch back/bridge. It makes more sense to develop to the East, with direct access to roads to Hagley & Worcester.	Comments noted.
Moor Park Trustees	LPO1102	6.6 Housing need	Comment	The draft policy appears to fail to deal with any issues of unmet housing need from the wider area and/or neighbouring authorities. There should be provision for adjustment of figures to allow the local Plan to effectively address any issues which arise and a commitment to meeting the specified housing requirements by the end of the plan. The local authority should treat housing requirements for the area as a minimum and commit to fulfilling the	Although Wyre Forest District is its own housing market area, WFDC continues to undertake Duty to Cooperate discussions with its neighbouring Local Authorities during the Local Plan Review process to ensure NPPF requirements are met. Since the Preferred Options document was consulted on, the Government have published

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				needed food produce and reduce the need to import food from elsewhere. As we all know once arable land is developed for housing there is no going back.	
	LPPO3956	6.6 Housing Need	Comment	<p>We understand the need for further housing in Wyre Forest to facilitate affordable housing and social housing for local people. We do not agree that as much as a 12% growth in the number of households in Wyre Forest is required to accommodate migration to the area. If, as the plan suggests Wyre Forest has a 54% increase in the aging population (but you do not break it down to specific age groups ie, over 65yrs, over 75 yrs, over 85 yrs etc) leading up to 2034 and a reduction in younger population (due to low birth rate), requiring local housing, then isn't it feasible that there will be an excess of housing as current and future older residents die, with fewer younger generations requiring housing? Therefore I think that the estimated number of new houses needs to be reviewed to take this into account.</p> <p>The plan also mentions having more residential units, or care homes to accommodate the aging population. As Wyre Forest does not have any in-patient unit at Kemp Hospice maybe this would be an opportunity to consider having specialist palliative care beds within such institutions to accommodate individuals requiring</p>	Comments noted. The Objectively Assessed Housing Needs (OAHN) Study does consider the population of Wyre Forest District and the growing elderly population that we have in the District. This study provides the evidence base for our housing requirement and helps to shape the housing policies within the emerging Local Plan. The proposed site allocations also include allocations for C2 use (i.e. nursing homes / care homes).

					Brownfield land has been considered as part of the Local Plan Review process. A Brownfield Land Register was published in December 2017 and has been used inform the emerging Local Plan. This register is available on our website for public viewing. The HELAA document also includes an assessment of brownfield sites.
	LPPO3827	6.6	Object	I believe the amount of housing that WFDC claims is needed (6,000 houses by 2034) is grossly inflated given the relatively static population growth in this area over the last fifteen years. The target number suggested does not take into account the local conditions regarding employment, low in migration rates and a realistic allowance for vacant properties. Recent research by the CPRE found that WFDC featured in the bottom 10 areas in the UK which have not reduced their allocated housing targets, despite having high proportions of protected countryside. WFDC was charged with accepting higher housing targets and the prospect of allowing developers to build upon environmentally valuable land. The Government's OAHN for Wyre Forest is 229 houses per year, yet this appears to have been inflated to 300 a year in the Draft Local Plan. Planning rules also state that this number should be reduced when facing the constraints.	Objection and comments noted. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO4026	Paragraph 6.6	Object	One of the key issues mentioned was a need for housing to accommodate an increasing population.	Objection noted. The statistics used for the OAHN are statistics published by the

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Based on the OAHN report, it calculates that 199 houses per year for the next 18 are required. Furthermore, Wyre forest currently has a population of 99,503 and based on the OAHN report and has grown just 2.7% since 2001 and has maintained since 2011- significantly below the national average of 10.8%. In addition, since the decision to leave the EU, it is projected that population growth will decrease on the basis that we leave the single market and thus, end free movement and some EU migrants will return to home countries as a result.</p> <p>Furthermore, the statistics have been grossly exaggerated in your report. The plan states that 300 houses are required per annum which is based on a population growth of 8.2%- this would lead to an extra 1,818 homes that are not required. Also, according to the OAHN, there are 1216 vacant homes in the WFDC, it would make more sense so use these homes. Overall, extra housing to accommodate a growing population is not applicable to the Wyre Forest and therefore, is not justifiable to build on greenbelt land.</p>	<p>Government from the Office of National Statistics.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>vacant properties in Wyre Forest is 3.2% It says that there are currently 44490 dwellings in Wyre Forest It then increases the allowance for vacant properties to 4.5 %. Whilst the 4.5% figure is taken from the 2011 census, Wyre Forest District Council is legally obliged to use the most up to date data available, i.e., the current Council Tax data. There is no logical reason to use the 4.5% figure instead of 3.2% The difference between 3.2% and 4.5% is 1.3% There are 44490 dwellings in Wyre Forest This means that an extra 44490 x 1.3% dwellings will be built or 578 dwellings (39 per year). In other words, because the OAHN consultants have chosen, without statistical justification, to increase the vacancy rate by 1.3%, 578 houses will be built on the Green Belt in order to allow for them to remain vacant.</p> <ul style="list-style-type: none"> The main OAHN calculation of housing requirement. <p>I believe that it is absolutely impossible for a mere mortal to analyse the OAHN Report and discover how the housing requirements were calculated. It is riddled with unexplained acronyms and utter gobbledygook in a way that make it impossible to analyse and challenge.</p>

				<p>representative of the future as PG –Long-Term data includes the boom of 2001/2 to 2007/8</p> <p>The SNPP 2014 shows a population increase of 4.7% and only a need for 199 dwellings per annum.</p> <p>PG – Short-Term shows a population increase of 5.8% and only a need for 229 dwellings per annum</p> <p>Our population has been virtually static since 1991 (per consultation section 2.2). It has only grown 2.7% since 2001-2015 (compared to the West Midlands of 8.9%) which would suggest both the above figures are on the high side.</p> <p>In the Consultation document Section 6.A 300 dwellings is assumed but if we take PG-Short-Term data showing population increase 5.8% this is still more than double the rate of recent times and requires only 229 dwellings i.e. 1278 less and therefore no need to develop the green belt to the rear of Spennells.</p> <p>The plan figure of 300 dwellings p.a. appears to be based on a population growth rate of 7.7% which is a ludicrous 285% higher than the last 10 years which for the UK generally has been driven by immigration which will slow now we have voted for Brexit. One could argue the SNPP figures are too high.</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>In The Labour Force and Employment Implications section the unemployment rate is assessed to be fixed between 2020-2034 which is unrealistic as we have always been a boom and bust economy. Therefore the modelling is optimistic (section4.10).</p> <p>Section 4.16 indicates due to ageing population economic activity and employment are projected to decline.</p> <p>Cambridge Econometrics suggest an increase in jobs of 76p.a., Oxford Economics suggest 2p.a. and Experian suggest -61p.a.</p> <p>I think the above results show they can be ignored as they do nothing to inform the process.</p> <p>Section 5 simply recommends 300 dwellings p.a.</p> <p>The vacant dwelling rate between 2005 and 2015 has been 3.5% to 2.6%. The report assumes a vacant dwelling rate of 4.5%. As at 2015 it is 2.6% (page 33) therefore the report is over egging the figures by 879 dwellings (46260 x1.9%).</p> <p>My conclusion is even if we assume the population growth more than doubles when compared to 2001 to 2015 we do not need to develop the fields behind Spennells and additionally the report is over egging</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				requirements by 879 dwellings once again evidencing no need to use Green Belt at the back of Spennells or in many other locations. Assuming the population growth more than doubles and reducing the vacant dwelling % to current levels indicates a requirement of 3243 dwellings over the outlook period i.e. 180 p.a.	
	LPP01978	Housing need	Comment	It appears the growth has been over estimated to justify the amount of housing needs over the next few years and into the future.	Comments noted.
	LPP02105	Housing Need	Object	<p>I am not convinced the amount of homes we need for the Wyre Forest is 6,000. It states in the plan that we have had a static population with quite a large proportion of elderly people. So with this in mind I believe we should only be building what we will need for the next 5 years which is drastically less than 6000.</p> <p>If the plan includes attracting people to move to the area and increase revenue I feel by encouraging businesses, road infrastructure, investment in a fully operational hospital including A&E, two extra Doctor practices, extra schools from primary to secondary, new fire station, an extra 30 police to the area first and then perhaps some of our unemployed in the area will get jobs and be able to afford the houses you are planning to build.</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p> <p>The Infrastructure Delivery Plan (IDP) sets out the infrastructure requirements for the emerging Local Plan.</p>

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO2733	6.6 OAHN	Comment	<p>I object to all proposals set out in the Local Plan as I do not consider the assessment of need and calculations contained within the Local Plan to be robust. I appreciate that Local Authorities are finding themselves under increasing pressure, particularly in relation to people resources, however the Local Plan should be of upmost priority and the production a sub-standard and ill-informed statutory document is unacceptable.</p> <p>Purpose of the OAHN document</p> <p>With respect to the first point, the OAHN document has not been produced with the intention of becoming a public facing document. The document produced by Amion Consulting is a classic example of a private consultancy's technical output to a client (in this case WFDC). I suspect that WFDC have not completed a comprehensive technical review of the document and as such the contents of the document are not fully understood. At the very least, if the OAHN document was intended to become a public facing document then WFDC should have included this in their brief to Amion Consulting. In addition to this, WFDC have also uploaded a substantial amount of supporting "evidence" to their website which is purposely counter- productive because it overwhelms the public with information, rather than providing succinct, well-informed and readable information to inform their</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

				<p>response to the Local Plan.</p> <p>Lack of transparency about assumptions</p> <p>The OAHN is not clear about the assumptions that have been applied to conclude with 5,400 houses (300 per annum) needed over the Plan period. In an attempt to better understand the origin of the 5,400 houses, I have completed a review of existing population and housing numbers available from data.gov.uk.</p> <p>Data available from the Office for National Statistics demonstrates that between 1981 and 2015, population growth has at the most experienced a growth rate of 0.6% year on year (see Table 1), but on average the growth rate has been 0.24%. If this average growth is applied to future years, the total population in 2034 is 104,500. This equates to a population increase of 4,600, which is in line with the population projections made in Table 2 and therefore appears to be a sensible assumption. There is also data available on the projected number of households up to the 2034. The household projections demonstrate that between 2016 and 2034, the Local Plan Period, 3,420 additional houses are required, equating to 190 new households per annum.</p> <p>A series of tables with data have been supplied to back</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				up the statements.	
	LPPO2131	Housing Need	Comment	Is Wyre Forest DC really certain that the need for housing in this area is so great? Or would we be building to encourage people from other areas to move here? That would be good if the areas of Kidderminster and Stourport could sustain so much development, which I do not believe they can.	Comments noted. The proposed development requirement is based on the housing need for the District. This housing need was evidenced in the OAHN study published in April 2017. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO2537	6.6 Housing Need	Object	Both options assume more homes are needed than are I believe are justified. Table 6.0.1 Page 25 says 300 pa. but the Amion report suggests 254 p.a. Also, the Guidance Housing and Economic Development Needs, 2015, states that local councils need only base their assessment on "future scenarios that could reasonably be expected to occur", not hypothetical future scenarios. The OAHN Report states that the census has measured growth within the Wyre Forest over the past 15 years that may provide a more realistic future scenario.	Objection noted. The OAHN study published in April 2017 stated that 300pda was required over the plan period. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore

					undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO2092	Housing Need	Object	<p>The proposal to build up to 6000 dwellings on Green Belt land is unjustifiable when there has been scant growth to Kidderminster's population. Over the last fifteen years or so, a number of the town's industries and businesses have closed causing many job losses. This has reduced Kidderminster to a low economy area with many medium to large retail outlets replacing lost businesses. The current economy of the town cannot justify building new homes that will be unaffordable for those who are on low incomes and on the current housing list. Where are the jobs/growth of jobs within Kidderminster to justify the amount of homes proposed?</p> <p>Is this a plan to increase extra funds through the council tax by having an excessive amount of new homes built for the long term? You must take into account the local residents concerns to these unrealistic plans and reconsider prioritising to redevelop the town centre which is long overdue.</p>	The Local Plan Review process doesn't just allocate sites for housing, it also allocates potential sites for employment to meet its employment land requirement. The Employment Land Review evidence base study sets out what the employment requirement is for the district during the plan period. This evidence base study is used to inform the site allocations in the emerging Local Plan for employment use.
	LPPO3392	Housing need	Comment	I cannot understand why WFDC have opted to propose to build more houses than the Government requires. It is only one of two District Councils in the West	<p>Comments noted.</p> <p>The OAHN follows the guidance for</p>

				Field sites.	determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPP04660	6.6 Housing Need	Object	I notice from the 'Key Issues' that the population since 1991 had remained static with only an aggregate increase of 2.2.% in the last 24 years. These figures only go up to 2015, has there since been a census for 2015-2017 to see whether the population is in fact increasing at the same rate as the 2 years from 2013-2015? If there is no evidence of such an increase then would the 5,400 not be a little overkill? If between now and 2034 the population increased by 1.1% every 2/3 years, would this not only mean a growth of c6.6%, being 6,567 people and with a national household average of 4, this would only assume c1700-2000 dwellings were required? What is the logic behind the strategy of such a large number of dwellings being required? Similarly, if the population is ageing, should the plans not incorporate the need of this ageing population i.e. ensure low-level housing/ bungalows	The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036. There will be a marked increase in the number and proportion of older residents. The population aged 65+years is expected to increase by 28.1% from 24,200 in 2016 to 31,800 in 2036. (Data based on ONS 2016-based Subnational Population Projections). This suggests that the population is not 'static'. For further information please see the updated OAHN Study which will be published on the Council's website during the Pre-Submission consultation.

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				are developed to suit the needs of the elderly (who can live independently in their own homes) and to effectively 'free-up' family homes within already developed areas in order to avoid development for developments sake?	
	LPO4386	Housing Need Figures	Comment	The housing need figures are questionable and do not necessitate the choice between Option A or B as the additional land take is not required yet.	Comment noted.
	LPO4446	6.6 Housing Need	Object	<p>Disagree with your calculations that 5000+ houses are needed. Where are all these people coming from? I believe these figures have been grossly inflated, and rounded up time after time, rendering them totally inaccurate. Please see below:</p> <p>HELLA report</p> <p>I have added up the availability presented in the Hella report. This makes for very interesting reading. There are several interesting things about this table:</p> <ol style="list-style-type: none"> 1. If the actual need were less than 3697, no Green Belt land would be required 2. If the actual need were less than 4476, only brownfield Green Belt land would be required 3. 8378 Greenfield Green Belt sites have been identified. This number obviously shows the absolute need to protect the Green Belt immediately and permanently. <p>Rounding – Justification?</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>If the OAHN Report is accepted, then the requirement is calculated at 284 dwellings per year. The Report then rounds up this number to 300 dwellings per year. This simple unjustified action requires the building of 240 houses over the 15-year period</p> <p>In other words, a section of Green Belt land will be used for housing 240 houses purely because of a rounding up. Who does the rounding up benefit? My only conclusion is that it allows the developers to build more executive houses and therefore increase their profits. Why would Wyre Forest District Council take a decision which simply increases the profits of developers? Is the Council not here to serve the residents?</p> <p>Vacancy rate</p> <p>The OAHN Report says that the number of vacant properties in Wyre Forest is 3.2%</p> <p>It says that there are currently 44490 dwellings in Wyre Forest</p> <p>It then increases the allowance for vacant properties to 4.5 %. Whilst the 4.5% figure is taken from the 2011 census, Wyre Forest District Council is legally obliged to use the most up to date data available, i.e., the current Council Tax data. There is no logical reason to use the 4.5% figure instead of 3.2%</p> <p>The difference between 3.2% and 4.5% is 1.3%</p> <p>There are 44490 dwellings in Wyre Forest</p> <p>This means that an extra 44490 x 1.3% dwellings will</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>be built or 578 dwellings (39 per year). In other words, because the OAHN consultants have chosen, without statistical justification, to increase the vacancy rate by 1.3%, 578 houses will be built on the Green Belt in order to allow for them to remain vacant.</p> <p>The main OAHN calculation of housing requirement. I believe that it is absolutely impossible for a mere mortal to analyse the OAHN Report and discover how the housing requirements were calculated. It is riddled with unexplained acronyms and utter gobbledygook in a way that make it impossible to analyse and challenge.</p> <p>From my experience, I cannot tell whether this is a deliberate attempt to baffle residents of Wyre Forest or just because consultants are masters at making things as complicated as possible to justify their excessive charges.</p> <p>To bring a level of sanity to the calculations I have tried to replicate the calculations using data provided by the OAHN report.</p> <p>I have looked at 2 population growth figures, 8.2 % which is a national average that obviously doesn't apply to Wyre Forest, and 2.1% which is the actual growth figure of population in Wyre Forest since 2001. Whilst I have used this figure it is my understanding that the population growth was all weighted to before 2011 and there has been nil growth since 2011. The figures also make no attempt to factor in potential</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>population decline as the considerable number of European citizens in Wyre Forest falls post Brexit. I will try to explain my calculations as I do them:</p> <p>Latest population figure for Wyre Forest: 98960 Number of occupied dwellings: 43086 Average number of occupants per dwelling (98960/43086): 2.2968 (note: I have not made any attempt for allowing this average to decrease) Population Growth 2.1% Population growth 8.2% Population Growth from 98960 to 2078 or 8114 Dwellings required (growth divided by 2.2968) 904 or 3533 Dwellings per year (over 15 yrs) 60 or 235</p> <p>As a check as to whether my calculations work, if I add together the increased number of houses to be left vacant and the houses required for increased population at 8.2% it comes to $235 + 39 = 274$ per year. This is so close to 284 that I feel that my simplistic calculation is somewhat less flawed than the number by which the consultants have rounded their calculation up.</p> <p>Conclusion The figures used to calculate the housing requirement have been deliberately maximised to produce the highest possible number of houses required.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>There is absolutely no need to round the figures upwards.</p> <p>The use of 4.5% vacancy is out of date and should not have been used.</p> <p>The population growth figure taken by the OAHN has no basis in the reality of Wyre Forest. 2.1% is a far more realistic figure.</p> <p>This means that the housing requirement over the 15 year period of the local plan is far closer to 904 than 6000. The plan is totally flawed and must be totally withdrawn. There is absolutely no requirement to build on the Green Belt in Wyre Forest.</p>	
	LPPO4488	Housing Need	Object	<ul style="list-style-type: none"> Plans are overstating the need for new housing. The housing needs report states that the reason for so much housing is to attract overspill from surrounding areas to solve the issues there - not really 'local'. 	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO4914	6.6	Object	The Wyre Forest Assessment of Housing Need report is flawed and only just over 3000 dwellings are required	Objection noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				<p>suggest -61p.a.</p> <p>I think the above results show they can be ignored as they do nothing to inform the process.</p> <p>Section 5 simply recommends 300 dwellings p.a.</p> <p>The vacant dwelling rate between 2005 and 2015 has been 3.5% to 2.6%. The report assumes a vacant dwelling rate of 4.5%. As at 2015 it is 2.6% (page 33) therefore the report is over egging the figures by 879 dwellings (46260 x1.9%).</p> <p>My conclusion is even if we assume the population growth more than doubles when compared to 2001 to 2015 we do not need to develop the fields behind Spennells and additionally the report is over egging requirements by 879 dwellings once again evidencing no need to use Green Belt at the back of Spennells or in many other locations. Assuming the population growth more than doubles and reducing the vacant dwelling % to current levels indicates a requirement of 3243 dwellings over the outlook period i.e. 180 p.a.</p>	
	LPPO4823	6.6 - Housing Need	Object	The OAHN report which was used by the council to arrive at the number of houses needed states that the census is a relevant source, which would be the most accurate measurement of growth within the Wyre Forest over the past 15 years. Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>equates to a 2.7% increase in population growth from 2001 to 2015 (point 2.3 of the Objective Assessment of Housing Needs 'OAHN' Report May 2017).</p> <p>The National Statistics Sub National Population Projections (SNPP) 2014 evidences a growth of population for the outlook period at 4.7% with a requirement of only 199 dwellings per annum. This is significantly less than the projection in the WFDC Local Plan Review which states the need of 300 dwellings per annum (this must be based on a 7.7% increase). This would give us a 285% higher rate of growth than in the last 10 year period which is completely improbable.</p> <p>If we used the SNPP recommendations for building 199 dwellings per annum over the stated 15 year period, we only need to build 2,985 dwellings in total - which negates the need to take Green Belt land around the District and reduces the WFDC consultation figures by 2,415 houses.</p> <p>The consultation document (section 6A) assumes 300 dwellings per annum should be required, but even the PG Short Term Data shows an increase of 5.8% which is twice the growth of the last 15 year period and still only has a need for 229 dwellings per annum. This is 1,278 dwellings less than currently assumed.</p> <p>No allowance has been made for the age profile of the Wyre Forest population leading to increased mortality rates and hence increased availability of property in the district. It is likely that many properties will come</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>free over the next 15 years as people downsize, move to care homes, live with children outside the area or die.</p> <p>I firmly believe that growth figures will be less than 5.8% based on national projections and taking account of the recent cutbacks in the carpet industry in Kidderminster. Along with the forthcoming government attempts to reduce immigration, this will bring the figure close to the 2.7% experienced over the last 15 years.</p> <p>The OAHN Report says that the number of vacant properties in the Wyre Forest is 3.2% and that there are currently 44,490 dwellings in the area. The Report increases the allowance for vacant properties to 4.5%. Increasing the vacancy rate by 1.3% means that the housing demand has been unnecessarily increased by 578 dwellings (or 39 per annum).</p> <p>Consequently, the need for new dwellings in Wyre Forest up to 2034, will realistically be under 3,000 and therefore the need to use any Green Belt land is unnecessary.</p> <p>A realistic requirement of 3,000 homes to 2034 can be met on brownfield sites.</p> <p>According to the statistics on page 39, there is a total of 967 dwellings completed or with planning permission granted on brownfield sites, with a further 1,193 proposed by the plan on other brownfield sites.</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				350 dwellings are also proposed on greenfield sites not in the Green Belt and 796 dwellings can be placed on previously built Green Belt land including 600 of these at Lea Castle. This makes a total of 3,306 dwellings. This exceeds the number of houses needed for the 15 year land supply (when using the SNPP figures of 199 p.a. as detailed in 1c above) without the need to use Green Belt at all.	
	LPPO4788	6.6 Housing Need	Object	<p>Revisit WFDC's figures for projected housing requirements in Kidderminster as the figures do not equate with WFDC review which quotes "<i>virtually static</i>" growth in the local population.</p> <p>The Amion Report on which figures are based states that the number of houses it recommends per year (which is 254 not 300 as WFDC) would be "<i>capable of absorbing the scale of numbers likely to be involved</i>" in "<i>an identified shortfall of provision in the Greater Birmingham HMA</i>".</p> <p>Without this provision to accommodate Birmingham overspill the figures required for future growth in Kidderminster would be lower and could be addressed via use of Brownfield sites.</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO4800	6.6 Housing need	Object	The data put forward by WFDC in terms of future housing requirement is in direct contradiction of the actual population growth recorded over the recent decade. The actual population has risen at a much	Objection noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				lower rate than the forecast for future housing would have us believe.	
	LPPO4836	6.6 Housing Need	Object	<p>Although the DCLG Housing statistical release dated 12 July 2016 has a projected national increase in the number of households of 19% between 2014 and 2034 the population of Wyre Forest District rose by 1.1% between 2001 and 2011 and has remained fairly constant since 2011. Although projected population increase lags behind projected households it is not clear that there will be a demand for an additional 6000 houses in Wyre Forest by 2034 unless it is coming from elsewhere.</p> <p>I am not aware of the reasoning for the need for more housing in Wyre Forest where the population has been stable for some years. Obviously there must be some, but as a dormitory estate for Birmingham and the Black Country it calls into question incompatible requirements with respect to sustainable development.</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO4882	6.6 Housing Need	Object	<p>Having reviewed extensive report prepared by WFDC, it presents numerous facts and figures, based on 'independent' assessments including OAHN report (estimating how many houses might be needed), however, it seems to have significantly exaggerated the number of new houses actually required, which would then encroach onto Green Belt sites, when compared with the HELAA report. The HELAA tables A-I</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was</p>

				is full of empty shops, we need to look at this for our own town before we start housing for another area? We do need better housing for some, new start homes but with so many brown field sites in this area this can be accommodated without touching very precious Green Belt. The suggested demand does not exist.	consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO1940	Housing Needs	Comment	I believe that there are miscalculations concerning the number of houses required in this area, the population of this area has remained fairly static in recent years, the growth of population appears to be exaggerated and does not seem to be based on evidence. Is it practice to overestimate numbers so that they might be reduced in the future giving the appearance of giving some concession to the public?	<p>The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036. There will be a marked increase in the number and proportion of older residents. The population aged 65+years is expected to increase by 28.1% from 24,200 in 2016 to 31,800 in 2036. (Data based on ONS 2016-based Subnational Population Projections).</p> <p>This suggests that the population is not 'static'. For further information please see the updated OAHN Study which will be published on the Council's website during the Pre-Submission consultation.</p>
	LPPO2172	Housing Need	Comment	I would also challenge the population forecast in this review as the Worcestershire County Council web site states that the population growth in this area has grown by 1200 people between 2001 and 2012. Is there a demand for the proposed number of houses?	Comments noted. The proposed development requirement is based on the housing need for the District. This housing need was evidenced in the OAHN study published in April 2017.

				As it is at the moment we have a town centre that is in decline with many empty shops and industry cutting jobs. Who would want to move into a town as it is at the moment?	Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO2185	Housing Need	Comment	I do not believe the numbers of proposed growth within Wyre forest require the need for the number of homes provided.	Comments noted.
	LPPO2348	Housing Need	Object	<p>We believe the proposed build of 6000 units is excessively ambitious and consider hardly any Green Belt needs be touched.</p> <p>WFDC assessment of the housing needs looks quite flawed and we believe the numbers in the report cannot be substantiated. We think the requirement for accommodation will be in the region of 3000 not 6000 units. 3000 units can be completely be accommodated within Brown Field sites without the vast removal of swathes of the Green Belt.</p> <p>The WFDC Local Plan is flawed and should be reviewed, revised and if required withdrawn.</p> <p><u>Wyre Forest Objective Assessment of Housing Need report</u></p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>1. We believe the Wyre Forest Objective Assessment of Housing Need (OAHN) report is flawed, not fit for purpose and not objective. Our population has been virtually static since 1991 (confirmed by the Local Plan consultation section 2.2). It has only grown since 2001 to 2015 by 2.7% (compared to West Midlands growth of 8.9%). The population of Kidderminster in 2015 is stated to be 56,185, (55,530 in the 2011 census). This local plan allows for an increase of over 18,000 people in the area, a massive increase in local population. This increase is certainly not from organic growth so where are the additional people coming from and what would attract them to the area? One can only assume that they will be coming into the area from further afield.</p> <ul style="list-style-type: none"> ○ The ONS Sub National Population Projections (SNPP) 2014 evidences a growth in population for the outlook period of 4.7% and a requirement of 199 dwellings p.a. i.e. a reduction of 1818 dwellings over the 18 years bringing the total down from 5400 to 3582. Allowing for some flexibility shows a population growth of 5.8% and requires 229 dwellings p.a. i.e. a reduction of 1278 dwellings over the 	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				predictions therefore one can only assume that these are incorrect and vastly inflated, and all future needs can be met from the use of brownfield site development.	<p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO2782	Housing numbers	Object	<p>It is self- evident that the Plan assessment of housing needs has been based on a projection of population growth that is not borne out by the Government's Office of National Statistics projection for the Wyre Forest. The latter show that over the planning period the population of Wyre Forest will increase approximately by only 5% from 99,000 in 2016 to 104,000 in 2034. However the Planners have accepted, without apparently questioning, the higher projection given by the Amion and Edge Consultants i.e.: 8.1% growth, a degree of growth that has never been achieved in the Wyre Forest.</p> <p>This difference in projected population growth will impact on the number of dwellings required to be</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>built. Based on 5% the annual requirement would be 199 dwellings - a total of only 3582 over the planning period — but based on 8.1% the annual requirement is raised to 291 dwellings — a total of 5238 over the planning period. Over and above this, the Plan has added more contingency to the latter figure raising the number of dwellings at first to 5400 and then again to 6(X)0, an increase of nearly 2500 (+67°Ai) over the SNPP —2014 figure of 3582.</p> <p>There is also an ageing population in Kidderminster so it is reasonable to assume that as old people downsize; move into care homes; move outside the area to be nearer to family; or sadly die, more vacant properties should become available in the Plan period under review.</p> <p>It is also important to note that in the Worcestershire Local Transport Plan 2017 2030, dated as recently as December 202016, it stated that “The Wyre Forest District Site Allocations and policies local Plan 2006-2026 seeks to allocate 4000 dwellings from 2006 to 2026. However, as of April 2013, 2869 homes have already been supplied, therefore only 1131 are required to be built up until 2026.” This makes the figures quoted in the local Plan Review even more questionable.</p> <p>If Planning is assuming that the increase in population</p>

				is because Wyre Forest (and Kidderminster in particular) is being designated as a catchment area for potential over spills of population from Birmingham and Solihull then such an objective should have been clearly stated in the Plan so that a full consultation on this disturbing issue can be made.	
	LPPO3710	Paragraph 6.6	Object	<p>Overall (my comments on more specific areas of the report are provided after this initial comment below)</p> <p>The Objective Assessment of Housing Need (OAHN) which underpins the Local Plan Review (LPR) has weaknesses and is not wholly objective. I therefore object to the number of houses proposed as the figure is much higher than necessary. With this in mind, the amount of green belt proposed to be consumed is needless.</p> <p>At OAHN Appendix G stage 1 the figure of 1,726 for current need is based upon assumptions at G2.5 and G2.6 and the overall figure is based upon a grossed-up breakdown from a sample of just 39% of the housing register.</p> <p>These assumptions erode confidence of the proposed scale of development and so object to this.</p> <p>At G2.7 a claim is made that ‘Having established the scale of need in Steps 1.1, 1.2 and 1.3, total current</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>housing need from existing households across Wyre Forest ... is 2,245' is completely unsound and unjustified. There is no clear line of sight as to how this figure has been obtained from objective evidence and therefore the OAHN is flawed. There is no objective establishment of the scale as incorrectly claimed within the statement. Furthermore, there is no clear line of sight as to how the figure of 76.9% has been shown to be derived and what lower quartile house prices figure has been used in this calculation.</p> <p>At G2.2 the OAHN states that the scale of need by homeless 'households can be derived from several sources', but it is not clear which source has been used for the figures within the report nor whether the 68 households quoted separately have been double counted within this assessment.</p> <p>At G3.2 I do not see a right to those that have made a free decision to form a new household for the costs involved to be picked up by the tax payer with free accommodation. It is clear that the households should not be formed unless they can live within their means and do not burden the community with cost. The situation is of their own making and so can be dealt with by staying with family and friends. The statement that 'The housing register reports a total of 574 newly-forming households...' is inconsistent with statements made at G1.4 where the figure has actually been</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>grossed up from a breakdown derived from 1305 households on the register. There is scope for this figure of 481 households to be reduced here.</p> <p>At G4.4 the OAHN states that 2% vacant stock is acceptable. I object to this number as this is valuable inefficient use of housing stock. Ordinary households manage to move home without there have to be a stock of vacant property so why shouldn't the Council be able to operate at this efficient level? This would reduce the pressure in green field development and is not justified. A figure should be included at stage 3.2.</p> <p>At G4.5 the OAHN includes objective data over the period April 2010 to Sept 2015 that reduced the overall imbalance to 120 each year yet has not been taken into account within the assessment due to the numbers being a prediction. I object because this approach is inconsistent with the rest of the report where most of it is a prediction through to the year 2034. At just 120 affordable dwellings – this can be accommodated within current brownfield and other inner town sites that do not involve building on green field. A figure should be included at Stage 3.3.</p> <p>At G4.7 the OAHN assumes that 1192 affordable rented dwellings are available over the five-year period yet G4.5 is inconsistent with having a prediction not</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>included within the modelling work.</p> <p>Stage 3 does not take into account of the 1201 existing households living in other tenures. This is clearly a dwelling supply and should be taken into account. The 1192 figure should therefore be considerably increased. The annual supply has been artificially reduced in the OAHN and should be revised, therefore I object.</p> <p>At G4.9 again, an assumption is made for the annual capacity of new tenant lets yet G4.5 makes no comparable assumption for consistency. If an assumption can be drawn at G4.9 then an assumption can similarly be drawn at G4.5. Therefore I object.</p> <p>At paragraph 5.3 within the OAHN, this solely refers to the Edge Analytics in drawing to conclusion the housing need referring to Fig 4.10. The assumptions embedded within the Edge Analytics is upper-bound and does not reflect previous historical performance of the town that is the norm for the size, location, setting and environment of the district.</p> <p>Third party analysis of Oxford Economics, Experian, Cambridge Econometrics are simply dismissed by the report in favour of the Council's commissioned Edge Analytics. The previous three assessments average as zero growth in housing demand. Edge is out of line,</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>making very optimistic assumptions to derive development scale that simply does not align with historic development in Kidderminster.</p> <p>At paragraph 5.5 within the OAHN, the breakdown of the OAHN figure of 300 is unsubstantiated and does not connect with the figure of 229 derived earlier. I therefore object to the analysis.</p> <p>At paragraph 5.11 within the OAHN, the report states that there is an intention to attract people to the area at the expense of green belt. I object to the needless expansion of a town that has no business case in support as to the type of skills required. There appear simply to hope for the best. In reality, these peoples will be attracted from the West Midlands to cheap housing and then commute to better paid jobs outside the region. They are most likely to shop outside of the district and so bring little to the town.</p> <p>At paragraph 6.13 within the OAHN, there is disconnect with the previous housing strategy of 200 dwellings/yr where there had been no overall undersupply at this level. This supports a much smaller scale of development than that proposed now.</p> <p>At paragraph 6.14 within the OAHN, this concludes that there is no need to adjust the dwelling</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>requirement.</p> <p>With so many areas within the report that are lacking detail and objective evidence, the Council has failed to inform properly the Wyre Forest community to allow proper consultation and decisions to be reached.</p> <p>The level of development is entirely dependent upon the OAHN which uses subjective assumptions to derive the recommendations. The document has no clear line of sight from its source data to its final conclusions bringing in figures at table G1 without justification.</p> <p>I therefore object to the scale of development and the consumption of valuable green belt.</p>	
	LPPO3967	Paragraph 6.6	Object	<p>The guidelines set out in the National Planning Policy Framework states that we should consider only future scenarios that could reasonably be expected to occur. The population of the Wyre Forest has only grown slightly since 1991 and remains fairly static. This equates to a 2.7% increase in population growth from 2001 to 2015.</p> <p>The National Statistics Sub National Population Projections (SNPP) 2014 evidences a growth of population for the outlook period at 4.7% with a requirement of only 199 dwellings per annum. This is significantly less than the projection in the WFDC Local</p>	<p>Objection and comments noted.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Plan Review which states the need of 300 dwellings per annum (this must be based on a 7.7% increase) especially as you suggest that these houses are only for existing residents of the local area.</p> <p>If we used the SNPP recommendations for building 199 dwellings per annum over the stated 15 year period, we only need to build 2,985 dwellings in total - which negates the need to take Greenbelt land around the District and reduces the WFDC consultation figures by 2,415 houses. This would save and protect vital greenbelt land in the area, something that the local council proposed that they were advocates of during the recent general election.</p>	
	LPPO2823	6.6	Object	<p>The Council has manipulated the figures against independent analysis. In respect of affordable housing stock the OAHN says 229 at G1.4, 100 at para 5.9 and the Council says 90 at its Local Plan Review at para 6.4., so this is open to challenge.</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO3616	Paragraph 6.6	Object	<p>The WFDC Local plan states that 300 houses per annum need to be built to cover the growing population in its area. It also covers the migration of overspill that needs to be considered from the Birmingham & Solihull area. As the population has grown very little between 2001-2015 (1000 approx.) where have the figures come from to justify the amount of houses the WFDC recommends?</p> <p>In a report conducted by Amion for the WFDC. It recommends that 254 houses per year for 20 years were required as a guideline. So why are WFDC recommending 300 houses per year when the Amion report was confident that the migration to the area could be absorbed in their figures?</p> <p>WFDC local plan has also estimated a 6000 population increase by 2034 when as they state in their report population only increased by 1000 approx. between 2001-2015. It states in the local plan this was derived by carrying out an assessment in accordance with the National Planning Policy Framework (NPPF). The guidance on the Housing and economic development needs 2015 states <u>“Assessing development needs should be proportionate and does not require local councils to consider purely hypothetical future scenarios, only future scenarios that could be reasonably expected”</u>. How have WFDC come up with the extra 5000 people when population has been</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.</p>

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>relatively stagnant for all those years?</p> <p>The Objectively Assessed Housing Needs (OAHN) states that <u>the census is a relevant source</u>, which would be the most accurate measurement of growth within the Wyre Forest over the last 15 years. So why has the WFDC chose to ignore these figures and use national and regional figures instead. If the census figures were used then a total growth of around 3000 would be more accurate and could be accommodated within brownfield sites. Also in the WFDC local plan it does say “<u>All population growth is to be achieved naturally, with no net inflows</u>”. Surely that contradicts all the figures the local plan states.</p> <p>So to conclude the Housing section I think the WFDC local plan is fundamentally flawed and needs to be thoroughly looked into again and figures recalculated.</p>	
	LPPO3663	6.6	Object	<p>6.5 – 6.7 You have not shown the evidence and justification for the need for 5400 homes and 540 care homes from the local region. It is inevitable that these homes will be populated from in migration throughout the UK and will commute out of the region.</p> <p>OAHN:</p> <ul style="list-style-type: none"> The assessment of housing need at table G1 stage 1 shows a total current needs 	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating</p>

				<p>requirement of 1726 households at Step 1.4A. There is no direct line of sight as to where this figure has come from within the evidence based document</p> <ul style="list-style-type: none"> The document is therefore not objective and is misleading to the consultation. Extra time is therefore needed for the consultation to review the objectivity of the document and assess how the figures have been derived. It is further noted that detailed information from just 39% of the households on the housing register and has been grossed up to the 3308 on the housing register this is open to error and assumptions drawn to make this assessment and not objective. The breakdown is derived from just 39% sample and not definitive. The figures relied upon have been grossed up from a small sample. There is potential for error. All should have been contacted as they are on the electoral register the details will be available. Clearing the housing need entirely will simply draw into the area from outside those that perceive quicker access to housing in Wyre Forest compare to other areas and so join the housing register creating more demand that is unsustainable. Acting like a magnet for housing need from other areas. 	<p>housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<ul style="list-style-type: none"> Step 2.1 – there is no guarantee that the figure of 574 for new household formation can be guaranteed each year until 2034. Step 2.2 – no clear line of sight within the document as to where the percentage of 83.7 has been derived. If this was 60.1%, this would reduce the number of new households requiring affordable housing to just 345 and therefore the supreme new affordable and social housing requirement of zero. The stakeholders in this report do not back up Wyre Forest need for new Housing. A4.5 – A4.7 Stakeholders consulted. One stakeholder commented on a recent slowing down in the market, with low levels of mortgage applications. They considered that future trends will be determined by “market forces, Government schemes, impact of RTB and mortgage availability”. 8.6 We propose that the OAHN should be 300 dwellings per annum. This figure sits at the upper end of the dwelling requirements suggested by the various demographic scenarios that have been developed and the component key variables regarding migration, headship rates and economic activity. Why use upper end –why use worst case scenario- the research and rest of the report do not substantiate why use the upper end? 	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<ul style="list-style-type: none"> 8.8 Housing market signals suggest that the housing market in Wyre Forest is relatively stable. There are currently no indicators suggesting a need for adjusting the housing dwelling requirement on the basis of market signals. The report is not fit for purpose, it is not objective. The plan should not go ahead. 	
	LPPO4031	Paragraph 6.6	Object	<p>I believe the number of properties required in the Wyre Forest from 2019 to 2034 has been vastly over-estimated by both the Objective Assessment of Housing Need (OAHN) by AMION and the Local Plan Review (the Wyre Forest housing requirements has only grown by 1000 in the last 15 years)</p> <p>I would like to challenge:</p> <ul style="list-style-type: none"> the number of houses you are claiming are required per year and in total until 2034 <p><u>Number of Houses Required</u></p> <p>The number of houses required in the review are based on figures from the Objective Assessment of Housing Need (OAHN) by AMION and then adjusted upwards by yourselves in the review</p>	<p>Objection noted. The statistics used for the OAHN are statistics published by the Government from the Office of National Statistics.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO3783	6.6	Object	<p>Having read LTP4, Green Belt Review and now the Local Plan Review I must conclude the statistics for housing requirement quoted within the documents commissioned are not accurately substantiated and, as such, should be challenged by WFDC before any decision on release of any Green Belt made. Wyre Forest has had a ‘virtually static population growth’ since 2001-2015 (2.2% at most using ONS statistics). Looking at the population of Kidderminster alone, from 2001 -2011 it dropped by 0.14%. An increase from 2011 Census to current estimate of population set in 2016 of 2.1% at most. If the figures were accurately reviewed and if the true objective of the LPR is to meet future housing needs of Wyre Forest in line with current projected growth figures — all development could be achieved on brown field sites. It is therefore the duty of WFDC to ensure developers are not allowed to sit on brown field sites and that all development of brown field sites are completed before approving plans for green belt development.</p> <p>I believe the Local Plan Review to be a cynical attempt to provide a quick, unsustainable fix for the failing local economy - a wolf in sheep’s clothing. The LPR identifies a ratio imbalance of elderly to young and the increased impact that is having on services and ultimately finances of WFDC. The LPR identifies that educational standards within Wyre Forest are below that of national average — thus leading to low paid jobs and</p>	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.</p>

				<p>zero hour contracts, with very little opportunity for home ownership and personal development. Health within Wyre Forest is generally poor and a proactive stance on high levels of obesity is required. The LPR should identify these problems as core issues that need addressing and not covering over with a temporary influx of cash. The LPR promotes actively pursuing in-migration to resolve such issues.</p> <p>Whilst the new homes allowance of £9,000 per unit is an attractive incentive and 1735 units will generate £15,615,000 for WFDC, this is a short-sighted answer to the long-term problems facing Kidderminster and Wyre Forest as a whole. The introduction of new residents alongside the initial flush of cash will place a burden on already over stretched services. Even considering additional council tax, the proposed development of 3 & 4-bedroom family homes will not help balance the books.</p> <p>It is disingenuous to assume much of the aging population are not contributing to the local economy or are tying up family homes. My own family home will support three generations very shortly. My husband and I both work and run a small business, paying taxes at every level, not least business rates. We fall outside the optimum demographics laid bare within the LPR - which WFDC and their 'Pro Growth Agenda' are chasing. Are we to then interpret the LPR as saying in-</p>

	LPPO4078	Paragraph 6.6	Object	Further concerns are the accuracy of demographic assumptions made as a basis for the plan, and the employment prospects behind the assumptions for the longer term housing requirements.	Objection noted. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO4649	6.6 Housing Need	Object	It appears that there is consistently noted to be a need for a significant increase in housing in the Kidderminster and surrounding areas and this is the 'identified need' for sourcing additional land in order to allow large-scale development to meet this need. Having checked census figures from 2001 through to 2016, it appears that nothing much has changed regarding population; with a net increase of only c.1,058 people in 15 years. Obviously this increase does not require housing for each of these individuals as some will be couples and families moving into the area, or even existing Kidderminster residents increasing the number of people in their household. So, with this information to hand I cannot understand why the council feels that there is a case for decimating the Green Belt to provide this 'much needed' housing. It appears that it would be a way for landowners to make some money with no regard for	It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>reality of Wyre Forest. 2.1% is a far more realistic figure. The figures used to calculate the housing requirement have been deliberately maximised to produce the highest possible number of houses required. There are so many assumptions made and permutations shown.</p> <p>This means that the housing requirement over the 15-year period of the local plan is far closer to 904 than 6000.</p> <p>Rounding Up and varying numbers: If the OAHN report is accepted, then the requirement is calculated at 284 dwellings per year. The report then rounds up this number to 300 dwellings per year. This simple unjustified action requires the building of 240 houses over the 15-year period. In other words, a section of Green Belt land will be used for housing 240 houses purely because of a rounding up. Who does the rounding up benefit? The only viable conclusion is that it allows the developers. Why would Wyre Forest District Council take a decision which simply increases the profits of developers? Is the Council not here to serve the residents? Then we see the 5400 houses required (6.5 in Local Plan) increase to 6000 (Table 6.0.5) – another 11% increase and 333 houses per annum. What is the actual figure?</p> <p>Vacancy rate: The OAHN report says that the number</p>	<p>their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

				<p>of vacant properties in Wyre Forest is 3.2% It says that there are currently 44 490 dwellings in Wyre Forest. It then increases the allowance for vacant properties to 4.5 %. Whilst the 4.5% figure is taken from the 2011 census, WFDC is legally obliged to use the most up to date data available, i.e., the current Council Tax data. There is no logical reason to use the 4.5% figure instead of 3.2%. This means that an extra 578 dwellings (39 per year). In other words, because the OAHN consultants have chosen, without statistical justification, to increase the vacancy rate by 1.3%, 578 houses will be built on the Green Belt.</p> <p>The Assumptions: There are so many assumptions within the OAHN and the projected number of houses required differs greatly, the higher number (332) being an increase of 66% on the lower (199). The OAHN states that ‘the emphasis should be more towards the upper end of the ranges suggested’ for migration (the Long-Term scenario but including UPC), headship rates (the partial return headship rate - HH-14 PR) and (in the jobs-led scenario) economic activity (OBR2). This would equate to a maximum of 309 per annum (the PG-Long Term figure). Then there is a token gesture that some recognition should be afforded to the results of the analyses of the employment implications of the demographic scenarios (and vice versa) based on the economic forecasts and a final rounded number of a suggested 300 dwellings per annum. This</p>

				the growth rates cannot be used to predict the requirements for housing growth required in the WFDC area.	
	LPP04833	6.6 - Housing Need	Object	The estimates for population growth and hence residences required in the Wyre Forest over the next 18 years has been grossly exaggerated. The Office for National Statistics Sub National Population Projections (SNPP) 2014 Report estimated a population growth of 4.7% and therefore a need for 199 dwellings per annum. In actual fact the population of the Wyre Forest has only grown by a net figure of 1000 or 2.7% over the past 15 years. The core plan provided in the Amion Report would provide 3640 dwellings, which is an average of 202 per annum, which would accommodate an increase of 3% population – a far more realistic projection. Indeed since industry and thus employment within Kidderminster is currently in decline, even these figures appear to be over ambitious.	Objection noted. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPP04678	6.6 Housing Need	Object	I disagree with the Local Plan which states that the use of Green Belt is necessary to facilitate the building of 6000 houses in the next 15 year period as not enough Brownfield sites are available. According to the statistics on page 39 of the Local Plan Review, there is a total of 967 dwellings completed or with planning permission granted on Brownfield sites, with a further 1193 proposed by the plan	It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>on other Brownfield sites. 350 dwellings are also proposed on Greenfield sites not in the Green Belt and 796 dwellings can be placed on previously built Green Belt land including 600 of these at Lea Castle. This makes a total of 3306 dwellings.</p> <p>Even using your confusing calculation of 300 homes required per year, this would mean at least 11 years would pass without any Green Belt needing to be removed. As you only need to show a 5 year land supply to avoid unwanted development challenges, the Green Belt review at this time is unfounded and unneeded.</p>	<p>requirements. This will include some greenfield sites within the Green Belt.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO3226	6.7	Object	For the reasons sighted in paragraph 6.3, Table 6.0.1 is not supported by the OAHN document what has different figures and the OAHN dismisses three independent analyses as being inconvenient to its engineered numbers to support a political council Ambition that simply is not required. At 6.13 it is stated that the previous housing strategy was 200 houses per year yet at 6.14 concludes no need to adjust the dwelling provision. This is completely unacceptable and is absurd.	Objection noted.
Sir Thomas White's Charity	LPPO912	Para 6.7	Support	In relation to housing development, the Preferred Options document seeks to provide for 5,400 dwellings (300 units per annum) over the plan period. This	Support is noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				represents a notable increase from the 200 dwellings per annum requirement in the currently adopted Local Plan. This increase is welcomed in order to ensure the Council are meeting their Objective Assessment of Housing Need. Our client also supports the approach of employing an annual requirement of 300 units, rather than a stepped trajectory, as this will ensure a steady supply is achieved throughout the plan period.	
	LPP02591	Paragraph 6.7	Object	The Plan makes reference to another document regarding the calculations for the number of dwellings required in the plan period. It would be better if the Plan itself showed these calculations in the interests of transparency.	Objection noted.
Gladman Developments Limited	LPP01438	para. 6.8	Comment	<p>The Duty to Cooperate is a legal requirement established through Section 33(A) of the Planning and Compulsory Purchase Act 2004, as amended by Section 110 of the Localism Act. It requires local authorities to engage constructively, actively and on an ongoing basis with neighbouring authorities on cross-boundary strategic issues throughout the process of Plan preparation. If a Council fails to satisfactorily discharge its Duty to Cooperate, this cannot be rectified through modifications and an Inspector must recommend non-adoption of the Plan.</p> <p>In this regard, Wyre Forest District Council must be able to demonstrate that it has engaged and worked with neighbouring and nearby authorities, alongside</p>	Comments noted. WFDC continue to have Duty to Cooperate discussions with its neighbouring local authorities, and will continue to consult on subsequent stages of the Local Plan review process.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>any existing joint working arrangements, to satisfactorily address cross boundary strategic issues and the requirement to meet any unmet housing needs.</p> <p>It is noted that the Local Plan Review Preferred Options Document includes a section on the 'Duty to Cooperate' at paragraph 6.8. Reference is made here to the conclusions of the Council's OAHN Study, April 2017 on the definition of the housing market area and indicates that Wyre Forest District Council area is co-terminal with the Wyre Forest Housing Market Area and as such the housing requirement is based solely on the needs of the Wyre Forest. This conclusion is somewhat surprising given the location of the district in the context of the West Midlands region and that the CURDS Study indicates that Wyre Forest falls within the Worcester HMA alongside the local planning authorities of Worcester City, Malvern Hills, and Wychavon. Gladman are of the clear view that this will need to be explored further during the process of finalising the Local Plan and that this is a matter that must be carefully considered alongside the relevant authorities within the auspices of the Duty to Cooperate.</p> <p>At the publications stage, it will be essential that the process that the Council has followed to fulfil its duty to cooperate during the plan making process is fully</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				documented. This should provide background information on the issues that have been tackled and justification for any associated outcomes, including consideration of a robust way forward should agreement not have been achieved across all relevant issues.	
Barratt Homes West Midlands	LPP0764	Para.6.8	Object	We consider that Wyre Forest WILL need to play an active role in helping to meet the growth needs of Birmingham and the Black Country. About 60,000 additional dwellings will need to be delivered in adjoining areas. This is likely to affect commute to work patterns and distribution of development. Until the distribution of this large shortfall is agreed it is premature for the Wyre Forest emerging plan to assume that it has no role to play.	Objection and comments noted. WFDC continue to have Duty to Cooperate discussions with its neighbouring local authorities, and will continue to consult on subsequent stages of the Local Plan review process.
South Staffordshire Council	LPP01251	6.8	Comment	As a member of the GBSLEP, Wyre Forest District Council (WFDC) participated in the initial PBA Strategic Housing Needs Study work. Stage 2 of the SHNS was published in November 2014 and confirmed that whilst WFDC did not comprise part of the Greater Birmingham and Black Country Housing Market Area (GBBCHMA), it had close links with it. Based on the earlier housing market areas, work undertaken for the National Housing and Planning Advisory Unit and published by DCLG in 2010, WFDC was a best fit with the Worcester HMA along with the three South Worcestershire Authorities (Worcester, Malvern Hills and Wychavon), but as these authorities have an	Comments noted. WFDC continue to have Duty to Cooperate discussions with its neighbouring local authorities, including South Staffordshire Council.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>adopted plan, it follows that for the purpose of this round of local plan making, WFDC is a free-standing HMA.</p> <p>The Issues and Options consultation noted support for additional in-migration, particularly of working age people, due to the ageing population in WFDC. The Amion / Edge Analytics 2017 Objective Assessment of Need Report, verifies the ageing population and also identifies internal migration as being the principal source of population growth. Figure 2.3 and table 2.2 in this Report show that the principal source of this is conurbation authorities within the GBBC MA.</p> <p>In considering economic factors, the Amion / Edge Analytics Report suggests an OAN of 300 dwellings per annum, compared to a demographically driven figure derived from the 2014 household projections of 199 dwellings per annum. The situation in the South Worcestershire Authorities mirrors that of WFDC in that they too are seeking economic led growth, which requires more people than demographic projections suggest and is reflected in the adopted plan. It follows therefore, that the same must apply in WFDC.</p> <p>The adopted Birmingham Development Plan acknowledges a shortfall of 37,900 dwellings in the GBBC HMA arising from the city alone and evidence emerging from the Black Country Core Strategy may lead to the overall HMA shortfall increasing further. It is logical to conclude that increased supply in WFDC is</p>

				likely to be met by additional migration from the GBBCHMA; this is reflected in 8.12 of the Amion / Edge Analytics Report. The recently published proposed modifications into the Telford and Wrekin Local Plan are relevant in this context in that the Inspector has acknowledged interactions between HMAs. As a consequence, we (together with our partner authorities within the GBBCHMA) would welcome the opportunity to discuss this matter with you further, with a view to signing a Duty to Cooperate Statement / Memorandum of Understanding between the relevant local authorities.	
CORE11	LPP0202	6-8	Comment	The last line at 6-8 refers to the Core Strategy as one of the legal statutory instruments to be followed along side the NPPF.	Comments noted.
	LPP0479	paragraph 6.8	Support	Pleased that Wyre Forest District only has to plan developments in line with Wyre Forest District needs, however, as commented before I do not believe that we need 300 new properties p.a.	Support is noted.
South Worcestershire Authorities	LPP01243	Duty to co-operate	Comment	Whilst paragraph 6.8 refers to the Duty to Cooperate, it is not clear what agreement, if any, has been reached with regard to the role of Wyre Forest District in providing homes to meet need arising outside of its own Housing Market Area and any implications that this may have for the Development Strategy. The SWCs welcome the opportunity for further	Comments noted. WFDC continue to have Duty to Cooperate discussions with its neighbouring local authorities, and will continue to consult on subsequent stages of the Local Plan review process.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				discussions with Wyre Forest District Council as the Local Plan Review progresses in order to comply with on-going requirements associated with the Duty to Cooperate. Consequently the SWCs wish to continue to be consulted on subsequent stages of the Wyre Forest Local Plan review.	
	LPPO3748	6.8	Object	The Wyre Forest District is incorrectly quoted as being within the West Midlands – it is within Worcestershire! Clearly the Executive should revise his geography! I have no confidence of the flawed report nor its conclusions. For the reasons sighted within 6.3, the Plan does not correctly forecast the housing requirements and this will lead to needless consumption of valuable green belt. There is clear evidence that the council has engineered its documents to deliver a policy that is unsupported. There is evidence that Wyre Forest is presently a stable housing market area and stakeholders consulted say that there is no sizeable demand for new housing. The Council is misguided in its judgement to try and grow artificially a town that does not want or need to become a competitor to West Midlands or surrounding areas. If the area is presently stable that there is no need to damage this with negative impact upon infrastructure, health facilities, transport etc that a grossly enlarged town would create. The Wyre Forest towns are presently sweet balanced areas to live without becoming ever larger and changing their	Wyre Forest District forms part of the West Midlands Region, as does Worcestershire.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				character. I therefore object to the statements made as the information is false.	
	LPPO3750	Paragraph 6.9	Object	<p>I object to the Council's plans for use of land in general; development has been inefficient in terms of land consumption.</p> <p>The Council is misguided in its quest to continue to grow– this will change the character of the areas and imbalance the supporting infrastructure.</p> <p>Inner town development with better more efficient design for affordable housing/presence in town centres would be more efficient use of land.</p>	Objection and comments noted.
West Midlands HARP Planning Consortium	LPPO1333	Para 6.9 - Land supply	Comment	<p>Criterion a. should be amended to include Housing Association Registered Providers. The revised criterion should read as follows:</p> <p><i>a. Working with house builders / landowners / Housing Association Registered Providers, to monitor and progress the housing supply and to identify any causes of supply problems and where appropriate to act on feedback received.</i></p> <p>It is noted that there is no specific mechanism whereby if the housing supply falls by 10% below expectation in any monitoring period and how the Council would respond to the shortfall. A solution could be that the council could bring forward reserve sites, this would</p>	Comments noted.

ts Limited		ability appraisal		Plans must be subject to Sustainability Appraisal (SA). The Council should ensure that the results of the SA process clearly justify the policy choices made within the Local Plan. It should be clear why some policy options have been progressed and others have been rejected. The Local Plan's approach to scoring and the associated decisions made, should be robust, transparent and justified. The sustainability merits of all of the reasonable alternatives should be fully explored and tested in the context of their ability to achieve a sustainable form of development that accord with national policy and fully support the economic, social and environmental objectives of the area. Care must be taken to ensure that each reasonable alternative has been considered to the same level of detail as the option that is eventually chosen within the Local Plan.	Work on the SA is continuing as we progress further with our plan. Reasonable alternatives have been considered in the SA and will continue to be considered as we progress with the work. The SA will be published during the Pre-Submission consultation.
Persimmon Homes Limited	LPPO1594	Paragraph 6.11	Comment	There are further areas of the Sustainability Appraisal which need to be amended to reflect the potential benefits of development identified in the accompanying Illustrative Masterplan (Appendix 1). A summary of the changes, and justifications, has been proved as part of Appendix 2 which indicates a significant improvement of the sites scores in areas around accessibility, sustainable transport, landscape and townscape, biodiversity and the historic environment setting.	Comments noted. The SA will be reviewed and updated for the pre-submission plan.

	LPPO118	Sustainability Appraisal Para 5.35	Comment	Your 'Preferred options sustainability appraisal report' talks at point 5.35 of the Highclere site (and other sites)'With mitigation of highway improvements may have the potential for a neutral effect' (of increased traffic). The use of the word 'may' is highly significant. It is impossible to consider what highway improvements could be carried out to Wyre Hill or Park Lane to mitigate the problems and potential pedestrian casualties caused by increase traffic, due to the constricted nature of both roads.	Comments noted.
Worcestershire Wildlife Trust	LPPO1113	Paragraph 6.11 SA	Comment	We are particularly concerned to see that the Sustainability Appraisal (SA) for the Plan concentrates simply on designated sites (Sites of Special Scientific Interest and Local Wildlife Sites) under SA Objective 9 rather than encompassing wider biodiversity as we recommended during the scoping process. At the very least we consider that the council should be taking into account habitats and species of principle importance as listed under Section 41 of the Natural Environment and Rural Communities (NERC) Act 2006. The legal duty imposed on the council in this regard is set out in Section 40 of the Act and we strongly recommend that the evidence base is re-visited to take account of this. We believe that the failure to consider habitats and species outside designated sites represents a fundamental shortcoming in the SA and may undermine the decisions taken so far. This is underlined by the overall SA finding that ' <i>it would be</i>	Comments noted. We will look to updating our evidence base and also our SA to take on board these issues raised.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<i>expected that both options would have a significant positive effect on the district's biodiversity', which we consider to be highly unlikely at the moment. Further work to determine the impact of proposed allocations will be required to ensure that the Local Plan is based on sound evidence and can be progressed in line with the law and relevant planning guidance (see for example NPPF paras. 9,17, 109,110, 117, 157 and 165). We would be pleased to discuss this fundamental issue with the council with a view to improving the evidence base for the Local Plan if that would be helpful.</i>	
Worcestershire Wildlife Trust	LPO1120	Paragraph 6.11 SA	Object	<p>The assumptions in the SA (suggesting positive biodiversity outcomes) seem extremely optimistic. Whilst mitigation for some of the biodiversity issues may well be possible it will require land take that is likely to have implications for the net developable area (and accordingly the number of dwellings allocated) set out in the plan.</p> <p>We do not consider that these biodiversity constraints have been considered properly in the evidence base for the plan and we do not accept the findings of the SA.</p>	Objections and comments noted. We will look to undertake ecological appraisals of some of the sites in the next stage of plan making to inform the pre-submission plan.
Worcestershire Wildlife Trust	LPO1121	Paragraph 6.11 SA	Object	Need to update the evidence base for the plan prior to	Objection noted. We will update our evidence

				<p>so that the “big issues” are kept clear; only the main differences between alternatives need to be documented i.e. the assessment should be proportionate to the level and scope of decision-making for the plan preparation”.</p> <p>4.4 – “As a plan evolves, there may be further consideration of options that have developed by taking the preferred elements from earlier options. Thus the options for plan-making change and develop as responses from consultation are considered and further studies are undertaken.”</p> <p>4.5 – “There is a hierarchy of options assessment with sites that are not viable or deliverable or might have adverse effects on protected environmental assets rejected at an early stage.”</p> <p>Nonetheless our concerns regarding sites consulted on in 2016 and affecting nationally designated sites around the town remain unaddressed. Our consultation responses dated 9.9.16 and 2.12.16 refer. Natural England repeats its requests for a meeting (previously expressed by email in December 2016 and April 2017) with the LPA to discuss the approach to be taken with regard to these sites.</p> <p>We draw the Council’s attention to the fundamental nature of these concerns and the need to ensure as far as possible that the plan can be judged ‘sound’ at the next stage of local plan making.</p>	
Natural	LPPO1129	Sustain	Comment	The comments set out below relate to the matrices	Comments noted. The SA will be updated

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
England		ability Appraisal - Sites		<p>within Appendix G and follow up on our previous response on the SA:</p> <p>FPH/1, Settling ponds, Wilden Lane – the SA matrices for this allocation highlights that proposals could result in impacts on landscape and biodiversity but it is not explained in the accompanying text. We would have concerns that development in this location could potentially impact on the Wilden Marsh & Meadows SSSI.</p> <p>BW/4, Hurcott ADR – we note that the matrices have identified that this site is adjacent to the SSSI and a residual negative impact on landscape and biodiversity may result unless mitigation is in place. We acknowledge that the local plan policy explains that extensive areas will be left undeveloped to protect the adjacent Hurcott Meadows SSSI.</p> <p>WFR/WC/15, Lea Castle - we acknowledge that the SA identifies that this site includes large tracts of woodland and acid grassland that needs to be protected and that fragmentation of ecological corridor should be avoided.</p> <p>BR/RO/7, New Road Far Forest and BR/BE/6, Land off Highclere – priority habitats should be considered within these allocations.</p>	accordingly.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>AS/5, Victoria Carpets, Sports Ground – Whilst flooding issues are mentioned in the SA for this site the possible impact on the Wilden Marsh & Meadows SSSI via the Hoo Brook has not been included.</p> <p>OC/13 East of Kidderminster – Whilst we support enhancements to the watercourse and pools for this area we would expect the SA to mention the potential impact on Wilden Marsh & Meadows SSSI.</p> <p>MI/3, Parsons Chain – The potential impact on the Hartlebury Common and Hillditch Coppice SSSI should be mentioned.</p> <p>FPH/10, British Sugar Phase 2 – the potential impact on Wilden Marsh & Meadows does not appear to have been fully considered.</p> <p>BW1, Churchfields & BW2 Lime Kiln Bridge – the impact on deciduous woodland, the River Stour and Wilden Marsh & Meadows should be considered.</p>	
Worcestershire Wildlife Trust	LPPO1114	Paragraph 6.11 SA	Object	Of particular note is the need to determine any ecological constraints using up to date survey information. We cannot see that this has been done and so far as we can ascertain constraints other than SSSIs and LWSs have not been considered in the evidence base or SA for the plan. This may have the effect of rendering the plan unsound. We therefore	Objections and comments noted.

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>strongly recommend that the evidence base for sites listed in Table 30.0.1 is updated and that the quantum of development proposed is made acceptable in light of any overriding biodiversity constraints before the plan is finalised.</p> <p>Notwithstanding the broad comments above we wish to object specifically to the allocation of site FPH1 (Settling Ponds, Wilden Lane) because we consider that development here will lead to unacceptable adverse impacts on the adjacent SSSI and our Wilden Marsh Nature Reserve. This is a particularly significant issue because the site has been included as a Core Site in the Local Plan with Option A proposing employment and Option B proposing housing. Both options are likely to have impacts that we do not believe can be effectively mitigated because of the limited space available and the very close proximity of development to the SSSI and reserve. In light of this we are extremely surprised to note that the Sustainability Appraisal scored Option A as a minor negative and Option B as neutral in terms of the impact on the designated site and we seriously question the underlying assumptions made to reach this conclusion, especially given the commentary in the consultation document regarding the need for further hydrological study.</p>	
	LPPO2031	Policy	Object	There are no facilities for extra housing. There are not	Objection noted.

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
		31		enough schools or doctors surgeries. We will lose more of our green area which will do the ozone no good what so ever.	
	LPPO1596	Sustainability Appraisal	Comment	<p>The Local Plan Preferred Options attempts to qualify the loss of Green Belt land via use of its Sustainability Appraisal Methods. The following 4 objectives have clearly been ignored, as have the decision-aiding criteria with the Preferred Options to the Local Plan.</p> <p>(tables included in full response)</p> <p>The local authority has also ignored numerous environmental aspects. The noise, visual intrusion and pollution the by-pass would cause to people both living and working in the areas affected is huge.</p> <p>There are various breeds of bat to Hodge Hill Farm Barns (common pipistrelle, noctule and brown long-eared) when these were converted from farm buildings to dwellings (see planning permission) the ecological survey by Worcestershire Wildlife Consultancy demanded the provision of both bat roosts and bat boxes. The survey also states that there are further breeds of bat within a 2km radius of Hodge Hill Farm and that Hurcott Podmore pools and Hurcott woods and the primary source of food for bats. WFDC have a legal requirement under the Wildlife and Countryside Act 1981 and Conservation of Habitats and Species</p>	<p>Comments noted. The SA will be reviewed and updated for the pre-submission plan.</p> <p>A Green Belt Study was undertaken to inform the Preferred Options document and has since been updated to consider new sites. This GB study considers the five purposes of Green Belt, as set out in the NPPF.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Regulations 2010 to protect the bats in and around Hodgehill and Hurcott. The effects of the proposals to develop on OC/4, OC/5, WFR/CB/7 and the building of a bypass would undoubtedly be detrimental to the bats at Hodge Hill. The Bat Conservation Trust state: <i>If a bat survey demonstrates that bats and/or a known roost are likely to be affected by the proposed development and planning permission is to be granted: condition should be placed on the decision notice requiring the developer to apply for and obtain, a European Protected Species Licence before work commences.</i></p> <p>Hurcott and Podmore pools and Hurcott Woods is an area of Significant Scientific Interest (SSI). We have contacted the Wildlife Trust to make them aware of the proposals to not only the pools, but surrounding wet woodlands within Hurcott. They advise that noise, visual intrusion and pollution of developments in and around Hurcott village would have a negative environmental impact.</p> <p>We would ask Wyre Forest District Council to literally go back to the drawing board and re-consider their own Sustainability Appraisal Objectives and their Decision-Aiding Criteria, and then correctly apply these to any proposals to modify the Local Plan.</p> <p>It would appear to be obvious that the Preferred</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				Option of squeezing virtually everything into one concentrated area is not compatible with sustainability.	
Spennells Against Further Expansion	LPPO1745	Sustainability Appraisal	Object	<p>In the presentation of the two preferred options (in Appendix E of the Sustainability Appraisal), Option A appears to have more plusses and less minuses than Option B. This is false for the following reasons:</p> <ul style="list-style-type: none"> • The so-called Eastern Relief Road is not necessarily a benefit and the argument for it is demolished in another section of our letter. • There is no evidence that a road, for which there is no detail, will “help reduce traffic congestion in the town centre”. • Option A is claimed to have a significant improvement “on traffic issues and the Air Quality Monitoring Area around the Horsefair in Kidderminster.” Any traffic amelioration measures which take place at the Horsefair can be done in conjunction with a redevelopment of the sites at Churchfields and are completely independent of housing development and roads at Spennells. • There is a claim that Option A will “enable more effective school provision” by concentrating over 1000 homes in one area – however, there is no guarantee any school will be built. 	Objection noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<ul style="list-style-type: none"> Concentrated development to the East of Kidderminster is said “to provide additional services and facilities such as infrastructure, shop, school, cycle ways and footpaths.” This could equally be said for a concentrated development in any area. 	
	LPP01751	Paragraph 6.12	Object	<p>Have there been appropriate and detailed studies carried out by suitably qualified and experienced experts to demonstrate this beyond doubt in the Wyre Forest / Kidderminster area?</p> <p>The documentation available does not show this to a degree that would enable the statements made in the Plan that there is insufficient Brownfield Land available in the area to prevent the amount of excessive development proposed on Green field areas (such as the Spennells extension).</p>	Objection noted. A viability assessment study has been undertaken which helps to inform the emerging Local Plan in terms of evidence base.
CORE11	LPP0203	6-12	Support	Support for paragraph 6.12.	Support noted.
	LPP03752	Paragraph 6.12	Object	I object to the Council’s misguided belief. Using its own contracted analysis, that there is a higher housing requirement. The evidence for which is in the OAHN document.	<p>Objection noted.</p> <p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
					Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO3674	Paragraph 6.12	Object	<p>6.12 I would question whether all of the Brownfield sites have been developed. Where is the evidence for this? There appears to be many vacant homes in current developments. Why are these still empty?</p> <p>I would question your reference to Greenfield site – It appears to be a convenient way for Councils and developers to destroy Green Belt land and circumvent Green Belt protections.</p> <p>Please supply written evidence of what constitutes Greenfield sites and why the wildlife, trees and landscape in that area is less significant and does not warrant the same protections than in Green Belt .</p> <p>I would also question the housing requirement as outlined above.</p>	Objection noted. Greenfield sites are defined as not previously developed. The Housing & Economic Land Availability Study (HELAA) provides the evidence to the sites that have been assessed through the Local Plan Review process.
	LPPO3043	6.12	Comment	No Green Belt land should be released until all of the considerable Brownfield land in the Wyre Forest area has been used up. Makes reference to Council previously acknowledging that around 3000 dwellings	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				could be constructed upon existing Brownfield sites in Wyre Forest.	
	LPPO4403	6.12 Brownfield land	Comment	WFDC should ensure all Brownfield sites are developed first. Otherwise they will never be developed. House Builders only want to build on Green Belt sites as they are more profitable. I notice that Persimmon Homes are appealing to the Government for the release of more Green Belt land. The extra cost of building on a Brownfield site reduces their profit margin.	Comments noted.
	LPPO4650	6.12	Comment	Your plan refers to insufficient sustainable located readily available Brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period. We realise that the council offices have now left Kidderminster and been built in the new development towards Stourport but surely all of the WFDC can see that Kidderminster is fast become a ghost town and, rather than moving housing and commercial areas away from the town centre and forever eroding the value of Kidderminster as a town, regeneration within the centre to include housing and refreshed commercial sites should be a priority. There are large pockets of empty, run-down and vandalised industrial sites, as well as areas of land that have been cleared (such as the old leisure centre and ex-retail sites in the town – even the shelved development of the old post office could have provided a large source of town-living apartments) which could so easily have served to provide new units	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>for commercial premises or town-centre living – the latter actually bringing people into the town and therefore increasing the need for commercial services to provide to residents.</p> <p>From the land reviewed, it appears that there is the potential for 490 + 29 + 779 dwellings under individually reviewed Brownfield sites in urban and rural locations (although Brown Westhead Park in Wolverley and the site of the old quarry on the B4189 seem to have been omitted from these considerations) with more site likely to come forward for consideration. The Campaign to Protect Rural England has provided research to show that housing developments on Brownfield sites are consistently completed more quickly than construction on Greenfield land and, as such, we would ask that you reconsider your useage of the Green Belt for construction. Give Kidderminster and it's residents a chance to rejuvenate the town centre, use and upgrade its existing infrastructure (rather than destroying more countryside to put a relief road that is not necessary) remove the eye-sores and problem sites that give current residents a headache and allow everyone to enjoy its surrounding green spaces that were given Green Belt status to protect such areas in the first place.</p> <p>We do not need to become another urban sprawl to</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				meet the needs of the area. Use Brownfield sites in the Green Belt by all means (such as the Lea Castle Site) but stick to existing footprints rather than destroying our precious assets that, once lost, will never be regained.	
	LPPO5073	6.12	Comment	Not enough information about the plans for land that apparently is readily available for development – Lea Castle, ideas for developing the Glades site seem to be at odds with priorities. Proposals for the development of Green Street should be taken into consideration that is as far as Kidderminster is concerned, there must be similar areas or plots of land in the other two towns.	Comments noted.
	LPPO4810	Brownfield Land	Comment	I have little confidence that Brownfield sites are fully identified by WFDC. There should be a public document showing where the Brownfield sites are so omissions could be identified by the public. There should also be a commitment from WFDC that all Brownfield sites are used for housing before Greenfield sites. The use of Greenfield sites should then be phased and reviewed taking population growth into account, as the projections could well be excessive.	Comments noted. A Brownfield Land Register was published on the Council's website in December 2017. The register will be updated annually.
	LPPO4812	6.12 Brownfield use	Object	Statements have been made that there are not enough Brownfield sites to meet the need, yet there is no comprehensive list of such sites? Statements have been made that Brownfield sites will be built on first, I	Objection noted. A Brownfield Land Register was published on the Council's website in December 2017. The register will be updated

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				believe this would be firstly illegal and secondly unenforceable. Why have these statements been made?	annually. The Council has considered Brownfield sites as part of the Local Plan process. As much of the District is Green Belt, the Council has looked to accommodate its development need on suitable and deliverable Brownfield sites first before considering Greenfield / Green Belt sites.
	LPPO4824	6.12 - brownf ield use	Object	Development of all the Brownfield sites should take place before using any other land. There are more which should and could be considered. There is a large disused property behind Matalan (Park Lane), there is an old building, (inhabited by pigeons) opposite Aldi on Green Street and there are many empty town centre shops. The old Woolworths for example could be turned into an indoor market with small shop units on the ground floor and create flats above.	Objection and comments noted.
	LPPO4843	6.12 - brownf ield use	Comment	Use Brownfield sites to meet housing need before greenbelt.	Comments noted.
	LPPO4631	6.12 Brownf ield Land Use	Support	I believe that Brownfield sites should be developed where possible over Green Belt areas. The old Chichester Caravans site at the junction of the A451 and the Gilgal does not seem to figure in the plans; I pass this every day of the week but perhaps there are others that I am unaware of.	Support and comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>that we will need the stated number of houses by 2034 so NO building on Green Belt land unless there is a desperate need for housing in Kidderminster by 2034 and all other options have been exhausted.</p> <ul style="list-style-type: none"> • Green Belt land should be left for the quality of our life and future generations, inc consideration for wildlife. • Consideration should be given to using Green Belt land for all to use for the health of our Nation <p>What are the exceptional circumstances in Kidderminster/surrounding area for Wyre Forest District Council to build on the Green Belt?</p> <p>Why are we being asked to comment on such an important issue as building on Green Belt land when planners (Rowland Hill Centre Friday 21.7.17) cannot answer questions on infrastructure as no decision has been made on the Eastern bypass?</p> <p>Is this plan being rushed through and our comments disregarded as decisions have already been made?</p> <p>Building on Green Belt land is a National issue as well as a local one. Too many bad decisions have been made in the past and our MP and Councillors must listen to the local people they represent, the first</p>	<p>some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				consideration must be the quality of life now and for future generations, not lining the pockets of developers.	
	LPPO4871	6.13	Object	<p>Development should concentrate on the undeveloped and derelict Brownfield areas of Kidderminster first to rejuvenise people to want to live there. If premises owners do not put forward empty buildings or vacant properties for redevelopment, this should be done as a compulsory purchase by the Council.</p> <p>The housing figures quoted are disproportionate and unjustified based on comments such as 'no population growth'. There is ample housing land currently available to take us into the next 10 years, and so at this point, no further land should be removed from the Green Belt.</p>	Objection and comments noted.
	LPPO5084	6.13	Comment	<p>In 2014 CPRE identified Brownfield land within England on which to build 1,000 000 homes. The government's own office for national statistics shows only 537,080 homes have been completed. In October 53 authorities identified that 11% more housing could be built on brown field sites.</p> <p>The Green Belt, first introduced in 1935, but to England as a whole in 1955, was successful in putting in place a planning tool to prevent urban (and localized) sprawl. It is an effective method of ensuring towns and cities rejuvenate brown field sites to prevent slums. England</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				is only covered by 13% of Green Belt so to lose 2% is a huge disservice to future generations. The Green Belt provides countryside up close for 30 million people.	
	LPPO4658	6.13 Green Belt use	Object	<p>Why did I respond to the plan? I would like to see the region prosper. I have lived on the Spennells for 30 years and use the footpaths on four or five occasions each week. I have been aware for many years of the possibility of removing the fields from Green Belt protection. However, on reading the plan, I strongly feel that the case has not been made to build on Green Belt.</p> <p>Final Comment - I understand that the Council wrestles with conflicting needs on a tight budget, but the level of justification required before building, especially on Green Belt needs to be addressed urgently and much more rigorously.</p>	Objection noted.
	LPPO4682	6.13 - Green Belt Use	Object	I would also like to include that no Green Belt should be removed at this time as per below (3,640 / 300 per annum) you have a healthy 12 year land supply available already (without any windfall sites arising) in existing Brownfield sites and you are only required to have a 5 year supply available which can easily be evidenced and which would stop any hostile building taking place. Therefore you need to leave the Green Belt restrictions in place until the end of this period as a minimum.	Objection noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO4895	6.13	Comment	<ul style="list-style-type: none"> I am struggling to see how any of the supporting reports have informed the choice of options in the Local Plan for the urban extension on the eastern side of Kidderminster. I do not believe there has been any clear reasoning and evidence to support the proposals in this Draft Plan. The Adopted Core Strategy of 2010 makes no mention of any of the proposed permits for development which appear in the current draft plan. Indeed, section 5.13 of that document states that 'only proposals which can demonstrate very special circumstances will be permitted' within the Green Belt. Having trawled through the documents that have been published since I cannot find any evidence of a significant change in the housing needs and demographics of the district, which would warrant overturning that policy. Green Belt land is there for a very good reason, and creeping urbanisation from the Birmingham conurbation is not permitted under current planning regulations except in 'exceptional circumstances'. I cannot see that a case has been made here for exceptional circumstances. 	The Sustainability Appraisal report, the Site Selection Topic Paper, and the HELAA assessment provide evidence on the site selection process. There are also other evidence base studies that have helped to inform the plan such as the Employment Land Review, Strategic Flood Risk Assessment and ecological appraisals. The evidence base studies used for the plan can be found on the Council's website.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<ul style="list-style-type: none"> The National Planning Policy Framework 2012 and the 2015 Conservative manifesto stated clearly that Ministers attach great importance to the Green Belt and will maintain existing levels of protection. In March this year the Prime Minister declared that protecting the Green Belt is 'paramount', and Communities Secretary Sajid Javid said 'In 2015 we promised the British people that the Green Belt was safe in our hands and that is still the case'. What are the justifications for Wyre Forest to overturn these clear statements of policy from the Government? Landowners have put forward in the call for sites most of the Green Belt land to the east of Kidderminster which is now under threat, as they can obviously see a huge windfall coming their way, and developers can see a greater return on developing these sites than the Brownfield sites still available in the area. It would seem to be the easy option to allow these proposals to go ahead, rather than pursuing other options. 	
	LPP04588	6.13	Comment	Quotes local Councillors stating that no Greenbelt should be lost if at all possible. These are most sensible opinions which if carried forward would ensure that any inadequacies in the PG figures or failures to meet	Comments noted.

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				green belt away will not only have an effect on the wildlife in the area, it will also have a profound effect on casual and weekend visitors, who seek to visit the area for some respite from the surrounding built up areas of the Black Country and Birmingham. This would diminish the 'businesses' of the leisure and catering industry especially in Stourport and Bewdley.	Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.
	LPPO3753	Paragraph 6.13	Object	I object to the Council's strategy for development as it does not have the expertise to develop Brownfield land efficiently.	Objection and comments noted.
	LPPO3153	Green Belt release	Object	I do not agree with the use of any Green Belt land for house building. The British countryside must be protected for our people and also for future generations. It seems that the proposed new housing is needed for an increasing population that cannot be controlled. Brexit appears to be the only way to achieve this.	Objection and comments noted.
	LPPO3208	6.13	Object	I am writing to strongly object to any building over our lovely countryside, for the following reason... The countryside is a beautiful natural haven for wildlife, flowers, hedgerows it is there to be enjoyed by all.	Objection noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				premise is wrong. We don't need to use the Green belt in the eastern side. Yes to Lea Castle as that has been talked about for many years.	
CORE11	LPPO206	6-25	Comment	In line with the Core Strategy and NPPF any review of green belt should consider whether the district, has the full amount of statutory open and recreational space requirements already in place. Development in these areas would only make the shortages worse.	Comments noted.
	LPPO3766	Paragraph 6.26	Object	I object to the Council's strategy; the overall District housing requirements have been falsely derived.	Objection noted.
	LPPO2311	Paragraph 6.26	Object	6.26 - figures incorrect as based on rounding up, miscalculations and general poor calculations. Given this has not been done properly it makes the rest of the plan a nonsense!	Objection noted.
	LPPO4718	6.26	Comment	6.26 This paragraph mentions the HELAA (?) and says that there is potential for 1200 dwellings on Brownfield sites within the main towns and 600 on Lea Castle. So, another 2000 dwellings which added to the over 2000 dwellings already started or committed as shown in 6.4 takes us very near the total required by 2034. Or is some of this double counting?	This is referring to the housing capacity of potential site allocations on brownfield land within the main towns and the additional 600 at Lea Castle (pdl area). The point being made is that there is not enough brownfield land to accommodate all of the housing requirement. There is no double counting included in the figures.
	LPPO4719	6.27	Comment	6.27 Proposes the removal of 2% of all land from the Green Belt. Why? Given the above amount of housing	Objection noted. It is a legal requirement for the Local Authority to have an up to date Local

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>on Brownfield or already committed which does not require this to happen at this moment.</p> <p>Building houses takes time. I would imagine from watching the development on Silverwoods which is still not completed we are talking at least 10 years into the future before any release of Green Belt land needs to be considered and reviewed. We are all aware of how goal posts keep changing as Government's change and Brexit will have an influence as well as what happens in the rest of the West Midlands.</p>	Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.
	LPPO4813	6.27	Comment	We are told that this Local plan will only use 2% of the Green Belt. Why does this 2% have to be contiguous with the existing developments? Why can't this 2% be separated from the existing developments?	Development needs to be located in sustainable locations. Next to existing urban areas with local services are sustainable locations. The new development can also help to support and sustain the existing local services and create new ones. It can also lead to infrastructure improvements such as road junction improvements
	LPPO3933	6.27	Object	<p>6.27 'Therefore to meet the needs of the growing population, removal of around 2% of all land from the Green Belt would be required'</p> <p>This statement would appear contradictory to the fact that the population of Kidderminster has remained static since 1991.</p> <p>The Assessment of Housing Need Report, Section 2</p>	The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036. There will be a marked increase in the number and proportion of older residents. The population aged 65+ years is expected to increase by 28.1% from 24,200 in 2016 to 31,800 in 2036. (Data based on ONS 2016-based Subnational

					Core Strategy.) Both Stourport-on-Severn and Bewdley benefitted from their status as 'market towns' under the Advantage West Midlands (AWM) Market Towns Initiative.
	LPP03792	Paragraph 6.31	Object	I object to the Council's strategy and to its distinction of Bewdley and Stourport as market towns; Kidderminster is also a market town and should not be used for development unwanted in other areas.	Objection is noted. Kidderminster was not identified as a 'market town' in the currently adopted Local Plan (see para 5.33 of adopted Core Strategy.) Both Stourport-on-Severn and Bewdley benefitted from their status as 'market towns' under the Advantage West Midlands (AWM) Market Towns Initiative.
	LPP0161	6.31	Comment	Stourport is not and never has been a market town. It is correctly described below (6.34) as a canal town but today would be regarded as a Heritage town because of its important canal history. This distinction is important because it provides a focus on what is important about the town, its not shopping nor markets but history, protection of its heritage and tourism.	Objection is noted. Kidderminster was not identified as a 'market town' in the currently adopted Local Plan (see para 5.33 of adopted Core Strategy.) Both Stourport-on-Severn and Bewdley benefitted from their status as 'market towns' under the Advantage West Midlands (AWM) Market Towns Initiative.
Stourport on Severn Civic Society	LPP01297	Para 6.32	Comment	The historic core of Stourport (Bridge Street, High Street, York Street) offers potential for improvement of flats above shops, enhancing both the townscape and providing residential accommodation.	Comments noted.
Stourport on Severn Civic Society	LPP01295	Para 6.33	Comment	In Stourport the local infrastructure and road system are already at full capacity, particularly Stourport Bridge and the town centre one-way system. These are limiting factors to any increase in traffic flow.	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPP0165	Housing Option B	Object	The option for additional housing to be built on Rectory Lane will increase already overly heavy traffic, especially at peak times. The Gilgal to the bridge is already subject to long periods of slow moving and even stationary traffic. This also backs up to areas as far as Worcester Road, Wilden Lane and beyond. This also hugely increases health risks from increases pollution from 'idling' engines. Any plan that that uses Green Belt land before fully exhausting all other options, especially Brown Field is to the detriment of future generations.	Objection noted.
	LPP0173	6.38	Comment	As a tourist destination, Bewdley needs a place for coaches to park, within close proximity to Load street to cater for elderly coach parties.	Comment noted.
Wyre Forest Green Party	LPP01415	Para 6.39	Comment	For Bewdley, the summary states that new developments on Brownfield sites in or adjacent to the town centre are limited by various factors including the Welch Gate air quality management area. This AQMA has been in place since 2003. Despite an action plan the only measure implemented has been a change in priority at the junction of Welch Gate with Dog Lane. The only effective action would be changing Welch Gate to a one way traffic flow or other traffic management measures in Bewdley town centre.	Comments noted.
	LPP0607	Welch Gate air	Comment	Due the problems of stationery traffic it is surprising that the right of way has not been changed (say for 12 months) to monitor the Air Quality in Welch Gate.	Comment noted.

Ltd					
CORE11	LPPO238	6-45	Support	Support for paragraph 6.45.	Support noted.
Summerfield Against Land Transformati on	LPPO1616	6.45	Comment	We reject your approach to the Local Plan and its reliance upon housing, indeed being housing led. Given both the population dynamics and economic concerns we believe that your strategy should be reversed i.e. it should be economic development led. You should seek to stimulate the economy e.g. rate relief and grant giving, work more closely with local employers e.g. with SVR and the Safari Park, seek to stem job losses and improve educational performance and thus the qualification base of the workforce. It is our belief that such a course would stimulate the economy, create vibrancy and lead to and support subsequent housing development.	Comment noted. The Local Plan also has an employment land requirement to meet. See the Employment Land Review Study for further details. This ELR study has helped to inform the plan and the sites allocated for employment use.
	LPPO3681	6.46	Object	6.46 How will extra monies be available? There is no evidence in your proposals. How will Kidderminster fund the extra health, transport, waste disposal, schools, pre-schools and nurseries, care in the community, libraries and parks to name but a few of the services which will be under greater demand. I understand there are monies to be made available for developments in Churchfields urban village – but there is no evidence in your plans to show how this will benefit the Spennells side of Kidderminster. The grants you propose will be received from the	The Infrastructure Delivery Plan (IDP) sets out the infrastructure requirements for the emerging Local Plan.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				Government, local enterprises and private investment will be insufficient to fund the needs of the huge influx of residence you propose.	
Worcestershire County Council, Planning Economy & Performance	LPPO1137	Paragraph 6.46	Comment	<p>This paragraph usefully makes reference to the securing finance for the implementation of sufficient supporting infrastructure, and the need for a critical mass of development to enable the effective provision of sufficient infrastructure, which we support. This raises two additional issues:</p> <p>1. Cross reference to comments on the infrastructure delivery plan and the viability assessment which provide evidence of both the infrastructure need and the financial challenge that exists in securing contributions. In particular that it is unlikely that development alone will pay for the delivery of infrastructure and external funding will be required from different sources.</p> <p>2. Some of the infrastructure required may be outside of Wyre Forest District because of the impact of Wyre Forest residents and businesses on the wider transport network, for example. Whilst schemes outside of the district cannot be allocated in this local plan, they can be listed in the IDP and the second bullet on the provision of infrastructure could be expanded to include: "to enable effective provision of directly related infrastructure in the district and in</p>	Comments noted. We look forward to working with Worcestershire County Council as we shape the Infrastructure Delivery Plan further for the emerging Local Plan.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				neighbouring authorities". The final sentence in 6.46 may risk raising unrealistic expectations, especially as the term "real benefit" is abstract, and would benefit from qualifying, such as real benefit to the district as a whole.	
	LPPO3749	Paragraph 6.46	Object	I object to the Council's strategy and thinking for development, linked to funds becoming available to justify the scale of development. We do not need towns to grow beyond their natural size for their setting by adding more roads, schools, shops and industrial units on the outskirts of the town centres. Instead regenerate its town centres.	The Infrastructure Delivery Plan (IDP) sets out the infrastructure requirements for the emerging Local Plan.
	LPPO3786	6.47	Object	Persimmon Homes, inadvertently, provided the catalyst to the level of debate that the residents of Wyre Forest now find themselves involved in. I personally believe the Green Belt Review and the LPR document would have slipped through very much unnoticed if Persimmon hadn't made a fundamental mistake. I do not feel the consultation process to be fair, inclusive or within the spirit of the NPPF. I have had to actively seek access to all documents that have helped shape my opinion — even requesting that documents were correctly, chronologically ordered on WFDC portal. The language and terminology used can be at best described as ambiguous. This would have negated	The Preferred Option Plan and the supporting evidence base documents were made available on the Council's website for public viewing throughout the whole of the consultation period, and remain on there now. The documents were also available at the eight drop-in sessions held throughout the District during the consultation event. Hard copies of the Preferred Options Plan was also available at the Council Hob and local libraries in the District.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				many residents being able to fully comprehend the magnitude of the proposed options. I believe the Local Plan Review to be biased in its writing and a cynical approach taken to the presentation and timing.	
	LPPO3794	Paragraph 6.47	Object	I object to the Council's strategy and thinking for development. There is no objective evidence to support the perceived large scale development. The figures are false, derived for the Council as a paid contractor which is dismissive of independent analysis. The scale of development is unnecessary. It is poor land use policy to simply blight perfectly good Green Belt due to the Council's inability to drive through good efficient development of Brownfield and inner town development. Simply adopting the least resistance is a mark of poor direction and ability by the Council. This provided residents with low confidence of the ability of the Council to properly look after its existing residents to the Area and points to it not having the required skills in place to tackle more challenging issues.	There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO4149	6.47	Object	Fairness should be observed – currently the Local Plan is biased towards Option A which unfairly shoulders the greatest loss of Green Belt and the greatest number of new houses built in one big mass, as well as a new road cutting straight across the peaceful countryside. The Local Plan is written in totally biased language. Examples are seen in Table 6.06, Comparison	Objection and comments noted.

				<p>of Option A and Option B:</p> <ol style="list-style-type: none"> Option A looks to minimise the number of sites in a more concentrated strategy whilst for Option B a greater number of sites will be required and overall a more dispersed strategy Option A is more likely to enable viable provision of affordable housing Option A enables the building of Kidderminster Eastern Relief Road which would: Provide access for the new development to the east of Kidderminster Enable S-NE traffic to by-pass Kidderminster altogether en route to M5 motorway and Birmingham Help relieve congestion on A449 and in Kidderminster (Ring Road, Horsefair etc) Help facilitate an improvement in AQMA at Churchfields (<i>what does this mean?</i>) Option A will not impact as much on A451 and A449 as larger Lea Castle Scheme (Option B) Option A maximises the benefit of proximity to Kidderminster rail station (<i>It is at least 2 miles and unwalkable</i>) Whereas Option B would not enable the building of the Kidderminster Eastern Relief Road and the benefits this scheme allows In Option B -Additional development at Lea 	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Castle will put additional pressure onto A451 and A449 from the north into Kidderminster</p> <p>12. In Option B – Additional development to west of river, particularly at Arley Kings is likely to have a negative impact on Stourport on Severn and the river crossing</p> <p>It is clear that the planners favour Option A on the basis that they can have a new Eastern Bypass that was denied them years ago when original scheme was scrapped.</p>	
	LPPO4834	6.47	Object	The Local Plan has been designed to present the case as a clear choice between Option A or Option B, although some clarification has now been offered that all aspects of the Plan can still be challenged. This has meant that local people were being asked to comment upon a Plan which was not fairly or accurately presented. The Plan as presented was clearly weighted towards the so-called advantages offered by Option A (such as the building of an Eastern Relief Road), while presenting the disadvantages of choosing Option B (less provision of local infrastructure). The architects of the Plan had clearly already decided which Option they preferred so the Plan was not offered in a balanced or even-handed way, thus not presenting the case fairly.	Objection noted. Comments could be made on any of the sites within the plan and the large number of consultation responses we have received has proved that this worked effectively. In particular, para 6.57 of the Preferred Options document asked specifically if there were any other alternative options that the public would like to suggest.
	LPPO4783	6.47	Object	I object to the unfairness of weighting given to the paragraphs 6.55 and 6.56. Option A is proposed in a positive light, stating what it could supposedly help	Objection and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				and Option B is placed with negative arguments about possible problems it might entail. This means that the initial proposal has been made on unfair grounds, with its influential wording affecting people's thoughts, before giving them a fair chance to look at the pros and cons independently and giving them a fair chance to make up their own minds.	
	LPPO4867	6.47	Comment	I would urge the Council to review its housing need and figures, and guarantee that all Brownfield sites are used before any Green Belt land is released.	Objection noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.
	LPPO5129	6.47	Comment	<p>The Wyre Forest DC plan was not put forward in a fair way. The campaign against it did more to publicise it than the council did. The council intended to hold no drop-in information event for Spennells, the area most affected by the proposal, despite other less affected areas getting such drop-in events. Why not? There only was one in Spennells thanks to the effort of a Spennells councillor to stop this bias.</p> <p>The plan itself presents the Core build sites as non-</p>	Objection noted. Comments could be made on any of the sites within the plan and the large number of consultation responses we have received has proved that this worked effectively. In particular, para 6.57 of the Preferred Options document asked specifically if there were any other alternative options that the public would like to suggest.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				negotiable and pressures residents to support Plan A as the "preferred" plan, discouraging anything but picking A or B or objecting to any part of the Core, such as behind Spennells.	
	LPPO2936	Paragraph 6.47	Object	<p>How does the Local Plan ensure deliverability? Greenfield sites are cheaper to develop and are very attractive to developers and conflict with the profitability of Brownfield sites, where issues of existing and precious old buildings, land clearance and cleansing constrain profits. The LPR must make clear stronger requirements for the development of the Green Belt released sites, the need to 'add' environmental gain. Details are given for the need to relieve traffic congestion in Kidderminster with the Eastern Relief Road, but robust green infrastructure is also vital to enhance new and existing communities.</p> <p>The viability problems of Brownfield sites seem to be lacking any solution, so areas will remain blighted for the plan period. There are significant landscape considerations for wide rural and Green Belt areas of the district, whereas for others who live in more urban areas, landscape value is just as significant and should be evidenced as such, through robust policy for the development sites. It is not just a matter of funding a new road, but ensuring other areas are developed on an economic level playing field.</p> <p>It would be appropriate to see a similar set of</p>	Objection and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>safeguards for these proposed release areas as exist for rural areas of Wyre Forest, to ensure a high standard and positive contribution to make a place 'unique'. Clear parameters for green infrastructure would even the economic playing-field of development.</p> <p>In proposing release of Green Belt, policy addressing environmental matters such as sustainably built housing- low carbon and greenhouse gas emissions and ability to accommodate the impacts of climate change over the plan period are not given sufficient importance for the development process. These matters should be evident in the LPR, so these sites contribute to the locality in the way that rural areas can and do.</p>	
Hurcott Village Management Committee	LPP01625	6.47 - viability	Comment	Large areas of Wyre Forest, currently owned by developers who have designated planning permission, are not being developed due to a lack of financial viability. While these areas remain undeveloped Wyre Forest is being forced to consider other sites. Surely the structure and details of the Local Plan should be in the hands of WFDC and not potential developers.	Comments noted. The Council does work with developers/landowners to bring forward the more challenging sites on brownfield land for development. The Council will also use its compulsory purchase powers where necessary.
Spennells Against Further Expansion	LPP01744	6.47	Object	It is remiss of Wyre Forest District Council that they did not make it clear early enough to residents that all areas suggested in the draft local plan can be commented upon. Many people are of the impression that they have to choose between one of two packaged-up options and that "Core" areas which are	Objection noted. The Sustainability Appraisal and the Site Selection Process Topic Paper set out the process the Council has undertaken to identify the proposed allocation sites. The HELAA document has also informed this process. These documents will be available for

				<p>incorporated in both options are a “done deal”.</p> <p>By presenting the Draft Local Plan proposals in this way, the District Council has effectively disenfranchised comment. It is only recently (Express and Star 3/08/17) that the WFDC press releases have not implied a fixed choice. By changing the presentation of the consultation mid-way through, not all residents have had time to understand that any site can be commented upon or alternative suggestions be made.</p>	public viewing during the pre-submission consultation.
Taylor Wimpey West Midlands	LPPO1491	Paragraph 6.47	Comment	<p>Urban Extensions vs Dispersal</p> <p>In addition to a 20% buffer different types of sites in different locations should be included. If one/ two large urban extensions are exclusively proposed to deliver the dwelling requirement, there is the risk that in the short term no dwellings will be delivered as the administrative tasks associated with large schemes inevitably take longer to be processed, there are possibly multiple land owners that will need to be satisfied when preparing and executing the S106 and often significant infrastructure is required and is necessary to be delivered before the construction of dwellings can commence. An example of where this have recently happened is in Rugby Borough, where only two large urban extensions were proposed and as a result of the issues identified above, the Council</p>	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>failed to demonstrate a five year land supply (which is still the case and has been ever since their Core Strategy was adopted in June 2011). One of the two extensions, due to its scale, will now not be required within the plan period. The Council is now rectifying this issue through a review of the Plan, which extends the plan period and includes new smaller deliverable sites to plug the gaps.</p> <p>Whilst it is good planning practice to reap the benefits of large scale development on the urban edge to comprehensively plan a neighbourhood and secure the delivery of required infrastructure, it is important that housing delivery is maintained throughout the plan period to enable households to form as and when they need to. The best way this can be achieved is through identifying additional sites elsewhere in the District. Further, different housing needs and preferences exist across the District and, therefore, to provide choice and variety to households, in a sustainable manner, is beneficial. This is particularly so when new housing is often a more popular choice for first time buyers given the support provided through the successful 'Help to Buy' initiative. Alternatively, households may choose to relocate elsewhere outside of Wyre Forest, which would be potentially detrimental to the local economy.</p> <p>Whilst housing should be located in the most sustainable locations from the perspective of</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>minimising the need to travel, there are a number of social benefits to locating homes in more rural locations (i.e. sustaining local services, allowing families to live nearby relatives and, inevitably, achieving a balanced population to help a location to thrive). Development can bring with it much needed facilities and infrastructure to communities, which could improve the quality of life for residents. It is therefore important that a reasonable level of development is dispersed to deliver sustainable communities across Wyre Forest. This should, however, not undermine the vision for a comprehensive urban extension to the south and east of Kidderminster and the strategic benefits this could deliver.</p> <p>In terms of the proposed options put forward by Wyre Forest in the Preferred Options Draft Local Plan Review, Option 'A' seeks to locate concentrated development outside the main towns to two urban extensions and Option B seeks to deliver two smaller urban extensions and a more dispersed strategy elsewhere. Whilst both options have their merits, it is considered that a combination of both Option 'A' and 'B' would provide both deliverable and sustainable growth in Wyre Forest for the reasons identified above.</p>	
	LPPO4643	6.47	Object	The Local Plan is not in accordance with the guidelines	Objection and comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>for Public Consultation and recognised best practice so should be revisited and also cover Blakedown.</p> <p>I believe the plan/some supporting documentation is biased to Option A.</p> <p>The promise to develop all brown field sites before Green belt seems false.</p> <p>I think we need 3000 houses not 6000 on a site to include a Drs/school with only Lea Castle/land behind Spennells and the Comberton/Offmore Core being big enough.</p>	
	LPPO4829	Development Strategy	Comment	<p>The plan identifies as Core Sites the development of 3640 dwellings, the bulk of which fall in Green Belt on the eastern side of Kidderminster. In particular (OC/6), (OC/13) and (WFR/ST/2). In addition Option A includes (WFR/ST/2) and (AS/10) together providing together 930 dwellings.</p> <p>Firstly I would question the need for the provision of an additional 5400 dwellings and therefore the need for substantial development on the Green Belt. I would question whether there has been a rigorous enough assessment of Brownfield sites within the District.</p> <p>The Strategic Housing Land Availability Assessment shows a potential of 4475 dwellings which would go a</p>	<p>Objection noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p>

				<p>downturn of the town centre. It was only a matter of time once Crossley Park and Weavers Wharf were developed that flagship stores would move to a location with doorstep parking. The development of the new leisure complex out of town is a huge blow to Kidderminster town centre, and is rife with errors of its own. The new relief road has only managed to move traffic issues from Stourport Road Island further down A449 towards Hoobrook. Impacting on Spennells Valley Road, Wilden Lane and A449 Northbound from Black Bridge.</p> <p>The future of Kidderminster must start with rejuvenation of the town centre spreading outwards. The large units will never attract new business. The current financial climate would make the risk of undertaking a retail unit of that size too great. Breaking the buildings up into low rise apartments with small artisan retail units interspersed would be the best option. Include pockets of green space and trees, with seating. The local schools and college should be encouraged to run small businesses as part of educational programmes. Design students encouraged to group together and run a cooperative – showcasing their individual talents. The canal side and tourism exploited for its maximum potential. The access routes into the town centre need to be made safer and more attractive. On the protest march I noted the extent of the vandalism and stench in the underpass – I certainly</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

				<p>wouldn't walk there alone or encourage my daughters or any tourist to.</p> <p>Offering Option A or Option B is a divisive and dangerous tactic – one that splits communities and gives way to resentment. Who am I to say that the Green Belt in Kidderminster is more important than the Green Belt in Stourport? If the projected growth figures are accurately calculated it will be unnecessary to develop on any Green Belt land. If WFDC harnessed the passion raised by this consultation and worked with residents then maybe we may achieve something lasting and worthwhile.</p> <p>I must ultimately conclude that WFDC are happy to support a document that is biased in its writing and statistically incorrect; or the Councillors themselves are not qualified to read and interpret the data presented. If this is so then the residents of Wyre Forest are not being offered a fair and inclusive consultation. I urge WFDC and politicians at every level to listen to the residents – the very people who elected you, the very people you represent, the very people who you serve.</p>	
	LPP04777	6.47	Object	<p>Bias in structure of “options”.</p> <p>The Sustainability Appraisal describes the two options presented in the Draft Local Plan as follows: <i>A.13 The</i></p>	Objection noted. Comments could be made on any of the sites within the plan and the large number of consultation responses we have received has proved that this worked

				<p><i>preferred options are for Option A to be more contained with an urban extension to the east of Kidderminster and for option B to be a more dispersed approach.</i></p> <p>WFDC website describes the Draft Local Plan proposal this way: <i>The Preferred Options document sets out 2 possible options for potential sites of new development. It seeks to identify and allocate land only, detail for each site would be subject to a planning application.</i></p> <p>WFDC did not make it clear early enough to residents that <u>all areas suggested</u> in the draft local plan could be commented upon. Many people are of the impression that they have to choose between one of two packaged-up options and that “Core” areas which are incorporated in both options are a “done deal”.</p> <p>In The Shuttle of 15th June, the consultation is presented this way: <i>The council is proposing two options - one option sees additional development concentrated to the east/south of Kidderminster, while the second option would see growth more widely dispersed, particularly around Stourport and adjacent to Lea Castle.</i></p> <p>By presenting the Draft Local Plan proposals in this way, the District Council has effectively</p>	effectively. In particular, para 6.57 of the Preferred Options document asked specifically if there were any other alternative options that the public would like to suggest.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>disenfranchised comment.</p> <p>It is only towards the end of the consultation that the WFDC press releases have changed their tune. For example, the Express & Star (3 August 2017) quotes from the WFDC press release this way: <i>Comments can be made on any of the sites proposed for development and alternative suggestions made before 5pm on August 14. The final draft plan may include a combination of sites from the options put forward and from new suggestions.</i></p> <p>There is no strong push here for the two preferred options. By changing the presentation of the consultation mid-way through, not all residents have had time to understand that any site can be commented upon or alternative suggestions be made.</p> <p>Bias in Content of “Options”</p> <p>In the presentation of the two preferred options (in Appendix E of the Sustainability Appraisal), Option A appears to have more plusses and less minuses than Option B. However, this is false for the following reasons:</p> <ul style="list-style-type: none"> • The “Eastern Relief Road” is not necessarily a benefit. • There is no evidence that a road, for which 	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>there is no detail, will “help reduce traffic congestion in the town centre”.</p> <ul style="list-style-type: none"> Option A is claimed to have a significant improvement “on traffic issues and the AQMA around the Horsefair in Kidderminster.” Any traffic amelioration measures which take place at the Horsefair can be done in conjunction with a redevelopment of the sites at Churchfields and are completely independent of housing development and roads at Spennells. There is a claim that Option A will “enable more effective school provision” by concentrating over 1000 homes in one area – however, there is no guarantee any school will be built. Concentrated development to the east of Kidderminster is said “to provide additional services and facilities such as infrastructure, shop, school, cycleways and footpaths.” This could equally be said for a concentrated development in any area. 	
	LPPO4916	6.47	Object	I believe the plan is biased to Option A as is some of the supporting documentation. Also, it is fact that no “drop in session” was originally planned for the impacted people of Spennells which is another indication of unacceptable bias to Option A	Objection noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO2734	6.47 Document Bias	Comment	<p>Wyre Forest District Council (WFDC) demonstrate a biasedness towards Option A throughout the Local Plan and as such I particularly object to Option A; the large scale, landscape dominating development, located on the periphery of Kidderminster which would not be sustainable in relation to access to existing infrastructure (particularly public transport and sustainable transport infrastructure). The Local Plan states that Option A would “maximise the benefit of proximity to Kidderminster rail station and links to the national rail network”. Kidderminster station is over two miles from the proposed location of Option A and this distance is not considered to be within the boundaries expected.</p> <p>It is evident that the ambition to construct a bypass is the focus of this option and the housing is the secondary priority, which is contrary to the guidance included in Manual for Streets. Air Quality and noise impacts are national priority with policies such as Clean Air Zones increasingly common place. The Local Plan states that Option A would “help facilitate an improvement in AQMA in Churchfields”, however constructing a bypass to “enable S-NE traffic to bypass Kidderminster altogether en route to the M5 motorway and Birmingham” suggests that there is unlikely to be any net change in air quality across Kidderminster. Regardless of housing delivery, is there not an option to upgrade the existing road network</p>	Comments noted. The Infrastructure Delivery Plan (IDP) sets out what infrastructure requirements will be required to support the emerging Local Plan and the funding that will be required to delivery this infrastructure. A Transport Assessment study is being undertaken as part of the final stage of Plan making and will be made available for public viewing during the Pre-Submission consultation.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>such as the A450/Worcester Road – if a road can be delivered over a rail track then there are not any reasons to suggest that the bridge with the A449/A450 could not be improved? In addition, Spennells Valley Road is good quality and rarely suffers from congestion – it's the Worcester Road/Chester Road/Wilden Lane roundabout that is the issue.</p> <p>Based on the documents within the public domain, WFDC do not have a robust evidence base to objectively demonstrate that Option A is a viable site for housing. Engineering constraints such as the rail track and lack of physical boundary to redefine the Green Belt make delivering housing and the bypass undeliverable, particularly if you are to achieve your affordable housing targets (as WFDC are likely to want developer contributions towards the bypass). Stanklyn Lane cannot be used as a physical boundary to redefine the Green Belt as this would result in the merging of two distinct places, which is contrary to the National Planning Policy Framework guidance. In addition, at the drop-in consultation sessions, WFDC stated that they have not completed any transport modelling or early assessment work to prove that an Eastern Bypass would relieve congestion or that the levels of demand are likely to justify the construction of a bypass (and offer value for money). If no technical work has been completed that suggests that the Eastern Relief road could benefit Kidderminster's</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>highway network, then WFDC should not be stating the potential benefits of the road. Alternatively, if WFDC have completed some initial feasibility work then they should be sharing this with the public. However, the fundamental issue with identified this site in the first place, as with all the other sites, is the poor technical evidence informing the identification that 5,400 (300 per annum) houses are needed over the Plan period. The Local Plan states that Option A would “help facilitate an improvement in AQMA at Churchfields”. This statement also suggests that some level of transport modelling has been undertaken and if it has not, then this statement is misleading and misinformed.</p> <p>The Local Plan also states that Option A will “help facilitate Kidderminster regeneration”, however the Green Belt Review Strategic Analysis (September 2016) suggests that the majority of the sites proposed in the Local Plan including Option A have a “low contribution” to regeneration. It is not clear from this document whether they will have a low contribution in terms of being developed in future or whether they currently have a low contribution. Nonetheless, Option A scores the same as many of the parcels in Option B and as such Option A contributes no more to regeneration than Option B does, hence the statement in the Local Plan is incorrect based on the assessment in the Strategic Analysis document.</p>

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
	LPPO3826	6.47	Object	The Draft Local Plan has been presented with a definite bias in favour of Option A (eg. Appendix E of the Sustainability Appraisal). Promises of improvements in infrastructure to meet the demands of new residents should also apply to Option B. The repetition of the “benefit” of an Eastern Relief road only available in Option A is not only biased, it is completely lacking in evidence. No route or traffic model has been provided; claims made that such a road would help regenerate Kidderminster and improve air quality at Churchfields lack any factual evidence; the A450 already takes traffic from the A449 to the A448 and the A456 so a “relief road” is not needed. A new road would in fact bring increased air and noise pollution to the heavily populated Spennells estate as well as causing distress to local wildlife.	Objection and comments noted.
	LPPO2665	6.47	Object	I believe the plan is biased to Option A as is some of the supporting documentation. Also, it is fact that no “drop in session” was planned for the impacted people of Spennells which is another indication of unacceptable bias to Option A.	Objection and comments noted.
Wyre Forest Green Party	LPPO1480	6.47	Object	It is remiss of Wyre Forest District Council that they did not make it clear early enough to residents that all areas suggested in the draft local plan can be commented upon. Many people are of the impression that they have to choose between one of two packaged-up options and that “Core” areas which are	Objection noted. Gladman Developments Limited	LPPO1419	para. 6.48	Object	Gladman note suggested provisional requirement of 6000 dwellings against requirement of 5400 giving a 10% contingency against claimed OAN. However, we would recommend using a 20% contingency made up of small and medium sized sites across wide range of sustainable settlements throughout the hierarchy. This would demonstrate an effective strategy that provides sufficient flexibility against reliance on large strategic sites and Brownfield sites. Likelihood of large strategic sites delivering beyond plan period should be acknowledged. If BW FOAN figure is used then requirement would be 7171 dwellings (332 x 18 +20%) rather than 6000.	There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.
	LPPO4722	6.48	Comment	6.48 The figures in the table 6.0.3 do not appear to reflect the figures given in other council sources for the amount of dwellings nearly completed and in the pipeline. There is no timeline in these figures. Are they	Comments noted. The dwelling completions in the table were the number of completions since 1 st April 2016 up to 1 st April 2017. This information will be further updated in the pre-

				opportunities rather than pursue outdated models from the past - 'mixed use' communicates little other than the elements of 'wishful thinking' so often reported in the local press over numerous years.	
Campaign to Protect Rural England	LPPO923	Table 6.0.1	Object	We believe the Plan's Housing Requirement is not the Objectively Assessed Need, but a highly subjective one, taking into account irrelevant factors. The 2016 OAHN Amion report came up with a figure in line with recent delivery and this is a good indication of what is needed. Our report (see attached) shows an OAHN of 229 pa making a total of 4122 over the plan period. This is not much more than urban and Brownfield capacity and would need minimal Green Belt release.	There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO155	6.0.1	Comment	My comments relate to the housing needs assessment and the impact it has on the proposed sites allocation later in this document. Whilst I have no issue with the detailed assessment carried out by Amion, I do not believe the conclusions reached are sufficiently robust to justify the proposed allocation of green belt land at this time. The report suggests that the housing needs assessment indicated additional homes ranging from 199 per annum (SNPP) to 291 per annum, but they proposed 300 per annum.	There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>This is an odd conclusion given that:-</p> <ol style="list-style-type: none"> 1. The average supply over the last 10 years has been 255 per annum and only in 2 years has 300 been exceeded. 2. The report says that over that time there has been "virtually static population growth". 3. Local industry is in decline and the impact of Brexit is likely to be negative for the local economy and growth. 4. The report states that, at a point in time, there were 1,404 vacant dwellings, but no allowance is made for filling these in the figures. 5. There seems to be no allowance for infill development, windfall sites and rural exception sites, nor has any account been made for the conversion of commercial property to provide, for example, flats in the town centre. <p>It is my contention that a more realistic needs figure would be about 250 per annum, midway in the range of figures quoted in the Amion report and also close to the average of previous years. This results in an 18 year requirement of 4,500 homes, 900 fewer than the recommendation.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>If allowances were made for other sources of housing provision as follows, then the need for green field land is reduced:</p> <ol style="list-style-type: none"> 1. Assume 30% of vacant dwellings will reoccupied over 18 years, equating to 421 in total or 23 per annum; 2. Allowing 10 units to be provided by infill per annum equates to 180 over 18 years; 3. Allowing 10 units to be provided by conversion of commercial property per annum equates to a further 180 over 18 years; 4. Allowing for 5 rural exception site units to be provided per annum equates to 90 over 18 years; <p>which add up to a 871 units over 18 years. This reduces the new build requirement to 3629 (4,500-871). These figures almost completely satisfy the requirement shown in table 6.0.3 below without the need for green belt land at this time.</p> <p>It is my submission that the housing need figures be reviewed as my comments suggest.</p>	
	LPPO293	6.0.1	Comment	Figures take Wyre Forest as a whole. May be useful to look at the need for affordable housing, in each of the	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

					PPG. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO476	Table 6.0.1	Object	I do not believe that Wyre Forest District needs 300 more properties per annum. Also as there is a need for 540 elderly persons accommodation, I believe that a development like some of the developments in Birmingham which are more like village communities where there is a Doctors surgery on site would be more suitable on the Lea Castle Hospital site than 600 houses/flats.	There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO468	Table 6.0.1	Object	Wyre Forest District has a virtually static population growth. Population of Wyre Forest has risen by around 1,200 since 2001, an increase of around 1.2%, and by about 100 persons since mid-2011. (http://www.worcestershire.gov.uk/info/20044/research_and_feedback/795/population_statistics/8)	The population of Wyre Forest District is projected to increase by 4.9% over the course of the Plan Period 2016-2036, from 100,000 in 2016 to 105,300 in 2036. There will be a marked increase in the number and proportion of older residents. The population aged 65+years is expected to increase by 28.1%

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				I do not understand why the aim is to build 5,400 new properties over the life of the plan which is 300 per annum.	<p>from 24,200 in 2016 to 31,800 in 2036. (Data based on ONS 2016-based Subnational Population Projections).</p> <p>This suggests that the population is not 'static'. For further information please see the updated OAHN Study which will be published on the Council's website during the Pre-Submission consultation.</p> <p>There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO480	Table 6.0.2	Support	Agree with this table but feel that the proposed developments on Lea Castle Hospital site will impact detrimentally to Cookley village.	Support and comments noted.
Hardwick & Prosser	LPPO721	6.0.2 Settele ment	Comment	It is noted that the draft documentation's settlement hierarchy states that in the main town, Kidderminster, suitable development includes utilisation of	Comments noted.

		hierarchy		appropriate Greenfield and Brownfield sites and residential amongst other things. It is noted that the NPPF specifically excludes garden land from the definition of Brownfield and thus garden land is not considered previously undeveloped so is Greenfield.	
Kidderminster Harriers Football Club	LPPO931	Table 6.0.2	Comment	To promote sporting opportunities in the district and improved health in accordance with NPPF. Suggests including an additional bullet to suitable development column for Kidderminster: <ul style="list-style-type: none"> • <u>Sports and education facilities.</u> 	Comment and suggestion noted.
Sir Thomas White's Charity	LPPO907	Table 6.0.2	Support	Our client supports the settlement hierarchy described in Table 6.0.2 'Wyre Forest Settlement' Hierarchy of Policy 6B and the identification of Kidderminster as the 'Main Town' where development will primarily be directed. As Wyre Forest's largest settlement, Kidderminster is a sustainable location for growth and the recognition of this is supported.	Support is noted.
Hagley Parish Council	LPPO780	Policy 6B Locating New Development	Object	Housing locations The report undertaken By Peter Brett Associates for GBS LEP and others (for which WFDC was a client) concluded that Wyre Forest was not part of the Birmingham & Black Country Housing Market Area (HMA), which it identified. The Consultation Document correctly (in our view) identifies Wyre Forest District as coterminous with a HMA. Both these imply that WFDC should in its plan be making zero provision for housing	Objection noted. The Sustainability Appraisal Report and the Site Selection Process Topic Paper set out the site selection process that the Council has undertaken. The HELAA document also provides from evidence. These evidence base documents are available for viewing on the Council's website.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>for Birmingham commuters. Since such commuters (if by going by car) will inevitably use A456, this will prevent the new plan from exacerbating the traffic problems in Hagley described above.</p> <p>The Consultation Document concentrates housing sites on the east side of Kidderminster, without giving any (or at least any adequate) explanation for this. The implication that we draw from this is that Kidderminster is seeking to contribute to the alleged shortfall of housing land in Birmingham and (contrary to wider policy) increase commuting, which (if by car) will inevitably be along the congested section of A456, exacerbating the problems in Hagley and the pollution in the Hagley AQMA.</p> <p>The strategic gaps between Kidderminster and Bewdley and between Kidderminster and Stourport are narrow and should not be eroded, but the options of expanding Kidderminster northwest towards Low Habberley do not seem to have been considered. If the objective is to meet Kidderminster's housing needs (rather than Birmingham's), this option should have been considered. This area has good road links to Kidderminster town centre and scarps above Habberley Valley and a tributary of the Honey Brook would provide good landscape barriers to be a new edge to the Green Belt; that is if Green Belt release is</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>necessary.</p> <p>As a Brownfield site, it is very difficult to oppose the redevelopment of Lea Castle Hospital. This site is very well shielded by coniferous plantations. The consultation suggests development between it and A451 Stourbridge Road. This may look attractive on the map, but in fact would be a severe encroachment on open countryside, and adversely affect the openness of the Green Belt.</p> <p>We note that the sites considered by WFDC include some among scattered housing in Broome parish. The housing in this area is properly to be considered as part of a scatter of housing focused on Hagley. We support the rejection of those sites. Housing in that area should not be considered unless the gap between Hagley and the Wyre Forest District boundary has been developed.</p> <p>We also note that two large employment sites have been suggested (and rejected) in the Hurcott and Hodgehill area on either side of A456, on the basis that they have a good transport link via A456. Their use, perhaps as a logistics site, would also exacerbate the traffic problems and pollution in West Hagley.</p>	
South Worcestershire	LPPO1245	Settlement hierarchy	Support	The SWCs support the proposed settlement hierarchy which is logical and informed by appropriate sustainable development planning criteria.	Support and comments noted.

		Development		<p>alternative development or the provision of new playing field to support new development is properly informed and based on local evidence base to accord with NPPF Pars 73 and 74.</p> <p>A number of the proposed allocations do affect playing field sites therefore this is an important issue.</p>	
Horton Estates Ltd	LPPO849	Policy 6B	Support	<p>Bullet point iii. of Sub-section A is supported for the same reasons set out in our response to Table 3.0.2. In addition, the view is taken that bullet point v. should be expanded to refer to the Local Plan's identification of specific PDL sites within the Green Belt (under draft Policy 34) where sustainable development will be permitted.</p> <p>The settlement hierarchy in Table 6.0.2 should also reflect that development at PDL sites in the Green Belt – both specific sites and windfall sites – is permitted by draft Policy 34. As it stands, the hierarchy appears to be in conflict with draft Policy 34 and it is therefore requested that "PDL sites in the Green Belt" is provided as a specific category in the hierarchy. A similar position exists with Sub-sections D and E which fail to acknowledge the development permitted on PDL in the Green Belt (within the countryside) under draft Policy 34.</p>	Support and comments noted.
Barratt Homes West Midlands	LPPO769	Policy 6B	Comment	Support for aspirations of policy on locating new development but concerned that this is not reflected in	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>actual allocations.</p> <p>Number of proposed allocations are on employment sites - such site should only be allocated where there is clear market evidence to show sites will not come forward for employment uses.</p> <p>We support the recognition that it is necessary to facilitate the delivery of sufficient accessible housing to meet objectively assessed needs. We are concerned that the Kidderminster allocations in particular will result in a market saturation on the eastern edge of Kidderminster. Furthermore, housing should be distributed so that it reflects the settlement hierarchy.</p> <p>Accept that some Green Belt land release will be required. However, suitable and sustainable Greenfield sites outside Green Belt should be allocated first in order to pass 'exceptional circumstances' test.</p>	
Homes England	LPP0797	Policy 6B	Support	Policy states that the development strategy and site allocations proposed for locating new development are based on a number of principles. These include the re-use of available, accessible and environmentally acceptable Brownfield land. The HCA supports this, as the proposed allocation of the former Lea Castle Hospital site as a core housing site for 600 dwellings as part of a mixed use development is an appropriate use of the site, regenerating a redundant Brownfield site	Support and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>on the edge of Kidderminster and bringing it back into use.</p> <p>Another principle is the maintenance and openness of the Green Belt following the Green Belt Review. This is an important principle, and highlights the need for the Council to carefully consider the scale of Green Belt releases that will be required in order to meet the OAN over the plan period.</p> <p>The principle that Kidderminster is to be the main focus for large-scale housing development is supported.</p>	
	LPP04556	Settlement Hierarchy	Comment	Cookley is a Village <i>INSET</i> in Green Belt with its own strong identity/local services. WFDC should support Wolverley & Cookley PC to meet local needs in a sustainable way w/o destroying green belt and effectively joining Cookley to Kidderminster.	Comments noted.
	LPP04574	Settlement Hierarchy	Comment	Cookley is a Village <i>INSET</i> in Green Belt with its own strong identity/local services. WFDC should support Wolverley & Cookley PC to meet local needs in a sustainable way w/o destroying green belt and effectively joining Cookley to Kidderminster.	Comments noted.
Horton Estates Ltd	LPP0851	Table 6.0.3 and 6.0.5	Comment	Table 6.0.3 appears to provide a breakdown of what the District Council deems to be completed or committed housing supply. However, it includes lapsed planning permissions which is unsound because they	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				no longer benefit from planning permission and do not amount to deliverable/developable supply. It is requested that this component be deleted from Table 6.0.3. In addition, we wish to highlight that PDL could be released at Cursley Distribution Park through site rationalisation which could be allocated for residential development. As described in more detail above, two areas of land could potentially be released (1.5ha and 1.9ha), each of which could accommodate in the order of 40 dwellings.	
Sir Thomas White's Charity	LPPO913	Table 6.0.3	Comment	Table 6.0.3 within the Key Choice for the Development Strategy states that the Council have identified 3,640 dwellings (approximately) which could be achieved to meet the requirement. The complete figure from 2016/17 (the first year of the plan) are yet to be confirmed; however these are not going to plug the gap between the proposed allocations and the requirement. This leaves a significant shortfall which requires the Council to release additional strategic land. The plan includes no reference to a Part 2 Plan or a review mechanism. In this context the plan must identify additional strategic sites for housing now if it is to be found sound. Land to the north west of Kidderminster (a site location plan for which is enclosed) could contribute towards the Council's requirements for additional strategic land and could boost the supply of dwellings required within the	<p>The OAHN follows the guidance for determining housing needs as laid out in guidance available at the time and will be updated to reflect changes in the NPPF and PPG.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>region, which would assist in addressing the shortfall.</p> <p>Beyond the issue of identifying insufficient land to meet its housing need, it should also include additional sites to provide flexibility with respect to the Council's housing needs and consequently the allocation of sites. At present the Council's supply relies on a significant amount of previously developed land, which is likely to have constraints in terms of contamination and accessibility. Furthermore, the Council has only ever achieved an annual supply in excess of 300 dwellings in two previous years (2013/2014 and 2014/2015), and predicted for 2016/2017 (although this is still to be confirmed). If the Council is to consistently exceed 300 dwellings going forwards, as well as allocating sufficient sites to meet the basic requirement (which it does not currently do), additional flexibility in the supply will assist further. Consequently the Council should include additional flexibility of at least 10% above the minimum requirement of 5,400 units when allocating sites which are appropriate for addressing the Council's shortfall. This equates to 540 additional dwellings.</p>	
CORE11	LPPO239	6.0.3	Support	Support for table 6.0.3.	Support is noted.
CORE11	LPPO240	6.0.4	Comment	Option 4 strongly recommended, The development fabric will be of prime importance.	Comments noted.
	LPPO4598	6.0.4	Comment	We would say that the wording on the proposals is	Comments noted.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				confusing. One would assume that the 'Core proposal' would be the favoured one, when in fact this is not the case. Such proposals should be made very clear and concise so that the general public are in no doubt about what is being proposed.	
Wyre Forest Green Party	LPPO1486	Brownfield Sites	Comment	According to the statistics on page 39 of the Local Plan Review, there is a total of 967 dwellings completed or with planning permission granted on Brownfield sites, with a further 1,193 proposed by the plan on other Brownfield sites. 350 dwellings are also proposed on Greenfield sites not in the Green Belt and 796 dwellings can be placed on previously built Green Belt land including 600 of these at Lea Castle. This makes a total of 3,306 dwellings. This exceeds the number of houses needed for the 15 year land supply (when using the SNPP figures of 199 p.a. as detailed in 1c above) without the need to use Green Belt at all.	Comments noted. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.
	LPPO483	Table 6.0.5	Object	Do not believe that we need to allow land for 6,000 properties therefore as I object to both Option A and Option B there is no need to use any percentage of greenbelt land.	Objection and comments noted. The proposed development requirement is based on the housing need for the District. This housing need was evidenced in the OAHN study published in April 2017. Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				small part of the “number of dwellings proposed on Greenfield Green Belt sites” category. There is clearly neither a requirement to develop the Green Belt Fields abutting the Spennells Estate, for which an allocation of 930 dwellings, under site references OC/13S. WFR/ST/2 and AS/10 has been proposed. nor a requirement to develop the core area in Option A to the East of Kidderminster.	housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.
	LPPO4499	Table 6.06	Object	This table is unfairly portrayed. All facts concerning option A are portrayed in a positive manner whereas facts concerning option B are negative. For example, Option A is shown to enable ‘the building of Kidderminster Eastern Relief Road’ whereas Option B ‘Would not enable building of Kidderminster Eastern Relief Road and the benefits this scheme allows’. It is obvious this table has been designed to advocate option A and confuse the less-educated population. I believe this is a key reason why this proposal should be completely reconsidered and presented in a fair manner.	Objection and comments noted.
Bromsgrove & Redditch DC	LPPO901	Table 6.0.6 Infrastructure Roads	Object	Council has concerns re transport evidence required to support these allocations. Concerned that preference is being sought for a preferred option without any modelling being done and a transport background paper being available. Table 6.0.6 sets out infrastructure requirements for both core sites and options A and B, together with a comparison of impacts on the highways network. It is not clear what	Objection and comments noted. The Transport evidence base study will be made available at the Pre-Submission consultation stage. WFDC will continue to engage with Bromsgrove and Redditch Council’s in Duty to Co-operate discussions.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>these schemes entail, when and how they will be delivered and what impact they will have. Option A appears to offer an eastern relief road which could ease congestion and improve air quality within Kidderminster town centre. But there is no mention of what impact this might have outside of Wyre Forest. Either option would be likely to have a significant impact on Bromsgrove's infrastructure. We are especially concerned about the impact on the A456 through Hagley and beyond. Also the A448 route to Bromsgrove and Redditch. Both routes would be used to access the motorway. There are already AQMAs at these locations. What impact would there be on country lanes which may be used as rat runs?</p> <p>The Council hoped that transport evidence would have been made available to influence the Preferred Option and not at a later stage in order to justify the chosen option going forward. This issue has already been raised in response to IDP. We would like to engage further with WFDC and WCC to develop a wider transport strategy for North Worcestershire. This would then allow the area to continue to grow and thrive in a coordinated and sustainable way.</p>	
Worcestershire County Council, Planning	LPP01138	Table 6.0.6	Comment	In Table 6.0.6 the housing row states that "Large scale site releases more likely to enable viable provision of affordable housing". However, there is considerably evidence to the contrary, both in Worcestershire and	Comments noted. We welcome the opportunity to work with Worcestershire County Council and the Green Infrastructure Partnership as the plan evolves.

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
Economy & Performance				<p>nationally. The accompanying variability assessment indicates that small scale green field developments of between 30 and 75 homes are the most viable.</p> <p>This may be too broad a statement, as the viability of affordable housing will depend on a range of factors, not least of which is location, as well as the scale of the development. Pockets of growth consisting of small-scale development will support existing infrastructure, but large-scale development will have a wider and more far-reaching impact on, for example, school places.</p> <p>Infrastructure and roads: this line of the table appears to present the Kidderminster Eastern Relief Road as desirable in its own right which is contrary to discussions. The potential need for the relief road arises from the planned development to the east of Kidderminster. As the quantum of development is greater in option A it is the working assumption that this will be more supportive of the need for the road than option B, but we would also stress that no transport modelling has as yet taken place as we will undertake this once a development option has been chosen. Modelling will confirm (or not) the need for the road.</p> <p>The results of the modelling notwithstanding, there are also concerns over the route of the relief road and the</p>

DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>potential impact that this would have on protected sites in the district, including both SSSI's and Local Wildlife Sites in particular direct and indirect (notably severance) effects on Hurcott & Podmore Pools SSSI and Local Wildlife Sites, Captain's & Stanklyn Pools and Spennels Valley Local Wildlife Sites and Hoo & Barnett Brook Local Wildlife Sites. A complex of designated sites of nature conservation significance form biodiverse corridors which radiate into the open countryside from the peri-urban eastern fringes of Kidderminster. The Eastern Relief Road must address these effects in a manner which demonstrates net-gain for biodiversity; the quanta of mitigation will become a significant burden on the surrounding allocations. This is likely to far outweigh any opportunities for de-fragmentation/habitat creation or restoration which this new linear infrastructure might pose.</p> <p>We would welcome further opportunity to discuss these issues with WFDC following completion of the transport modelling and its conclusions.</p> <p>In the same table, the row for 'Green Infrastructure and Biodiversity' states that "The more dispersed nature of this approach will mean that more sites are affected. This, in combination with their typically smaller size (with the exception of the enlarged Lea Castle) will mean the delivery of Green Infrastructure</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>requirements is more difficult".</p> <p>We have some concerns about these comments about green infrastructure, and have impacts both locally and in combination on corridors. The Worcestershire Green Infrastructure partnership undertook an assessment of the site proposals at a high level, including some mitigation options in early 2017, and we would refer back to this document in assessing the green infrastructure impact of options A and B. We welcome the opportunity to work further with WFDC on green infrastructure.</p>	
	LPPO484	Table 6.0.6	Comment	I do not believe we need Option A or Option B.	Comment noted.
CORE11	LPPO241	6.0.6	Comment	Option B is the overall better choice, with more attention to green infrastructure, less large housing areas, a better place to live and quality of life, these factors should not be sacrificed to saving of cost if more dense developments are decided upon.	Commented noted.
Summerfield Against Land Transformation	LPPO1611	Table 6.06	Object	There is <u>clear bias</u> contained within the draft Local Plan, to the extent that Option A is portrayed as the only real choice and Option B as, effectively, ballast and barely viable. This is further depicted in the "vision" (simply a point of view) and as "strategic" (a high-level choice which supports <i>your</i> point of view). This is unacceptable.	Objection and comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>There is further bias in relation to the Eastern Relief Road. The dominant argument for Option A appears to revolve around both ‘critical mass’ and thus the need for a relief road, together with its capacity to provide solutions to existing congestion, poor air quality and problematic transportation links. Indeed, so heavily do you rely upon the relief road that it becomes the justification for rather than a consequence of Option A.</p> <p>Option A is shaped to justify the relief road, resolve pre-existing transport problems and attract capital funding.</p>	
Historic England	LPPO1269	Table 6.0.6	Comment	With reference to tables beginning on page 41, our specific interest is in how the harm/ impact to the historic environment has been assessed, in the decision of which option is the most appropriate for the Local Authority. This includes whether to release land from the Green Belt and also for all of the proposed site allocations contained later in the document.	The Historic Environment evidence base study includes details of the analysis of the proposed site allocations and land to be released from the Green Belt. This study will be made available on the Council's website during the pre-submission consultation.
Wyre Forest Friends of the Earth	LPPO1313	6.0.6 Road Infrastructure	Comment	The construction of the Eastern Bypass could encourage more car journeys to be undertaken. Locally generated traffic on the eastern side of Kidderminster could use the bypass as a shortcut between areas. This could lead to increased pollution including emission of CCGs, more road casualties, a reduction in walking and	Comments noted.

				cycling and a consequent rise in obesity and associated health conditions.	
Barratt Homes West Midlands	LPP0768	Table 6.0.6	Object	Option B requires less Green Belt release but still meets the housing requirement. Do not consider that exceptional circumstances have been demonstrated to justify this Green Belt release during site selection process.	Objection and comments noted.
	LPP04695	Table 6.0.3	Object	<p>Inconsistencies in Local Plan document</p> <p>A further reason for objecting the proposals for sites allocated for housing relates to the inconsistencies / lack of clarity over the housing number projections reported in the Local Plan document.</p> <p>Table 6.0.3 in the Local Plan reports that 3,640 houses can be accommodated on “core or common to both potential approaches [options]”. This replicated in Table 3. The Local Plan then concludes that they will assume a provisional requirement of 6,000 dwellings, which results in a shortfall of 2,360 houses. However, assuming 6,000 houses is a further 11% uplift which is in addition to the 58% uplift that has applied to the base population projections. The total uplift from the base population projections is therefore 75% (2,580, 143 per annum). This uplift has again not been justified by WFDC or Amion Consulting.</p> <p>In addition, it would be sensible to assume that the</p>	<p>Comments noted. The proposed development requirement is based on the housing need for the District. This housing need was evidenced in the OAHN study published in April 2017.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government’s new standardised methodology.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p><i>document the Government’s new Housing White paper was being published along with the underpinning documentation that accompanied it. The Council’s intention has been to try to anticipate as much as is possible of the Government’s strategy so that a Plan consistent with the requirements of the NPPF and emerging national policy has been brought forward for consultation. As such, through this Preferred Options, Wyre Forest District Council has strived to propose a realistic level of housing requirement that respects the findings of the Local Plans Expert Group”</i></p> <p>The Housing White Paper states that:</p> <p><i>“we need to plan for the right homes in the right places... but at the moment, some local authorities can duck potentially difficult decisions, because they are free to come up with their own methodology for calculating objectively assessed need. So, we are going to consult on a new standard methodology for calculating objectively assessed need and encourage councils to plan on this basis”.</i></p> <p>The Paper also states:</p> <p><i>“Plan-making remains slow... with arguments about the number of homes to be planned for often being a particular cause of delay – something not helped by the lack of a standard methodology for assessing housing</i></p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p><i>requirements. We want to ensure that every are has an effective, up-to-date plan, by making it easier for plans to be produced and understood and simpler to identify the homes that are required”.</i></p> <p>In relation to timescales for the methodology, the document states:</p> <p><i>“we will publish this consultation at the earliest opportunity this year [2017], with the outcome reflected in changes to the National Planning Policy Framework”.</i></p> <p>Given the timescales in which the Local Plan is being developed and the lack of transparency /robustness in relation to the OAHN report, it would be sensible for WFDC to await the objective methodology. This way WFDC could ensure they have used a methodology that justifies the substantial uplift from baseline population growth is actually realistic and the Local Plan will not pose risk to large expanses of Green Belt land unnecessarily.</p>	
	LPPO4809	Option B Stourp ort	Comment	A statement is made in the Preferred Options Document (table 6.0.6 option B) states that additional development to the west of the river at Areley Kings is likely to have a negative impact on Stourport and the river crossing. The development proposed is only about 20% of the existing Areley Kings settlement	Comments noted. A Stourport relief road is not being proposed; nor is a new bridge over the River Severn. Both of these would be very expensive and is not supported by the Worcestershire Local Transport Plan No. 4.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				(compared to 100% for Spennells) and the document fails to mention that the WFDC Infrastructure Delivery Plan (2012) proposes the Stourport relief road, with a new bridge over the River Severn.	
	LPP04619	Development Strategy	Object	Overall, the proposals reflect a lack of awareness of the need for infrastructure to support new housing developments, and a lack of creativity in considering how best to utilise available land.	Objection noted.
Yew Tree Walk Ltd	LPP0818	Location of new development	Comment	Stourport-on-Severn is identified as a large market town, the second largest settlement in the District. With Kidderminster as the main town in the District, both settlements should therefore be the primary focus for future housing development. In this context, rather than an either-or choice between 'Option A' and 'Option B', the housing distribution options being suggested through the Preferred Options, it would be more appropriate to seek to concentrate growth through major urban extensions at Kidderminster but also to seek some dispersed growth particularly focussing on Stourport-on-Severn given its role to support Kidderminster in the provision of larger scale housing. There is scope to increase the numbers allocated at Stourport-on-Severn, reducing the reliance of smaller, less sustainable and particularly rural settlements, in delivering the housing requirement. On this basis, further sustainably located sites on the edge of Stourport-on-Severn, should be identified which should include additional Green Belt	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				release.	
Barratt Homes West Midlands	LPP0767	Chapter 6	Object	Development should be allocated based on sustainability and suitability of sites. Kidderminster has a disproportionate amount of dwellings allocated under Option A. Stourport has 20% of population but under 14% of allocations under Option A. This should be higher.	Objection and comments noted.
Barratt Homes West Midlands	LPP0766	para. 6.48	Object	Emerging Plan places great emphasis on Brownfield urban sites (most are existing allocations) and potential large urban extensions (tend to have long lead-in times). Urban extension will need planning applications submitting shortly after adoption of Plan and have very strong delivery rates. We propose that a buffer should be added to OAHN to ensure choice and competition.	Objection and comments noted.
Barratt Homes West Midlands	LPP0772	Table 6.0.6	Object	Both options result in Green Belt release but no reference made to NPPF guidance and exceptional circumstances test. If there is a suitable and sustainable strategy for development that would protect the Green Belt then exceptional circumstances test cannot be passed. Where is this evidence to support Green Belt release? The 2 options have limited relationship to the status of the principal settlements. Under Option A, 85% of development goes to Kidderminster, 13.8% to Stourport and 3.1% to Bewdley. Kidderminster has 56% of population and Stourport 20%. Agree that Kidderminster should be focus for growth but other settlements should be	Comments noted. Further evidence base work has been undertaken at pre-submission stage which will address some of these issues raised.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>allocated growth proportionate to their size. Stourport has advantage of only partly being in the Green Belt unlike Kidderminster.</p> <p>Table 6.06:</p> <p>Spatial Strategy - option A relies on significant amount of Green Belt development to east of Kidderminster. Option B also includes Green Belt allocation east of Lea Castle Hospital. These sites are all in same area and would compete against each other leading to likely market saturation. Where is evidence that this quantum of development is deliverable in Plan period? Additional allocations elsewhere such as Stourport would provide greater choice.</p> <p>Green Belt - no reference to exceptional circumstances test made - fundamental failing</p> <p>Housing - suggested that Option B will result in smaller sites that will be less viable and therefore provide less affordable housing. However, all sites are above threshold and should deliver affordable housing. Several Option A sites have significant infrastructure requirements which could affect viability of affordable housing provision. No evidence to support statements made in table.</p> <p>Employment - Option B results in an employment site</p>	

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>being reallocated for housing. Option B housing numbers are higher than Option A so remove this site. it is suggested that Option B would mean reduced accessibility to employment sites due to more dispersed pattern of development. We do not agree. All employment allocations under Option B come from core sites.</p> <p>Roads - all allocations should be able to provide sufficient infrastructure to offset their impact.</p> <p>Education - implications for education provision between the 2 options should be minimal. Little evidence that option B will be more problematic for education provision.</p> <p>Green Infrastructure and Biodiversity - suggestion that option B would make green infrastructure harder to deliver. Where is evidence? Smallest allocation under Option B in main settlement is 72 units. Should be capable of providing GI.</p> <p>Sustainability - considerations identified in table are inappropriate. Little evidence to support statements made. Is not fair to describe option B as dispersed strategy as most development will be delivered in most sustainable settlement. It is suggested in Option B that considerable additional pressure will be placed on services and transport and cannot be mitigated. Where</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>is evidence?</p> <p>Evidence in Preferred Options is insufficient to inform 3rd approach in issues and options document.</p>	
	LPPO2416	Section 6	Object	<p>There is reference in Section 6 to additional school places that would be required as a consequence of increased housing. I would expect that: any increase in FTE pupils would be accompanied by appropriate increases in school facilities eg hall, space, play space, dining facilities, toilets, as well as additional classrooms; no school should be increased by a fraction of a class unless this rounds an existing fraction up to a whole number. The plan should also reflect the lack of certainty of securing any new school provision via the Free School route, and provide funded alternatives.</p>	<p>Comments noted. WFDC will continue to work with WCC children's services to establish future need for school places through the plan development lifetime.</p>
	LPPO2191	Development Strategy	Comment	<p>There should be a wider spectrum of development to meet housing needs for all sectors and demographics.</p> <p>Brownfield sites are not always suitable for sustainable communities in the long term. Town centre sites often lack amenity.</p> <p>I concur with the findings of the consultation that there has been a lack of development in Bewdley to</p>	<p>Comments noted. The emerging Local Plan is proposing to allocate some housing sites in Bewdley.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>meet local requirements.</p> <ul style="list-style-type: none"> Bewdley needs to support people who have been brought up in the locality and wish to remain. There is a need to attract additional residents to support and contribute towards the local WFDC economy. The provision of suitable family housing to attract such residents needs to be increased and diversified. There is also the question of elderly residents who wish to remain in Bewdley. Provision of suitable units for over 55s and possibly a complex for residential and nursing home is also a consideration. 	
	LPPO4597	Employment Needs	Comment	Industrial units continue to be built, why is this necessary, when throughout the District you can see units that have been empty for a considerable time, Easter Park is an example.	The Local Plan Review process doesn't just allocate sites for housing; it also allocates potential sites for employment to meet its employment land requirement. The Employment Land Review evidence base study sets out what the employment requirement is for the district during the plan period. This evidence base study is used to inform the site allocations in the emerging Local Plan for employment use.
	LPPO3966	Development	Comment	I will not labour the many valid points made about the loss of natural habitat implicit on any building on green	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
		Strategy		<p>belt or the inevitability of develops building the largest, most profitable houses they can which will inevitably attract commuters and lead to increased congestion, pollution and increased demand on local services which have so commendably been made by other contributors</p> <p>But crucially the document simple ignores the opportunity of empty buildings in the town centre. Believes that Council officials admit that recent large-scale retail developments have sucked economic activity out of the town centre leading to huge under occupancy but a blind eye has been turned by the council to these buildings due to the difficulty in getting landlords to repurpose these buildings into small residential units. Yet it must be obvious to all in authority that the centre of town is exactly where young people and mature people wish to relocate to be close to amenities. So, a council who would use their statutory powers including compulsory purchase orders has a ready stock of housing which could be ready for market in a maximum of 18 months. Further these homes would be close to public transport hubs, new health centre, hospital. The former glades site could easily have a school built on it, next to council operated pay car park rather than a cinema complex that will pull in car parking using customers for much smaller periods.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>As for plans to entice economic activity to the area, it is clear on only a cursory glance than no one who was asked to formulate these plans has the slightest idea about how businesses run, the keys are readily available local skilled workforce, good transport links and or local supply chain. Sadly, in the foreseeable future Kidderminster and environs will not be able to supply these which is why it is haemorrhaging industrial jobs.</p> <p>Too conclude once again this plan like the plan for a new council house, leisure centre and car park and road network, repaved public realm, retail developments, town gateways is ill thought out ill-conceived and totally misses the targets it aims to hit, attract younger people, allow older people who have spending power to downsize and stay in the area. Building executive houses for commuters and depriving the existing community of one its major areas to take exercise, breathe clean unpolluted air and de-stress from the pressures of modern life can only be described as a folly.</p>	
	LPPO1597	Development Strategy	Comment	We accept the need for new housing development within Wyre Forest District, but have major concerns regarding the amount of development proposed concentrated to eastern Kidderminster, including the use of prime agricultural Category 2 and 3 land. It is averred this would not be sustainable development.	Comments noted. The Sustainability Appraisal Report and the Site Selection Process Topic Paper set out the site selection process that the Council has undertaken. The HELAA document also provides from evidence. These evidence base documents are available for

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>We also believe that the WFDC Local Plan could better support the community through intelligent and sustainable regeneration of key areas of Kidderminster, Stourport and Bewdley. As shown in this Objection, it is not considered sufficient investigation has been made of Brownfield sites throughout the District. If the modifications to the Local Plan proposed were spread more evenly around the District, it would minimise the adverse impact on Green Belt, areas of SSI and reduce the urban sprawl of eastern Kidderminster.</p>	viewing on the Council's website.
Taylor Wimpey West Midlands	LPPO1483	6 A Sustainable Future - Development Strategy	Comment	<p>Development Strategy - Buffer</p> <p>The Preferred Options identifies land to accommodate 6,000 dwellings to deliver the housing requirement of 5,400 homes, a 7.4% buffer. Recent advice of the Local Plan Expert Group suggested a buffer of 20%, therefore need to identify additional land equivalent to accommodating 1,080 additional dwellings. Therefore, in total, the Local Plan should be providing enough land equivalent to the delivery of a total of 6,480 dwellings over the plan period in Wyre Forest District.</p>	<p>Comments noted. The proposed development requirement is based on the housing need for the District. This housing need was evidenced in the OAHN study published in April 2017.</p> <p>Since the Preferred Options document was consulted on, the Government have published their Standardised Methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.</p>
	LPPO1942	Development	Comment	If all these new houses are built where will the occupants work? Is it not more sensible to plough	There is a legal requirement for the Council to provide for its employment need as well as its

		Strategy		money into promoting growth of new industry, then build housing at the same time as industry grows? Quality of life is important to attract business and workers to the area so the beauty of the Green Belt and the wildlife it supports is crucial to our town.	housing need. To make a place sustainable it needs employment as well as housing. By creating employment opportunities it enables people to live and work within the district. Please see the Employment Land Review for further details.
Stanmore Properties Ltd	LPPO1510	Section 6	Comment	A focus on Kidderminster accords with the summary of Issues and Options representations which states support for a sustainable urban extension to the north of Kidderminster based on the Lea Castle Hospital (Option 2) and the Hurcott Lane ADR. Concern in respect of traffic may be addressed by the recent completion of the Hoobrook Road link and impact on the Hurcott pastures SSSI is considered further in our other responses. Representations also indicated little enthusiasm for allocating development in the rural east or west of the District (Options 6 and 7) and in respect of the west the relative isolation and poor sustainability make the location difficult for development over and above that to meet local needs.	Comments noted.
South Worcestershire Authorities	LPPO1242	Development Strategy	Comment	The consultation paper sets out a level of growth that the level of housing growth proposed ' <i>reflects the necessary housing requirement to satisfy housing need plus additional need arising from the necessity to provide additional affordable housing and opportunities for economic growth</i> '. However, it is not clear how the additional growth addresses unmet need	Comments noted. We continue to have Duty to Cooperate discussions with our neighbouring Local Authorities, which has included discussions with the Black Country Local Authorities, South Staffs, and Birmingham City Council.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				arising from outside of Wyre Forest District. It should also be recognised that whilst work is still underway to establish how the Birmingham shortfall will be distributed, there could be a need for the Wyre Forest Local Plan Review to consider higher levels of growth to absorb some of this need.	
Historic England	LPPO1266	Development Strategy	Comment	Within the section on development strategy, where development is discussed within the different settlements we would recommend that some text is included to highlight what the specific issues and opportunities are for the historic environment.	Comments noted.
	LPPO5121	Development Strategy	Comment	<p>My issues with the plan are:</p> <ul style="list-style-type: none"> The proposals for 5000+ houses (12,000+) by 2031 extra people are extreme. This is a 12%+ increase in the WF population (and if most are in Kidderminster; a 20%+ increase in Kidderminster's. The location of the bulk of the development is on the eastern edge of Kidderminster, in a ribbon development. This will have the effect of taking Kidderminster closer to the West Midlands, and the creation of a huge and unpleasant urban sprawl. The majority of the new population will be commuters. In effect WF will become another overspill area for Birmingham. There are no estimates of what type of people will choose 	Comments noted. There is a legal requirement for Local Authorities to meet their housing need for their areas. The OAHN Study published in April 2017 calculated the housing need for the district, which was used as the evidence to inform the Preferred Options plan. Since the Preferred Options consultation, the Government has published their Standardised methodology for calculating housing need. The Council is therefore undertaking a revised OAHN study which will use the Government's new standardised methodology.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>to live here. What if they are all old and retired? The existing ageing population of WF will be worsened.</p> <ul style="list-style-type: none"> It is not made clear in the plan what benefit this will bring WF economically. Maybe some extra money in retail shops? Attract new businesses? No real case is made for this in the plan. However the South Kidderminster Enterprise Park continued development is welcomed. Development of this magnitude will also bring huge pressure to local services, the environment, and transport – as it is not clear in the plan about what extra provisions are being made (i.e. schools, doctors, bus services etc.). It will not make WF a nice place to live, it will be the opposite. It is not clear how some areas have been declared 'Core' and some as options (A and B). There should be more options at this stage, and less 'Core'. Lea Castle Hospital is an exception, but BW/4, OC/4,OC/5,OC/6 are all deemed core for no obvious or strong reason. <p>What can be done to minimise harm to the WF?</p> <p>Accepting that government and NPPF pressures have to be implemented, then to reduce the huge impact,</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>the plans should consider;</p> <ul style="list-style-type: none"> ○ A clear plan for resolving the chaos on Hurcott Lane must be implemented before any work begins. It is a narrow country lane that cannot cope with today's traffic, never mind the goods and service vehicles that will come. ○ An eastern bypass road should be in place to ease the potentially huge impact on traffic in and around Kidderminster's already creaking road system. If public money is needed then a case must be made back to the NPPF (it is their demands that will create the emerging issues that will come). ○ ALL Brownfield sites <u>must be completed</u> before any Green Belt land is used. ○ Any development must have a critical mass of houses to create a focussed community. Much needed shops, bus routes, schools and healthcare provision will only work in a concentrated development – not one thinly spread over 10 miles. ○ Western Kidderminster (Low Habberley and Ferndale area in particular) has to be given much more

				<p>consideration than has been already – and help keep WF separate from the West Midlands. Joining Stourport, Bewdley and Kidderminster is more attractive than WF joining with Stourbridge.</p> <ul style="list-style-type: none"> ○ Hurcott Pools and Pasture SSSI's must be protected and respected much more! 	
	LPPO4405	Development Strategy	Comment	<p>During the consultation period we are asked to study and comment on the merits of two options: -</p> <p>Option A. A large-scale development mainly on 'Green Belt' fields adjacent to the east of Kidderminster and to the rear of Offmore together with associated infrastructure changes.</p> <p>Option B Development being accommodated by dispersal across the district.</p> <p>Nick Boles, following the outcry of the Tory Party being accused of failing to protect the countryside, categorically stated that development on Green Belt land will only be allowed when Local Authorities can prove insufficient Brownfield sites are available. Also in a letter to Anna Soubry MP, then Health Minister, who opposed Green Belt development 'it may mean building on environmentally uninteresting' green</p>	<p>Comments noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The Objectively Assessed Housing Needs (OAHN) Study sets out what our housing need is for the District. Unfortunately, we do not have enough deliverable brownfield sites left in the District. We therefore have to release some greenfield sites to be able to meet our housing requirements. This will include some greenfield sites within the Green Belt.</p>

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>spaces'. This is in line with the with the 2012 Government National Planning Policy Framework which requires relevant planning authorities to 'take into account the economic & other benefits of the best & most versatile land'.</p> <p>Nick Boles as Planning Minister also in the last Government set out plans to make it easier for high street shops to be converted into residential housing.</p> <p>Michael Gove MP on his appointment as Environmental Secretary spoke of the importance of protecting productive Greenbelt land which will be so important when we leave the Common Agricultural Policy</p> <p>The plan is biased to Option A which provides far more detail than Option B. Also evidenced by the fact no 'drop-in' session was originally organized for the Spennells. You have to ask the question why? Blakedown (served by a railway station with opportunities for parking extension) has not been considered. We are told 'Developers had not submitted any proposals' This indicates certainly in respect of Option A, the draft plan has been led by housing developers.</p> <p>Large urban estates attract increased anti social behaviour & crime rates & should be avoided.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>Worcester NHS is in crises, £29m in debt, having to reduce its services & also extend waiting times. It seems B’ham & Solihull (by providing funding) are keen to relocate their population who are expensive for the local authority to provide for in terms of schools, GP surgeries, hospitals, etc. none of which generate profit but is not likely to export any of its business which provides income whilst requiring no social support</p> <p>Until WFDC develop a policy of ‘town living’, the Council are not going to attract more retailers to Kidderminster. In fact further decline will occur with the increase of on-line shopping & the continual reduction in the number of banks building societies, etc. The Local Plan could give WFDC the ideal opportunity to develop a ‘town living’ policy. There are so many empty shops, offices & factories (e.g.Dixon St.) just crying out for conversion to flats/apartments.</p> <p>It is vital to protect as much green space as possible to make Kidderminster not only a pleasant place to live but also bring up children.</p> <p>The Local Plan Consultation Document refers to WFDC obtaining funds from B’ham & Solihull Enterprise Board & its duty to co-operate with them. A small authority is likely to be outmanoeuvred in any discussions with them, having vastly larger legal & financial departments, as has happened in Bromsgrove. If B’ham wishes to relocate overspill it</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE – DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>would be difficult to resist especially when it offers 'useful contributions' to the development of Kidderminster station & the proposal to resurrect the by-pass.</p> <p>In order to achieve 'Town Living', not only to maximise use of derelict/empty shops, offices & factories for new homes, but also bring vibrancy to the town centre. Government has produced legislation to facilitate this. I m sure with the right approach WFDC can develop a proposal to meet the needs of its local population and maximise the use of brownfield sites across the District that is not led by developers looking towards Green Belt (regardless of its quality) and the needs of Birmingham & Solihull. The question is does WFDC have the courage, ambition and motivation to pursue such a course of action?</p>	
	LPPO2979	Development Strategy	Object	<p>People living in the Wyre Forest area have not been given notification of all the proposed planning that may go ahead in this district. There are thousands of people in this district who do not have a computer or indeed buy a local paper to know what is being planned for the area, Maps and proposed planning forms should be distributed to all people in this area, Also Councillors should be made to attend all meetings on planned proposals for their areas.</p> <p><u>Objections to further buildings in this area of Wyre</u></p>	<p>Objection and comments noted.</p> <p>It is disappointing to read that you are not entirely satisfied with how the Local Plan Review Preferred Options consultation was conducted. There was a full 8 week public consultation which closed on Monday 14th August at 5pm. During this 8 week consultation period we held 8 drop-in sessions across the District for members of the public to come along and have their say. The drop-in sessions were all very well attended. Leaflets</p>

				<p><u>Forest and on specific grounds</u></p> <ol style="list-style-type: none"> 1. I object to further buildings of houses in this area because if we continue to build houses etc all over Britain we will end up with no countryside at all and we will not be able to grow food on our great fertile soils or even feed ourselves with other countries suffering drought, fires, mud slides and war devastation. Gone will be our green and pleasant land. Also our water supplies will undoubtedly have to be rationed as will our food and electricity etc. 2. Birmingham our 2nd biggest city is suffering from bad pollution, if we persist in building our area into Birmingham the people in Wyre Forest will also suffer from such pollution. The Government should have sorted out the most important policy of immigration with Brexit rather than building more and more homes. I am very annoyed about this and that our Government has passed laws to override Council decisions over buildings. 3. The only buildings we need built are for industry and for a new hospital on the site of Lea Castle. We have a downgraded local hospital that can't cope with patients and neither can The Royal Worcester Hospital. Lives are being lost because hospitals in Worcs cannot cope 	<p>advertising the consultation and the drop-in sessions were posted to households within the District, there were also posters displayed in public areas throughout the District and it was advertised on the Council's website, Facebook and Twitter. There were several articles about the consultation in the Shuttle and the Express & Star, and it was also on local radio stations and on the TV news.</p> <p>The consultation event was approved by our Local Plan Review Panel, Overview and Scrutiny Committee and Cabinet. We will however take your comments on board and will consider these issues next time we undertake a consultation event.</p>

**LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 6: A SUSTAINABLE FUTURE –
DEVELOPMENT STRATEGY (excluding paragraphs 6.54-6.57)**

Company / Organisation	Response Number	Para /Policy	Type of Response	Summary of Response	Officer Response - WFDC Officer Response
				<p>4. The local Council has squandered money on new sport centres and baths when others didn't need replacing yet whilst we get fewer services than we did in the past and when council tax spirals out of control for what? We have our fire stations and police stations highlighted to close and this is a great mistake.</p> <p>5. Too many houses have already taken up good agricultural land and our roads and bridges cannot cope with our massive population already. It is criminal to build on Green Belt land and only Brownfield sites should be used for industry which is sadly lacking in this area. The only jobs which seem to be available are supermarkets, and the health service and charity shops and fast food shops which is a disgrace. Our towns are down and out places to go which is a dreadful state of affairs.</p> <p>6. What other EU countries keep destroying buildings and rebuilding all the time. Old schools could still be used and other Victorian buildings made to last</p> <p>7. On grounds of health and safety I object to further building in this area except for what I have mentioned.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION KEY ISSUES TO PARAGRAPHS 6.54 – 6.57

Part of Document	Key Issues Raised	WFDC Officer Comments
Paragraph 6.54	<ul style="list-style-type: none"> • We are not able to offer support to either Option A or Option B in their entirety as we consider that both options are likely to have significant harmful implications for biodiversity. We would therefore recommend a blend of the two options where site allocations likely to lead to significant adverse impacts on biodiversity are removed. • As the principal town the logic of allocating significant levels of development to the most sustainable settlement is understood and accepted. • A hybrid of the two approaches will be required to meet development needs over the plan period whilst maintaining a five year housing land supply and that further sites will need to be selected to support the delivery of housing. • This Options document represents another binary choice, Option A with supporting traffic and education support or Option B without. Was this document prepared to bias the choice towards Option A? • The lack of transparency and logic in key areas makes it very difficult to decide which option we would prefer 	A mixture of sites from options A and B are being taken forward.
Paragraph 6.55	<ul style="list-style-type: none"> • No mention that the option would have a greater impact on the communities affected than a more dispersed option, where the strains on infrastructure could be shared. • Disagree with homes being built on Green Belt land which is easily seen by people on a daily basis. This should be protected to 'safeguard and enhance landscape character'. • Eastern bypass will not make Kidderminster a more attractive place for businesses. • Access and egress from Spennells already difficult. • WFR/ST/2 is a productive piece of arable land. • Development in this area would go over the small ridge and continue down to the settlement of Stanklyn which would encourage urban sprawl. • Development would put extreme pressure on local roads and make already busy highways in the area intolerable at peak times. • Consideration should also be given to spreading any development around the 	<p>Green Belt is not a landscape designation.</p> <p>Development to the south of Spennells (option A) is no longer proposed as part of this Local Plan.</p>

Part of Document	Key Issues Raised	WFDC Officer Comments
	<ul style="list-style-type: none"> • Why does an area with an almost static population need so many new houses? Is it because we are to be used as an overspill for Birmingham in the same way that Redditch is? • Please consider the possibility of incorporating the Lea Castle Hospital site into Option A, to minimise the impact on agriculture, environment and the Green Belt. Inclusion of Lea Castle Hospital into Option A, would also have a positive outcome for transport in the Spennells, Stone and Summerfield areas, with or without the Eastern Relief Road. • This new housing would not be ring fenced for local people. • There is no guarantee that benefits would happen! • Option A includes only area of Corn Buntings in Worcestershire. • We reject Option A particularly because of the larger Green Belt land take, scale and concentration of development and the negative impact upon local amenity biodiversity, health, wellbeing and community identity. • Challenge the validity and use of the Green Belt Review and the consequences this has, in respect of Option A, for the fields between The Spennells and Summerfield. • The Option A proposal will damage irrevocably the social amenity of and biodiversity in the fields which separate The Spennells and Summerfield and undermine the integrity and unique identity of the Summerfield community. • The land is breeding home to Skylarks which are red listed. • The proposed new road (the Eastern Relief road) would totally destroy this environmentally sensitive area with increased air pollution, more noise pollution, light pollution and the destruction of large amounts of natural habitats. • The need for an eastern relief road is not based on any sound traffic planning data. • Removal of the fields which could diminish the mental health and physical well-being of the people who use them. • The fields are extensively used by local people to walk, run, cycle walk dogs and ride horses. • Increased traffic, noise and higher emissions from exhaust fumes thereby increasing risk to health. 	<p>The Lea Castle site has been extended to take in the surrounding land parcels and a sustainable stand-alone community is proposed at this location.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION KEY ISSUES TO PARAGRAPHS 6.54 – 6.57

Part of Document	Key Issues Raised	WFDC Officer Comments
	<p>Increased pressures on hospitals, doctors, dentists and opticians</p> <ul style="list-style-type: none"> • Loss of Green Belt status which protects our countryside from urban sprawl, threatening the existing public rights of way. • Loss of wildlife habitat. • Loss of good quality productive agricultural land. • It will not solve the housing crisis as the houses will not be affordable. • Lack of vision and seeks to doom Kidderminster to becoming a dormitory town for Birmingham without the necessary infrastructure to support it. • Presenting developers with the opportunity to build upon green field sites, currently outside of the Green Belt, will lead to urban sprawl to the southeast of Kidderminster, while brown field sites within the area remain undeveloped. • The options for redevelopment have been unfairly portrayed. Question 6.55 outlines benefits of Option A before asking for an opinion whereas question 6.56 outlines the disadvantages of option B before asking for an opinion. The document should be impartial and allow residents to create their own opinions and decisions independently and without influence from the council. • No comprehensive modelling of the Eastern Relief Road route benefits has been carried out and so the comments relating to the road in Paragraph 6.55 appear overly optimistic. • Biodiversity mitigation and enhancement necessitated by the road scheme will potentially have a detrimental impact on the developable area of nearby allocations and is likely to seriously limit their capacity to accept the proposed levels of growth. • We do not believe that the benefits offered by the larger scale development here outweigh the disadvantages. • if it were built it would only transport traffic from the bottleneck at Goldness Corner on the A449 slightly more quickly to the bottlenecks in Blakedown and Hagley on the A456. • Disproportionate focus of additional housing in Kidderminster. • Natural border removed between Wyre Forest and Wychavon. • Use of Green Belt only justified by proposed eastern relief road, which is only necessary if development proceeds. There is no need for the relief road without 	<p>Kidderminster currently has over half of the District's population so it should be expected to take the majority of the proposed development.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION KEY ISSUES TO PARAGRAPHS 6.54 – 6.57

Part of Document	Key Issues Raised	WFDC Officer Comments
	<p>the development as traffic can use the A450 from Hagley to Torton.</p> <ul style="list-style-type: none"> • Spennells is already too big. • The land behind Offmore is considerably higher than other development and would be very visible. • The sustainability report suggests local employment to support the additional 1700 homes will be available from the businesses on the Worcester Road and Hartlebury Trading Estate. I do not believe these will expand to support the potential numbers involved. • Part of Option A (Spennells) has been shown to be unacceptable mainly on the grounds of storm and foul water drainage and flooding issues. • I cannot see how subjective and unproven benefits would outweigh admitted disadvantages. • The 'beauty of the countryside' has been cited in the plan as an important criterion but has not been given sufficient consideration in Option A. • Option A will remove important wildlife corridors which connect sites of special scientific interest and nature reserves. • Option A infers the inclusion of an Eastern Relief road; I believe that this is being used as a dangling carrot to encourage people to support this option. There is no evidence that in reality the relief road is any more likely to happen with this option. • Option A will just provide a commuter estate and therefore secure the Bypass. • Suitable brownfield land and not Green Belt should be the priority. • The amount of housing you propose to build is completely unnecessary and based on figures that apply to our nation as a whole and not the local area's needs. • There aren't enough jobs in the area to support this huge influx of people. • Would support the integration of small developments of less than 100 houses to be spread across the district on a variety of Green Belt areas so as to reduce the pressure on local infrastructure and services. • The proposed development is 3 to 4 miles away from the town centre. • The shaping of Option A to justify the relief road to resolve pre-existing transport problems and air quality is not correct. The relief road will not help with air 	<p>Development will be kept to the lower levels with the higher land left as green space. This open space will remain in the Green Belt to prevent its future release for development going forward.</p> <p>The dispersal of development over a higher number of sites would mean that existing schools would not have the capacity to take the additional pupils generated. Providing 2 large developments would allow for new school provision and additional community</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION KEY ISSUES TO PARAGRAPHS 6.54 – 6.57

Part of Document	Key Issues Raised	WFDC Officer Comments
	<p>quality in the Horsefair as the majority of traffic to Birmingham from Worcester use the A450 Worcester Road, which should be enhanced and the Bridge raised to accommodate the larger vehicles instead of creating a very expensive and unneeded additional road basically running parallel to this.</p> <ul style="list-style-type: none"> • Stone parish is unfairly targeted in option A for housing and a relief road. • Option A does not address the need for affordable homes as prices will be too high for local residents as it's a low income area. • Current employment land lies vacant and unused on Worcester road since built what evidence is there that more is required and that it will be filled? • The by-pass will not add any growth to Kidderminster and will serve as a route to by-pass the town. • Offering A or Option B is a divisive and dangerous tactic — one that splits communities and gives way to resentment. • The current proposals (Plan A) seem to be filling people with anger, dread and upset. • This new housing would not be ring fenced for local people. • If Option A is selected then I believe the land at the rear of Spennells should be deleted from the Option as it is not needed. • Should Option A still be selected then I recommend the expanded Lea Castle site within Option B is transferred to Option A.6.55 • Asks that the hedgerow and trees which characterise Stanklyn Lane be reinforced by a tree belt of between 15 and 20 metres width to protect the character of this country road and to mark a clear line between town and country. • We would also ask you to consider deleting that section of the site between the A448 Bromsgrove Road and the stream and fishing ponds. In our view, this relative small area will have an impact on the openness of the countryside and the Green Belt well in excess of what its size might imply. It will also effectively remove any gap between Stone and Kidderminster. • Several footpaths and bridleways will all be affected by the development of this area. We are not opposed to these paths becoming urban in character but would be opposed to development that was not sympathetic to their ability to continue to serve a valuable community function 	<p>facilities to be provided.</p> <p>An Employment Land Review has been undertaken by specialist consultants and updated in 2018 to reflect the latest requirements. The requirement for employment land in the plan period is closely linked to the housing requirement.</p> <p>The land alongside the A448 forms part of the Hoobrook LWS and will be protected from development. This area will not be removed from the Green Belt. The development in OC/13N will be screened from the A448. Views to/from St. Mary's Stone will be protected.</p> <p>An extensive network of footpaths will be provided as part of the proposed</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION KEY ISSUES TO PARAGRAPHS 6.54 – 6.57

Part of Document	Key Issues Raised	WFDC Officer Comments
	<ul style="list-style-type: none"> Ramblers will be concerned that the road is bound to have a serious impact on the footpath network by forming a barrier to walkers' ability to cross it Development in the smaller towns and rural villages would help to support these areas through the provision of additional housing including affordable housing, as well as local jobs through construction. Option A fits in with WFDC's plans for the redevelopment of Kidderminster, its Eastern Gateway, has good transport connections especially with the ability to support an Eastern Relief Road. Option A is not perfect but does bring infrastructure which will decrease the overall impact. Would still wish the Council to promote 'brownfield sites first' whilst they are still available and also to prioritise public sector land. It addresses more of the strategic proposals with which I agree. Plan A is more likely to attract new residents because of access to employment, education, shopping and other services. Option A gives something to the area in terms of educational and transport facilities and so seems preferable to option B which will further overload existing stretched facilities. Concerned that the release of land to the south east of the Lea Hospital site as proposed in Option B will have a significantly greater impact on the West Midlands Green Belt than will the Option A proposals. Additional housing requires more investment in infrastructure/employment/communication links and new housing to the north and east of Kidderminster could attract businesses Support the councils preferred option A, because building the majority of the houses on the Spennells and Lea Castle would be the most attractive for those people who choose to live in the Wyre Forest but their employment is within the surrounding towns and cities. Eastern Relief road would benefit everyone in the Wyre Forest. It would help to relieve the congestion within central Kidderminster and be convenient for residents on the new estate who commute to Birmingham and the Black Country. Also new schools are proposed for the extension to the Spennells 	<p>development which will link into the wider existing public rights of way network.</p> <p>Proposals in the Local Plan will allow for affordable housing sites to come forward in the rural villages.</p> <p>Public sector land is proposed for allocation through the Local Plan.</p> <p>Significant additional landscaping is proposed alongside the release of land at Lea Castle to mitigate for adverse impact on the open landscape.</p>

	<ul style="list-style-type: none"> A large proportion of the existing retail zone in the centre of Kidderminster could be reallocated to housing. Need to ensure there are no shortfalls in housing provision, especially in early years. Build bungalows to free up family homes. The plan should promote centralised housing development that reduces the dependency on car travel and lowers Co2. Housing needs to run in conjunction with employment. Development should be dispersed across the district as equally as possible so that no one area alone has to bear the brunt of the associated negatives. WFDC should not build on any Green Belt land until all brownfield sites have been developed first. Use existing empty properties in the town centre e.g. Woolworths site for a leisure complex (cinema/bowling alley) leaving Lionfields / Bromsgrove Street for residential. There is supply for 10 years if Lea Castle is developed.. No Green Belt site to be released until housing needs are reviewed after 10 years. Further Review needed to check housing need and available brownfield sites. Empty homes need to be utilised before any building work on new homes begins. Future planning permissions given should have a time period that states any building work is started & completed within a set time scale. Our area needs to be more innovative in our buildings and become a known area for a sustainable district of innovative non traditional building method. Opportunities to rid Kidderminster of unsightly and often derelict properties. I can't see any mention of eco-housing. Surely all proposed housing should far exceed minimum insulation standards and incorporate solar panels as standard. Development that allows for the building of the eastern relief road enables people to be connected to major road networks, allowing them to commute without getting gridlocked in town traffic. We need suitable housing for elderly people to downsize to. You have not demonstrated that there are insufficient brownfield (or green field 	<p>residential uses on upper floors are being implemented.</p> <p>Proposals / plans are well advanced on a number of large brownfield sites and it is hoped that these will come forward for development in advance of any Green Belt sites. Much of Lionfields is likely to be used for residential uses.</p> <p>The housing need has been recalculated using the recently adopted standardised methodology from Government. Planning permission is usually only valid for 3 years. A start on site must be made in that time.</p> <p>All housing needs to meet minimum building standards.</p> <p>With a rapidly expanding elderly population it is important to provide suitable</p>

	<p>non-Green Belt) alternatives</p> <ul style="list-style-type: none"> • Support infill development to south of Kidderminster. • ‘Political will’ at national level needed to deter land banking. • Focus on development areas and not a long featureless strip as current. • Many small business owners find it difficult to lease small offices. All that is proposed are large industrial units, there should be a mix. • Would love the council to carry on rejuvenating the town itself and make it a pleasurable place to visit with more restaurants, maybe an entertainment venue for concerts, shows. • Revisit all ‘vacant’ property in Kidderminster and the use of CPOs as required. Approach Housing associations to support with this. • The development of the inner town must be the priority long before any further outward expansion of Kidderminster is even dreamed of. • Kidderminster has great potential; it has canals and rivers and a few years ago was a thriving market town surrounded by beautiful country side, but if we are not careful it will become a commuter town that no one wants to visit. • Kidderminster does not need a Multicomplex cinema and more shops. • Whichever options are chosen the road network needs significant improvements to maintain safety and minimise congestion. • The present road between Black Bridge and Hagley should become a major dual carriageway with housing near it to rid the Worcester Road Island of its bottleneck. • Commuters to Birmingham and Worcester desire to live in the country. Build more villages on some green field sites outside Kidderminster to give people this option. This would disperse the concentration of people entering an already grid locked system. 	<p>accommodation for this age group. This will include smaller dwellings and also C2 provision for those unable to live on their own.</p> <p>Employment proposals are land allocations. The Employment Land Review has shown a requirement for smaller workshops / move-on units to be provided.</p> <p>Many of the brownfield redevelopment sites have river/canal frontage. Development just beyond the town centre has proved very popular with towpath links direct to the town centre. These wildlife corridors should also be enhanced as part of any redevelopment.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
Worcestershire Wildlife Trust	LPP01049	6.54	Comment	<p>We are not able to offer support to either Option A or Option B in their entirety as we consider that both options are likely to have significant harmful implications for biodiversity. We would therefore recommend a blend of the two options where site allocations likely to lead to significant adverse impacts on biodiversity are removed. In particular we would recommend the complete deletion of the Core Site FPH1 (Settling Ponds, Wilden Lane) because of the unacceptable biodiversity implications arising from any development here. Mitigation for biodiversity impacts elsewhere will be required under both options and it is therefore not the case that there is a clear ‘best’ option to take forward in terms of biodiversity protection and enhancement. Notably however, impacts will be especially challenging to mitigate successfully at sites on the eastern edge of Kidderminster, meaning that pursuing Option B (i.e. with reduced levels of housing) in this area may offer significant advantages. Option B also has positive implications in terms of reducing overall Green Belt take and potentially offering more ‘headroom’ to the housing numbers, which in turn may allow for more on-site flexibility to accommodate GI. Taken together these are important benefits and we do not believe that they are outweighed by the difficulties set out in the consultation document. In particular we do not believe that the case for the eastern relief road has been robustly demonstrated in the evidence base for the Plan and so we do not as yet consider it to be a strong reason to pursue Option A.</p> <p>We provide further details of our position under the relevant allocation policies but here we also wish to raise a more general point regarding the evidence base on which the allocations and Options have been progressed to date. So far as we can ascertain there is no site by site analysis detailing likely biodiversity impacts in the evidence base for the Plan and it is not clear how biodiversity implications have been accounted for in the decision-making process. We are particularly concerned to see that the Sustainability Appraisal (SA) for the Plan concentrates simply on designated sites (Sites of Special Scientific Interest and Local Wildlife Sites) under SA Objective 9 rather than encompassing wider biodiversity as we recommended during the scoping process. At the very least we consider that the council should be taking into account habitats and species of principle importance as listed under Section 41 of the Natural Environment and Rural Communities (NERC) Act 2006. The legal duty imposed on the council in this regard is set out in Section 40 of the Act and we strongly recommend that the evidence base is re-visited to take</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				account of this. We believe that the failure to consider habitats and species outside designated sites represents a fundamental shortcoming in the SA and may undermine the decisions taken so far. This is underlined by the overall SA finding that <i>'it would be expected that both options would have a significant positive effect on the district's biodiversity'</i> , which we consider to be highly unlikely at the moment. Further work to determine the impact of proposed allocations will be required to ensure that the Local Plan is based on sound evidence and can be progressed in line with the law and relevant planning guidance (see for example NPPF paras. 9, 17, 109,110, 117, 157 and 165). We would be pleased to discuss this fundamental issue with the council with a view to improving the evidence base for the Local Plan if that would be helpful.
Bromsgrove & Redditch DC	LPP0898	6.54	Comment	The main concern of the Council is the location of the larger core housing sites, the fact that a preferred option is not specified, and that we are requested to make a choice of option A or option B in relation to significant development. The core housing sites, and also the majority of the option A and B sites are all situated towards the eastern / north eastern extent of the urban area of Kidderminster. As the principal town the logic of allocating significant levels of development to the most sustainable settlement is understood and accepted.
North Worcestershire Water Management	LPP0925	6.54	Comment	Regarding preference for option A or B: As it is clearly set out in national planning policy that development should only be considered if it is not at risk of flooding and will not increase flood risk to others in theory none of the sites should have a negative impact upon flood risk. Having to position development outside floodable areas and having to include flood mitigation measures can obviously impact upon the viability of a site. However, this is on a site by site level and I therefore believe it is virtually impossible to have a preference for option A or B purely from a flood risk point of view, as both options contain sites that are partially at risk of flooding. I would say that in my experience it is easier to get a good surface water drainage scheme together for a number of larger sites than it is to get good schemes for a whole range of smaller sites. Based upon this, I have a slight preference for option A.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
Gladman Developments Limited	LPP01422	6.54	Comment	<p>Gladman believe that a hybrid of the two approaches will be required to meet development needs over the plan period whilst maintaining a five year housing land supply and that further sites will need to be selected to support the delivery of housing to meet objectively assessed needs in full. This approach will enable the strategic infrastructure requirements to be delivered and could also support the sustainability of settlements across the district through the release of small and medium scale sites that are favoured by SME builders. As part of the plan preparation process it is essential that development needs are met in full, with sufficient contingency provided to demonstrate an effective strategy is being brought forward. A review mechanism would allow needs of neighbouring authorities to be taken into account.</p> <p>Need to use evidence base to select both Green Belt and non-Green Belt sites. Consider that additional sites to those put forward under options will be needed.</p>
	LPP02401	6.54	Comment	<p>If new builds are to take place, then the brownfield sites should be used first and then other land within the existing Green Belt boundary before you even start to think about redefining the Green Belt boundaries. There are many areas/ sites in Kidderminster that could be used first. Referring to Options A or B, the Eastern Bypass should be built anyway as some traffic relief is needed now between the Worcester Road and Birmingham Road and this will be increased, irrespective of whether you choose Options A or B. There is insufficient employment in the town to support the additional increase in population, so therefore they will have to commute to their places of work, adding to more congestion on already crowded roads in and around Kidderminster.</p> <p>It was said at one of the presentations we attended, that the building of new properties around the towns would encourage companies, whose employees live in the new builds for a few years, to relocate to this area. I don't think so, look at the number of shops and units we have already vacant in and around the town. We have seen a gradual decline in industry and retail over our years living in the area. Businesses will only move to this area if they are offered generous packages to do so.</p> <p>Due to the poor planning in Kidderminster in the past, the town now has no heart. The town centre manager said or intimated on H & W recently when questioned about Worcester Street</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>and the number of empty shops that the chances of increased retail in this area were dead, so why are we proposing to open up Worcester Street at a cost of nearly £1000000? I think, if I heard correctly, if there is no chance that these shops will be filled.</p> <p>I think that the County and Town planners need to revisit and rethink their strategies over the future of Kidderminster and the surrounding areas. We accept that there is and will be a need for new housing, it is the method which is used to achieve the end result.</p>
	LPP04694	6.54	Comment	<ul style="list-style-type: none"> This plan basically states where housing is currently located, that is where the new development should take place. This will see the city centres getting busier, but the more rural environs becoming more deserted. Where is the planning to address this issue? My biggest concern with this Options document is this represents another binary choice, Option A with supporting traffic and education support or Option B without. Was this document prepared to bias the choice towards Option A? <p>If Option B is preferred for development location, that should not be used to penalise the quality of living after.</p> <p>I say this because I prefer the location of development to be Option B but with the traffic and educational support included within Option, but apparently to be denied in Option B. I feel we have had enough of all or nothing choices, so called fear or hope choices-we need to get this right for the future for us and our children</p>
	LPP04803	Option A	Object	Option A has a more concentrated strategy than Option B. This may make it easier for the planners and builders but there is no mention that the option would have a greater impact on the communities affected than a more dispersed option, where the strains on infrastructure could be shared.
	LPP05107	6.54	Object	We have been asked to state a preference for option A or B as set out in the above Plan. Whilst it is accepted that the Wyre Forest District Council have an obligation, placed on them by Central Government, to produce a Local Plan that meets a set of pre-defined criteria, we have strong but logical objections to both options in the above current Local Plan. The lack of transparency and

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				logic in key areas makes it very difficult to decide which option we would prefer. If the stated forecast of housing needs was accepted as fact which we do not accept and the choice had to be made solely on the grounds of the impact on the Green Belt then Option B would be preferred since it requires a lower percentage of Green Belt land than Option A. However we set out below the reasons why Option A and the core developments in Option A and in Option B should be rejected.
	LPP02969	Option A	Comment	Option A fits in with WFDC's plans for the redevelopment of Kidderminster, its Eastern Gateway, has good transport connections especially with the ability to support an Eastern Relief Road. Can provide the necessary support structure such as schools and recreational areas.
	LPP03019	Option A	Comment	Option A is not perfect but does bring infrastructure which will decrease the overall impact.
	LPP03021	Option A	Comment	There is limited choice as the 'core sites' appear to be predetermined. Given that choice, my preference is for option A, but some of the option sites in both A and B seem more sustainable than some of the core sites. For example the site identified as Wyre Forest Golf Club, corner of Kingsway, is isolated from the main development and town centre of Stourport. A more sustainable location nearer the centre and next to existing school provision would appear to be the now disused former Wyre Forest Golf Club land off Kingsway next to the Burlish schools. There may be sufficient land there to obviate the need for some or all of the 'core sites', some of which appear to have boundaries based on ownership, rather than spatial features. With regard to schools whilst the additional need arising from the new housing seems to be recognised, there doesn't appear to be any sites identified. I would still wish the Council to still promote 'brownfield sites first' whilst they are still available and also to prioritise public sector land.
Shrawley Parish Council	LPP01392	Option A	Comment	Shrawley Parish Council wishes to make no observations with regards to Option A, proposed developments on the eastern side of Kidderminster.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP01838	Option A	Comment	Preference: Option A, but disagree with homes being built on Green Belt land which is easily seen by people on a daily basis. This should be protected to 'safeguard and enhance landscape character'.
	LPP01975	Option A	Comment	1. I am concerned that much of the proposed housing is on greenfield sites used by local communities. This is a serious loss. Are there really no brownfield sites left to develop?
	LPP0684	Option A	Comment	We would like to make the following points: <ol style="list-style-type: none"> 1. Plan A is the most attractive to us. 2. Plan A gives Kidderminster the opportunity to improve its local amenities in a substantial way. 3. Plan A is more likely to attract new residents because of access to employment, education, shopping and other services.
	LPP0278	Option A	Comment	Option A with a new road, and infrastructure built is the only way forward.
	LPP0298	Option A	Comment	I would support Option A and it addresses more of the strategic proposals with which I agree,
	LPP03150	Option A	Comment	Option A is preferable as the problem of increased traffic would be addressed with the construction of a new road.
	LPP02370	Option A	Comment	Not shown in searches when buying house Prefer Option A as includes bypass, insufficient existing transport infrastructure in Stourport.
	LPP04917	Option A	Comment	If Option A is selected then I believe the land at the rear of Spennells should be deleted from the Option as it is not needed. If it were still to be included then I would want assurance that development would not start until "core Sites" have been finished including the expanded Lea Castle site within Option B.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				Should Option A still be selected then I recommend the expanded Lea Castle site within Option B is transferred to Option A.6.55
	LPP04653	Option A	Comment	<p>In effect, both Options A and B suggest ribbon development. Neither option envisages a community that could be centred in the midst of the development.</p> <p><u>Option A</u> assumes the building of a Kidderminster Eastern Relief Road. Who would pay for this? Developers could not be expected to pay for the bridge that would be needed.</p>
	LPP04622	6.55	Comment	If I had to vote for a proposal it would obviously have to be A as this seems to be the least invasive of the green areas as a whole.
RSPB Midlands Regional Office	LPP04407	Option A	Comment	<p>Specifically we wish to help answer the consultation question posed in paragraph 6.54.</p> <p>The RSPB is a nature conservation charity, and therefore our comments below relate solely to nature conservation issues as they affect the choice between Options A or B. We do not have a mandate to comment on other issues including landscape impact, traffic, etc.</p> <p><u>Summary:</u></p> <p>If Option A is chosen the impact on wildlife of local and County importance (specifically, the local corn bunting population) is likely to be greater, and would prompt the need seriously to examine the scope for large-scale habitat compensation in the form of species-rich grassland creation for corn buntings, as part of the development package.</p> <p>Our initial assessment of the land affected by Options A and B was that none of the areas put forward as development options were of significant value for nature. The areas affected are predominately farmland under intensive arable production, or improved pasture. The species present in those fields and hedgerows are likely to be widespread and familiar animals and plants found across the wider countryside in similar farmed habitats. Many of them are in decline but this is happening nationally, and in the main, the most effective solution to halting those declines</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>does not (yet) lies with defending individual fields from development. In almost all respects we believe there is little to separate Options A and B, in terms of impacts on wildlife.</p> <p>Our initial assessment was broadly confirmed, very recently, by data received from West Midlands Bird Club (WMBC). We understand WMBC plans to send this same information to you as part of their own response.</p> <p>However, the one exception to the above assessment was WMBC’s data on corn buntings SE of Kidderminster. The data shows that 1km grid squares in the Stanklyn Lane area of SO8473, SO8474, SO8574 and SO8577 collectively support a population of corn buntings likely to be of at least county importance, and possibly regional importance in the West Midlands. The area seems to be particularly important as a wintering ground for significant numbers of corn buntings, with a small but important breeding population as well.</p> <p>Corn buntings were once very common birds of open grasslands and cereal fields across England, but numbers have crashed over the past few decades, to the point that we now face the real prospect of county-level extinctions in the West Midlands in the next decade or so.</p> <p>Corn buntings are already effectively extinct in Wales, and, we believe, Herefordshire. The bird is now Red-listed as a species of high conservation concern in the UK, following a catastrophic population decline of 90% or more since 1970.</p> <p>Having said above that the future of farmland wildlife does not depend on defending individual fields, for a few species like corn buntings a site level response is now justified if we are to hang on to the remaining 10% of the population. This is especially true in areas like Worcestershire, where corn buntings are on the very edge of their diminishing range. Getting wildlife <i>back</i> into a landscape once it has been lost is enormously more difficult and costly than making sure those species do not disappear in the first place.</p> <p>It is not possible to accommodate corn buntings within the layout of new housing estates. There</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>will need to be off-site compensation, and this must consist either of managing the remaining farmland better for corn buntings, or creating new flower-rich grassland adjacent to that farmland on a large scale. Calculations based on average corn bunting densities in different habitat types combined with WMBC data on the size of the local corn bunting breeding population suggests that an area of at least 200 hectares of grassland habitat will be needed.</p> <p>Obviously, this would have significant additional benefits for other wildlife, including pollinators, and could also contribute significantly to the strategic green infrastructure network to serve residents as much of it could be accessible to the public, most of the year.</p> <p>Obviously, achieving such compensation will be costly and difficult, not the least of which is ensuring its long-term management.</p> <p>For all these reasons, the RSPB favours Option B. However, if Option A is selected we recommend further consultation with WMBC to identify how and where best such compensation can be delivered. The RSPB would also be happy to advise further.</p>
	LPP04485	Option A	Comment	<p>If Option A is selected then I believe the land at the rear of Spennells should be deleted from the Option as it is not needed per my points above. If it were still to be included then I would want assurance that development would not start until “core Sites” have been finished including the expanded Lea Castle site within Option B.</p> <p>Should Option A still be selected then I recommend the expanded Lea Castle site within Option B is transferred to Option A.</p>
	LPP03615	Option A	Comment	<p>I would like to comment simply that Option A gives something to the area in terms of educational and transport facilities and so seems preferable to option B which will further overload existing stretched facilities.</p>
	LPP03737	Option A	Comment	<p>If option A entails an eastern route around Kidderminster, I think with common sense that this would be preferable to a western route.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP03823	Option A	Comment	My general concern is that the burden of new housing developments in the WFDC area need to be shared across the area and not almost entirely along the eastern boundary of Kidderminster which is essentially Green Belt land which is currently used as arable land growing essential food crops.
	LPP03856	Option A	Comment	<p>Once these areas have been developed, further options could be explored if necessary, in 5-7 years time.</p> <p>I do not support either option. Please consider the requirements of local residents, rather than those of developers in this plan, as well as the implications of destroying the local countryside, which is well used and loved by the local community. Have a look at brownfield sites first.</p> <p>The Kidderminster Eastern relief road appears to take traffic from one busy road and feed it into another! A wider-scale review of the traffic round the Kidderminster area is needed, not merely an additional road.</p> <p>Please take this project one step at a time. Things change very quickly on a local, national, economic and demographic basis. Please think about the residents of Kidderminster and do not destroy their town.</p>
	LPP03962	Option A	Comment	<p>I would love to see a regeneration programme that really lifts the spirits of the people of Kidderminster.</p> <p>I am always happy to welcome change that improves the area for people. The current proposals (Plan A) seem to be filling people with anger, dread and upset.</p> <p>Is there any way the council planning could come up with some proposals that would enhance the Wyre Forest and make it an area we would be proud to live in?</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>In the light of the Kidderminster/Stourport link road, my vision would include:</p> <ul style="list-style-type: none"> • Repurposing empty units and building new units in Stourport Road area to provide retail (like Primark) and companies (like OGL). • Look at what attracts people to the Merry Hill and include those shops in this area to encourage people to stay and shop local. • Relocate all the warehouse companies from New Road to the Stourport Road area. • Build all the affordable housing you require on New Road. Young people will be most attracted to this area because of its close proximity to the Railway Station and Town Centre. <p>The following makes me feel happy. The thoughts of :</p> <ul style="list-style-type: none"> • Providing affordable housing very near the town centre and railway station. • Regeneration of the current town centre to provide excellent retail and attract shops. • more businesses with highly paid jobs • bungalows with beautiful views lots of generous sized rooms and a nice sized plot for well off elderly people to encourage old people to move from their family homes • New spacious four bedroom houses with beautiful views, three/four reception rooms, quite large garden, definitely not open plan and overlooked. • Relieving congestion and making journeys to work easier. • Regeneration of parks that are free for people to visit. • Helping schools regenerate and develop, to help them be the best they can be for the young people in our area. • Hospitals providing the best care for all local people. <p>The following makes me feel sad: The thoughts of:</p> <ul style="list-style-type: none"> • Only retail, tourism and leisure jobs being provided. • 50% of the extra houses on the Green Belt land on the edges of town being for

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>affordable housing that are a stepping stone to help people get on the housing ladder and not forever homes, beautiful houses/bungalows.</p> <ul style="list-style-type: none"> • A new road near housing that will create noise and pollution. • Turning the top of Spennells from a desirable, quiet, place to live, on the edge of town to a dreadful place to live. • Taking away habitat for wildlife. • Taking away free green space for Spennells people to visit on foot. <p>I am highly concerned about the Plan A and the standard of living to be offered to people living near a railway line, industrial park and a busy main road A449 and the proposed new road. They would not be within close proximity of the railway station or the town centre.</p> <p>This new housing would not be ring fenced for local people. I do believe that the developers would do a good advertising job of their large new estate that would result in a large influx of people not local to the area and most likely commuters.</p> <p>If a few houses are developed here and there this would be less likely to attract large numbers of people that are not local to the area.</p> <p>Please consider creating:</p> <ul style="list-style-type: none"> • Housing within close proximity of the railway station (easy walking distance). • Housing within close proximity of the town centre (easy walking distance).
	LPP04074	Option A	Comment	<p>I neither fully support option A or B as they stand at present. Housing should be spread as equally as possible across Wyre Forest so that it does not negatively impact one side/area. I also would also not support Lea Castle becoming a huge estate because of its surrounding road links. I do not support any surge to push housing onto Lea Castle so that building does not have to occur to the South/Spennells area or Stourport— any building should be fair to ALL areas and the load</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				shared. There is argument that south of the town is better access to the motorways. I do not support building on the land opposite the entrance to Lea Castle. I am in support of a relief road, but were this not in the final plan then even more the need to ‘spread the load’ in terms of housing and commuting as well as easing traffic in already busy and congested areas. Controlling traffic flow/safety is paramount. Planning must take on board residents’ concerns so as not to disadvantage people like myself who have lived in Kidderminster and the surrounding areas all their life. People need to feel that Wyre Forest District Council is there for all its people.
Ramblers Association	LPPO4134	Option A	Comment	<p>Ramblers has strong views on the need to protect the open countryside and especially around major conurbations with such instruments as Green Belts the options offered in the Local Plan Review are not really very palatable to our organisation. However, we have concluded that Option A offers the best solution to the problem. We have reached this conclusion on the basis that it is important to maintain the separation of the 3 towns in the District, to protect the beautiful Severn Valley, the character of the two smaller market towns and the countryside to the west. We are also concerned that the release of land to the south east of the Lea Hospital site as proposed in Option B will have a significantly greater impact on the West Midlands Green Belt than will the Option A proposals.</p> <p>We do have some concerns about the proposal to release the large area of land to the south east of Kidderminster. In order to restrict its impact on the open Countryside we would ask that the hedgerow and hedgerow trees which characterise Stanklyn Lane be reinforced by a tree belt of between 15 and 20 metres width to protect the character of this country road and to mark a clear line between town and country.</p> <p>We would also ask you to consider deleting that section of the site between the A448 Bromsgrove Road and the stream and fishing ponds. In our view, this relative small area will have an impact on the openness of the countryside and the Green Belt well in excess of what its size might imply. It will also effectively remove any gap between Stone and Kidderminster.</p> <p>You will be well aware that several footpaths and bridleways will all be affected by the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>development of this area. We are not opposed to these paths becoming urban in character but would be opposed to development that was not sympathetic to their ability to continue to serve a valuable community function. We shall also be opposed to their being subsumed within the urban road network. Urban footpaths need to be traffic free as are their rural counterparts not reduced to mere pavements at the sides of roads. Developers and designers should be made aware that existing features like these historic paths, hedgerows and trees should be incorporated within their designs.</p> <p>Paths should be incorporated into the green spaces as far as possible and where they cannot be found a function alternative paths should be provided to compensate for their loss. These issues should be included in a design brief which should be required as part of Policy 31. In addition, you should consider requiring an obligation towards improvements to the footpath network between this site and the town centre, employment areas, local shops, leisure facilities and the open countryside to ensure that they are fit for purpose.</p> <p>In addition to the public rights of way, there are many other regularly walked paths within the site which may or may not have accrued public right of way status. I have made a record of these and I would expect developers to have regard to these in so far as the paths have achieved a public status.</p> <p>My final comment regarding this particular site is that I note that the development is intended to fund the construction of the Kidderminster East Relief Road. None of the maps accompanying Local Plan review document appear to show its location. Ramblers will be concerned that the road is bound to have a serious impact on the footpath network by forming a barrier to walkers' ability to cross it. Suitable safe crossing points will be needed if the network of paths is to function properly. In addition, it is likely to have an adverse impact on the appearance of the countryside and contribute noise and air pollution. Once we have details of the alignment and design of the road we will be able to comment more effectively on this proposal and on proposed mitigation measures.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPPO2277	Option A	Object	<p>NO benefits do not outweigh disadvantages. Eastern bypass will not make Kidderminster a more attractive place for businesses. Where are the new employment opportunities going to arise for people to walk/or cycle to work – they will not walk/cycle from the area to “EASTER PARK / Trading estate”.</p> <p>Route and details of eastern road not known, and where will access to new development be? Access and egress from Spennells already difficult and since the traffic lights were installed for the link road long queues. If a massive housing estate built for people who will not be able to obtain employment in Kidderminster the whole area will further become a commuter expansion town. Option A does not “Respect the Green Belt”.</p>
	LPPO2309	Option A	Object	My objection is generally against option A but also against all building on Green Belt.
	LPPO2144	Option A	Object	<p>I do not agree with the proposed change of the Green Belt between Spennells estate and Stanklyn Lane and so I object to the adoption of Option A for the following reasons:</p> <ul style="list-style-type: none"> • The area WFR/ST/2 is a productive piece of arable land. The statement in the Green Belt review: “Landscape character and condition is of average quality, but with some evidence of the withdrawal of active land management evidenced through poor crop growth (in contrast to arable cultivation on land immediately to the north east)” is incorrect. I would suggest that the survey was done at the time when these fields had been put down to clover • Development in this area would go over the small ridge and continue down to the settlement of Stanklyn which would encourage urban sprawl. • This is a useful green space for wild life and humans. Home to Sky Larks and bats. • Development would put extreme pressure on local roads and make already busy highways in the area intolerable at peak times. • Pressure would be placed on the existing infrastructure such as medical treatment and schools. • There appear to be a number of Brown Field sites in Kidderminster before Green Belt is considered. Has the site once occupied by Wyre Forest Golf Club been included in the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>review?</p> <ul style="list-style-type: none"> Consideration should also be given to spreading any development around the three towns and not concentrate it all in one area.
	LPP02159	Option A	Object	<p>We refer first to your request for residents to choose between options A and B of this Review. We prefer neither but wish to comment on their relative merits. In your document the choice is clearly presented in favour of Option A based on two major considerations: 1. provision of educational, medical and community facilities and 2. Provision of a relief road between the Worcester and Birmingham roads. It appears that this advice is related to planning convenience for WFDC. Our comments are:</p> <ol style="list-style-type: none"> Wherever additional housing is built, extra facilities will need to be provided whether they be centralised in just one conglomeration, or existing provisions are expanded to suit needs. It is difficult to see where the money would come from for a costly relief road that has to pass over a main railway line. Funding has been refused before in less stringent financial times and you have provided no evidence that any would be forthcoming in the present case. It is difficult to see how the 'promised' provision of a ring road with option A can, for the purpose of this Review, be ensured. <p>If one of the two options A or B has to be chosen then Option B would be the most equitable way of accommodating the suggested housing requirement rather than creating a continuous belt of housing between Stanklyn Lane and Baldwin Road.</p> <p>Non-Green Belt sites available for building can provide in the region of 3000 houses. This number should surely be more than sufficient for local needs.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPPO2262	Option A	Object	<p>I would strongly recommend that you drop option A. Why can't you build on brownfield first when there are plenty of sites in Kidderminster crying out to being redeveloped first? Parts of Kidderminster town centre have been derelict for years now like the old post office and Woolworths just for starters.</p> <p>Then there is the problem with schools where are all the children going to go when they are already overflowing.</p> <p>The extra traffic will cause mayhem during the rush hour its bad enough now at certain times of the day.</p> <p>You are planning to build on green fields where there is plenty of wildlife at the moment but that will all disappear once you start building on.</p> <p>Have you even thought of the drainage problems this will have when we have heavy rain the drains can not cope building extra houses will only make this worse.</p> <p>Then what about all the people who use the fields for exercise and taking there dogs for a walk. And the people who exercise there horses on this land.</p> <p>Where are all these extra people going to go to the doctors, hospital when the NHS is already struggling in this area?</p>
	LPPO2268	Option A	Object	<p>We oppose the adoption of the Local Plan, both Options A & B including the Core Areas of The Captains and the Lodge because :-</p> <ol style="list-style-type: none"> 1. There should be no erosion of the productive Green Belt land as there will be an increased need for the UK to provide more food production rather than import food once we have left the EU. 2. Loss of Green Belt will further endanger wild life, both flora and fauna.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<ol style="list-style-type: none"> 3. Loss of Green Belt will also reduce the natural area for people to exercise, as the current areas have many public paths. 4. Proposed building on areas designated as natural flood plans seems fool hardy, as there is plenty of local evidence showing the damaging effects this can have on other areas. I.e. Bewdley, Upton on Severn, Tewksbury etc; 5. Loss of Green Belt will add to the global warming effects that are projected. 6. The increase in population predicted in the new plan will not be able to be employed within Wyre Forest and will thus need to commute to Birmingham and West Midlands, and Worcester. The Wyre Forest has seen a reduction in manufacturing over the last 5 to 10 years in trades that rely on large numbers of workers. Any new businesses are more likely to be high tech and requiring less personnel. 7. Due to item 6 above, roads will become more heavily congested, causing more health problems due to greater levels of engine exhaust emissions. 8. The existing trunk road system in and around the Wyre Forest area is currently running at full capacity with no real plans evident to address the situation. 9. Increased population will need more health facilities both at GP level and Hospital. Wyre Forest has seen Kidderminster Hospital services progressively reduced and this would need to be reversed. Likewise more GP surgeries would be required and the concern there seems to be a national shortfall in GPs. Whilst the Government states that more will be trained, the Royal College of GPs has revealed that some 20% are likely to leave. It is not clear in the Proposed Local plan if the areas required for additional medical facilities are included in the plan or would be additional to it. 10. Current public transport is very poor and needs substantial investment to serve the current population levels let alone increased population.
	LPPO2422	Option A	Object	<ul style="list-style-type: none"> • Objects to Spennells development. • Attack on the natural world and residents of Spennells. • There are other sites, including brownfield sites, which could be used. • Wyre Forest Golf Club could be used.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<ul style="list-style-type: none"> Disconcerting that the council has not explored other options for development. Like to go for walks etc. around the countryside at Spennells - development would take this away. No matter how many artificial gardens or concrete playgrounds you build nothing can equate to nature.
	LPPO2432	Option A	Object	<ul style="list-style-type: none"> Objects to option A. Shouldn't use Green Belt land before utilising brownfield sites. Conservative policy is to build on Green Belt land only in 'exceptional circumstances' - this is not the case if Kidderminster. Town centre needs regeneration and is a disgrace. Spennells fields should be retained for future generations. In addition I feel that if Option A is adopted, traffic problems will increase greatly and air pollution will worsen in the Spennells area with potentially a major road and many more cars.
	LPPO2482	Option A	Object	After viewing the options proposed, we feel that Option A would be inappropriate until the Eastern By-Pass is completed and other alternatives explored.
	LPPO2486	Option A	Object	<p>No one in their right minds would consider the use of this glorious natural resource as acceptable.</p> <p>I often use this as a necessary recreational activity as a way of escaping from the mental prison I find my self in.</p> <p>If this area is taken away there is no where else similar within walking distance where I could reach in order to enjoy the countryside.</p> <p>There are a bunch of other factors like traffic load, lack of infrastructure, already low water</p>

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>pressure in the area.</p> <p>Please don't take this area away from people like me.</p>
	LPPO2490	Option A	Object	<p>In a dying town such as Kidderminster, we do not need more families moving in, fighting for jobs that do not exist.</p> <p>Schools would need to be built to accommodate new children.</p> <p>I strongly object to Option A – in a dying town such as Kidderminster, we do not need more families moving in, fighting for jobs that do not exist, schools that would need to be built to accommodate new children moving into the area. It's a ridiculous idea.</p> <p>I am absolutely disgusted that the Wyre Forest District Council is considering building on our surrounding GREEN BELT! The Green Belt is about the only thing that Kidderminster has left to be proud of! Don't destroy this like you have the town centre that is now a ghost town thanks to the development of Weavers Wharf.</p> <p>Don't take away the natural beauty that Spennells residents are fighting for and are desperately trying to cling on to!</p> <p>Preserve the natural beauty that we currently are very lucky and privileged to enjoy.</p>
	LPPO2507	Option A	Object	<ul style="list-style-type: none"> • Preservation of Green Belt land for recreation is essential for health. • Impact on wildlife • Dense development can result in social problems • Residents are not able to comment on whether a relief road would be appropriate or affordable.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<ul style="list-style-type: none"> The Plan B option slightly preferred as it uses less Green Belt/has easier road access to the Hagley road. Blakedown Station car park capable extension, Kidderminster's is not This plan would also avoid the coalescence of two districts and would exacerbate existing congestion and pollution
	LPP02585	Option A	Object	<p>Loss of green field space (Denying me open space) which is in walking distance, and being replace by increasing levels of noise and car pollution.</p> <p>Loss of public Rights of Way and a quality of life for my grand children and future generations.</p> <p>With such a large-scale build, surely it would make sense to create a new town elsewhere in the area.</p> <p>Planning it this way would ensure adequate funding for its own infrastructure. Instead of relying on the existing schools, doctors, road network etc.</p>
	LPP02683	Option A	Object	<p>I am writing to strongly object to the building of extra housing as explained under the draft Local Plan Preferred Options A and B. My reasons are as follows:</p> <ul style="list-style-type: none"> The population of Kidderminster over the last few years has remained fairly static and this proposal will unnecessarily attract more people into a market town that is currently ill equipped to handle such an influx. Both Options will involve the loss of a tremendous amount of Green Belt and agricultural working farm land. Option A would be far more disastrous, and would also result in the loss of wildlife in the nearby woodland areas. I believe the Council has a duty to protect these Green Belt areas and the wild life that lives there for future generations. Loss of local footpaths and bridleways, where many of the local residents and indeed schoolchildren spend recreational time, and indeed is the very reason why many people

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>have chosen to live here!</p> <ul style="list-style-type: none"> • The building of houses under Option A, and to a lesser extent Option B, will cause the loss of the natural break from the other nearby communities, creating an ugly urban sprawl and eat into the lungs of Kidderminster. Furthermore, additional housing would increase the Carbon Footprint. • Heavy traffic on local roads which are not suitable for the amount of housing proposed. They are always in a poor state of repair which can only get worse, requiring additional Council spend. • The proposed housing is situated too far for most people to be able to walk into town so additional bus routes would be needed. • There will be an over capacity for local schools, doctors and hospitals. • At a time when the nearest fully functioning hospital is already stretched to capacity and under special measures and the local Kidderminster hospital is operating as a “drop in centre”, what guarantees can the Council make that the necessary and sufficient amenities for healthcare would be actually provided? • With BREXIT looming and the uncertainty that it will bring to the ability to forecast public spending, how can the Council justify increased expenditure on infrastructure and services necessary to support an expanded community, without jeopardising their ability to remain in office? • What Job opportunities are available for an increased population in a run down and depleting Kidderminster, where shops and businesses are closing at an alarming rate? Could this mean that eventually people will want to move away from Kidderminster to seek employment, ultimately defeating the object of attracting them there in the first place? <p>I urge the council to throw out both Option A and B, not to destroy beautiful Green Belt and wildlife areas that can never be replaced, and to spend the money primarily on regenerating a rundown Town Centre. However, if it is proved to be a definite need for additional housing, then reluctantly Option B would be my preference.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP02758	Option A	Object	Object to Option A
	LPP02825	Option A	Object	<p>In OPTION A the fields in Area 3 are productive farmland bordering a site of SSI effect on wildlife; development will:</p> <p>Impact on the biodiversity of site/result in loss of open spaces for recreational use and hospitals/doctors surgeries will be overwhelmed?</p>
	LPP02710	Option A	Object	<p>Please note my objections to both Option A and Option B. First of all, there are areas common to both Options, on Green Belt land. Does this mean these cannot be questioned?</p> <p>My objection is not that Kidderminster needs no additional housing, but Green Belt land should not be used:</p> <ul style="list-style-type: none"> • Green space is important for emotional and physical wellbeing • Green space is a diminishing resource and should be protected. Once it is gone it cannot be regained • Loss of farmland will lead to insufficient food for the Country – imports are costly and cannot be guaranteed, especially with Brexit looming • Building on undeveloped land causes flooding. When land is covered by concrete/tarmac the surface water runs off and has to go somewhere. Broadwaters is already prone to flooding by the park, building at the top of the hill can only make this worse • Green spaces and farmland are important habitats for wildlife, some species of which are rare/endangered. From my garden I have personally seen deer, grass snakes and bats. Bats are a common sight in the evening – during the last few years I have found a dead long-eared bat and a horseshoe bat in my garden so I know for certain that those species live in the Hurcott area. <p>Kidderminster's infrastructure cannot cope with this expansion – schools, doctors, dentists and roads are insufficient. Numerous schools in the town have been closed over the last 10-15 years</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>– presumably the Council decided they were undersubscribed. Which is the mistake? Shortsighted decision then, or the apparently imminent population explosion now?</p> <p>Kidderminster Hospital has been downgraded. The closest A&E department is now a 45 minute drive from the town. This will cost lives in times of emergency.</p> <p>Urban sprawl on the scale proposed is not in keeping with Kidderminster's semi-rural character. The size of development planned for the north east side of town is massive – 1100+ houses in a tranche will completely alter the character of the town and destroy Hurcott Village, spoiling a historic area forever. The roads around the Park Gate public house, Hurcott Lane and Birmingham Road are already dangerous with numerous accidents occurring. The massive increase in traffic which would result from these plans would worsen the accident rate and cause gridlock. The Clensmore development has made the Horsefair congestion much worse as no change to the road system was included. Further development on this side of town will only add to this.</p> <p>Properties on the Silverwoods development remain unsold; why is there now a need for such massive development when there appears to be insufficient demand already? This huge building project was supposed to solve Kidderminster's housing needs for the foreseeable future. Once again this contradicts decisions made by the Planners. Was the mistake then or now?</p> <p>There are not enough jobs in the area to support this huge influx of people. This will render new developments commuter ghost towns and increase traffic on main roads.</p> <p>I believe Kidderminster should use all of its brownfield sites before any further destruction of green sites is even considered. There are numerous factory sites and sites where schools have been closed – apparently these schools were not required but now they are needed again to support the massive expansion plans! The site at Sion Hill has planning permission but is still lying derelict. Crown House in the town centre is an eyesore and could be used, as well as the plethora of empty shops and offices in the town. This would rejuvenate the town centre; at the moment it</p>

				<p>is dying.</p> <p>To summarise, I do not agree with Plan A or Plan B. I believe there is no need for such urban expansion.</p>
	LPP02725	Option A	Object	Objection to the whole draft local plan for Wyre Forest.
	LPP02853	Option A	Object	I strongly object to Option A.
	LPP02870	Option A	Object	<p>Page 30 5.13 Option A proposes a gross loss of 2.4% total Green Belt Land across the district and Option B a gross loss of 1.9%.</p> <p>Most sites are on high quality agricultural land and its loss cannot easily be mitigated. Redevelopment of Brown field sites has the potential for a significant positive effect.</p> <p>OPTION A - Loss of Green Belt status which protects our countryside from Urban sprawl, and threatens the existing public Right of Way, which is good for the health and wellbeing of the population.</p> <p>Loss of good quality, productive agricultural land; crops are regularly grown, barley in 2017; according to Agricultural Minister, we need our agricultural land.</p> <p>Loss of wildlife habit, skylarks, Linnets and other red listed birds nest in these fields, and there are protected Bats along Stanklyn Lane.</p>
	LPP02914	Option A	Object	<ol style="list-style-type: none"> 1. Kidderminster cannot take volume of traffic the A448 and A449 are congested enough already. 2. So many of our schools have closed already and the remaining ones are under so much pressure. 3. Our hospitals in Worcestershire are full to capacity. 4. Use brown field sites first, Lea castle, Sion Hill School, The old magistrate courts, Crown house, Green street Worcester street and Park Lane all have empty buildings. 5. The wild life Skylarks, Kestrels, Starlings are protected what about their habitat are they

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>become extinct.</p> <p>6. The Green Belt needs to be protected less food and animal fodder will be grown if more Green Belt Land is taken. Farming is a way of life.</p> <p>7. Units at Easter park are still empty what about employment.</p>
	LPP02956	Option A	Object	<p>Reasons why he objects to option A</p> <ol style="list-style-type: none"> 1: The impact on the local wildlife would be catastrophic. There are many endangered species living on this land. Joining Spennells with the housing on Stanklyn lane is a perfect example of urban sprawl, something that the government have said should be avoided at all costs. Building so many houses in one area with no new shops, schools etc. is plain ridiculous. No Green Belt land should be built on until every single inch of brownfield has been used. When is the council going to realise that Worcester Street will never be the busy shopping street it used to be. The arrival of Weavers Wharf, Merry Hill & the Internet have combined to see to that. Every building on the one side of Worcester street could be knocked down (Woolworth's side) & replaced with housing. What about crown house? No building firm is interested in developing that site so why not turn crown house into flats? There are many other sites within the area where housing could easily be built. Why does an area with an almost static population need so many new houses? Is it because we are to be used as an overspill for Birmingham in the same way that Redditch is? If that is the case & you still insist on building on the Green Belt why not use land on the way to Blakedown? This is closer to Birmingham & would help to keep extra traffic out of Kidderminster. I would be especially interested to hear Marcus Hart's answer to this point. Profit is much higher for building firms when they are allowed to build on the Green Belt so I can see why they are so keen to go ahead with option A. Also the council would get a lovely new Road linking the A449, A448 & A456 for free as well as a nice lump of cash.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				But is this worth losing such a large amount of our beautiful countryside for? If the council decide it is I think that will prove once & for all that the lunatics really have taken over the asylum.
	LPP02897	Option A	Object	<p>Housing Need: Does the district need the number of dwelling suggested in option A? The Preferred Options document states that the local population has remained relatively static since 1991 and has grown at approximately one third of rate of the West Midlands. Employment opportunities in the district have decreased considerably since 1991, with the demise of the carpet, and local engineering industries. This would suggest that the number of dwellings planned for Option A, is in excess of the actual requirements of the district during the period of the Plan, and could be readily met by Option B.</p> <p>Roads: Option A would put considerable pressure on already busy roads. The residents of around 3700 dwelling accessing the A449 and A448 is unlikely to be helped by the Eastern Relief Road. Spennells Valley Road links the A449 and the A448 and there would be a considerable increase in volume of traffic, resulting in even slower flow at peak times and increased pollution.</p> <p>Schools: The catchment area of the proposed option A would be serviced by schools with limited numbers of free places. Even if more places could be made available at the local schools (unlikely due to available land), this would contribute to pressure on roads as schools would be accessed via A449 and/or A448. The review suggests the possibility of new schools being built to accommodate the increase population. I understand the new schools would only be considered only after 1000 new dwellings have been built and occupied.</p> <p>Agriculture Green Belt & Environment:</p> <ul style="list-style-type: none"> Option A uses a large area of productive agricultural land. <i>Green Belt</i> - The Preferred Options document suggests that there would be limited effects of merging of communities with Option A. I believe that the effect would not be

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>limited and that Stone, Stanklyn Lane Summerfield would be largely subsumed into the enlarged Spennells Estate.</p> <ul style="list-style-type: none"> <i>Environmental Impact</i> - Increased traffic in the Spennells access roads would lead to additional pollution, not only for residents but also children attending local schools. Heronswood Primary and the small local shopping area attract a high volume of traffic in the mornings and after school in the afternoon. An additional 1700 homes are also likely to make a contribution to air pollution. <p>Finally: If Option A, was the chosen option, please consider the possibility of incorporating the Lea Castle Hospital site into Option A, to minimise the impact on agriculture, environment and the Green Belt. Inclusion of Lea Castle Hospital into Option A, would also have a positive outcome for transport in the Spennells, Stone and Summerfield areas, with or without the Eastern Relief Road.</p>
	LPPO3008	Option A	Object	<p>The proposed expansion by up to 6000 dwellings and associated infrastructure represents a potentially very significant increase in the size of the population of Wyre Forest. Option A would concentrate most of this in Kidderminster increasing the population of the town in the order of 30% (according to the figures in section 2). Whilst concentrating the expansion into a few large developments would limit the number of existing residents affected, the impact on those affected would be disproportionately higher.</p>
	LPPO3011	Option A	Object	<p>I welcome change that improves the area for people. The current proposals (Plan A) seem to be filling people with anger, dread and upset.</p> <p>I am highly concerned about the Plan A and the standard of living to be offered to people living near a railway line, industrial park and a busy main road A449 and the proposed new road. They would not be within close proximity of the railway station or the town centre.</p> <p>This new housing would not be ring fenced for local people. I do believe that the developers would do a good advertising job of their large new estate that would result in a large influx of</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>people not local to the area and most likely commuters.</p> <p>If a few houses are developed here and there this would be less likely to attract large numbers of people that are not local to the area.</p>
	LPP03031	Option A	Object	<p>Question 2 - Benefits easier delivery of school provision/Eastern Relief Road v. effect of large-scale of expansion to the east of Kidderminster</p> <p>Answer. - No, because history has shown there is no guarantee that this would happen!</p>
West Midland Bird Club	LPP01533	Option A	Object	<p>We strongly object to both proposals because o the devastating effect these proposals would have on all wildlife within the planned areas. This land is Green Belt Land, South of Spennells and WFDC Core area, East of Offmore Estate. These areas should be maintained for farming and for recreational use such as walking and bird, butterfly and moth surveying. The public foot paths and bridle ways are used daily by both residents and visitors.</p> <p>Option A includes only area of Corn Buntings in Worcestershire.</p> <p>It is our view no consideration has been given to the wildlife in the areas you intend to build on be it a Relief Road or houses. The words (<i>No nature conservation Issues</i>) is clearly not a correct. To support our views that these proposals should be rejected we enclose a number of documents:</p> <ol style="list-style-type: none"> 1. WMBC Members Records who visit both the Green Belt Land and Core Areas on a regular basis throughout the year. 2. Records from the British Trust for Ornithology Bird Track System. 3. Records sent direct to the Worcestershire County Recorder by Bird watchers either local or visitors of which there are many.
Summerfield Against Land Transformation	LPP01620	Option A	Object	<p>We reject the scale of development and the concentration of housing required for the Kidderminster Urban Extensions - as set out in Option A.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>We reject Option A for all the following reasons but particularly because of the larger Green Belt land take, scale and concentration of development and the negative impact upon local amenity biodiversity, health, wellbeing and community identity:</p> <ul style="list-style-type: none"> • The Option A proposal will damage irrevocably the social amenity of and biodiversity in the fields which separate The Spennells and Summerfield and undermine the integrity and unique identity of the Summerfield community. • With reference to the Green Belt Review: Land to the r/o Spennells/Easter Park (13.48 hectares — 200 dwellings); Land off Stanklyn Lane (27.4 hectares —> 350 dwellings); Captains and The Lodge (4.59 hectares — 135 dwellings) and Stone Hill (89.37 hectares —> 2000 dwellings). A total of 2685. This is development on a wholly unacceptable scale. The Green Belt review itself concedes this would have a “most significant impact” on the Green Belt to the SE and NE of Kidderminster, that the “identity of Summerfield would change” and would do nothing to protect and enhance existing site and biodiversity interests . However, “master planning could mitigate the direct visual impact of development and hence the perception of spillage of the town into open countryside.” • We challenge the validity and use of the Green Belt Review and the consequences this has, in respect of Option A, for the fields between The Spennells and Summerfield, particularly the impact upon social amenity, biodiversity and the integrity and identity of Summerfield • We have ready access via PRow and other footpaths to wonderful green space which is used by riders, cyclists, runners and walkers for recreational and leisure purposes. We also enjoy the biodiversity and geodiversity whilst exercising, all of which helps to address obesity and promotes positive mental health • The land is breeding home to Skylarks which are red listed. Other species of birds also frequent this area including the red listed Lapwing and Marlin. There is real concern regarding the Skylarks and Lapwings who nest on the ground are in decline in Worcestershire and the rest of the United Kingdom. Even the Green Belt review conceded that development will not enhance biodiversity. • Any reduction in Green Belt near Stanklyn Lane would irrevocably change the quality of

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				the landscape by reducing the amount of prime agricultural land, open countryside and damage the rural character of Summerfield. The unique identity and integrity of the Summerfield community would be threatened.
Wyre Forest Green Party	LPP01404	Option A	Object	The proposed new road (the Eastern Relief road) would totally destroy this environmentally sensitive area with increased air pollution, more noise pollution, light pollution and the destruction of large amounts of natural habitats.
	LPP01642	Option A	Object	<p>Object to option A as its Green Belt; brownfield sites should be considered first. Local infrastructure - roads, traffic, schools, doctors insufficient/local hospital has no A&E.</p> <p>Kidderminster town centre is worst it's ever been half the shops are empty/rates are high.</p> <p>Houses could be built on former Glades old site, Park Lane, Mill Street, the old PO and above the shops in the town centre. Given £1.4 million cost of renovating 3 derelict cottages in the Horsefair then we should do so before touching Green Belt.</p>
Spennells Against Further Expansion	LPP01742	Option A	Object	We object to Option A.
	LPP01842	Option A	Object	<p>I would like to object most strongly to option A proposed development of Green Belt land adjacent to Spennells and Stanklyn Lane.</p> <ul style="list-style-type: none"> Green Belt land MUST NOT be used as an easy, cheap option. It should only be used after all available brownfield sites are used, and even then should be used only if there is no alternative to further expansion. The need for an eastern relief road is not based on any sound traffic planning data. This would not reduce in anyway town centre rush hour traffic, and this is where the focus should be. Traffic trying to leave the Spennells or Offmore estates to get to the town centre would not be using this road.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<ul style="list-style-type: none"> This Green Belt land is within walking distance of a large part of the population of Kidderminster who use it for general exercise, dog walking and this type of recreational activity. If this is no longer available residents will be forced to drive to other areas, thus increasing the traffic and pollution. This area is a large agricultural production area which is needed to feed the growing population.
	LPP01936	Option A	Object	<p>I object to the whole of Option A:</p> <p>This new development will lead to :</p> <ul style="list-style-type: none"> Removal of the fields which could diminish the mental health and physical well-being of the people who use them. The fields are extensively used by local people to walk, run, cycle walk dogs and ride horses. Increased traffic, noise and higher emissions from exhaust fumes thereby increasing risk to health. Increased pressures on hospitals, doctors, dentists and opticians Loss of Green Belt status which protects our countryside from urban sprawl, threatening the existing public rights of way. Loss of wildlife habitat Loss of good quality productive agricultural land
	LPP01937	Option A	Object	I object to both Options and I think it should be re-thought. This is a massive decision for Wyre Forest so we must be sure to get it right. Protect all Green Belt as far as possible.
	LPP01886	Option A	Object	Concerned about both option A and B. Questioning the evidence to prove that building on the Green Belt is actually needed. Believes development of Green Belt should be avoided in light of: Brexit - it very productive farm land which will be of benefit to the country and local farmers if tariffs are placed on produce grown in Europe. The Green Belt stops communities merging into

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>one another and becoming yet another urban sprawl. Believes that the council should consider the needs and well-being of local people and put them at the forefront of their decision making. Both options also mean a disproportionate amount of housing development would centre on and around Kidderminster, which does not have the infrastructure to support it. Questions where does the money come from to provide new schools for these developments? Challenges the need for so many homes in the area. The growth forecasts on the OAHN have been over-inflated, as there has not been significant rise in the local population in the past 10-15 years. Concerned about employment in the Wyre Forest as most people commute to bigger towns and cities to work. Concerned about traffic congestion caused by commuters.</p> <p>Challenges the belief that not enough Brownfield sites are available. Suggests further development on the Silverwoods site and the Lea Castle campus. Also, Burlish Top Golf Course has been closed for about a year and, I believe, will not open again as a gold club viable for business venture, as there is already sufficient provision in the area. It is common knowledge that the golf course is not viable agricultural land as it is of very poor quality and would provide space for hundreds of homes (and possible school). There is also the old Parsons Chain site in Stourport.</p> <p>My preferred choice of the two, as it has less impact on Green Belt land, especially with regards to the fields adjacent to Spennells. Spennells Estate is already a large housing development and even option B is going to put pressure on the roads, amenities and school – which is already at capacity. Green spaces are extremely important for the well-being and mental health of everyone and the proposed development field in option B contributes to the physical and mental health of all who use it.</p> <p>The field is also important for wildlife and biodiversity. Red-listed birds, such as skylarks and linnets, use it as a valuable nesting site, as well as supporting other wildlife such as foxes, badgers, hedgehogs, sparrows and blackbirds. The hedgerow which runs from Spennells to Stanklyn Lane on the east side of the field is old and consists of a variety of mature species, e.g.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>hazel, oak, elderberry, hawthorn and blackthorn and many species of birds use it for nesting.</p> <p>As a resident of Stanklyn Lane, believes it is totally remiss of Wyre Forest to impact on our community in the way that both options, but particularly option A does. Building right up to the boundary of Stanklyn Lane would completely change the semi-rural nature of this lane. If traffic was allowed to exit the new development onto Stanklyn Lane, the land would not cope. This is a country lane with no proper pavement for the majority of it and used regularly by horse riders, joggers and cycle clubs, not to mention walkers and dog walkers, none of which would cope with extra traffic. At one end of the lane the exit is onto the over-busy, accident riddled A449 Worcester Road, and at the other end there is a 90 degree sharp, blind bend before the exit into the Bromsgrove Road which is at the bottom of Stone Hill where traffic comes down at speed.</p> <p>Although I reluctantly support option B, I do not think we have been offered a fair choice at all and if this is indeed a consultation exercise, perhaps the planning policy team will take on board the objections I and hundreds of others in the Wyre Forest have submitted and come up with a better thought out option C. Finally, it seems unreasonable that an unelected planning policy team and a few local councillors on the planning committee have the power to make such momentous decisions that will have such a detrimental impact on so many people's lives. Some of the planning committee also have Green Belt land earmarked for re-designation in their ward and will naturally be under pressure from residents to oppose development there and instead vote for it in another ward. I hope that this will not be allowed to happen.</p>
	LPPO2180	Option A	Object	<p>I strongly object to the loss of Green Belt to build the proposed number of houses specified in option A.</p> <ul style="list-style-type: none"> There is a need for affordable housing, however by building on Green Belt, you lose the environment that makes somewhere a great place to live. To remove this seems very unfair when there are so many other areas of the district crying out for regeneration, making the area look tired and worn out. Social isolation is a huge issue and also obesity and mental health. Access to this Green

				<p>Belt provides valuable, meaningful interactions with others, increasing mental and emotional wellbeing. The area is used by people of all ages to exercise; walking, running, cycling, horse riding, etc, alongside other leisure pursuits such as photography, bird watching, painting.</p> <ul style="list-style-type: none"> • The Green Belt is teeming with wildlife, some of these (skylarks, corn buntings, bats) species are protected. It reduces pollution, helps with flooding, and provides valuable farmland. • The town centre is deserted at the top. Surely areas such as that, the old Glades, Lea Castle and Sion Hill School would be better sites for development. <p>Once the Green Belt is gone we'll never get it back.</p>
	LPPO2192	Option A	Object	<ul style="list-style-type: none"> • Static population growth - no need for new houses. • Aging population downsizing - freeing up family sized houses. • High obesity levels - why build on Green Belt land where leisure and exercise activities occur.
	LPPO2203	Option A	Object	<ul style="list-style-type: none"> • Targeting Comberton, Spennells, Offmore and Stone communities. • Serves only to defile natural countryside. • Devalues houses in the surrounding area. • Why build houses in an area with a high price range if the aim is to house poorer citizens? • It will not solve the housing crisis as the houses will not be affordable. • Should refurbish dilapidated areas to increase market value. • Expanding on Spennells will only devalue the area making it harder for people to buy/sell existing houses.
	LPPO2205	Option A - Spennells	Object	Further expansion will put a strain on local services.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPPO2206	Option A	Object	<ul style="list-style-type: none"> • Objects to building on Spennells. • The creation of homes on Spennells/Offmore is unnecessary and damaging to the local environment. • Why build on Green Belt when there are brown belt sites available. • Developing brown belt sites will create housing which can be purchased by local residents - the houses being proposed will be unaffordable to locals. • If brown belt land is not utilised what about using Wyre Forest Golf Club? • The countryside is a place people can exercise. • We are told to buy local produce but if fields are built on where will the crops be grown? • Rich building companies are irresponsible and don't care about the environment. • The plans are toxic to the area and people. • Replanting saplings in the new development will not make up for what it taken. • Once the green land is gone - it's gone. • Don't want to lose our beautiful countryside.
	LPPO2231	Option A	Object	<p>I feel that many of the aims for the future of our local area are good. However, while I appreciate the need for the local council to make adequate provision for future housing, both for local people seeking affordable homes (including those seeking social housing) and to provide some housing which will encourage higher wage earners to move into the area, I do not feel that Option A meets this need and that Option B would be preferable.</p> <p>In the past the local council has shown lack of vision in planning. I fear that Option A shows further lack of vision and seeks to doom Kidderminster to becoming a dormitory town for Birmingham without the necessary infrastructure to support it. My views are not based upon 'Not in my backyard' but because I care about the preservation of Green Belt and realistic improvement of the local area for local people.</p> <p>My main concern is that presenting developers with the opportunity to build upon green field sites, currently outside of the Green Belt, will lead to urban sprawl to the southeast of</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				Kidderminster, while brown field sites within the area remain undeveloped.
	LPP02238	Option A	Object	The options for redevelopment have been unfairly portrayed. Question 6.55 outlines benefits of Option A before asking for an opinion whereas question 6.56 outlines the disadvantages of option B before asking for an opinion. In order for this document to fairly ask for people's opinions without swaying their judgment then both options should be weighed up with advantages and disadvantages before asking for the opinions of residents. The document should be impartial and allow residents to create their own opinions and decisions independently and without influence from the council.
Worcestershire Wildlife Trust	LPP01051	Option A	Object	<p>We do not believe that the evidence base underpinning the Local Plan as yet demonstrates a compelling need for the proposed eastern relief road. In particular we note that no comprehensive modelling of the route benefits has been carried out and so the comments relating to the road in Paragraph 6.55 appear overly optimistic. Whilst some of the other benefits may accrue as a result of the increased development proposed in Option A we do not believe that the evidence base demonstrates with any clarity that they would not also be available in the absence of the road or indeed under Option B, which would still deliver development at a scale requiring appropriate infrastructure (including GI). This is particularly the case because the very considerable biodiversity mitigation and enhancement necessitated by the road scheme and required by policies in the Local Plan and NPPF will potentially have a detrimental impact on the developable area of nearby allocations and is likely to seriously limit their capacity to accept the proposed levels of growth.</p> <p>Accordingly, and in light of comments we make elsewhere regarding the risk to biodiversity caused by the Option A proposals in this area, we do not believe that the benefits offered by the larger scale development here outweigh the disadvantages. As we make clear in our response to Policy 6D it is our opinion that given the very significant environmental issues likely to arise from the relief road it may be better to seek alternative access arrangements, including improvement to the existing network of roads in the area, and a reduced quantum of development in this area until such time as the evidence demonstrates that there is an overriding need for the relief road.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				Please see our response to Policy 6D – Kidderminster Urban Extensions for further details.
	LPP0509	Option A	Object	None of these options but another option
	LPP0610	Option A	Object	<p>Object to option A. I don't think it meets the objective of providing housing for people already living in Wyre Forest. A huge expansion in housing on the east side of Kidderminster suggests it is meant to serve people commuting to Birmingham and the Black Country who are likely to travel by car and so contribute to increased traffic and air pollution along the A456. An eastern relief road has already been rejected on more than one occasion, if it were built it would only transport traffic from the bottleneck at Goldness Corner on the A449 slightly more quickly to the bottlenecks in Blakedown and Hagley on the A456. Anyone who has travelled on these roads at peak times will know how bad the traffic is now and a huge expansion in housing will make it worse. A relief road will only move the problem along a little, possibly exporting some of the air pollution into a neighbouring district without solving the overall problem of congestion.</p> <p>The proposed almost doubling in size of the Spennells housing estate would contribute to increased local traffic. Currently there are two exits to the estate and there can be difficulties getting out of the estate in the mornings due to traffic congestion. An increase in housing would make that much worse, and idling cars cause increased air pollution. Most parts of the estate have access to fields with public footpaths that can be used for recreation and exercise helping to combat the problem of obesity that has been identified in the district. Option A these fields will be built on and that amenity will be lost. There are no public footpaths on the fields further out so opportunities to exercise will be removed. The leisure centre is the other side of town and public transport is poor so opportunities for exercise will be greatly reduced for those without a car.</p> <p>There will also be an adverse impact on wildlife that uses Captains pool since the current access to the countryside will be cut off by housing making it hard for wildlife to move from one area to another. Similarly the nature reserve will be cut off and there will no longer be a wildlife corridor between the nature reserve and the countryside. This could have an adverse effect on the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>viability of breeding populations of wildlife.</p> <p>Although option A is said to enable more effective school provision and provides for free schools at primary level it does not adequately account for the increased need for places at secondary level. The closest secondary school is the split site King Charles I School. Although there may be potential for some expansion of the lower school site on Borrington Road, the upper school site is surrounded by housing and there is no room for further expansion. Under "Building schools for the future" it was planned that the school would be replaced by a new single site school on the Borrington Road site extending into part of the Green Belt. If that land is used for housing it removes the option for expansion of King Charles I School and makes it hard to provide the extra school places required at secondary level.</p> <p>Option A would also have an adverse effect on the Wyre Forest Rural polling district, since all the new houses in the extended Spennells housing district would be within this ward. This would be a large number of suburban Kidderminster households voting on matters affecting rural areas of Stone, Chaddesley Corbett etc and potentially outnumbering those communities so that their views were no longer taken into account.</p>
	LPP0677	Option A	Object	<p>I object to OPTION A.</p> <p>Option A would have a significant, negative impact upon biodiversity and “Green Belt/developed area” - giving the impression of urban sprawl effecting the distinctive identity and attractiveness of the district.</p> <p>Disproportionate focus of additional housing in Kidderminster would add substantial risks to transport, school, amenity requirements in the area- and take away a positive green/environmental outlook and experience forever.</p> <p>The proposal in respect of Heath Lane is impractical and dangerous. Walking along this lane often find having to climb a bank to allow a single lane of cars to pass. Any additional traffic is an</p>

				<p>accident waiting to happen!</p> <p>If pursue Option A, “natural border” removed between Wyre Forest and Wychavon suggest you consult residents and the government on advantages of merging councils.</p>
	LPP0156	Option A	Object	<p>I object as neither are viable options.</p> <p>Use of Green Belt only justified by proposed eastern relief road, which is only necessary if development proceeds. There is no need for the relief road without the development as traffic can use the A450 from Hagley to Torton.</p>
	LPP0333	Option A	Object	<p>I submit the following objections to OPTION A :</p> <ul style="list-style-type: none"> the land proposed for this Option is agricultural land and has been used for food production during the whole of the time I have lived in my house (32 years) The whole project does not appear to have been well thought out. WFDC is asking residents to submit details of any other sites that they may know about. Surely that is the job of WFDC Planning Dept. In 2016 we had planning permission refused to fell trees behind our house as the proposed works would have “an adverse effect on the amenity of the local area”. If a single house can have such a “damaging” effect then how can WFDC justify building hundreds of houses on the same field? Spennells is already too big.
	LPP0403	Option A	Object	See summary LPP0400.
	LPP0425	Option A	Object	<p>I object to Option A and Option B.</p> <p>Green Belt land should be used only as a VERY LAST RESORT.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collaborate and collectively review overall brown field site availability and plan housing development accordingly – decisions to build on the Green Belt should not be based on local authority boundaries.</p> <p>The 5 year rolling time frame for construction sites should allow for regular reviews of brown field sites and enable changes to be incorporated into any plan,.</p> <p>The plan fails to recognise changes in shopping habits and unrealistically targets retail expansion and comparison shopping.</p> <p>Kidderminster has suffered from the failure to 'tidy up 'following the migration of Kidderminster town centre to Weavers Wharf and Crossley Retail Park.</p> <p>Retail premises and the courts building have been empty for 8 /9 years - the regeneration of such sites require radical solutions for alternative use that reduce any need to build on the Green Belt.</p> <p>Unnecessary decisions are being taken now e.g. in 1999 who could have predicted the impacts of the 2007/08 economic collapse or changes caused by online shopping (indeed, the plan itself demonstrates an inability to predict /understand short term population levels in the District).</p> <p>The plan fails in its stated aim to "to use a robust and up-to-date evidence base to ensure that the local plan meets the full, objectively assessed needs for market and affordable housing in the housing market area" . Instead it aims to justify what developers want to deliver rather than meet the needs of Kidderminster residents.</p> <p>Previous attempts to build an Eastern relief road have failed - the plan fails to present evidence based data that supports it in economic or environmental terms - at the consultation session I was informed this would be a single carriageway 40 mph road following the same route as the existing road from the Worcester Road through Mustow Green to the Birmingham Road - is it</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>really a relief road at all?</p> <p>Whilst constructing a new school in the Spennells area appears attractive this (together with the promise of the 'relief road' shouldn't be the determining factor when opting to build on the Green Belt – other options should be sought.</p> <p>Many people commute into / and out of Kidderminster now (hence the railway station development) - and have done so for many years. This situation equally relates to the areas covered by the LEPs identified in the plan.</p> <p>Whilst economic development in Kidderminster will be welcome - past experience shows this will take time – in the meantime people will continue to travel.</p> <p>Immediate need is for fresh radical thinking that optimises the use of brown field sites throughout the LEP areas for residential use and enables Kidderminster itself to become a modern, contained and attractive town centre that incorporates retail leisure and residential opportunities rather than pursue outdated models from the past - 'mixed use' communicates little other than the elements of 'wishful thinking' so often reported in the local press over numerous years.</p>
	LPP0486	Option A	Object	I object to Option A
	LPP03142	Option A	Object	<p>I would like to raise my deep concerns regarding the proposed housing development Option A under the local plan review. I think such a large scale development would be extremely detrimental to the physical and mental health of existing and new residents for a number of reasons:</p> <ul style="list-style-type: none"> • The loss of access to valuable Green Belt areas that enrich the lives of all residents • The rise in air pollution from increased traffic • The increased everyday stress from an already congested area

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<ul style="list-style-type: none"> The lack of essential amenities (including school and doctor surgery places) to accommodate such a growth in population <p>I am hopeful that the Council, elected to represent the needs of their constituents, will take these concerns into consideration</p>
	LPPO3059	Option A	Object	I do not support Option A. The land behind Offmore is considerably higher than other development and would be very visible. Schools in the area are already full it would be nice to be a sustainable community and not just fields of houses.
	LPPO3068	Option A	Object	<p>Having viewed the report and considered the alternatives, I favour the proposals put forward in Option B and object to option A for the following reasons:</p> <ul style="list-style-type: none"> The area's population is almost static and it seems that the council's estimation of the number of new homes needed is too high, meaning that there is room to accommodate the needed homes without using the additional Green Belt land included in Option A. If an extra 2% of Wyre Forest's Green Belt is made available to developers it will, in all probability, be used for housing while brownfield sites/derelict buildings, forming a blight zone around the town centre, will be allowed to remain undeveloped. Development of brownfield sites and derelict buildings in and around the town centre would help to rejuvenate the town. If the expanded Lea Castle site were used to its full potential then many of the needed homes could be accommodated there along with the necessary infrastructure (school, local shops etc) Development of this site would not put further pressure upon the already busy, Bromsgrove and Worcester roads. An Eastern bypass/link road, joining the Worcester road, Bromsgrove road and Birmingham road would not alleviate traffic congestion and would cause air and noise pollution within in a residential area. Mental health and welfare is an increasing issue in this country and it is proven that green space and fresh air and exercise are hugely beneficial in combating mental health issues such as anxiety and depression. How can the removal of an area like this be

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>justified?</p> <ul style="list-style-type: none"> The fields to the East of Spennells are of high quality agricultural land and should continue to be used for food production. The fields provide valuable habitat for wildlife. <p>I object to the proposals put forward in Option A and favour Option B.</p>
	LPPO3181	Option A	Object	<p>In principle objection to loss of Green Belt sites.</p> <p>Concern at expansion and sprawl of Kidderminster eastwards around Hodge Hill area.</p> <p>Inadequate infrastructure to support housing and employment uses/development near Hodge Hill on A456, Hurcott Lane and Husum Way junctions.</p> <p>Concern at lack of infrastructure detail in the plan for the Core and Option Sites to East of Kidderminster.</p> <p>Such development will put undue strain on the existing rural road network with drivers using lanes as rat runs to connect to the A456 and onwards to M5 and A38.</p> <p>In particular Hurcott Lane, Perryford Lane, Rocky/Stakenbridge Lane, Churchill Lane, Wagon Lane, and also south of A456 including Belbroughton Road.</p> <p>Concern at any effect on Hurcott Pool – SSSI – and watercourse network.</p>
	LPPO3195	Option A	Object	<p>The sustainability report suggests local employment to support the additional 1700 homes will be available from the businesses on the Worcester Road and Hartlebury Trading Estate. I do not believe these will expand to support the potential numbers involved.</p> <p>The resulting additional vehicles will have to get on to one of the already congested B roads</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>around Kidderminster. As the new by-pass to Stourport has resulted in major congestion. It is currently very difficult to get out of Wilden Lane at most times of the day and almost dangerous when it gets near rush hour.</p> <p>Surely 'Option A' which disperses the additional homes around the area would be the most beneficial for congestion and general facilities.</p>
	LPP05112	Option A	Object	Option A would use valuable Green Belt agricultural land surrounding the Spennells estate, which is currently in production.
	LPP05123	Option A	Object	I object to the parts of the Core plan and Option A.
	LPP05141	Option A	Object	I do not support Option A for all the above reasons but particularly because of the larger Green Belt land take, scale and concentration of development and the negative impact upon local amenity, biodiversity, health and wellbeing and, most importantly, community identity.
	LPP04839	Option A	Object	<p>Part of Option A (Spennells) has been shown to be unacceptable mainly on the grounds of storm and foul water drainage and flooding issues. Also other constraints, issues and discrepancies relating to the consultants reports. In my view the development here would have a serious impact on Urban Sprawl.</p> <p>I have questioned whether the Eastern Relief Road would do anything other transfer stress to other pinch points on the existing highway network. I can't see how it would improve town centre congestion other than where perhaps the A449 passes through the Horsefair. A traffic modelling analysis may be helpful here but it is not evident that one has taken place. Therefore I cannot see how subjective and unproven benefits would outweigh admitted disadvantages. These disadvantages I believe I have shown to be far more serious than anything shown in the Options Review.</p>
	LPP04651	Option A	Object	The benefits of Option A do not outweigh the disadvantage caused by the large-scale of expansion to the east of Kidderminster that would be necessary.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Objections to Option A on Planning grounds:</p> <ul style="list-style-type: none"> The 'beauty of the countryside' has been cited in the plan as an important criterion but has not been given sufficient consideration in Option A. See Annex 1 below for detail. Option A proposes building on Green Belt land which can happen only in exceptional circumstances which have not been demonstrated). See Annex 2 below for detail. The plan has not adequately demonstrated the need for 5,400 new dwellings <u>specifically</u> on Green Belt land. The correlation between the population and the years considered (2001 to 2015) explains less than 5% of the variation (Pearson method). See Annex 3 below for detail. The development of farming land is permitted <u>only</u> if unavoidable. Option A contains well managed farmland with no justification presented for its loss. See Annex 4 below for detail. Option A will remove important wildlife corridors which connect sites of special scientific interest and nature reserves. See Annex 5 below for detail. There is a lack of adequate road capacity and infrastructure for an expansion of the Spennells with no real prospect of the infrastructure being developed. See Annex 6 below for detail. <p>Annexes</p> <p>Annex 1; Sections 5aiii, 11.1, 11.2 and, 23.1 respectively set out the importance of;</p> <ul style="list-style-type: none"> access to facilities for those without cars; recognising the intrinsic character and beauty; protection and enhancement of the natural environment and Promoting activities such as walking and cycling. <p>Around 3,000 houses are within easy walking of the fields; providing access to the countryside to many as a healthy, leisure pursuit. However, the LCA cited states that account has not been</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>taken of scenic beauty. I have added a few pictures that could not be taken following Option A’.</p> <p>Annex 2; Option A proposes building on Green Belt. The Government recommends, ‘maintaining strong protections’, and clarifies that, ‘Green Belt boundaries should be amended only in exceptional circumstances and where <u>all</u> other reasonable options have been examined’. Policy 6B commits to ‘encouraging the effective use and re-use of acceptable brownfield land, safeguarding and enhancing the open countryside. I recognise that <u>some</u> residents <i>think</i> that Green Belt is a landscape protection tool, but very little commitment to policy 6B or of other options being ‘fully examined’ has been presented.</p> <p>Annex 3; The ‘reasoned justification’ outlined is predicated on ‘unusual demand’. However, Figure 3.1 is extremely misleading. The trend to 2034 which predicts 5,400 dwellings appears to have been based on the population figures which explain less than 5% of the total variation (Pearson method). The poor correlation is evident by scrutinising Figure 3.1 from 2001 to 2015. The study does an excellent job of teasing out other factors affecting population such as the age demographic, economic factors, international and national migration and even tries to take account of Brexit, but since the conclusion is that these factors play a minor role on population change the predictive method used remains crucial and is erroneous. The increase from 2001 to 2015 has been 2.7% <u>in total</u> and Table 2.0.1 suggests static population growth. Despite the Council’s best efforts to encourage job growth, for which we are all grateful, the carpet industry continues to decline, so maintaining the number of jobs would be an outstanding outcome. In section 2.4, it is acknowledged that the carpet industry in Kidderminster (population 56,185 in 2015) has been in decline since 1970s. Furthermore, there are numerous examples of construction and development companies holding property with planning permission around the Wyre Forest. If there were high demand, work would start today to convert their land assets into profit. There is clearly little latent demand in the system. The plan looks forward 20 years, but surely the demand needs to be demonstrated <u>now</u> in order to release Green Belt?</p> <p>The Government suggests the established method of calculation is ‘particularly complex and lacks transparency’; recommending a new, standard formula. Given the intrinsic character and</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>natural beauty of the targeted Green Belt and the poor correlation of existing data, we must await the proposed standard method for calculation <u>before</u> giving planning consent. Delaying planning permission to build on Green Belt, pending improved forecasts of the need for new dwellings is surely a minimum legal requirement? Section 6.12 states that, ‘much of the readily available brownfield land has now been developed’. I am aware of brownfield sites and abandoned properties in the area that have not been developed. Surely, the minimum requirement before building on Green Belt is a survey of <u>all</u> brownfield sites in the Wyre Forest, providing a comprehensive list identifying the ownership and status of that land and an action plan to build on it.</p> <p>Annex 4; With respect to sustainability, the local plan suggests safeguarding agricultural land. However, the Amec review is misleading, describing the character as having ‘average quality’ when the pictures here demonstrate it is high quality. The review describes the withdrawal of active land management through poor crop growth. It would be easy to understand land management withdrawal given the speculation over the future of the land and its ownership (now by a development company), precluding a coherent long-term farming plan. The position has been exacerbated by the 2007 outbreak of foot and mouth in the locality, forcing local farmers to move away and reducing demand from local fields for animal feed. In practice however, the reverse is true. My photos show healthy crops, demonstrating that local farmers value the opportunity to rent from the developer to farm! Recently, crops including wheat, barley, carrots, spring onions, potatoes etc, have been grown as well as occasionally encouraging pollination by use of poppy and other wild flowers. My knowledge of the fields covers 30 years. Section 7.9 explains that the ‘Amec’ studies formed a key part of the evidence base for policy options and decisions. Has testimony been sought from any of the farmers that have farmed there? Section 6 outlines the importance of promoting local food production. This has even greater importance post-Brexit. Greater attention is being paid to the number of miles travelled by food and the contribution this makes to global warming. The region can ill afford the loss of agricultural land.</p> <p>Annex 5; A 2014 Government press release outlined the importance of wildlife corridors. The</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>area is blessed with sites of special scientific interest (e.g. Wilden Marsh) and nature reserves (Spennells Valley Local Nature Reserve). Numerous rare species would benefit from the use of natural hedgerows and open fields to provide a varied habitat and a corridor to extend their range.</p> <p>Annex 6; Everyone understands the difficult choices Councils make when balancing infrastructure spend against other pressing needs in times of austerity. We were led to believe that the residential housing on Hawfinch Rise would be reserved to provide extra space for the much-needed expansion of the school. The reality is that development of the fields with the inevitable failure to provide the required infrastructure will produce a nightmare scenario for the new residents in terms of traffic congestion and facilities.</p> <p>I understand that the Council wrestles with conflicting needs on a tight budget, but the level of justification required before building, especially on Green Belt needs to be addressed urgently and much more rigorously.</p>
	LPP04737	Option A	Object	Do I prefer Option A or B? The immediate answer is neither. The amount of land taken up by these two proposals especially the core sites is too extreme. The amount of additional infrastructure required for schools, health facilities etc. looks from this perspective to be too costly and will never be completed. Where are these additional schools or Form Entry (not sure what this means) to be built within this new development without compromising all the other factors such as green infrastructure, transport, water and sewage etc? What about the unique place and all the other considerations?
	LPP04594	Option A	Object	The impact on the Green Belt and the size of the proposed “Super Estate” is huge. For anyone who knows the area, in particular the existing Spennells estate, you will appreciate how big this proposed development is.
	LPP04331	Option A	Object	Option A infers the inclusion of an Eastern Relief road; I believe that this is being used as a dangling carrot to encourage people to support this option. There is no evidence that in reality the relief road is any more likely to happen with this option. Section 106 moneys will be used to

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				ensure affordable housing (which they should) within said scheme, there will not be any left for relief roads.
	LPP04632	Option A	Object	<p>I have tried to read and absorb the contents of the document and have only being partially successful. What I have seen is a looming disaster for quality of life in this beautiful area. The plan is some kind of a patch to a problem that should be fixed at source. In allowing unchecked immigration, successive governments have caused this country to become massively overpopulated and as a consequence, ordinary people are having to endure constant development, loss of open spaces and food production areas (needed all the more with the ever increasing population) and more and more traffic congestion and its attendant pollution, which in turn require more roads and bypasses to be built. The problem must be addressed at source by national government who should be severely pressured by local authorities on residents' behalf.</p> <p>As for the plans themselves, there are too many individual components to be able to comment on them all. If I had to express an opinion, then I would say that option A is not my preferred option, but that is not to say that the other option is acceptable either - it is just the lesser of two evils.</p> <p>I realise that the production of this plan has been imposed by national government, but I implore the local council to act now in resisting the move to just keep building in an attempt to solve a problem that could easily be fixed at source, i.e. stop adding to the problem of an already overpopulated and overcrowded island immediately.</p>
	LPP04301	Option A	Object	The Local Plan Review document is flawed and biased towards Option A. The options only provide two sites whereby additional schools would be assured. The redevelopment of Kidderminster train station is questionable. The Capital Portfolio Fund and the £10 million Development Loan does not go hand in hand with proposed Option A, or any agreement for Kidderminster to take any overspill from Birmingham. The proposed Option A will just provide a

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>commuter estate and therefore secure the Bypass.</p> <p>The downgrading of Kidderminster Hospital is just one example of how the town amenities are not suitable for the existing residents let alone any newcomers.</p> <p>Option A will bring a commuter estate encouraging people to work and spend outside of Kidderminster when in fact the local economy needs a boost.</p>
	LPP04377	Option A	Object	I am strongly opposed to the Options suggested. The district Council is not trying hard enough to use the brownfield sites that are available.
	LPP04436	Option A	Object	<p>I am writing to express my objections to the local plan review preferred options consultation.</p> <p>They are as follows-</p> <ul style="list-style-type: none"> The Councils own statistics show that there are enough brown fields/other capability to fulfil government targets for ten more years. The proposal is for five years (beginning in 2019 will run until seven years from now), and as such no release of Green Belt land will be necessary during this period- “The Green Belt is 13% of the land. We can solve this crisis without having to take huge tracts out of the Green Belt,” the housing minister, Gavin Barwell, said. “They can take land out of the Green Belt in exceptional circumstances but they should have looked at every other alternative first,” he said, including building on brownfield land, releasing surplus government land, increasing the density of projects in towns and cities, or partnering with neighbouring Councils. Whilst I appreciate that there are difficulties in attracting building companies to build upon more difficult sites, allowing the release of more lucrative ‘easier option’ sites will only exacerbate this problem. It may be argued that the Council can negotiate a ‘tie in’ for companies to build upon brownfield/other sites alongside ‘easier’ options, they will then be able to pay a levy to the Council rather than completing these obligations. The Council will not, however, be obliged to spend these resources in Kidderminster/to

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>improve local housing stock that utilises brownfield/other sites.</p> <ul style="list-style-type: none"> The preferred option A removes more than twice the amount of Green Belt from our local area than option B (2% as opposed to the Government's nation benchmark of 1%). This option is purported to allow for new road networks and supporting, but as no information is available, it must be assumed that this is a desire rather than an absolute fact. If one of the two options is to be adopted then option B is the most appropriate, as it will simply extend an already existing new development area with its own direct transport links to both the Wolverhampton and Stourbridge main roads. In light of the above points my vote as a constituent of this area is that- Firstly, that both plans A and B are unnecessary and unacceptable, but that secondly IF one must be adopted, then it should be plan B.
	LPP04445	Option A	Object	<p>Please note my objections to both Option A and Option B of the Local Plan Preferred options.</p> <p>I don't think it's fair to offer a Plan A and B which both involve destroying our local Green Belt which is so close to many of our residents' hearts. Green space is important for emotional and physical wellbeing. As a nation, we grow less than two-thirds of our own food. Now, more than ever, we need to avoid unnecessarily losing our countryside. Why can't we utilise our brownfield land instead of destroying our precious countryside, which is home to rare and endangered wildlife like the Corn Bunting, Long-eared Bat and a Horseshoe Bat.</p> <p>I have lived in Kidderminster many years and have always valued the local Green Belt. It played a huge part in my childhood wellbeing and I have very fond memories of going on nature walks with my family and playing with my friends. Our Green spaces should be protected as once they are gone they are gone for good.</p> <ul style="list-style-type: none"> Green spaces and farmland are important habitats for wildlife, some species of which are rare/endangered i.e. the Corn Bunting. In our efforts to tackle the housing crisis, suitable brownfield land and not Green Belt

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>should be the priority. This should be utilised first and foremost, before any Green Belt land is even touched. What about the derelict and vandalised Sion Hill school site? There are places like this all over which have not been utilised after about a decade and yet you propose to destroy our Green Belt.</p> <ul style="list-style-type: none"> • The amount of housing you propose to build is completely unnecessary and based on figures that apply to our nation as a whole and not the local area's needs. You have also rounded figures up. This is completely unacceptable and one can only assume this has been done to make money first and foremost, and not with the wellbeing of our local people in mind. • Our local government has only closed schools over the years and you now want to move thousands more people into our town. Where will they go to school? Where will they go to the doctors, or the hospital? How will our Police and Fire services cope with the increase? There already aren't enough GPs for the town's population and it's already difficult enough to get a doctor's appointment. Kidderminster Hospital has been downgraded. • I don't feel that this proposal has been purposely kept quiet- I only found out about it from a family member who had a leaflet through her door. I didn't have any warning whatsoever and neither did several other people I know. I also believe it has been designed in a way as to pit 2 parts of our town against each other, with one side hoping you will use Option A and the other wanting Option B with no option available to people who don't want any Green Belt used. Is this not an option? • Houses on the Silverwoods development remain unsold; why is there now a need for such massive development when there appears to be insufficient demand already? This huge building project was supposed to solve Kidderminster's housing needs for the foreseeable future. Once again this contradicts decisions made by the Planners. Was the mistake then or now? • There aren't enough jobs in the area to support this huge influx of people. This will render new developments commuter ghost towns and increase traffic on main roads. <p>To summarise, I do not agree with Plan A or Plan B. I believe there is no need for such urban</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				expansion.
	LPP04452	Option A	Object	<p>In the draft plan there are aspirations to redress the imbalance in the age of the population, attract more business and jobs. Destroying the Green Belt to build houses does nothing to address these aspects of Kidderminster's future. The idea that almost 6000 houses are required when clearly the population of Kidderminster is not growing at a significant rate seems like a grossly inflated figure. The 2.7% increase in the last two years is almost certainly the effect of increased immigration from Europe, which may reduce as some return to their own countries following Brexit.</p> <p>Average age and jobs: To lower the average age of the population it is necessary to attract young people to the town for which you need jobs and cheap housing. In fact the biggest problem facing youngsters today throughout the UK is that they can't afford to get on the housing ladder. Just building new houses on Green Belt land will not help. A potential solution to the housing problem would be to have the derelict and unoccupied properties, of which there are many, in the town converted to flats. This may require the use of compulsory purchase orders, which must be within the power of the Council. The resultant dwellings, would be cheaper to buy or rent, would attract young people and would help to revive the town centre. The proposed use of the Glades site for retail should be changed to more flats for the same reason. Cheap housing will not be found on Spennells Green Belt. Young people will be the people to develop new businesses; older people with established careers will be reluctant to take risks.</p> <p>Green Belt effect: Building houses on green field sites to the east of Kidderminster could have an adverse effect on the average age of the population. Any developer building on that land will want to build 4 & 5 bed houses not only to increase his revenue but also to recover the cost of the land he has purchased. They will not want to provide affordable housing at the 30% level. This will attract commuters from Birmingham and Worcester. And will exacerbate the commuting problem.</p> <p>My objection: I am strongly opposed to both of your preferred options. I believe that developing</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				cheap flats for younger people will balance the ageing problem and help to create new businesses. I believe that to meet the need for affordable housing all brownfield sites in the town should be redeveloped first. No Green Belt land should be built on until the redevelopment of the town centre has been completed and all flats occupied.
	LPPO3215	Option A	Object	<p>I would like to highlight my objection to WFDCs plan to sacrifice large swathes of Green Belt land around Kidderminster for housing development and support neither option A or B. The reason for this being that I believe population growth within the region is static due to a reduction in job opportunities in the area.</p> <p>The Green Belt land around Kidderminster is easily accessed by local people and is well used by all members of the community providing a safe space to exercise both the mind and body. The loss of such land will in addition have a detrimental effect on wildlife with many protected species such as corn buntings, bats, badgers and many other bird species using this land.</p> <p>If following the use of all brownfield sites there is a true unmet need in the district for housing I would support the integration of small developments of less than 100 houses to be spread across the district on a variety of Green Belt areas so as to reduce the pressure on local infrastructure and services. In addition these areas should be carefully considered to see how they link in to existing public transport methods with the potential for a new park and ride train station to be developed outside of the town.</p>
	LPPO3218	Option A	Object	<p>I opposes Option A:</p> <ul style="list-style-type: none"> The plan proposes two thirds to three quarters of development centre on Kidderminster and land surrounding it. I consider this to be unfair and disproportionate and there needs to be some choice as to where people can live to encourage more people to stay in the Wyre Forest. The proposed development is 3 to 4 miles away from the town centre, which has no transport links after 6 pm and will create more traffic getting into the town and out of

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>the already congested estate roads around Spennells.</p> <ul style="list-style-type: none"> Kidderminster town centre is very run down. People do not want to live in big soulless estates or shop in the town centre here, but would rather live in the more vibrant and social areas of Stourport, Bewdley and Cookley etc. The shaping of Option A to justify the relief road to resolve pre-existing transport problems and air quality is not correct. The relief road will not help with air quality in the Horsefair as the majority of traffic to Birmingham from Worcester use the A450 Worcester Road, which should be enhanced and the Bridge raised to accommodate the larger vehicles instead of creating a very expensive and unneeded additional road basically running parallel to this. I challenge the validity of the Green Belt Review and the consequences this has, in respect of Option A for the fields between Spennells and Summerfield. These fields have a massive impact upon social amenity, biodiversity and the integrity and identity of the hamlets of Summerfield and Stone. There are many rare bird and mammal species in these fields (e.g. Bats, Badgers, Linnets and Corn Buntings), and are used regularly for exercise and health and wellbeing by residents, as well as visitors to the local area.
	LPPO3263	Option A	Object	<p>I object to A proposals as you are putting forward an option to build on prime farming land, which has very diverse wildlife on it, (including protected species such as bats, badgers and great crested newts). Also concentrating too many houses on the east of Kidderminster, overwhelming the existing communities which could cause social problems further down the line.</p> <p>The schools and Doctors to the east of Kidderminster are already at capacity.</p>
	LPPO3274	Option A	Object	I object to plan A and “Core sites”.
	LPPO3371	Option A	Object	<ul style="list-style-type: none"> Objects to option A - prefers option B. Consultants are incorrect stating there is no significant wildlife interest in Spennells fields - they are habitats to many animals. Option B would not endanger these habitats.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<ul style="list-style-type: none"> Option B spreads smaller, more desirable development throughout Wyre Forest. Local infrastructure demands will be best served in option B - especially schooling, transport and public transport as it will be spread around the district. Stone parish is unfairly targeted in option A for housing and a relief road. Option A does not address the need for affordable homes as prices will be too high for local residents as it's a low income area. The loss of Green Belt, arable land and hedgerows should not be focused on one main area - option B uses less Green Belt. The draft plan is in support of option A as it will provide fund to the relief road - the need for which has no evidence.
	LPPO3408	Option A	Object	<ul style="list-style-type: none"> Prefers option B over option A. Green Belt land should only be used as a last resort. Disconnect between plans and town centre regeneration/transport infrastructure. The Glades used to be in walking distance but now they aren't - these plans will repeat the decision causing more cars on the road.
	LPPO3420	Option A	Object	<ol style="list-style-type: none"> Increased traffic, noise and pollution from exhaust fumes with resulting affect on existing resident's health. Removal of Green Belt amenity currently used by existing residents for walking, cycling, dog walking or horse riding. Increased pressure on local services - schools. GPs and hospital. It is currently impossible to get an appointment at Church Street GP practice. Loss of wildlife habitat. Loss of productive agricultural land. Wyre Forest has an ageing population who do not require thousands of starter homes built for commuters. Commuters parking in neighbouring streets to the railway, rather than paying for car parking, are already a nuisance. Roads are already grid locked. Farfield is as a result of all

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				day commuter car parking a one way road.
	LPP03564	Option A	Object	<p>I drive around Kidderminster and see so many derelict areas and unused building, I cannot comprehend how using Green Belt is appropriate. Should we not be using brownfield sites, derelict buildings etc there are enough factories in Kidderminster or is this too expensive for the developers and they are looking for a cheaper option?</p> <p>We have to protect our Green Belt as concerns over increasing mental health are on the news every day. Our schools are full, we will have even more traffic even with a relief road, additional pollution, increased pressure on doctors and NHS and urban sprawl.</p> <p>The fields on Stanklyn are a haven for wildlife – I go there at 6am for a walk – the swallows are flying over the top of the grasses and I can hear skylarks – it is heavenly – what will happen to their habitat - are we trying to create a horrendous urban sprawl.</p>
	LPP03573	Spennells	Object	<p>In Option A it is suggested that around 1700 dwellings be built. This is far in excess of the actual growth of the local population, which has remained relatively stable since 1991. Recent job losses suggest there is unlikely to be large demand for new dwellings.</p> <p>Option A will take out valuable, much needed, agricultural land if around 1700 dwellings are built on it. This will lead to less productive land being available to Britain. Wildlife habitat will also be lost when the hedgerows are taken out. The common toad, whose numbers are declining rapidly, will lose its migration routes around the Spennells Valley Nature Reserve.</p> <p>Option A would put great pressure on the existing busy roads. The future 3700 residents are unlikely to be helped by an Eastern Relief Road. Spennells Valley Road links the A449 and the A448 and an increased volume of traffic would result in an even slower flow at peak times, leading to increased pollution.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Schools: These have only a very limited number of places which only possibly might still exist for new residents' children.</p> <p>Spennells community centre no longer exists as it was all that was available for the school to expand to furnish places for the existing pupils on Spennells.</p> <p>Spennells estate no longer has a community centre. This means there is nowhere for existing residents to meet or pursue leisure activities.</p> <p>Shops: These are next to the school. There are five "shops" and two takeaways on Spennells. The volume of traffic and difficulties in parking around these and the school at peak times are already great. Pollution levels will be greatly increased with 1700 more dwellings. Do we want increased pollution around our schools?</p>
	LPP03588	Option A	Object	<ol style="list-style-type: none"> 1) The lack of concentration on potential Brown Field Sites rather than the easy option of allowing building on Green Belt. 2) You have already identified such Brown Field Sites in your report "Wyre Forest District Strategic Housing and Economic Land Availability Assessment 2016" 3) It is pleasing that areas such as the old Lea Castle Hospital have been identified and these surely are areas to use first for house building. 4) There is no concentration or even identified concern that sites where building permission has been granted are being left and no movement has yet been made to build on such sites, viz:- the land adjacent to the new Tesco in Stourport. 5) This loss of Green Belt land is very worrying especially due to the impending Brexit situation. We are already only 50% self sufficient with food production in England and a continued loss of good agricultural land, which is that backing onto Spennells, could have serious repercussions for our food production. Once the land is built upon, the situation could not be reversed.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPPO3593	Option A	Object	<ul style="list-style-type: none"> • Objects to option A. • Would have negative impact on local area. • Would affect local environment and wildlife. • Increase traffic congestion and risks. • Diminishes the identity of Summerfield and Kidderminster - creates urban sprawl. • Have we used all available brownfield sites across the district? • Selected easier solutions for developers. • The council needs to re-examine options to establish a more balanced plan to protect its distinct and attractive identity for further generations.
	LPPO3664	Option A	Object	<p>OPTION A is opposed and <u>preference is for OPTION B</u> for the following reasons:</p> <ul style="list-style-type: none"> • The housing need outlined is incorrect • You have not provided enough evidence for transport support. The proposed Eastern By pass is not proposed in enough detail in the plan. There are no maps, volume of traffic proposed, entry or exit zones. • If Option A is chosen, there will be negative impact on: <ul style="list-style-type: none"> ○ Health ○ Well being ○ Mental Health ○ Safety ○ Road ; congestion ○ Distinctiveness , region characteristics ○ Transport ○ Crime, social behaviour ○ Wildlife ○ Schools ○ Medical centres, Doctors hospitals. • Councillor Ian Hardiman confirmed that the Council had brownfield sites for 3000

				<p>dwellings so use of Green Belt should be a last resort.</p> <p>The benefits of allowing easier delivery of school provision and the option of an Eastern Relief Road do not outweigh the disadvantage caused by the large-scale of expansion to the east of Kidderminster that would be needed.</p> <p>Option A:</p> <ul style="list-style-type: none"> Will not provide the employment need as this will make Kidderminster a soulless commuter town. Will produce a housing sprawl and will not generate growth to Kidderminster. One town will merge into another. Current employment land lies vacant and unused on Worcester road since built what evidence is there that more is required and that it will be filled? Infrastructure: The by-pass will not add any growth to Kidderminster and will serve as a route to by-pass the town. The eastern by pass will be opposed as it was previously. What evidence is there that this road will enhance the community? Where will the Eastern by pass end? Presume on A456 where this will add to already heavy congestion. It will cause congestion, traffic, health and asthma problems, and destroy much more than green field and Green Belt sites. <p>You have not mentioned development to secondary schools.</p>
	LPO3780	Option A	Object	Option A unacceptable.
	LPO3795	Option A	Object	<p><u>OBJECTION TO ‘OPTION A’ AND REMOVAL OF LAND FROM GREEN BELT STATUS</u></p> <p>Offering A or Option B is a divisive and dangerous tactic — one that splits communities and gives way to resentment. Who am I to say that the Green Belt in Kidderminster is more important than the Green Belt in Stourport? If the projected growth figures are accurately calculated it will be</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				unnecessary to develop on any Green Belt land. If WFDC harnessed the passion raised by this consultation and worked with residents then maybe we may achieve something lasting and worthwhile.
	LPP03802	Option A	Object	I object to the Council's strategy as evidence/analysis shows the scale is unnecessary. I do not support Option A inc the Kidderminster Eastern Relief Road which, if built, would bypass the town centre and worsen traffic problems along the A449
	LPP04147	Option A	Object	I do not agree with any option that builds on Green Belt.
	LPP04156	Option A	Object	<p>I do not support options A. I would urge you to consider the requirements of local residents, rather than those of large developers in this plan.</p> <p>As well as the implications of destroying the local countryside, which is well used and loved by the local community. Have a look at brownfield sites first.</p> <p>The Kidderminster Eastern relief road appears to take traffic from one busy road and feed it into another!</p> <p>A wider-scale review of the traffic round the Kidderminster area is needed, not merely an additional road.</p>
	LPP04230	Option A	Object	OPTION A IS NOT AN OPTION FOR ME ,
	LPP02357	Option A	Support	<p>Support Option A.</p> <p>Additional housing requires more investment in infrastructure/employment/communication links and new housing to the north and east of Kidderminster could attract businesses.</p> <p>Housing west of the River Severn, with no additional road improvements, will increase traffic congestion/pollution/air quality in Stourport/Bewdley.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP02612	Option A	Support	We wholeheartedly support the councils preferred option A, because building the majority of the houses on the Spennells and Lea Castle would be the most attractive for those people who choose to live in the Wyre Forest but their employment is within the surrounding towns and cities.
	LPP02614	Option A	Support	<p>I attended the consultation meeting at Areley Kings Village Hall last Wednesday and this is my response. I am totally in favour of option A for the new housing.</p> <p>Your development plan states that you want to develop the role of Kidderminster as the main town for the area. In that case large areas of new residential development should take place there, particularly as a new Eastern Relief road is being proposed which would benefit everyone in the Wyre Forest. It would help to relieve the congestion within central Kidderminster and be convenient for residents on the new estate who commute to Birmingham and the Black Country. Also new schools are proposed for the extension to the Spennells estate. This must be more advantageous than trying to expand multiple schools across Wyre Forest if the residential development is widely dispersed.</p>
	LPP02768	Option A	Support	Option A preferable.
	LPP02955	Option A	Support	It seems that Option A would include new infrastructure whereas Option B will not include any.
	LPP02968	Option A	Support	<p>The current and planned infrastructure in Kidderminster is more suited to the housing increase. The development would complement the recent improvements such as the town centre as well as the planned eastern gateway.</p> <p>The road system in Stourport struggles currently so an increase in traffic would not be helpful to the town itself or the residents.</p>
	LPP02995	Option A	Support	<p>In general I am in support of Option A. I am in favour of keeping new homes near to potential employment site, schools and services whenever possible to reduce the travelling and pollution.</p> <p>Concentrating new housing will make it easier to provide new schools places, health services and</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				leisure activities. The advantage of, and benefits from, constructing a link road to the east of Kidderminster, is self evident.
Stourport on Severn Town Council	LPP01257	Option A	Support	<p>The Council met on 1st August 2017 and wishes for Wyre Forest District Council to proceed with Option A and not Option B.</p> <p>Option B does not provide for any highway or other infrastructure improvements within and around Stourport. Option A proposes a new road which would link the A449 with the A448 which would provide new infrastructure to support the proposed new development around the Spennells Estate.</p>
Stourport on Severn Civic Society	LPP01298	Option A	Support	<p>Overall we prefer Option A as we feel the existing and proposed infrastructure will support development on the scale proposed.</p> <p>Kidderminster is already on the national rail network with access to Birmingham and beyond. The proposed Eastern Bypass will facilitate road traffic in the area- locally and beyond.</p> <p>Stourport High School is at full capacity whereas there is capacity within Kidderminster High Schools.</p>
	LPP01661	Option A	Support	I wish to support option A as it is logical from a geographic point of view, would support the proposed by pass and would be straightforward in delivering County and District services.
	LPP01662	Option A	Support	<p>I would like to offer my support for option A. it makes so much more sense than option B because it will come with inbuilt infrastructure and a bypass road to avoid the town centre.</p> <p>Option B spreads out the houses and therefore puts the strain on local services such as schools and doctors. Placing 600 houses on the Areley Kings side of Stourport would create gridlock on the bridge over the river Severn, and the town centre,</p> <p>Option A is the only way forward.</p>

Wyre Forest Community Housing	LPP01681	Option A	Support	We are in favour of the delivery of more homes and particularly more affordable homes in the District. Having considered the District Council's Local Plan Review Document, we do agree with your assertion that larger scale sites are more likely to enable the viable provision of affordable housing. Therefore, we support Option A.
	LPP01765	Option A	Support	Option A Support-Better suited road system.
Rock Parish Council	LPP01161	Option A	Support	Rock Parish Council supports Option A.
	LPP0595	Option A	Support	I prefer option A
	LPP0676	Option A	Support	I prefer option A as more flexible and would allow the Eastern Relief Road. With all consultations much is unknown and needs a developer to implement it. Apart from Sugar beet factory seen little action e.g. Bromsgrove Street, Sladen School Site, Horsefair, Improvements between Town Centre & Railway Station.
	LPP0757	Option A	Support	Option A would be preferable as it would allow for desperately needed Eastern Relief Road for Kidderminster.
	LPP0131	Option A	Support	Broadly support Plan A as less dispersed, makes use of some existing infrastructure e.g. Lea Castle site, larger development could more cost effectively support its own services; shops, health etc. Concerns about traffic access from this area to Birmingham Road and people using Hurcott Lane which is narrow and already a rat run. Without mitigating routes this could cause problems.
	LPP0174	Option A	Support	I support the Kidderminster Relief road, and development to the East of Kidderminster.
	LPP0337	Option A	Support	I prefer Plan A as this area already has services i.e. medical centre, schools, roads. Plan B in

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				Stourport does not have sufficient roads, medical centre or schools to cope with another 1,000 houses approx. Dunley Road already has traffic queuing. The bus service is awful. Also we have no leisure centre as it has gone to Kidderminster.
	LPP03098	Option A	Support	Apart from the 'Land off Highclere site (BR/BE/6)', I am in favour of Option A.
	LPP03079	Option A	Support	The Parish Council of Kidderminster Foreign wish to generally give support to option A to enable the creation of an Eastern relief road for Kidderminster.
	LPP03179	Option A	Support	I would support Option A in the light of the benefits and the less negative effects on education etc.
	LPP04659	Option A	Support	Given that there are two preferred options, it would, in my opinion, be best suited to develop the sites at Option A areas within the Lea Castle/ Spennells/ Stanklyn areas of Kidderminster. Although this option does mean developing on a slightly higher % of Green Belt land, it does mean that development is contained within one area and road networks and infrastructure are already viable and the impact of such developments on the infrastructure would be minimal. Similarly, proposals to build facilities, such as schools and medical centres, specifically for the development would be a much better investment of public money than trying to ensure small, already established schools can cope with the demand of housing developments being built around them. Overall the impact of the building of larger developments is lower as the building works are confined to one location.
	LPP04596	Option A	Support	<p>The obvious option is the East of Kidderminster Sustainable Urban Extension with the very important and essential benefits that an Eastern Relief Road for Kidderminster would bring for the whole of Wyre Forest.</p> <p>With the financial incentives available from the developers who develop these sites, it surely makes sense to concentrate them all in one area, where the incentives are large enough to make a difference, i.e. new schools, road improvement and community facilities rather than spread them throughout the District, thereby diluting the effectiveness of these financial incentives.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP04629	Option A	Support	I realise that a plan is required and putting it into action may take years. Firstly I would like to say that in general terms I would support the core housing sites to the east of Kidderminster together with the option A housing sites. These seem to have been considered more thoroughly in that it provides for education and other community facilities along with a relief road to provide for the additional traffic and provide assistance with congestion on the current ring road.
	LPP04235	Option A	Support	Option A is the best and only way forward, the only logical solution
	LPP04474	Option A	Support	These are THREE good reasons to decline the Stourport-on-Severn proposal and choose the Kidderminster option which has given more attention to the additional infrastructure requirements of the area.
	LPP03231	Option A	Support	<p>It seems logical to base houses closer to employment hubs, major transport links (rail & road) and where there's potential for increased school provision. There's the added benefit of the Eastern Relief Road which should help with the current well-known traffic problems around the roads in Kidderminster (A449, Hoobrook, the Horsefair etc).</p> <p>Improvement to these traffic problems should also help to improve/stabilise the current air quality issues.</p> <p>The benefits of Option A outweigh the disadvantages as long as the new infrastructure is built/developed at the same time as the housing to make it a sustainable development.</p> <p>There will be an additional economic benefit to the town as a whole, new houses mean new people who will shop, eat and spend their leisure time and money in Kidderminster.</p>
	LPP03273	Option A	Support	Prefer Option A
	LPP03293	Option A	Support	Overall the features of Option A, together with the existing infrastructure and facilities of Kidderminster and the area to the east of the town, would more appropriate to better the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				development on the scale proposed.
	LPP03358	Option A	Support	<p>Please find below my proposal in favour of Option A. The reasoning to support this Option relies solely on its viability with regard to existing and proposed infrastructure.</p> <p>Transport links, accessibility, and the provision of services including educational have been positively accounted for in the proposed Option A. The Relief Road relinquishes current pressures on Kidderminster town traffic and the A449, whilst also ensuring easy access to the M5 and Birmingham. Most importantly, it enables direct, easy access to Option A's two concentrated urban developments.</p> <p>These two sites can enjoy convenient transport links and all that the main town has to offer, including existing educational establishments and the higher than required employment opportunities. The utilisation of the sites minimises aesthetic disruption beyond two concentrated areas. Adherence to existing national and local authority affordable housing policies can be realised when Option A is adopted.</p> <p>It seems nonsensical that Option B can be considered, especially after residential concerns noted at 2.10, Local Plan Review – issues which were echoed by planning officers in the recent refusal of planning application for 125 homes at Astley Cross. Issues of site suitability and the risk to the nature and character of the landscape only stand to be amplified by Option B's mapped locations. It is acknowledged in the Local Plan Review that more green space would have to be utilised in Option B, reducing the likelihood of adherence to Green Infrastructure policies.</p> <p>With regard to site suitability, it begs the question whether local Housing Policies, Adopted Development Plans, the Adopted Wyre Forest Core Strategy, Adopted Wyre Forest Site Allocations amongst others have been seriously considered in mapping Option B.</p> <p>It is not just the distinctive countryside within the District that risks adverse harm from Option B development, it is the already stretched infrastructure. With goals noted in the Local Plan Review</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>to limit the need for travel and ensure sustainable alternatives are available, it must be noted that in Areley Kings for example, there are extremely limited public transport options. This is typical of the District outside of the main towns.</p> <p>Employment opportunities are noted in the Option comparisons to be much less than Option A, and it is disappointing the Local Plan Review has continued to fail to remedy the relationship between land availability, housing completions and employment opportunities.</p> <p>With such limited employment options within this rural corner of the District, use of a car is somewhat imperative. Road users within this vicinity currently face the dangers of on-road parking, and increasingly a blatant disregard for speed limits by drivers - issues which would be exacerbated with greater road users.</p> <p>Accessibility to amenities is limited to the river crossing at Stourport-on-Severn which already faces extreme congestion, again acknowledged in the refusal of application noted above.</p> <p>Whilst Option A accounts for transportation options, sustainable alternatives and seeks to minimise the need for travel in its proximity to amenities, it must be remembered that there is no way of dispersing this additional pressure to infrastructure if Option B were to be adopted.</p> <p>The severity of the shortcomings of the existing infrastructure which would be pressurised further by Option B with no remedies offered, makes Option B prohibitively detrimental to the District for many reasons, only a few of which have been noted above.</p>
	LPPO3429	Option A	Support	I wish to register my support for plan A.
	LPPO3452	Option A	Support	Support Options A.
	LPPO3495	Option A	Support	We support the basic thrust of the proposals including the limited use of Green Belt land, the need to ensure adequate provision of affordable housing and appropriately sited provision for

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>the elderly and single occupation.</p> <p>Any proposals to reduce traffic through town centres are to be welcomed. Pedestrianised zones in Kidderminster have been a great improvement and should be extended wherever possible.</p> <p>These measures would help to improve air quality.</p>
	LPP03517	Option A	Support	I support option A as I believe this area could support and increase in population BUT brown belt land must be sort in preference to Green Belt land at the Spennells site.
	LPP03527	Option A	Support	<p>Option A</p> <ol style="list-style-type: none"> 1. We agree it is very important to preserve the wildlife corridor. 2. Housing suggested in Option A would be closer to employment and education opportunities, therefore requiring less travel. 3. The proposed new Kidderminster Eastern relief road would be very welcome, easing congestion in Kidderminster. This would have the added benefit of improving travel to Worcester, Birmingham and M5 etc without having to go via the town centre. 4. Any new houses in these areas would benefit from this and also the added benefit of easy access to the two mainline railway stations at Kidderminster and Blakedown.
	LPP03533	Option A	Support	I think Option A is preferable as it includes the relief road which surely is desperately needed and suggests better school provision.
	LPP03535	Option A	Support	My feelings regarding the proposed local plan consultation are that WFDC has already made their choice and that this consultation is just a formality they have to go through, based on the fact that there are only going to be infrastructural improvements done to option a this is the one id prefer, id also like it noted that should any further plans for housing be made in Stourport that none is allowed without the developer doing something to improve the roads and local facilities before any permission is granted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP03582	Option A	Support	Our favoured option is A because they can get the roads changes. Stourport is getting none.
	LPP03585	Option A	Support	Support Option A
	LPP03606	Option A	Support	Option A preferred choice.
	LPP03656	Option A	Support	Support option A.
	LPP03695	Option A	Support	<p>Option A</p> <p>Proposes significant new infrastructure in the form of a new road, The Eastern Relief Road, improved access to Kidderminster Railway Station and links to the national network. This will have the advantage of reducing traffic congestion in Kidderminster town centre and nearby estates as well as allowing easy access to the economic powerhouse of Birmingham where many well paid jobs are to be found.</p> <p>It also ensures that there will be sufficient school places for the new residents.</p> <p>Although the Lea Castle site lies within the designated Green Belt this has previously been built upon and in its current derelict state is an eyesore and a blot upon the landscape. Development here would only be an improvement.</p> <p>Although it is understandable that many of the residents affected by option A will be deeply unhappy by the proposals this is clearly to be preferred to Option B as the new infrastructure and proximity to the economic opportunities of Birmingham and the Black Country will bring many advantages to the district as a whole.</p>
	LPP03709	Option A	Support	Prefer Option A.
	LPP03728	Option A	Support	Prefer option A
	LPP03730	Option A	Support	In favour of Option A.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP03788	Option A	Support	Plan A is the better solution.
	LPP03797	Option A	Support	Support Option A on good planning grounds as it would result in new and much needed infrastructure improvements, esp. a new Kidderminster Eastern By-Pass.
	LPP04036	Option A	Support	<ul style="list-style-type: none"> The Kidderminster/Stourport corridor has seen a lot of development in recent years, with several new housing developments. With these have come increases in noise, litter, traffic and road accidents. There is also insufficient parking for local business, with overspill onto side streets and across people's private driveways. Channelling more traffic via this route under Option B would be greatly distressing for residents and detrimental to their health and (road) safety. Keeping facilities more localise in outlying areas should hopefully prevent this from happening Outlying areas will also benefit from local developments and as such should share in the inconveniences caused. Whilst I understand people's concerns around loss of Green Belt land, I believe Option A to be far a far more sustainable and common sense approach to development that will spread the strain across the region rather than concentrating it in areas that are already badly affected.
	LPP04080	Option A	Support	<p>I believe Option A is the answer to local planning. The new developments improve infrastructures, including a Kidderminster by-pass. Option A is on the best side of Kidderminster, improving road access to Bromsgrove, M5, M40, M6. No bridge access is needed.</p> <p>Option B is piecemeal and involves no road improvements, no access improvements over Stourport-on-Severn bridge which is already running to full, with long tailbacks throughout the year. Through Astley Cross village, it is single lane; with good manners keeps it running. The road leads to the Stourport-on-Severn bridge. Traffic congestion is already a problem over Stourport-on-Severn and Bewdley bridge.</p>
	LPP04111	Option A	Support	In relation to the two preferred options being put forwards for development it seems that the obvious option to adopt is Option A as opposed to Option B. I believe this to be for the following

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>reasons:</p> <p>Infrastructure - Option A includes for the proposed Eastern Relief Road which will assist in managing the added traffic which will come to our district as part of the increased population. Preferred Option A would also place residents a lot closer to public transport links such as Kidderminster and Blakedown train stations to access larger neighbouring towns and cities such as Worcester and Birmingham.</p> <p>Employment - All proposed new employment opportunities are being shown on the maps as being in the Kidderminster area so it would make sense to build the new housing nearer to these jobs which will therefore point towards Preferred Option A being the better option. Preferred Option A with the proposed Eastern Relief Road will make it easier for residents to get to the new employment opportunities within our region but will also allow easier access to employment opportunities outside of our initial region in areas such as Worcester and Birmingham.</p>
	LPP04185	Option A	Support	<p>I wholeheartedly agree with proposal A where the potential building is all in one area.</p> <p>Pressure on schools and medical services are localised so new ones can be built rather than cause chaos trying to fit people in to existing 'full' facilities.</p>
	LPP04214	Option A	Support	<p>Neither Option that you offer is totally consistent and I have concerns about both.</p> <p>Of the 2 on offer Option A would seem to be the lesser of two evils and slightly better aligned but have real additional fears that it presents the dangerous significant prospect of narrowing the essential gap between the West Midlands Conurbation and this part of Worcestershire with its unique history and traditions.</p>
	LPP03078	Option B	Comment	<p>I prefer Option B as the housing is spread more evenly across the area rather than a large scale expansion of the eastern side of Kidderminster which would cause even worse traffic.</p> <p>It would also impact on the quality of life of people living on Spennells and surrounding areas</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				who have a large area of countryside which they can access and use regularly for exercise.
	LPP03158	Option B	Comment	Prefer option B. I think there would be more benefits from dispersed strategy.
	LPP03164	Option B	Comment	Prefer option B. More benefits from dispersed strategy.
Land Research & Planning Associates Ltd	LPP0553	Option B	Comment	OPTION B is the preferable one. Still concerns.
Land Research & Planning Associates Ltd	LPP0555	Option B	Comment	NO.
	LPP0181	Option B	Comment	Option B is preferable because it develops the community as whole not just Kidderminster. Expansion and future proofing of school across the district is more equitable.
	LPP0182	Option B	Comment	No. The infrastructure is only necessary, if the development takes place. Improve existing infrastructure.
CORE11	LPP0242	Option B	Comment	We opt for Option b for the reason that, The core strategy and green infrastructure study 2010 which give prime importance to local green infrastructure and a good place to live, will be weakened if "Option a" is chosen. It would be the start of a brick and cement conurbation that is not sustainable, nor could be reversed.
Homes England	LPP0795	Option B	Comment	Provisional requirement for 6,000 dwellings for the Plan period, with the inclusion of previously developed land, including the former Lea Castle Hospital site, and potential greenfield releases, this leaves a shortfall of 2,360 dwellings. Option B, a more dispersed strategy, requires a larger number of sites to deliver the additional 2,360 dwellings, including the release of smaller sites within the rural areas. Development in the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				smaller towns and rural villages would help to support these areas through the provision of additional housing including affordable housing, as well as local jobs through construction, and transferable benefits to those areas provided by the additional population generated by the development. It will also provide choice of location in the housing market, and may deliver housing quicker than focusing on a small number of larger sites.
	LPP0623	Option B	Comment	<p>Employment opportunities are located throughout the district so makes sense to have the housing also dispersed throughout the district so that local people can live closer to where they work, especially as local transport is poor. The bus service is poor and there are no buses at all at the times needed to get to and from the safari park for early or late shifts. Enabling people to live closer to where they work would reduce traffic congestion and allow the possibility of walking or cycling to work.</p> <p>Option B also helps to preserve open space between Kidderminster and the village of Stone, retaining it as a separate community, and retains green space where the local community can exercise. Option B is much better for wildlife as it maintains access to open countryside for the Spennells nature reserve and the important wildlife site at Captains pool allowing wildlife to move freely and so maintain viable breeding populations.</p> <p>Option B is better than option A although some of the core sites in both options are of concern. The plan to build on the fields up to Hurcott village conflict with the aim to maintain clear space between Kidderminster and surrounding villages. It also puts at risk the SSSI at Hurcott with potential detriment to the wildlife there. I object to the proposal to build on the land currently occupied by Captains and The Lodge on the A448 since that will impact on the wildlife using the pool, the woods and surrounding areas. There are hedgehogs living around the site, a species under considerable pressure. The Captains site would contribute to the congestion on Comberton Road going into Kidderminster and also the Mustow Green roundabout, both currently places where long queues can occur that will not be helped by another 300 houses. The proposed Eastern Relief Road would be unlikely to have any positive impact traffic since it would run between two known bottlenecks and merely move the traffic jams to areas</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				just over the border of Wyre Forest.
Worcestershire Wildlife Trust	LPP01052	Option B	Comment	<p>We note that option B has a reduced impact on Green Belt (by area) which is welcome and would be broadly in line with the Government's stated position on Green Belt release. However it retains an unacceptable allocation at Wilden Lane and will still lead to considerable impacts on designated sites and wider biodiversity elsewhere. As a result, and considering guidance in the NPPF (in particular biodiversity guidance in paras. 9, 109 and 117), we do not believe that Option B as it is currently set out offers a sustainable solution to development at present. Please see our comments in response to Paragraph 6.54 for more details.</p> <p>Nonetheless for the reasons set out in our response to Paragraph 6.55 we are not yet convinced that the case for the eastern relief road has been adequately demonstrated and so we do not believe that Option B is fundamentally flawed in not bringing this element of the plan forward. Moreover, whilst we acknowledge that a more dispersed development strategy does cause some infrastructure difficulties we believe that the advantages it has in terms of reducing the risk to biodiversity to the east of Kidderminster outweighs them at this time. We can find nothing in the evidence base to demonstrate otherwise.</p>
RSPB Midlands Regional Office	LPP01174	Option B	Comment	<p>To summarise our position, on nature conservation grounds alone, the RSPB favours Option B.</p> <p>If Option A is chosen the impact on wildlife of local and County importance (specifically, the local corn bunting population) is likely to be greater, and would prompt the need seriously to examine the scope for large-scale habitat compensation in the form of species-rich grassland creation for corn buntings, as part of the development package.</p> <p>If Option A is selected, we recommend further consultation with WMBC to identify how and where best such compensation can be delivered. The RSPB would also be happy to advise further.</p>
	LPP01971	Option B	Comment	My preferred option is Option B providing more housing with less loss of Green Belt.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP01870	Option B	Comment	Option B - not loss of Green Belt and reusing the brownfields, consider going for option B
	LPP03032	Option B	Comment	<p>Question 3 - Do you prefer a more dispersed strategy?</p> <p>Answer. - Yes, as the District Council is not in control of the provision of a relief road/school provision it cannot guarantee their provision.</p> <p>Favour Option B.</p>
	LPP03045	Option B	Comment	<p>If a choice had to be made between Option A and Option B, which should not be necessary for at least the next 10 years, based upon the house building projections, I would choose Option B since this would use 22% less Green Belt land (218 hectares compared to 266 hectares in Option A). It would also provide potential residential building of 6559 dwellings compared to only 6304 dwellings in Option A, 255 more dwellings. It would enable development to be more evenly spread around the Wyre Forest in areas where local communities need dwellings for organic growth, rather than in the overcrowded Spennells area. This would place less stress upon existing infrastructure around Kidderminster.</p>
	LPP03053	Option B	Comment	<p>Kidderminster central and its surrounding areas have so many brownfield sites in which to build and develop. Building in these areas, could regenerate Kidderminster central and transform it from the ghost town it currently is.</p> <p>I am asking that you choose option B as the better option for our area.</p>
	LPP02691	Option B	Comment	<p>I am writing to express my objections to the local plan review preferred options consultation.</p> <p>They are as follows-</p> <ul style="list-style-type: none"> The Council's own statistics show that there are enough brown fields/other capability to fulfil government targets for ten more years. The proposal is for five years (beginning in 2019 will run until seven years from now), and as such no release of Green Belt land will

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>be necessary during this period- “The Green Belt is 13% of the land. We can solve this crisis without having to take huge tracts out of the Green Belt,” the housing minister, Gavin Barwell, said. “They can take land out of the Green Belt in exceptional circumstances but they should have looked at every other alternative first,” he said, including building on brownfield land, releasing surplus government land, increasing the density of projects in towns and cities, or partnering with neighbouring Councils.</p> <ul style="list-style-type: none"> • Whilst I appreciate that there are difficulties in attracting building companies to build upon more difficult sites, allowing the release of more lucrative ‘easier option’ sites will only exacerbate this problem. It may be argued that the Council can negotiate a ‘tie in’ for companies to build upon brownfield/other sites alongside ‘easier’ options, they will then be able to pay a levy to the Council rather than completing these obligations. The Council will not, however, be obliged to spend these resources in Kidderminster/to improve local housing stock that utilises brownfield/other sites. • The preferred option A removes more than twice the amount of Green Belt from our local area than option B (2% as opposed to the Government’s nation benchmark of 1%). This option is purported to allow for new road networks and supporting, but as no information is available, it must be assumed that this is a desire rather than an absolute fact. If one of the two options is to be adopted then option B is the most appropriate, as it will simply extend an already existing new development area with its own direct transport links to both the Wolverhampton and Stourbridge main roads. • In light of the above points my vote as a constituent of this area is that- Firstly, that both plans A and B are unnecessary and unacceptable, but that secondly IF one must be adopted, then it should be plan B.
	LPP02533	Option B	Comment	I prefer Option B. I do not feel the benefits of a more dispersed strategy outweigh the disadvantages, however, the reasoned justifications for Option A seems flawed in many ways, see previous comments.
	LPP02276	Option B	Comment	Which sites do you prefer? – Dispersed Option B

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP03801	Option B	Comment	I object to the Council's strategy for development; evidence shows that the scale is unnecessary. However I prefer Option B notwithstanding I object to the analysis re scale of development.
	LPP03361	Option B	Comment	<p>Option B is more reasonable and realistic, but I would still question whether the existing infrastructure can support such a large number of new houses and the families that will live in them.</p> <p>Kidderminster currently I believe has 3 ambulances and only 1 permanent fire fighting crew. Stourport has 1 ambulance car.</p> <p>Kidderminster hospital has been desecrated and as we all know, all 3 hospitals that serve the area are in special measures with services at bursting point or having been removed completely.</p> <p>What plans do the local authority have to support, maintain services and protect the health and safety of people living in the district?</p>
	LPP04497	Option B	Comment	Option B is my choice but no option chosen should include Green Belt land.
	LPP04455	Option B	Comment	Concern re loss of Green Belt
	LPP04458	Option B	Comment	<ul style="list-style-type: none"> • Static population growth - no need for new houses. • Aging population downsizing - freeing up family sized houses. • High obesity levels - why build on Green Belt land where leisure and exercise activities occur.
	LPP04459	Option B	Comment	We refer first to your request for residents to choose between options A and B of this Review. We prefer neither but wish to comment on their relative merits. In your document the choice is clearly presented in favour of Option A based on two major considerations: 1. provision of educational, medical and community facilities and 2. Provision of a relief road between the Worcester and Birmingham roads. It appears that this advice is related to planning convenience

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>for WFDC. Our comments are:</p> <p>1. Wherever additional housing is built, extra facilities will need to be provided whether they be centralised in just one conglomeration, or existing provisions are expanded to suit needs.</p> <p>If one of the two options A or B has to be chosen then Option B would be the most equitable way of accommodating the suggested housing requirement.</p> <p>Non-Green Belt sites available for building can provide in the region of 3000 houses. This number should surely be more than sufficient for local needs.</p>
	LPP04449	Option B	Comment	Option B requires the acquisition of numerous sites making the process slower and more complex. The additional educational and other facilities required would therefore be more piecemeal and less straightforward. Some sites in Stourport already have permission for development. Transport links are not particularly well supported and the already congested town of Stourport does not have the option for use of a relief road.
West Midland Bird Club	LPP04409	Option B	Comment	We strongly object to both proposals because of the devastating effect these proposals would have on all wildlife within the planned areas. This land is Green Belt Land, South of Spennells and WFDC Core area, East of Offmore Estate. These areas should be maintained for farming and for recreational use such as walking and bird, butterfly and moth surveying. The public foot paths and bridle ways are used daily by both residents and visitors.
	LPP04411	Option B	Comment	<p>Both options rely on developing Green Belt land which I believe is the 'easy way out' for the council and is supported by some extremely questionable 'evidence', particularly the extremely poor quality of the 'objective assessment of housing need'.</p> <p>Developing Green Belt land is extremely short sighted for a number of reasons, but especially in the light of 'Brexit' as the Green Belt land earmarked by the council is very productive farm land which will be of benefit to the country (and of course, local farmers) if tariffs are placed on</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>produce grown in Europe.</p> <p>The Green Belt is also supposed to stop communities merging into one another and becoming yet another urban sprawl.</p> <p>Building on Green Belt land is also the easy and most attractive option for developers, and the easy option for the council. The council should not give in to pressure from developers and land owners eager to make a 'quick buck' instead of thinking more creatively about where new housing should be allowed, but instead should consider the needs and well-being of local people and put them at the fore-front of their decision making.</p> <p>Both options also mean a disproportionate amount of housing development would centre on and around Kidderminster, which does not have the infrastructure to support it. The schools are now near or at capacity, so where does the money come from to provide new schools for these developments?</p> <p>I would challenge the need for so many homes in the area. The growth forecasts on the OAHN have been over-inflated, as there has not been significant rise in the local population in the past 10-15 years.</p> <p>There is very little employment actually in the Wyre Forest and most people commute to bigger towns and cities to work. Already, all roads in and out of Kidderminster are congested during the morning and evening 'rush hours' and building more, unnecessary, homes would make that worse, as people would come to live here, but have to commute elsewhere to work.</p> <p>My preferred choice of the two is B, as it has less impact on Green Belt land, especially with regards to the fields adjacent to Spennells.</p> <p>Although I reluctantly support option B, I do not think we have been offered a fair choice at all and if this is indeed a consultation exercise, perhaps the planning policy team will take on board</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				the objections I and hundreds of others in the Wyre Forest have submitted and come up with a better thought out option C. Finally, it seems unreasonable that an unelected planning policy team and a few local councillors on the planning committee have the power to make such momentous decisions that will have such a detrimental impact on so many people's lives. Some of the planning committee also have Green Belt land earmarked for re-designation in their ward and will naturally be under pressure from residents to oppose development there and instead vote for it in another ward. I hope that this will not be allowed to happen.
	LPP04415	Option B	Comment	I do not support option B. I would urge you to consider the requirements of local residents, rather than those of large developers in this plan, as well as the implications of destroying the local countryside, which is well used and loved by the local community. Have a look at brownfield sites first.
	LPP04416	Option B	Comment	Option B already has significant road access especially surrounding the Lea Castle area. Spreading the housing out across the district would help spread number of children needing schools although a primary school should be made for either option and would be needed for the Lea Castle area. More importantly reducing the number of houses needed would mean less Green Belt is used in option B as more brownfield land is used. Something the council should push for harder
	LPP04418	Option B	Comment	I neither fully support option A or B as they stand at present. I do feel that housing should be spread as equally as possible across Wyre Forest so that it does not negatively impact one side/area. I also would also not support Lea Castle becoming a huge estate because of its surrounding road links. I do not support any surge to push housing onto Lea Castle so that building does not have to occur to the south/Spennells area or Stourport— any building should be fair to all areas and the load shared. There is argument that south of the town is better access to the motorways. I do not support building on the land opposite the entrance to Lea Castle. I am in support of a relief road, but were this not in the final plan then even more the need to 'spread the load' in terms of housing and commuting as well as easing traffic in already busy and congested areas. Controlling traffic flow/safety is paramount. Planning must take on board residents' concerns so as not to disadvantage people like myself who have lived in Kidderminster

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				and the surrounding areas all their life. People need to feel that Wyre Forest District Council is there for all its people.
	LPP04419	Option B	Comment	Prefer Option B.
	LPP04431	Option B	Comment	I would like to highlight my objection to WFDCs plan to sacrifice large swathes of Green Belt land around Kidderminster for housing development and do not support option B.
	LPP04251	Option B	Comment	<p>We are in favour of a sensibly modified Option B for the following reasons:</p> <ul style="list-style-type: none"> • The Population Growth figures suggested in the report are speculative and dependent upon the aspirational target for employment growth. • Option A states there is no significant natural interest in Spennells Fields and the site known as Captains. This is incorrect. • The local infrastructure demands of any development are not addressed. • There is a failure to take a holistic view of the housing need alongside that of the Southern/ Eastern bypass and the development of the Railway Stations. A bypass consumes large quantities of land. • Option A will not address the need for affordable homes. (CRE) • There will be a major and significant loss of amenity to the residents of Spennells should Option A be adopted. • The suggested growth of Employment Opportunities in the Wyre Forest is not supported by current employment patterns. • Watercourses are already compromised in the area known as (WFR/ST/1) Captains and The Lodge. • The loss of Green Belt, arable land and hedgerows should not focus in the main on one particular area. Wyre Forest will be best served with a geographically widespread plan.
	LPP04367	Option B	Comment	Only support if all the alternatives to Green Belt development have been fully explored and any development was dispersed.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP04654	Option B	Comment	<p>In effect, both Options A and B suggest ribbon development. Neither option envisages a community that could be centred in the midst of the development.</p> <p><u>Option B</u> the second bullet point says “Additional development at Lea Castle will put additional pressures onto the A551 and A449”. This statement ignores the fact that Baldwin Road, and Hurcott Road, are already used as a rat run for traffic on the A456 from Birmingham travelling to and from Stourbridge and Wolverhampton. Development to the east in both options may also be used in this way. In addition, the Government’s own policy “to conserve, enhance and restore the diversity of England’s wildlife” would be compromised by the effects on Hurcott village nature area.</p>
	LPP04840	Option B	Comment	<p>I have questioned the impact of an Eastern Relief Road. If Option A was adopted a new access road would be required but other than access to the new developments it is not shown how it would relieve congestion on the existing network. Any development would increase air pollution. More analysis would be required here.</p> <p>‘The absence of additional infrastructure impacting oneducational provision’ is at odds with the Draft Wyre Forest Infrastructure Delivery Plan (2017), which indicates the estimated Education Infrastructure Costs for Option A at about £30m and about £25m for option B. This indicates an impact of the same order of magnitude and therefore at this stage of the argument probably not significant.</p>
	LPP05124	Option B	Comment	Option B uses less Green Belt and creates more houses yet isn't the council's preferred option.
	LPP03152	Option B	Object	Concern with option B.
	LPP0487	Option B	Object	I object to Option B
	LPP0426	Option B	Object	<p>I object to Option B.</p> <p>Green Belt land should be used only as a VERY LAST RESORT.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collaborate and collectively review overall brown field site availability and plan housing development accordingly – decisions to build on the Green Belt should not be based on local authority boundaries.</p> <p>The 5 year rolling time frame for construction sites should allow for regular reviews of brown field sites and enable changes to be incorporated into any plan,.</p> <p>The plan fails to recognise changes in shopping habits and unrealistically targets retail expansion and comparison shopping.</p> <p>Kidderminster has suffered from the failure to 'tidy up 'following the migration of Kidderminster town centre to Weavers Wharf and Crossley Retail Park.</p> <p>Retail premises and the courts building have been empty for 8 /9 years - the regeneration of such sites require radical solutions for alternative use that reduce any need to build on the Green Belt.</p> <p>Unnecessary decisions are being taken now e.g. in 1999 who could have predicted the impacts of the 2007/08 economic collapse or changes caused by online shopping (indeed, the plan itself demonstrates an inability to predict /understand short term population levels in the District).</p> <p>The plan fails in its stated aim to "to use a robust and up-to-date evidence base to ensure that the local plan meets the full, objectively assessed needs for market and affordable housing in the housing market area" . Instead it aims to justify what developers want to deliver rather than meet the needs of Kidderminster residents.</p> <p>Previous attempts to build an Eastern relief road have failed - the plan fails to present evidence based data that supports it in economic or environmental terms - at the consultation session I was informed this would be a single carriageway 40 mph road following the same route as the existing road from the Worcester Road through Mustow Green to the Birmingham Road - is it</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>really a relief road at all?</p> <p>Whilst constructing a new school in the Spennells area appears attractive this (together with the promise of the 'relief road' shouldn't be the determining factor when opting to build on the Green Belt – other options should be sought.</p> <p>Many people commute into / and out of Kidderminster now (hence the railway station development) - and have done so for many years. This situation equally relates to the areas covered by the LEPs identified in the plan.</p> <p>Whilst economic development in Kidderminster will be welcome - past experience shows this will take time – in the meantime people will continue to travel.</p> <p>Immediate need is for fresh radical thinking that optimises the use of brown field sites throughout the LEP areas for residential use and enables Kidderminster itself to become a modern, contained and attractive town centre that incorporates retail leisure and residential opportunities rather than pursue outdated models from the past - 'mixed use' communicates little other than the elements of 'wishful thinking' so often reported in the local press over numerous years.</p>
	LPPO366	Option B	Object	<p>If new houses are required the infrastructure MUST be in place which has to include roads (Stourport is already gridlocked most of the time) schools are oversubscribed and doctors at capacity.</p> <p>Green Belt must be protected at all costs, use brownfield sites first for any houses/schools and doctors.</p>
	LPPO402	Option B	Object	See summary LPPO400.
	LPPO614	Option B	Object	This was published under the 2010 to 2015 Conservative and Liberal Democrat coalition

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>government-:</p> <p>This government has been very clear that when planning for new buildings, protecting our precious Green Belt must be <u>paramount</u>.</p> <p>Local people don't want to lose their countryside to urban sprawl, or see the vital green land around their towns and cities go to unnecessary development.</p> <p>The council can meet their housing needs by prioritizing Brownfield sites, and fortify the Green Belt in their area.</p> <p>Only when every brown field site is exhausted should any consideration be given to Green Belt land.</p> <p>Greatest concern is the pollution due to vehicle exhausts, it is already very high due to queuing traffic outside of my home which is close to Burlish Crossing.</p> <p>I live next to Green Belt land and would like it to remain so. I say no to Plan B.</p> <p>I am strongly against any Green Belt land being used until all brown sites have been used.</p>
	LPPO2073	Option B	Object	<p>Please respond to following::</p> <p>The infrastructure for option B's dispersal strategy is of concern. Stourport facilities can't cope now e.g. lack of public toilets, so improved infrastructure - schools, roads, doctors, fire services needed first.</p> <ol style="list-style-type: none"> 1. Building a new town possibly at Lea Castle, is more sensible/cost effective and

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				centralising will reduce the impact on Green Belt.
	LPP02079	Option B	Object	<p>Option A, with an eastern by-pass/new link road from Birmingham Road, is preferable to Option B.</p> <p>Kidderminster and Stourport are already stretched - doctors, dentists, schools and heavy summer traffic w/o any new development.</p> <p>Option B has always been farmland so despite need for extra housing, the sites in Areley Kings are not feasible and opposed to by myself/others. The road from Areley Kings to Stourport is narrow and could not cope with extra traffic.</p>
	LPP01902	Option B	Object	Plan B would be unthinkable with the number of houses to be built adding to the already ridiculous amount of traffic on the Areley Kings side of the bridge! The infrastructure would never cope with more cars, people dying for space! The schools, doctors and roads are at breaking point now!!
	LPP01939	Option B	Object	I object to both Options and I think it should be re-thought. This is a massive decision for Wyre Forest so we must be sure to get it right. Protect all Green Belt as far as possible.
	LPP02954	Option B	Object	<p>Nobody wants to lose greenfield sites and would hope that all brownfield sites would be developed before any other land was considered.</p> <p>Stourport/Bewdley area would be worse off because of the heavy traffic problems already experienced by crossing the bridges. It seems that Option A would include new infrastructure whereas Option B will not include any.</p>
	LPP02895	Option B	Object	In the draft plan there are aspirations to redress the imbalance in the age of the population, attract more business and jobs. Destroying the Green Belt to build houses does nothing to address these aspects of Kidderminster's future. The idea that almost 6000 houses are required when clearly the population of Kidderminster is not growing at a significant rate seems like a

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>grossly inflated figure. The 2.7% increase in the last two years is almost certainly the effect of increased immigration from Europe, which may reduce as some return to their own countries following Brexit.</p> <p>Average age and jobs: To lower the average age of the population it is necessary to attract young people to the town for which you need jobs and cheap housing. In fact the biggest problem facing youngsters today throughout the UK is that they can't afford to get on the housing ladder. Just building new houses on Green Belt land will not help. A potential solution to the housing problem would be to have the derelict and unoccupied properties, of which there are many, in the town converted to flats. This may require the use of compulsory purchase orders, which must be within the power of the Council. The resultant dwellings, would be cheaper to buy or rent, would attract young people and would help to revive the town centre. The proposed use of the Glades site for retail should be changed to more flats for the same reason. Cheap housing will not be found on Spennells Green Belt. Young people will be the people to develop new businesses; older people with established careers will be reluctant to take risks.</p> <p>Green Belt effect: Building houses on green field sites to the east of Kidderminster could have an adverse effect on the average age of the population. Any developer building on that land will want to build 4 & 5 bed houses not only to increase his revenue but also to recover the cost of the land he has purchased. They will not want to provide affordable housing at the 30% level. This will attract commuters from Birmingham and Worcester. And will exacerbate the commuting problem.</p> <p>My objection: I am strongly opposed to both of your preferred options. I believe that developing cheap flats for younger people will balance the ageing problem and help to create new businesses. I believe that to meet the need for affordable housing all brownfield sites in the town should be redeveloped first. No Green Belt land should be built on until the redevelopment of the town centre has been completed and all flats occupied.</p>
	LPPO2896	Option B	Object	I understand and accept that more housing needs to be built in the Wyre Forest area but I feel it

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>is essential to upgrade, develop and extend road ways/links which are already very busy in order to keep traffic flowing.</p> <p>Infrastructure needs to be upsized to cope with the extra population particularly:</p> <p>Schools — In our area I believe Cookley Primary cannot cope with any more capacity and both Cookley and Wolverley Secondary school have very restrictive vehicle access and parking capacity. I think provision for new school(s) would be essential.</p> <p>Hospital — It is my opinion that Kidderminster Hospital already desperately needs upgrading to serve the people of Wyre Forest and surrounding areas so obviously with more population that would become even more important — we cannot keep adding to the pressure of Worcester and Russell's Hall.</p> <p>Of the two options proposed in the local plan review, I think Option A is preferable as it includes the relief road which surely is desperately needed and suggests better school provision.</p>
	LPP02855	Option B	Object	I strongly object to Option B.
	LPP02863	Option B	Object	Option B is more dispersed and will not bring any improvements but will worsen traffic congestion on Bewdley and Stourport bridges and affect the air quality in Dunley Road area
	LPP02747	Option B	Object	Objection to the whole draft local plan for Wyre Forest.
	LPP02702	Option B	Object	<p>I strongly disagree with both Options A and B.</p> <p>There is no need for 6,000 new houses in Kidderminster. As in the Council's own report the population of Kidderminster has remained static. Therefore I do not believe there are "exceptional circumstances" in Kidderminster that require the removal of protection of Green Belt land to build so many houses. A new, fair independent report should be completed as the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>existing one is obviously biased.</p> <p>If no alternative can be found I prefer Option B as it develops less of the Green Belt and it is much fairer to spread the developments. People prefer to have a choice of area to live in to be close to existing friends and family so I believe spreading out development would be better for the people of Kidderminster.</p>
	LPPQ2709	Option B	Object	<p>Please note my objections to both Option A and Option B of the Local Plan Preferred options.</p> <p>I don't think it's fair to offer a Plan A and B which both involve destroying our local Green Belt which is so close to many of our residents' hearts. Green space is important for emotional and physical wellbeing. As a nation, we grow less than two-thirds of our own food. Now, more than ever, we need to avoid unnecessarily losing our countryside. Why can't we utilise our brownfield land instead of destroying our precious countryside, which is home to rare and endangered wildlife like the Corn Bunting, Long-eared Bat and a Horseshoe Bat.</p> <p>I have lived in Kidderminster many years and have always valued the local Green Belt. It played a huge part in my childhood wellbeing and I have very fond memories of going on nature walks with my family and playing with my friends. Our Green spaces should be protected as once they are gone they are gone for good.</p> <ul style="list-style-type: none"> • Green spaces and farmland are important habitats for wildlife, some species of which are rare/endangered i.e. the Corn Bunting. • In our efforts to tackle the housing crisis, suitable brownfield land and not Green Belt should be the priority. This should be utilised first and foremost, before any Green Belt land is even touched. What about the derelict and vandalised Sion Hill school site? There are places like this all over which have not been utilised after about a decade and yet you propose to destroy our Green Belt. • The amount of housing you propose to build is completely unnecessary and based on figures that apply to our nation as a whole and not the local area's needs. You have also

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>rounded figures up. This is completely unacceptable and one can only assume this has been done to make money first and foremost, and not with the wellbeing of our local people in mind.</p> <ul style="list-style-type: none"> • Our local government has only closed schools over the years and you now want to move thousands more people into our town. Where will they go to school? Where will they go to the doctors, or the hospital? How will our Police and Fire services cope with the increase? There already aren't enough GPs for the town's population and it's already difficult enough to get a doctor's appointment. Kidderminster Hospital has been downgraded. • I don't feel that this proposal has been purposely kept quiet- I only found out about it from a family member who had a leaflet through her door. I didn't have any warning whatsoever and neither did several other people I know. I also believe it has been designed in a way as to pit 2 parts of our town against each other, with one side hoping you will use Option A and the other wanting Option B with no option available to people who don't want any Green Belt used. Is this not an option? • Houses on the Silverwoods development remain unsold; why is there now a need for such massive development when there appears to be insufficient demand already? This huge building project was supposed to solve Kidderminster's housing needs for the foreseeable future. Once again this contradicts decisions made by the Planners. Was the mistake then or now? • There aren't enough jobs in the area to support this huge influx of people. This will render new developments commuter ghost towns and increase traffic on main roads. <p>To summarise, I do not agree with Plan A or Plan B. I believe there is no need for such urban expansion.</p>
	LPP02474	Option B	Object	In response to the two options on display at the planning consultation at Areley Kings Village Hall on 26 th July I feel compelled to make the following observations and comments.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Option B is a non-starter for a number of reasons.</p> <ol style="list-style-type: none"> 1. The infrastructure in Stourport is inadequate to cope with the current demands of residents and the visitors, particularly during rush hours and summer weekends when the town is busy with holiday makers and tourists. 2. During the peak hours it is now at present normal to be stuck in massive traffic jams to enter and exit the town with the bridge traffic often stationary. I would offer the view that even as things are, should a major incident occur requiring large numbers of emergency services vehicles needing to access the bridge, it would be impossible to be dealt with in an efficient manner and would inevitably result in delays resulting in serious injury and a potential loss of life due to the current volume of traffic. <p>With this in mind I dread to think what the consequences could be with the additional housing and population should option B be adopted in the event of any unforeseen catastrophe?</p> <ol style="list-style-type: none"> 1. If plan be were to be adopted where would the children of school age be educated? Two schools have been closed in the last few years, once again this will mean additional cars on the road during “the school run” which will also add to the problems mentioned above while increasing the parking problems associated with dropping off and collecting the children. 2. As a pensioner with health problems I feel qualified to question whether the two doctor’s surgeries could cope with the additional influx of patients as it is not unusual to have to wait several days for an appointment now. 3. About 10 years ago Vodafone applied to erect a telephone mast adjacent to the field in Pearl Lane. Research uncovered certain facts, one being the field on Pearl Lane is part of an “area of outstanding natural beauty” and as such cannot be built on! It goes without saying the proposal was turned down by the Planning Committee. <p>In closing I wish to object to Plan B on the above mentioned grounds as I feel Kidderminster is better equipped to handle the increase in population and the town centre is in desperate need of</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				the extra footfall to make it a viable area for future investment.
	LPP02269	Option B	Object	<p>We oppose the adoption of the Local Plan, both Options A & B including the Core Areas of The Captains and the Lodge because :-</p> <ol style="list-style-type: none"> 1. There should be no erosion of the productive Green Belt land as there will be an increased need for the UK to provide more food production rather than import food once we have left the EU. 2. Loss of Green Belt will further endanger wild life, both flora and fauna. 3. Loss of Green Belt will also reduce the natural area for people to exercise, as the current areas have many public paths. 4. Proposed building on areas designated as natural flood plans seems fool hardy, as there is plenty of local evidence showing the damaging effects this can have on other areas. I.e. Bewdley, Upton on Severn, Tewksbury etc; 5. Loss of Green Belt will add to the global warming effects that are projected. 6. The increase in population predicted in the new plan will not be able to be employed within Wyre Forest and will thus need to commute to Birmingham and West Midlands, and Worcester. The Wyre Forest has seen a reduction in manufacturing over the last 5 to 10 years in trades that rely on large numbers of workers. Any new businesses are more likely to be high tech and requiring less personnel. 7. Due to item 6 above, roads will become more heavily congested, causing more health problems due to greater levels of engine exhaust emissions. 8. The existing trunk road system in and around the Wyre Forest area is currently running at full capacity with no real plans evident to address the situation. 9. Increased population will need more health facilities both at GP level and Hospital. Wyre Forest has seen Kidderminster Hospital services progressively reduced and this would need to be reversed. Likewise more GP surgeries would be required and the concern there seems to be a national shortfall in GPs. Whilst the Government states that more will be trained, the Royal College of GPs has revealed that some 20% are likely to leave. It is not clear in the Proposed Local plan if the areas required for additional medical

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>facilities are included in the plan or would be additional to it.</p> <p>10. Current public transport is very poor and needs substantial investment to serve the current population levels let alone increased population.</p>
	LPO2275	Option B	Object	<p>Option B</p> <p>Does not come with any new infrastructure and, therefore, any development west of the River Severn will increase congestion and pollution in both Stourport and Bewdley?</p> <p>In particular development at Areley Kings will exacerbate an already unacceptable level of congestion and pollution at the river crossing and along the High Street where the additional vehicle emissions occasioned by an additional 550 families (potentially 1000 plus vehicles) would require an Air Quality Management Plan which would be difficult if not impossible given the limited options in the restricted area of the High Street.</p> <p>The LPR also highlights concerns that the district has "Very poor public transport and high levels of traffic congestion with poor strategic transport infrastructure" (LPR; paragraph 2.10. p 15)</p> <p>This is especially the case in Stourport where it can take up to 20 minutes, at least, to cross the bridge from Areley Kings and negotiate the town centre by car and where most of the strategic car park at Vale Rd has already been sold to housing developers.</p> <p>Public transport is also very poor. The bus journeys from Bewdley and Stourport town centres, respectively, to Kidderminster bus station each takes over 30 minutes at best, meanders around several estates and provide no direct link to the railway station.</p> <p>Option B also fails to take into account pressures on local services such as doctors, police and fire that an additional 1547 families will make to Stourport's already oversubscribed amenities. The LPR itself describes the provision of additional sufficient, appropriately located education</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>facilities as "problematic". (LPR; paragraph 6.56, p45)</p> <p>It would also appear that Option B is less likely to meet the identified need for affordable housing. (LPR, Table 6.0.6, p41)</p> <p>A further disadvantage of option B is that it advocates urban sprawl in many different parts of the district. In addition to the problems of pollution and congestion already highlighted this encroachment on to the countryside will inevitably result in the loss of valuable agricultural land as well as natural habitats and would seem to contradict the council's overarching principle of "protecting and enhancing green infrastructure" (LPR, section 5.4, paragraph c vi, p22).</p> <p>Although it is understandable that many of the residents affected by option A will be deeply unhappy by the proposals this is clearly to be preferred to Option B as the new infrastructure and proximity to the economic opportunities of Birmingham and the Black Country will bring many advantages to the district as a whole.</p>
	LPPO2264	Option B	Object	<p>I write in relation to the Local Plan Review Consultation for Spennells estate in Kidderminster. I would like it known I strongly object to Option A and Option B.</p> <p>I shall outline my reasons below:-</p> <ul style="list-style-type: none"> • There will be an increase in traffic, noise and pollution from cars. This will have a detrimental effect on our mental health and wellbeing. Unsafe for our children to play out. • There will be an increased pressure on local schools. The class size will become too large and there would be fewer resources available to the students. Parents will have to bring their children to school in their car; again which will have an increase in pollution. • There is a good variety of wildlife in the area which will be lost, that nest on the fields i.e. Linnets, Skylark, dormouse etc. Wildlife should be protected. Also a lot of the trees on Spennells have preservation orders on them. Impact on the wildlife which feeds and

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>grazes the land is to be protected.</p> <ul style="list-style-type: none"> • It will have a loss of agriculture land which is of a good quality. • There is a public right of way on these fields which would be lost, which would contribute towards our mental health. • There would be a large increase in pressure on already stretched services for Doctors surgeries, hospitals, dentists and opticians, school and nursery on Spennells. • These fields are an important/integral part of the Spennells estate as a lot of people use the fields in a variety of ways. For instance, just going out for a stroll, walking their dog, riding/training their horses, children playing, running/jogging training, to recuperate from illness, exercise and interaction with friends for a walk and chat. • There is already an issue with traffic trying to get off Spennells during the day, this new development will only make matters a lot worse, more accidents can occur. There will be an increase in noise and car pollution which again has an effect on mental health. Extra pressure on our roads, more potholes to fill in after winter, heavy congestion. • Loss of internet speed and quality. • Extra busses and traffic which will be a safety issue for adults and children alike. • There will be drainage issues as the fields would be a good resource for a soak away, showers will lose pressure.
	LPPO2403	Option B	Object	<p>Prefer Option A which will bring much needed infrastructure improvements /job growth and other developmental benefits/investment in the area in terms of new businesses/other types of facilities and serve a greater proportion of the population than dispersed development of Option B.</p> <p>A new Kidderminster Eastern Relief road will ease congestion but Option B will bring no new benefits and worsen current traffic congestion in Bewdley/Stourport esp. Bridge area.</p> <p>Impact on emergency vehicles/rat runs could develop.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

				<p>Pedestrian safety/lack pavements.</p> <p>Spoil views/peace and quiet of the countryside/impact on recreational use/loss of agricultural land.</p> <p>Impact on council's conservation policy lists</p> <p>Already pressures on medical/educational provision would be easier to provide in bigger developments.</p> <p>New incomes may commute so provide housing where road and public transport improvements can be provided.</p>
	LPP02404	Option B	Object	<p>Support for Option A/object to Option B as it is unsustainable in the local area and is detrimental to the local community.</p> <p>Option A: New, much needed infrastructure improvements to serve more of the population than Option B which could impact on emergency vehicles/cause rat runs on narrow roads affecting pedestrian safety/loss of recreational land/views/agricultural land. Pressure upon medical/educational provision and few new job opportunities as opposed to Option A which may encourage job growth. More brown-field sites are available in and around Option B, rather than the greenfield area of Option A which may only attract commuters.</p>
	LPP04140	Option B	Object	I do not agree with any option that builds on Green Belt.
	LPP04066	Option B	Object	<p>Neither Option that you offer is totally consistent with the points made above and clearly I have concerns about both.</p> <p>I welcome the fact that the Town and District Councils have justifiably rejected the Gladman Appeal and their speculative proposals. But if they are approved what then? - surely we would not want to increase the damage done to our towns by their success by pressing ahead with</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				either of these options -particularly Option B which would have even greater and adverse effect on Bewdley and Stourport and their green surroundings.
	LPP04023	Option B	Object	Option B should be rejected.
	LPP03858	Option B	Object	<p>The expected travel time 10 minutes, the actual travel time was 25 minutes. The cause of the long traffic queue from the top of Dunley Road into town? There were no roadworks, the delay was purely down to the volume of traffic trying to move through Stourport. This was not a one-off event. It is not unusual for there to be long queues trying to cross Stourport bridge.</p> <p>If option B is selected, what plans are proposed to manage the extra traffic that is bound to arise with hundreds more houses expected?</p> <p>What plans are there for managing the fact that one of the proposed sites in Areley Kings lies on what was once marshland and is at the lowest point of the water table?</p>
	LPP03789	Option B	Object	Plan B has disadvantages, inc. access to facilities/traffic congestion.
	LPP03657	Option B	Object	Object to option B.
	LPP03659	Option B	Object	Object to Option B
	LPP03275	Option B	Object	I object to plan B and “Core sites”.
	LPP03224	Option B	Object	<p>I think that by dispersing the developments it will bring major problems with infrastructure in particular, the roads and traffic congestion over the river bridges in Bewdley & Stourport. For example, the increased traffic from the proposed developments at Areley Kings will only increase the known traffic congestion over the bridge and exacerbate the air quality issues in Stourport town centre/the Gilgal etc.</p> <p>The other issue is medical & educational services. These would be family houses and would undoubtedly increase demand for school places and doctor’s services –both already under</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				pressure in both Bewdley & Stourport.
	LPP04498	6.56	Object	Q 6.55 and 6.56: I wished to comment again on how the options for redevelopment have been unfairly portrayed. Question 6.55 outlines benefits of Option A before asking for an opinion whereas question 6.56 outlines the disadvantages of option B before asking for an opinion. In order for this document to fairly ask for people's opinions without swaying their judgment both options should be weighed up with advantages and disadvantages before asking for the opinions of residents. The document should be impartial and allow residents to create their own opinions and decisions independently and without influence from the council.
	LPP04447	Option B	Object	<p>Please note my objections to both Option A and Option B. First of all, there are areas common to both Options, on Green Belt land. Does this mean these cannot be questioned?</p> <p>My objection is not that Kidderminster needs no additional housing, but Green Belt land should not be used:</p> <ul style="list-style-type: none"> • Green space is important for emotional and physical wellbeing • Green space is a diminishing resource and should be protected. Once it is gone it cannot be regained • Loss of farmland will lead to insufficient food for the Country – imports are costly and cannot be guaranteed, especially with Brexit looming • Building on undeveloped land causes flooding. When land is covered by concrete/tarmac the surface water runs off and has to go somewhere. Broadwaters is already prone to flooding by the park, building at the top of the hill can only make this worse • Green spaces and farmland are important habitats for wildlife, some species of which are rare/endangered. From my garden I have personally seen deer, grass snakes and bats. Bats are a common sight in the evening – during the last few years I have found a dead long-eared bat and a horseshoe bat in my garden so I know for certain that those species live in the Hurcott area.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Kidderminster's infrastructure cannot cope with this expansion – schools, doctors, dentists and roads are insufficient. Numerous schools in the town have been closed over the last 10-15 years – presumably the Council decided they were undersubscribed. Which is the mistake? Short sighted decision then or the apparently imminent population explosion now?</p> <p>Kidderminster Hospital has been downgraded. The closest A&E department is now a 45 minute drive from the town. This will cost lives in times of emergency.</p> <p>Urban sprawl on the scale proposed is not in keeping with Kidderminster's semi-rural character. The size of development planned for the north east side of town is massive – 1100+ houses in a tranche will completely alter the character of the town and destroy Hurcott Village, spoiling a historic area forever. The roads around the Park Gate public house, Hurcott Lane and Birmingham Road are already dangerous with numerous accidents occurring. The massive increase in traffic which would result from these plans would worsen the accident rate and cause gridlock. The Clensmore development has made the Horsefair congestion much worse as no change to the road system was included. Further development on this side of town will only add to this.</p> <p>Properties on the Silverwoods development remain unsold; why is there now a need for such massive development when there appears to be insufficient demand already? This huge building project was supposed to solve Kidderminster's housing needs for the foreseeable future. Once again this contradicts decisions made by the Planners. Was the mistake then or now?</p> <p>There are not enough jobs in the area to support this huge influx of people. This will render new developments commuter ghost towns and increase traffic on main roads.</p> <p>I believe Kidderminster should use all of its brownfield sites before any further destruction of green sites is even considered. There are numerous factory sites and sites where schools have been closed – apparently these schools were not required but now they are needed again to support the massive expansion plans! The site at Sion Hill has planning permission but is still lying</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>derelict. Crown House in the town centre is an eyesore and could be used, as well as the plethora of empty shops and offices in the town. This would rejuvenate the town centre; at the moment it is dying.</p> <p>To summarise, I do not agree with Plan A or Plan B. I believe there is no need for such urban expansion.</p>
	LPP04378	Option B	Object	I am strongly opposed to the Options suggested. The district Council is not trying hard enough to use the brownfield sites that are available.
	LPP04385	Option B	Object	I have to object as neither are viable options. Option B is totally unsustainable in that it places a lot of additional development the wrong side of the river in Stourport-on-Severn, creating increased traffic pressure on the bridge, pressure on existing schools in Areley Kings and there is little provision for shopping nor any medical provision that side of the river. With no alternative river crossing or by-pass in prospect, this cannot be a serious proposition as the existing infrastructure cannot sustain further development.
	LPP04389	Option B	Object	None of these options but another option
	LPP04395	Option B	Object	Object to option B, lack of infrastructure and to the use of any Green Belt land.
	LPP04410	Option B	Object	<p>Object to option B as its Green Belt; brownfield sites should be considered first. Local infrastructure - roads, traffic, schools, doctors insufficient/local hospital has no A&E.</p> <p>Kidderminster town centre is worst it's ever been half the shops are empty/rates are high.</p> <p>Houses could be built on former Glades old site, Park Lane, Mill Street, the old PO and above the shops in the town centre. As £1.4 million was spent on renovating 3 derelict cottages in the Horsefair then we should do so before touching Green Belt.</p>
	LPP04413	Option B	Object	I do not support option B. I would urge you to consider the requirements of local residents,

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				rather than those of large developers in this plan. As well as the implications of destroying the local countryside, which is well used and loved by the local community. Have a look at brownfield sites first.
	LPP04426	Option B	Object	I object to the B proposals as you are putting forward an option to build on prime farming land, which has very diverse wildlife on it, (including protected species such as bats, badgers and great crested newts), and also concentrating too many houses on the east of Kidderminster, overwhelming the existing communities which could cause social problems further down the line.
	LPP04427	Option B	Object	My objections relate to Option B and the flawed way in which the figure of houses required has been arrived at. I am in favour of utilising the use of Green Belt only as a last resort. I feel we are far from a last resort and that this area just does not require a volume which cannot be met by utilising brownfield sites both identified already and also ignored.
	LPP04433	Option B	Object	Object instead re use of Brownfield sites and town centre rejuvenation.
	LPP04435	Option B	Object	I am writing to strongly object to the building of extra housing as explained under the draft Local Plan Preferred Options A and B. My reasons are as follows: <ul style="list-style-type: none"> • The population of Kidderminster over the last few years has remained fairly static and this proposal will unnecessarily attract more people into a market town that is currently ill equipped to handle such an influx. • Both Options will involve the loss of a tremendous amount of Green Belt and agricultural working farm land. Option A would be far more disastrous, and would also result in the loss of wildlife in the nearby woodland areas. I believe the Council has a duty to protect these Green Belt areas and the wild life that lives there for future generations. • Loss of local footpaths and bridleways, where many of the local residents and indeed schoolchildren spend recreational time, and indeed is the very reason why many people

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>have chosen to live here!</p> <ul style="list-style-type: none"> • The building of houses under Option A, and to a lesser extent Option B, will cause the loss of the natural break from the other nearby communities, creating an ugly urban sprawl and eat into the lungs of Kidderminster. Furthermore, additional housing would increase the Carbon Footprint. • Heavy traffic on local roads which are not suitable for the amount of housing proposed. They are always in a poor state of repair which can only get worse, requiring additional Council spend. • The proposed housing is situated too far for most people to be able to walk into town so additional bus routes would be needed. • There will be an over capacity for local schools, doctors and hospitals. • At a time when the nearest fully functioning hospital is already stretched to capacity and under special measures and the local Kidderminster hospital is operating as a “drop in centre”, what guarantees can the Council make that the necessary and sufficient amenities for healthcare would be actually provided? • With BREXIT looming and the uncertainty that it will bring to the ability to forecast public spending, how can the Council justify increased expenditure on infrastructure and services necessary to support an expanded community, without jeopardising their ability to remain in office? • What Job opportunities are available for an increased population in a run down and depleting Kidderminster, where shops and businesses are closing at an alarming rate? Could this mean that eventually people will want to move away from Kidderminster to seek employment, ultimately defeating the object of attracting them there in the first place? <p>I urge the council to throw out both Option A and B, not to destroy beautiful Green Belt and wildlife areas that can never be replaced, and to spend the money primarily on regenerating a rundown Town Centre. However, if it is proved to be a definite need for additional housing, then reluctantly Option B would be my preference.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPPO4738	Option B	Object	Do I prefer Option A or B? The immediate answer is neither. The amount of land taken up by these two proposals especially the core sites is too extreme. The amount of additional infrastructure required for schools, health facilities etc. looks from this perspective to be too costly and will never be completed. Where are these additional schools or Form Entry (not sure what this means) to be built within this new development without compromising all the other factors such as green infrastructure, transport, water and sewage etc? What about the unique place and all the other considerations?
	LPPO3182	Option B	Support	It would involve the loss of less Green Belt land together with all the wildlife that goes with it It would deprive the locality of less good quality agricultural land A dispersed strategy is good as the affect of new development would be spread more evenly around the district
	LPPO3081	Option B	Support	I am writing to notify you of my preference for Option B with regards to the two options for the proposed housing development in Kidderminster. I am concerned that the preference for Option A (involving the removal of protected green-belt) is not the best course of action for Kidderminster or its existing population. Furthermore, the scale of the development seems to have been based on pre-recession data during stronger growth, and as such does not represent the best interests or realities of the area. There are plenty of such alternate locations waiting for development in the Wyre Forest area, which have the added benefits of existing infrastructure. This in turn would result in an injection of demand to the stagnating town centre economies. Option B details the type of change that would benefit the local area in the long run. Developing green-belt must always be a last resort. It is often argued that the UK needs more housing to meet the historically growing demand, but before merging towns like Kidderminster with villages like Stone and Stanklyn (destroying vital countryside and farmland in the process) all

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>other options must be exhausted. In this case, other options <i>are</i> available and are clearly favoured by the majority of the local electorate. Last year's Brexit vote set in motion changes that are already impacting the UK population growth and industry and the UK's agricultural sector will need to be maintained and developed in order to thrive under these challenging times. Removing a belt of highly productive land from Kidderminster is economic self-harm in these circumstances, not to mention the negative health consequences of destroying available countryside and replacing it with new roads. Developing central urban areas makes much more sense on all counts.</p> <p>Aside from the ecological, agricultural and health benefits mentioned above, there are practical benefits of developing brownfield sites. In the past, these sites were part of the life-blood of our towns—connected to the arteries, nerves and hearts of areas like Kidderminster. The local economy is prepared to quickly reconnect with transport links and infrastructure (physical and digital), ready to resuscitate then regrow these brownfield sites. The aforementioned injection of much-needed demand in recently neglected areas will benefit towns like Kidderminster, building momentum in an area that has struggled since the great recession of 2008. Building on Birmingham's recent success, train-linked Kidderminster can then ensure that new money is spent locally, rather than bleeding off into places like Worcester (especially likely given that Option A is located on the Worcester road).</p> <p>My fear is that any preference for Option A is clearly not in locals' long-term interests, irreparably damaging Kidderminster. Please make the right choice and select Option B.</p>
	LPPO3060	Option B	Support	I support option B, because it already has existing development, it would have less impact on newly housing and there are schools which can support further development in the area.
	LPPO3167	Option B	Support	I would support choosing Option B.
	LPPO3171	Option B	Support	The route seems to cause the least disruption to roads and the lesser burden to other infrastructure such as medical facilities.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>A new school would not be needed; there are spaces available in schools in Wyre Forest.</p> <p>The money would be better spent on:</p> <ul style="list-style-type: none"> Reducing rents and parking charges to attract new business and visitors building an attractive cinema and bowling alley Providing free shuttle buses to and from successful sites such as SVR, Safari Park and Leisure Centre. <p>Stourport and Bewdley need additional bridges for traffic and pedestrians.</p>
	LPP020	Option B	Support	Supports Option B. Once Green Belt is lost it is gone forever. There may not currently be enough brownfield sites to meet projected needs, as time goes by, and ways of trading/manufacture change, who can say there will not be more available.
	LPP023	Option B	Support	Supports option B
	LPP0112	Option B	Support	Option B' is my preferred choice, if sufficient brown field sites can not be found
	LPP0189	Option B	Support	I think Option B is the better solution, giving a more even distribution of housing around the whole of Kidderminster, and regenerating the old ugly derelict buildings around the area making Kidderminster a more pleasant place to live.
	LPP0678	Option B	Support	<p>Reluctantly support Option B but re-examine all brownfield sites For example:</p> <ol style="list-style-type: none"> Transform redundant buildings, behind Matalan to vibrant, affordable apartments Are industrial units on the “ex British Sugar” development needed - there appears to be excess capacity at Easter Park and adjacent Trading Estate. Could additional housing be made available on this site? <p>If small, commercial unit capability is required convert the Kidderminster Town Area, ex-Woolworths location (with many adjacent empty shops), to a Trades and Skills area; i.e. a</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				location where businesses can pursue their trades, but also demonstrate them to the public/visitors? Kidderminster Town Centre could become a balance of retail, entertainment (bars, cafes) and Trades/Skills. A centre for educational (college) and vocational training. Could the area next to Tescos in Stourport be used for apartments/housing?
Stone Parish Council	LPP01159	Option B	Support	Stone Parish Council supports Option B.
Chaddesley Corbett Parish Council	LPP01029	Option B	Support	Parish Council supports option B. Impact on western settlements could be reduced by using option A site near Lea Castle. This may assist with plans for relief road. Plan appears to propose a relief road running through a new residential estate which would make it an unattractive place to live. Large eastern extension would have to be carefully controlled so that it made a positive contribution to quality design and local distinctiveness. Consider that option B would give greater opportunity for quality design and local distinctiveness. Both options will have major impact on traffic volumes heading east out of district. Junctions at Mustow Green and Hagley will need improving. Detailed discussions will be required with County.
	LPP02255	Option B	Support	Under Option B with the development of the Lea Castle site where the infrastructure is already in place, if 1000 homes were built a new school would be built to accommodate the children from the area. Heronswood School is unable to increase in size as it has no available land around. Lea Castle site would also be somewhat screened with the woodland areas already present which would have less impact on the area. For my reasons given I oppose option A and favour option B
	LPP02261	Option B	Support	I believe the best policy for Wyre Forest would be Option B where the proposed building etc. would be confined to infill and keeping the current boundaries of the area.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				I favour Option B as I think all of Wyre Forest should share the increase in housing but that the Council should firstly build on all available brownfield sites and insist on regeneration of empty properties into housing. They should lobby Parliament to change any laws to ensure landowners do not keep empty properties which are detrimental to the local area e.g. Crown House and Worcester Street. All planning permission already granted to developers should be developed quickly and without delays, planning permission should be given with a clause that building must be completed within a period of time for instance 3 years.
	LPP01876	Option B	Support	We feel strongly that it should be Option B. Option B is less extreme, less impact in any one area. .
Spennells Against Further Expansion	LPP01743	Option B	Support	Of the two choices in the Local Plan we would choose Option B because: <ul style="list-style-type: none"> • Less Green Belt land would be used • Ability to build a greater number of houses, in areas where they are needed for local expansion. • The dispersed nature of the development would result in less pollution and less strain upon Kidderminster's existing infrastructure. Spreading development would serve the needs of expanding local communities by creating the potential for more housing development, but without concentrating the development to the detriment of the Green Belt cushion between the Wyre Forest and the West Midlands conurbation.
Summerfield Against Land Transformation	LPP01624	Option B	Support	We reluctantly support Option B because of the lower Green Belt land take and the lesser disadvantage to the Summerfield (and Spennells) community.
	LPP03049	Option B	Support	<ul style="list-style-type: none"> • Option B uses less Green Belt land. • Option B plans for a larger number of houses, in areas where they reflect the local need. • The dispersed nature of development in Option B would result in less strain upon

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Kidderminster's infrastructure and allow other communities to retain their own infrastructure to the benefit of their residents.</p> <ul style="list-style-type: none"> Option B does not require the additional policing costs suggested in section 4.4.9 of the WFIDP.
	LPP03057	Option B	Support	<p>I believe there are a number of Brownfield sites in Kidderminster and the surrounding areas that could and should be used first.</p> <p>Kidderminster town centre itself has a number of opportunities for housing development and the existing infrastructure to support the building of residential units.</p> <p>New housing in the town centre could breathe new life into the depleted high street rather than moving people further away onto Green Belt land.</p>
	LPP03026	Option B	Support	<p>My opinion is that we should adopt Option B, the continued development of brownfield sites across the district as and when required.</p> <p>Conclusion: There is too much uncertainty to justify the irrevocable destruction of our Green Belt.</p> <p>Therefore I believe that Option B with the continued development of brownfield sites across the district as and when required is the correct decision.</p>
	LPP02997	Option B	Support	<p>I prefer Option B as it uses 20% less Green Belt. I also believe that there are other avenues which have not been considered and have been missed from your documentation without clear explanation. I also believe it is important to look at the actual figures in terms of population and what this area needs.</p> <p>I recommend Option B is followed utilising brownfield sites as a priority; only then that Green</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Belt is used once brownfield sites have all been developed and exhausted.</p> <p>It was also pleasing to hear Councillor Ian Hardiman on TV state that the Council had brownfield sites for 3000 dwellings, so the use of Green Belt should be a last resort. It was important to hear this and to prioritise these areas as approximately 3000 dwellings meets the need for this District. *3582 dwelling as calculated by using the SNPP projections would mean that brownfield sites can accommodate 83.74%.</p> <p>It was also encouraging to read that in your table for aims and objectives (3.02) that the District does want <i>"to protect and support the role of Green Belt through a strategic review"</i> so to lose the Green Belt agricultural land adjacent to the Spennells estate would be a substantially larger in option A, than that of Option B and with the projection figures of dwellings that can be sourced via brownfield sites Option B is more favourable and would <i>"identify limited strategic Green Belt release to enable the delivery of the plan"</i>.</p>
	LPPO2909	Option B	Support	<p>Prefers Option B as it uses 20% less Green Belt.</p> <p>The plan appears encourage building on the Green Belt, attracting commuters from Birmingham and Worcester.</p> <p>The road infrastructure needs addressing as Kidderminster is frequently gridlocked during rush hour, especially at the Wilden Lane/Worcester Road roundabout, which has been caused by the new link road.</p>
	LPPO2985	Option A	Support	I broadly support Option A because I feel that the infrastructure gains are very important.
	LPPO2915	Option B	Support	<p>I write with regard to the above proposal with regards to the Green Belt land surrounding Spennells estate.</p> <p>In the report we are asked whether we prefer Option A or B. My opinion is that we should go</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>with Option B.</p> <p>Option B would use less Green Belt land and there are ample brown field sites within the Wyre Forest area and especially within the Kidderminster town centre, which could be used for housing.</p>
	LPP02931	Option B	Support	Option B, a more dispersed use, would mean catchment areas for schools doctors etc would not be pushed past a potential breaking point. There are many viable brownfield sites and also the half derelict town centre to consider.
	LPP02950	Option B	Support	<ul style="list-style-type: none"> • Uses 20% less Green Belt land. • Does not involve Green Belt graded 'very good'. Towns & Villages to retain their historical characteristics • Less likely to attract overspill from B'ham/Solihull, therefore genuinely can be said to meet local needs across the District. • Will not cause the major traffic congestion that will occur with Option A • Will not require the construction of the essential Option A relief roads • The various housing developments can run concurrently across the District, without major disruption, achieving the housing requirements more quickly.
	LPP02871	Option B	Support	I support Option B
	LPP02829	Option B	Support	Do the benefits of dispersal strategy outweigh congestion in town centre?
	LPP02678	Option B	Support	<p>If the development of Wyre Forest (WF) is to be considered as a combination of residual, commercial and industrial phases, whilst still maintaining some credence to backing the surrounding 'Green Belt' (GB). Then in any statutory planning exercise there must be consideration, <u>as a first priority</u> given to any existing urban/'Brown-field' site (BFS) that has become available and apparently surplus to requirement.</p> <p>Let us now assume that this previously used BFS has been serviced with communications,</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>drainage, power and water then the only restoration of such sites would be the requirements of an environmental impact study, minimal site groundworks preparation – (providing there was little/no contamination.) There is no potential similar servicing benefit with Option A.</p> <p>Since most of such BFS sites would attract domestic dwellings and maybe some small and medium enterprises (SME) then an increase in population/residents would invariably help to bring the town centres back to life. Another advantage would be that transportation improvements would not necessarily be at such a high premium, walking between services would be an advantage in the health of the populace as well. Use the developers to assist in the refurbishment of the centre of the three towns, we all know of developments that have had new roads provided to service their respective new properties. The hospital, three major GP's surgeries, train and bus terminals are all within walking distance in Kidderminster.</p> <p>When one considers the approximate annual requirement of 300 developments for the next 17 years spread over the whole district, there seems little need to go for the GB option, as proposed. Given that the BFS will only be able to absorb half of the statistical requirement, presumably over the 17 years, that is still circa 150 properties per annum. Which means that the '3 noted fields' adjoining the Spennells, is too big by far for the implementation of the annualised sum of developments over the 17 years. There must be smaller GB sites that could absorb the annualised requirement, that the 'numbers' seem to suggest. Without the impact that taking three adjacent GB fields, all to make a stretched Spennells, will have in that one area of Kidderminster.</p> <p>Which could easily be interpreted as the acquisition of three fields to take the planned development of 5500. If we now consider the size of development companies that have been named in the media then they could develop the three fields in well under 10 years. Which all of a sudden makes a mockery of 5500 house provision spread over 17 years in the WF, and changes the whole Local Plan to a Local Plan for the Development of Eastern Kidderminster specifically, so be honest if this is the underlying and probably the cheapest proposal say this is the preferred</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>option.</p> <p>It seems too easy to say what WFDC needs to appease some directive from Westminster and in the process overload the ‘eastern’ side of WF, when the need to develop the GB does not appear necessary in the time scale that the current study is quoting. This is where the ‘Least Cost’ option to WFDC or conversely being the recipient of the very best benefit package that could be extracted from the developers or other financing operation/ILA</p> <p>Given that the GB option would need the provision of the Eastern Kidderminster Relief Road (EKRR) from the A449 around Kidderminster to the A456, one has to wonder where the funding for that would come from. In which case all the other County Councillors would be arguing for own “Eastern Relief Road”, that would likely take all of the 17 years to debate the funding of “Eastern Relief Road” wherever in the County it was going to go.</p> <p>So I say Option B – Development across the whole of Wyre Forest, is the way to go</p> <p>The facts are that since WFDC is apparently not in such a strong position, other than ‘rubber stamping’ any ideas of developing the whole of Wyre Forest that it will be forced to take the easy and cheapest option and disregard the rules that stipulate that communities should not be melded together, Spennells and Summerfield, Spennells and Stone. In other words load up the eastern side of Kidderminster and be done with it, all within one hit!</p> <p>I repeat develop the whole of WFDC – Option B</p>
	LPPO2581	Option B	Support	<p>As a resident of Stone Parish I am extremely concerned about the prospect of using greenfield land together with potential loss of wildlife habitat, in our Parish for housing needs, which will seriously add to unjustifiable urban spread.</p> <p>I therefore wish to register my objections to the Local Area Plan by selecting OPTION B.</p>

				<p>growth for the long term future in WFD, engenders a feeling of pessimism.</p> <p>Before all else certainly the needs for Healthcare, a viable Hospital with health care for all residents and the elderly, transportation and public services, roads infrastructure, Schools, Industry, commerce, retail, open space and leisure facilities, this with the background of an almost extinct Carpet industry a traditional employer of Wyre Forest residents.</p> <p>Any new housing certainly not at the proposed level could most probably be accommodated on brownfield site and via inner urban renewal and Core Option allocated land, surely when all of these sites are fully utilised, should there be a need to sequester greenfield land.</p> <p>Therefore I reiterate that OPTION B of the Local Area Plan is and should be the most sensible direction that Wyre Forest District Council must pursue.</p>
	LPPO2451	Option B	Support	<p>I am very much in favour of Option B for the following reasons:</p> <ul style="list-style-type: none"> • Flexibility. Dispersed development is more able to react to changes than one large scale development. • Diversity. Spreading the development across the district will allow Stourport, Bewdley et al to benefit rather than growing Kidderminster alone. • Environmental. We should be looking to reuse and redevelop rather than take away green field sites. Once they are gone, they will not come back. • Generational. If we are to keep young people in the district we need housing to suit them. Town centre would be ideal, and would contribute to town centre regeneration.
	LPPO2166	Option B	Support	<p>I do feel development does need to be spread out throughout Wyre Forest; not just on the eastern edge of Kidderminster which already has the brunt of the core housing. Hence, in addition to my other comments , I would choose Option B.</p>
	LPPO2329	Option B	Support	<p>I personally prefer Option B provided the brownfield sites are used first and a larger housing</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>estate is built at Lea Castle where there is currently some housing. Looking at the core development site in appendix A, an estate similar or of a similar size to Spennells could be built without causing too much intrusion on the approach to Kidderminster from Wolverhampton or Stourbridge. It would of course need careful planning. The area adjacent to the Stourbridge Road which is currently classed as Green Belt should only be reclassified as a last resort should the need arise.</p> <p>I therefore prefer Option B and object to Option A.</p>
	LPP02296	Option B	Support	Benefits of a more dispersed strategy most definitely outweigh the disadvantages of not supporting the relief road or easier school provision.
	LPP02366	Option B	Support	My preferred option is B
	LPP04231	Option B	Support	OPTION B IS BETTER
	LPP04178	Option B	Support	I feel that the District Council should adopt Plan B on the Kidderminster side of the river, where access from the main roads is a lot easier & people living on any development on these sites would be able if they wanted to easily walk into town to use the facilities.
	LPP04150	Option B	Support	Support Option B sites as there is much less requirement for the use of Green Belt land.
	LPP04070	Option B	Support	Therefore I support option B due to the fact that less Green Belt land is affected.
	LPP03832	Option B	Support	I prefer Option B as it utilises 20% less Green Belt land and object strongly to Option A.
	LPP03803	Option B	Support	<p>I object to the Council's strategy as evidence shows that the scale is unnecessary. I prefer Option B notwithstanding I object to the analysis leading to the unnecessary scale of development.</p> <p>The Council needs to think in other directions rather than to pursue an unwanted eastern bypass that would cause negative effects to outweigh any perceived benefit.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP03665	Option B	Support	<p>Option B is the preferred choice as this road will not be required and it uses less Green Belt.</p> <p>The benefits of a more dispersed strategy do outweigh the disadvantages of not supporting the relief road or easier school provision. More on brownfield sites.</p>
	LPP03747	Option B	Support	<p>Regarding the proposed new housing development to the East of Kidderminster, I have looked at the relevant plans and consider that Option B is the better Proposal.</p> <p>I am also very pleased to see that there is a proposal to convert the 1902 built former Warehouse in Churchfields (opposite the CMS Dealer's premises) into housing apartments.</p>
	LPP03776	Option B	Support	<p>Having studied the points behind the above review I would personally recommend that you support Option B.</p> <p>Plan B does seem more acceptable especially as promises have been made to improve the infrastructure.</p>
	LPP03614	Option B	Support	<p>I would like to show that my preferred option to be Option B and also my objections to the LP and my views, on how it is a flawed document.</p> <p>So to clarify I am stating my preferred option to be OPTION B but I want it to be noted, I am objecting to all building including the core housing which features in both options, and to the <u>Wyre Forest District Council Local Plan 2016-2034</u> as a whole.</p>
	LPP03574	Option B	Support	<p>Option B has a lower concentration of dwellings and spreads the development over a wider area. This will have a lower impact on transport, schools and other local services.</p> <p>Option B spreads any increase in dwellings around the district, and concentrating particularly on the Lea Castle brownfield site for dwellings appears to meet the actual growth in population.</p>
	LPP03475	Option B	Support	<p>This option will spread housing and employment zones around the area helping to boost the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>economy.</p> <p>Local facilities such as doctors, dentists and schools in each town will then be able to absorb people more easily.</p> <p>People will also be able to integrate more easily into the local community rather than becoming a satellite estate on the outskirts.</p> <p>Option B will lead to shorter car journeys for people to travel to their work, schools and shops.</p> <p>More children being able to walk to school.</p>
	LPP03398	Option B	Support	<p>Option B would be the lesser of two evils, if linked to the planned development for housing at the old Lea Castle Hospital site. This would involve far less Green Belt land having to be destroyed and would be very much fairer to spread new housing in smaller pockets around the district rather than dump it all alongside one already built-up area at Spennells.</p>
	LPP03217	Option B	Support	<p>I support Option B as my preferred option, and oppose Option A, as option B requires the use of less Green Belt and is a far more dispersed development to allow more people to choose where they live in the Wyre forest.</p> <p>Many younger people and families are wanting the flexibility to live in the more vibrant, green and social areas of the Wyre Forest such as Bewdley, Stourport and Cookley, and live near friends and family, rather than move out to mass housing estates in Kidderminster. There is currently not enough affordable housing in these areas, which Option B would address.</p> <p>I support Option B albeit land at Captains Pool should also not be developed.</p>
	LPP04532	Option B	Support	<p>I believe option B is more beneficial to Kidderminster and offers the opportunity to revitalise the town by removal of derelict / unused buildings and replacing them with housing either through the conversion of the current buildings or new build properties. The most obvious example is</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>resultant of the town centre moving down a street through the creation of Weavers Wharf which has left Worcester Street as an eyesore that gives a negative impression of our town. The building of housing on the land between Worcester Street & Bromsgrove Street (from Coventry St to Prospect Hill) & the demolition of the old Littlewoods & Woolworths buildings would bring people closer to the town, improve footfall for local business and at the same time clear away / rejuvenate a dead area of the town. I am sure as part of this process many other examples will be provided by residents of areas of the town that could be positively improved by open minded thinking around option B.</p> <p>The core housing plan combined with option B will have less of a negative impact on the area and careful consideration of how the core housing sites are utilised could reduce this impact further. The creation of a village on the Lea Castle Hospital site (core housing site) with more than the proposed 600 homes would spread the pressure on the area road network more evenly, reduce the need for unnecessary Green Belt development and provide the creation of a new community and business opportunity for local shops and services.</p>
	LPP04589	Option B	Support	<p>The Local Plan Review Preferred Options Document asks that we consider if we prefer Option A or B to cater for WFDC plans to accommodate increased population up to 2034 and the required housing and employment needs; and presumably the infrastructure needs including roads, public and private transport, schools, medical services, hospitals and policing.</p> <p>In broad terms the main differences between the two options is that:-</p> <p>Option A concentrates the vast majority of the housing towards the east of Kidderminster building on a vast amount of the Green Belt, making Spennells a “Super Estate”; where Option B disperses the build across Brown Field sites and Green Belt around Kidderminster, using approximately 20% less Green Belt.</p> <p><u>We of course support Option B but with a more realistic numbers of dwellings built as outlined in this objection.</u></p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP04465	Option B	Support	<p>In relation to the proposed developments on Spennells Green Belt we are simply asked do we prefer Option A or B. In simple terms I prefer Option B as it uses 20% less Green Belt but you will see I also have other views/ideas.</p> <p>I recommend Option B is followed but Green Belt is only used after existing Brown Field sites have been developed.</p> <p>Other reasons for preferring Option B is that the Wyre Forest Infrastructure Delivery Plan (WFIDP) identifies additional Policing costs for Option A (section 4.4.9). Also, Option B does not need as much roadwork and section 7.0.12 of the same report says " the County Council judges that there will be a transport funding gap, as has been consistently identified in the previous version of the WFIDP back in September 2012 and in the IDPs of other Districts in Worcestershire." This will save £17.5m per the report.</p> <p>This is recommended in the WFIDP in section 3:</p> <p>"It should be noted that the expanded Lea Castle site within Option B is preferable to the smaller allocation identified in Option A. This expanded site has the potential to include additional development opportunities such as retail and a new primary school which will assist in providing a more sustainable development. This expanded site also allows the potential for a further access from the site onto the A451. However, it should be noted the A451 is a fast road that has historically suffered from a high accident rate so care would need to be taken when considering any access."</p>
	LPP04450	Option B	Support	<p>I feel that many of the aims for the future of our local area are good. However, while I appreciate the need for the local council to make adequate provision for future housing, both for local people seeking affordable homes (including those seeking social housing) and to provide some housing which will encourage higher wage earners to move into the area, I do not feel that Option A meets this need and that Option B would be preferable.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>In the past the local council has shown lack of vision in planning. I fear that Option A shows further lack of vision and seeks to doom Kidderminster to becoming a dormitory town for Birmingham without the necessary infrastructure to support it. My views are not based upon 'Not in my backyard' but because I care about the preservation of Green Belt and realistic improvement of the local area for local people.</p> <p>My main concern is that presenting developers with the opportunity to build upon green field sites, currently outside of the Green Belt, will lead to urban sprawl to the southeast of Kidderminster, while brown field sites within the area remain undeveloped.</p>
	LPP04451	Option B	Support	Preference for Option B.
	LPP04414	Option B	Support	Supports option B.
	LPP04302	Option B	Support	I think Option B is preferable
	LPP04306	Option B	Support	Option B would be less impact in the area as it is mainly infill on areas already surrounded with properties and buildings.
	LPP04309	Option B	Support	I choose Option B.
	LPP04262	Option B	Support	<p>Prefer Option B.</p> <p>The dispersed strategy would have less impact but there have already been concentrated development of housing in The Horsefair, the Sugar Beet Site, Stourport Basin. Kidderminster would struggle to successfully become richer since it is further from motorways and transport routes. It is the semi-rural/rural nature of the town and housing which appeals to newcomers. School provision must always have the ability to fluctuate to demand for places.</p>
	LPP04292	Option B	Support	<p>Supports Option B:</p> <ul style="list-style-type: none"> It offers sufficient housing and commercial/industrial development opportunity to meet

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>the needs of the District with the least impact on the environment, agriculture and infrastructure.</p> <ul style="list-style-type: none"> • It has a lower concentration of dwellings, spreading the development over a wider area, which should have a lower impact on transport, schools, and other services. Being more widespread covers the catchment area of additional schools. • It uses less Green Belt and agricultural land and more brownfield sites such as the old Lea Castle Hospital site. • It is less likely to result in loss of local identity and merging of towns/communities, due to the wider spread of housing development.
	LPP04640	Option B	Support	<p>I prefer Option B as it uses 20% less Green Belt with comment as follows:</p> <p>Option B does not need as much roadwork</p> <p>In the Green Belt review some of the assessment is wrong and coalescence will occur if Option A is pursued.</p> <p>The WFIDP identifies additional Policing costs for Option A. Large estates have evidenced increased anti social behaviour/crime rates acknowledged in the WFIDP but in the Local Plan consultation.</p> <p>The WFIDP and the Local Plan are very light on the provision of medical services.</p> <p>It is recommended the expanded Lea Castle site within Option B is transferred to Option A. Should Option A be chosen I support the more sustainable Lea Castle site to inc further access</p>
	LPP04627	Option B	Support	<p>Option B would be a better proposal as it spreads the houses around and not pushing Kidderminster houses further away from the town centre which would mean cars would be required to get into town as opposed to walking. Why does Kidderminster need so many new</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				houses?
	LPP04759	Option B	Support	Access to other Green Belt areas identified as 'core' sites included in Option B, between Stourbridge Road and Bromsgrove Road can be easily accessed, at a fraction of the cost, (a) from Stourbridge Road and/or Birmingham Road, and (b) from Birmingham Road (via a new junction on Husum Way opposite Shakespeare Drive) and/or via the Stourminster School site. Neither of these potential areas of land, albeit existing Green Belt, would require a major trunk road completed to make them suitable for development.
	LPP04773	Option B	Support	I believe the best policy for Wyre Forest is option B where the proposed building etc would be confined to infill and keeping the current boundaries of the area. Option B is preferred as all of Wyre Forest should share the increase in housing. For the valid reasons stated it is my belief that any proposed building should be kept within the footprint already here, my preference is option B
	LPP04712	Option B	Support	<p>I do not approve of any development of the Green Belt and it is government policy to protect the Green Belt except in exceptional circumstances.</p> <p>Having read the information concerning economic social and environmental issues, I feel that on balance Option B would be the better option for future developments in the Wyre forest.</p> <p>Firstly, in relation to economic issues, I note that there has been a reduction in employment opportunities in the area, due to decline of traditional manufacturing industries. The static population growth and a high degree of economic dependency due to the ageing population, together with a low level of in migration, have produced the need to attract an economically active population to the area.</p> <p>If this premise is correct i.e. that the district needs to attract economically active commuters from other areas to address this imbalance and the assumption that they are less likely to have found employment in the local area than in Worcester or the West Midlands conurbation, then of the two main sites proposed Option B would be much more suitable. The site to the south of</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				<p>Stourport would give access to the main roads to Worcester without passing through Kidderminster and furthermore it is not in the Green Belt. There are only two short stretches of footpath in this area to the south west of the B4194 and access to wooded countryside of Areley and Ribbesford Wood would not be obstructed. The other site to the north of Kidderminster along the A451 would also unlikely to add any extra through traffic, as it would attract commuters bound for Halesowen, Stourbridge and Birmingham. It also adjoins an existing core site around Lea Castle.</p> <p>The other sites in option B are small and could be adapted to local needs in Cookley, Fairfield and Bewdley, provided there are no environmental objections. This would take into account the needs of an increasingly elderly population throughout the district who would suffer if they were separated by long distances from their families and local services.</p>
	LPP04922	Option B	Support	<p>In relation to the proposed developments on Spennells Green Belt we are simply asked do we prefer Option A or B. In simple terms I prefer Option B as it uses 20% less Green Belt but you will see I also have other views/ideas.</p> <p>I recommend Option B is followed but Green Belt is only used after existing Brown Field sites have been developed.</p> <p>Other reasons for preferring Option B is that the Wyre Forest Infrastructure Delivery Plan (WFIDP) identifies additional Policing costs for Option A (section 4.4.9). Also, Option B does not need as much roadwork and section 7.0.12 of the same report says " the County Council judges that there will be a transport funding gap, as has been consistently identified in the previous version of the WFIDP back in September 2012 and in the IDPs of other Districts in Worcestershire." This will save £17.5m per the report.</p> <p>This is recommended in the WFIDP in section 3:</p> <p>"It should be noted that the expanded Lea Castle site within Option B is preferable to the smaller</p>

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
				allocation identified in Option A. This expanded site has the potential to include additional development opportunities such as retail and a new primary school which will assist in providing a more sustainable development. This expanded site also allows the potential for a further access from the site onto the A451. However, it should be noted the A451 is a fast road that has historically suffered from a high accident rate so care would need to be taken when considering any access.”
	LPPO5075	Option B	Support	<p>I support the proposed Option B. Option B also removes around 48 hectares Less Green Belt than option A which is a very important and essential point that I wish to make. Green Belt should be protected wherever possible for future generations and current generations to enjoy and cultivate.</p> <p>The dispersed nature of the development would result in less pollution and less strain upon Kidderminster’s existing infrastructure which is already struggling to cope. This would spread the development more evenly around Wyre Forest, serving the needs of expanding local communities by creating the potential for more housing development and enabling people to choose where they want to live.</p>
	LPPO5076	Option B	Support	I therefore reluctantly support the proposed Option B, but request no Green Belt is removed or re-designated until every brownfield site already allocated in the plan in Kidderminster has been built on over the next 12 years or more.
	LPPO5081	Option B	Support	After the use of brownfield sites, I reluctantly support Option B. This uses less Green Belt land and it will spread housing and employment zones throughout Kidderminster, Stourport and Bewdley providing an economic boost to all the towns. It will also help people make shorter car journeys to work, school and shops leading to less congestion. I believe the three towns and surrounding rural areas can more easily absorb the numbers of extra people into doctor’s surgeries and children into local primary and secondary schools, rather than concentrate them on the Eastern part of Kidderminster. Hopefully more children would then be able to walk to school.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPHS 6.54–6.56

Company / Organisation	Response No	Para / Policy	Type of Response	Summary of Response
	LPP04844	Option B	Support	Disperse development around the district to ensure an equitable spread.
	LPP04845	Option B	Support	My preference is for Option B.
	LPP04866	Option B	Support	Option B takes a substantial amount less of Green Belt land (circa 20%) than Option A. The Green Belt has a very important part to play in protecting the sprawl of towns into the open countryside, and your proposals (Option A) disproportionately focuses all housing on the eastern edge of Kidderminster, which would then merge it with the hamlets of Summerfield and Stone. This would also mean that many new home buyers would have ‘no choice’ of where they wish to live. Option B is more dispersed and gives buyers options to live close to family, friends, work and the area they choose to live.
	LPP05115	6.56	Support	<p>Prefer Option B.</p> <p>The dispersed strategy would have less impact but there have already been concentrated development of housing in The Horsefair, the Sugar Beet Site, Stourport Basin. Kidderminster would struggle to successfully become richer since it is further from motorways and transport routes. It is the semi-rural/rural nature of the town and housing which appeals to newcomers. School provision must always have the ability to fluctuate to demand for places.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO6	Site submitted - Yew Tree Walk, Stourport	Comment	Suggests site AKR/18 - Yew Tree walk, Stourport. It is immediately available available for increased levels of affordable housing or an entirely affordable scheme.
	LPPO7	Site submitted - Habberley Road, Kidderminster	Comment	New site submitted for consideration - Habberley Road, Kidderminster
	LPPO64	Alternative sites	Comment	Alternatives. There are lots of empty disused buildings around Kidderminster which could be developed, all the empty shops. Crown House, Industrial buildings built and still left empty and old units left empty because cheaper units can be found elsewhere. Why take farm land when there are so many derelict and unused places?
	LPPO101	Alternative sites	Comment	<p>Old Leisure Centre site, ideal for town centre living being within walking distance of rail and bus stations.</p> <p>Re-develop Horsefair area, which is a total disgrace to Kidderminster and is close to town centre.</p> <p>Alternative which appears to have been over looked is the Burlish Park Golf course which is now closed and is now a waste land. I am under the impression that Wyre Forest owns this land, although I might be wrong. This area is close to bus routes and employment areas and covers a large expanse of land.</p>
	LPPO111	Alternative sites	Comment	Developing Green Belt land should only be considered as a last resort if all other options have been exhausted. There are many Brownfield sites in the Wyre Forest area that should be considered first, like the closed down carpet factories, redundant warehouses that litter this area, the failed Wyre Forest golf club off Zortech avenue and the old Ceramaspeed factory, next door, which is far too large for any prospective manufacturer in this area to ever use again as a factory.
	LPPO122	Alternative sites	Comment	Consideration should be given to the land at Burlish, until recently a golf course.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				This is poor agricultural land.
	LPPO183		Comment	Yes. Education provision will improve by more schools increasing capacity. Pollution can be solved easier by keeping Green Belt and appropriate tree planting. Improvements to traffic flow by appropriate route signage.
	LPPO198	Alternative sites - Town Centre	Comment	Our town centre is a ghost town, with the majority of retail units standing empty and the others mainly charity shops. A considerable amount of money was spent by the council changing the block paving and seating available, this has in no way regenerated the town centre or encouraged any new commercial enterprises either retail or otherwise. Would the land not be better used for creating housing?
	LPPO228	Alternatives - Kidderminster Town Centre	Comment	Kidderminster once a vibrant beautiful Town has dwindled and decayed. We <u>must think</u> of the future how best to make Kidderminster a pleasant & welcoming place to live. We should prioritise on improving and rejuvenating the town centre maximising areas such as brownfield sites first before we look to alternatives such as the fields around Spennells. I do not accept that we have to take green fields away.
	LPPO230	Alternatives - Kidderminster Town	Comment	Kidderminster town centre needs regeneration and improvement. I avoid its empty shops, graffiti and derelict buildings. Refurbishing and developing Kidderminster town would be an excellent opportunity to bring the once beautiful buildings back to life.
	LPPO310	Site submitted - Land at Puxton, Kidderminster	Comment	Suggests land at Puxton (WFR/WC/21) is included in the plan for housing.
Tooby Family	LPPO318	Site submitted - Land at Gaymore Farm, Cookley	Comment	There is no new land allocated for housing in Cookley Village up to 2034. This is not “robust” planning as the village has a considerable base population and the density of built form is unlikely to lead to many “windfall” sites even if the garden land policy is eased. Given that a Housing Needs Survey will be completed in

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				2017/18 it would be prudent to zone land for phased release. My clients site (WFR/WC/5) is preferable to the ADR as it does not close the strategic gap with the Lea Castle Hospital site (WFR/WC/15). By moving the Green Belt eastwards to the track alongside WFR/WC/5 a clearly defensible new boundary would be created.
	LPPO353	Site submitted - Land at Ridge End, Bewdley Hill	Comment	Suggests new site: East field near Ridge End, Bewdley Hill, Kidderminster
	LPPO427	Alternatives	Comment	<p>I object to Option A and Option B. Green Belt land should be used only as a VERY LAST RESORT.</p> <p>Wyre Forest, Greater Birmingham, Solihull and Worcestershire should collaborate and collectively review overall brownfield site availability and plan housing development accordingly – decisions to build on the Green Belt should not be based on local authority boundaries.</p> <p>The 5 year rolling time frame for construction sites should allow for regular reviews of brownfield sites and enable changes to be incorporated into any plan,.</p> <p>The plan fails to recognise changes in shopping habits and unrealistically targets retail expansion and comparison shopping.</p> <p>Kidderminster has suffered from the failure to 'tidy up 'following the migration of Kidderminster town centre to Weavers Wharf and Crossley Retail Park.</p> <p>Retail premises and the courts building have been empty for 8 /9 years - the regeneration of such sites require radical solutions for alternative use that reduce any need to build on the Green Belt.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Unnecessary decisions are being taken now e.g. in 1999 who could have predicted the impacts of the 2007/08 economic collapse or changes caused by online shopping (indeed, the plan itself demonstrates an inability to predict /understand short term population levels in the District).</p> <p>The plan fails in its stated aim to "to use a robust and up-to-date evidence base to ensure that the local plan meets the full, objectively assessed needs for market and affordable housing in the housing market area" . Instead it aims to justify what developers want to deliver rather than meet the needs of Kidderminster residents.</p> <p>Previous attempts to build an Eastern relief road have failed - the plan fails to present evidence based data that supports it in economic or environmental terms - at the consultation session I was informed this would be a single carriageway 40 mph road following the same route as the existing road from the Worcester Road through Mustow Green to the Birmingham Road - is it really a relief road at all?</p> <p>Whilst constructing a new school in the Spennells area appears attractive this (together with the promise of the 'relief road' shouldn't be the determining factor when opting to build on the Green Belt – other options should be sought.</p> <p>Many people commute into / and out of Kidderminster now (hence the railway station development) - and have done so for many years. This situation equally relates to the areas covered by the LEPs identified in the plan.</p> <p>Whilst economic development in Kidderminster will be welcome - past experience shows this will take time – in the meantime people will continue to travel.</p> <p>Immediate need is for fresh radical thinking that optimises the use of brownfield sites throughout the LEP areas for residential use and enables Kidderminster itself to become a modern, contained and attractive town centre that incorporates</p>

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				retail leisure and residential opportunities rather than pursue outdated models from the past - 'mixed use' communicates little other than the elements of 'wishful thinking' so often reported in the local press over numerous years.
	LPPO464	Extended Lea Castle	Support	Why cannot the lea castle site as a whole be developed between the A449 and Stourbridge road to the east this would give good infrastructure in the form of transport links and as this is already a major site will have the drainage, site is not within the east and south site flood plains. This could be developed to be self sufficient as there would be enough houses built to justify a new primary school and have local amenities constructed. If the land to the east and west of the current proposals were also developed this would allow a sustainable bus route, have access to the local secondary school in Wolverley and provide a sustainable community.
	LPPO465	Extended Lea Castle	Comment	Why cannot the lea castle site as a whole be developed between the A449 and Stourbridge road to the east this would give good infrastructure in the form of transport links and as this is already a major site will have the drainage, site is not within the east and south site flood plains. This could be developed to be self sufficient as there would be enough houses built to justify a new primary school and have local amenities constructed. If the land to the east and west of the current proposals were also developed this would allow a sustainable bus route, have access to the local secondary school in Wolverley and provide a sustainable community.
	LPPO466	Alternative sites	Comment	Why are there no proposals for development on the North/West of Kidderminster? Can development opportunities be investigated at the rear of the existing Ferndale Estate?
	LPPO488	Alternative site	Comment	A good use of Lea Castle Hospital site would be a 540 unit development for elderly persons with their own Doctors surgery. This would limit the extra vehicles that come out onto the A449 which is just before a dangerous bend.

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO578	Alternative sites	Support	<p>I support building on Lea Castle for the following reasons:</p> <p>Large number of dwellings would be on existing brownfield ground, and not reducing the amount of Green Belt land around the town. The size of the area could be further increased by using the land up to Axborough Lane.</p> <p>A large number of dwellings could support a 2 form entry primary school, thus reducing the impact on the local facilities.</p> <p>It would be within the catchment of Wolverly CE High School and would positively impact the schools long term viability.</p> <p>It would be capable of sustaining a bus service</p> <p>It would support a village centre which would fall under Cookley parish, but would not put any burden on that community as it would be large enough to support its own park, village hall, school and shop.</p> <p>It would potentially be able to provide live-work units</p>
	LPPO689	Site submitted - Land off Crundalls Lane/Hoarstone Lane	Comment	<p>Suggests new site: Land off Crundalls Lane / Hoarstone Lane Bewdley.</p> <p>It is understood that the adjoining land owner (Grey Green Farm) would potentially release the land to the west in addition to this site.</p> <p>Two blocks of land with road frontage totalling 10.52ha. Hoarstone Lane is narrow but there is sufficient land/space for infrastructure improvements.</p> <p>Sustainable site, well located to existing residential, cycle and road networks, bus routes, shops and other services.</p>

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO691	Site submitted - Orchard House, Far Forest	Comment	Call for Sites Submission form: Orchard House, Cleobury Road, Far Forest
	LPPO38	Alternatives	Comment	<ul style="list-style-type: none"> • Woolworths Building • Two Court buildings • Derelict and empty factories within the town area • Empty shops no longer fit for purpose • The Glades site • Empty shops in Blackwell Street • Crown House • The old factory in Park Lane <p>These could all be knocked down and new housing built in the town.</p>
	LPPO51	Alternative site - Land at Aggborough	Comment	I believe that the Harriers are moving their ground to the practice grounds by Birchen Coppice, this will leave the ground by Aggborough for further development. This is a far better option as it is nearer the town centre and rail links etc.
	LPPO56	Site submitted - Railway Corner, Stanklyn Lane, Kidderminster	Comment	Suggests site at Railway Corner, Stanklyn Lane, Kidderminster. Both in isolation and also in conjunction with the preferred option A. We would like to propose 3 bungalows on the site.
	LPPO61	Strategy	Comment	<p>The question is whether you join the three towns of Kidderminster, Stourport and Bewdley together with the infrastructure already in place i.e. roads and other requirements well within reach. In the event you expand into the country side without the infrastructure it all costs more and once the country side has been built on its gone for good, whereas with a few exceptions little would be lost with the integration of the three towns.</p> <p>Take the request for building down Dry Mill Lane Bark Hill that could be built at the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>top of Blackstone bank where water pipes are presently being laid. This in my opinion is far more acceptable to the community than the present request with all additional facilities required along with increased traffic problems for Welch Gate and Bewdley.</p> <p>Whilst high rise flats are not the in thing at present it is more than likely we will in the future due to the continued expansion of the human race we will build upward.</p>
	LPPO115	Extended Lea Castle	Support	<p>Would like to see a major expansion or the building on the Lea Castle site taking Green Belt right up to the A499 and across the Park Gate Rd in the field opposite. This would take less Green Belt and can use existing infrastructure. Potentially 2500 houses could be built</p> <p>I propose that a larger development is built on Lea Castle, taking in adjoining farm land. This will allow links with Wolverhampton Rd and Stourbridge Rd.</p> <p>A sizable development, say 2000 + houses, would be able to have a school , shops and maybe a bus route. This would prevent straining on existing services and also would feed into Wolverley High School, which is under subscribed.</p>
	LPPO191	Alternative sites - Wyre Forest Golf Course	Comment	<p>The land at Burlish, until recently a golf course, is also available and in my understanding already belongs to the local authority. In view of it being extremely unlikely to be taken over for use as another golf course as there is overcapacity in other clubs within an easy access to the district. This is very poor land for agricultural use, having a reputation of only able to grow stones. So no great loss to national food production. This land has not been cultivated since before the last war. However, the council record is not good in this respect, taking over fields used for recreation, to build new council offices. So much for the national obesity crisis. The plans only seem to identify only a small portion of this land as core. The</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				whole of the old golf course, not Green Belt land, should be fully utilised before considering other options.
	LPO195	Alternative sites - Land Between Kidderminster and Wolverley B4190	Comment	<p>Option C?</p> <p>Land (No mans land) between Kidderminster and Wolverley B4190 maybe an option, perhaps further enquiries could be made into this.</p> <p>We appreciate difficult decisions have to be made especially in the light of the government guidelines, but surely it makes more sense to use less Green Belt.</p>
	LPO196	Alternatives Selba Drive HELAA BHS/22	Object	I wish to object to the inclusion of "Land off Selba Drive, Kidderminster (referred to as BHS/22 - HELAA Reference Number) in the Local Plan Review. This land is a public amenity, the only open land used by very many living on the Habberley estate for a variety of purposes including dog exercise, children playing, family sitting/picnic area, various ball games (where every other small amount of sward is labelled "No Ball Games"). All other land surrounding this area is privately owned and not open to public access.
CORE11	LPO243	6-57	Comment	The retired eastern by pass plan should be re-visited. Links to this route from new developments near Kidderminster would be feasible, and at the same time combine with tourism from the north, and relieve traffic into Kidderminster, plus combining with the already completed Bewdley by pass. A western by pass should also be pursued for the same reasons. If planned correctly much of any new road building could be done independently of new housing and or commercial operations.
	LPO269	Extended Lea Castle	Support	<p>The current draft proposals in Options: A & B propose using only some of the land available at Lea Castle.</p> <p>My proposal would be to extend this by not only including both Options A & B but</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>also extend the site to land up to Wolverhampton Road and the rear of the Lea Castle site up to Axborough Lane. In addition further development along the western side of Wolverley Road towards Sion Hill linking up with the development of the disused Sion Hill Middle School site. In addition the old Sladen Middle School site on Hurcott Road has also never been developed since clearance and should also be considered.</p> <p>Advantages of these proposals:</p> <ol style="list-style-type: none"> 1. With the additional land proposed a sustainable community of around 2,500 homes could be created. 2. This community would be large enough for a new primary School. 3. This community being within the Wolverly High School catchment area it would positively impact on this schools long term viability. 4. This community would be large enough to sustain a Village Centre & local shops. 5. This community would also be large enough to sustain a bus service and live-work units. 6. Additional development areas to the North / West of Kidderminster should also be considered, such as the rear of the existing Ferndale Estate where over 200 houses could be accommodated and this area has local shops & a bus service etc.
	LPPO315	Site submitted - Land at Northwood Lane, Bewdley	Comment	<p>My client is disappointed that the site WA/BE/4 (land at Northwood Lane, Bewdley) has not been zoned for residential development. The land is not in the Green Belt and development would improve the landscape by removing existing structures. The site is within walking distance of facilities in Wribbenhall and Bewdley town centre. It is a sustainable location. Any increase in traffic would be very marginal. The site is perfect for low density “self-build” housing (3 or 4</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				developments) within an overall Master Plan layout. My client asks that the site be zoned for this use.
Cory & Morgan	LPPO316	Site submitted - Land at Wilden Top, Stourport	Comment	My clients are disappointed that their site (MI/20- Land at Wilden Top) has not been zoned for housing. Wilden village has all the facilities to make it a “sustainable” location. If MI/20 was developed with MI/17 and MI/21, this would give a better outcome than sites west of the River Severn in Stourport (Option B housing site) as there would be less pressure on urban roads in Stourport and easier access to Kidderminster, Worcester and Birmingham.
	LPPO317	Site submitted - Land at Wilden Lane, Stourport	Comment	My clients own land on Wilden Lane. It is currently used for storage and business purposes. My clients and their children are Gypsies with a long history of residence in the Stourport area. My clients wish to create a 4 pitch private Gypsy site on their land. This would help meet the identified shortfall of 21 pitches between 2020 and 2034. My clients ask that their land be allocated in the local plan, shown on the proposals map and be removed from the Green Belt. If this request is met in the Deposit version of the plan (Feb 2018) my clients will move towards detailed designs and a planning application.
Trustees G W Hardwick	LPPO322	Site submitted - Land off Lowe Lane, Fairfield	Comment	There is no new land allocation for housing in Wolverley or Cookley during the plan period. Whilst it is acknowledged that affordable housing sites have been developed recently, it is not “robust” to not allocate any land for the 17 years to 2034. This is especially so as both communities have significant base populations and the density of built form is unlikely to lead to a meaningful number of windfall sites, even if the ‘garden land’ restriction is eased. Given that Housing Needs Surveys are to be conducted in 2017/18 for the area it would be prudent to zone the ADR’s for phased release for housing, including my client’s land in WFR/WC/22.
	LPPO323	Site submitted - Corner of Caunsall Road / Kinver	Comment	There is no allocation of land for new housing in Cookley up to 2034. This is not ‘robust’ as required by Local Plan guidance. A local Housing Needs Survey will be

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
		Lane, Cookley		completed in 2017/18 and is likely to show unmet local demand for the plan period. My client's site on the corner of Caunsall Road and Kinver Lane is PDL benefitting from approvals 15/1069/FULL and 15/2056/CR. The attached drawing 3466-04A dated 6/6/17 shows that the requirements of the approvals can be met, in addition to 3 extra dwellings. This is an applicable 'windfall' site and should be removed from the Green Belt and zoned for housing.
	LPPO343	Alternative site suggestion	Object	<p>Response to Local Plan Review Preferred Options and Sustainability Appraisal Report (May and June 2017) in respect of the proposed non-allocation of site WFR/WC/10 - Land off Kimberlee Ave, Cookley</p> <p>The 2017 Objective Assessment of Housing Need Report has evidenced the overall requirement for 300 new dwellings per annum over the new plan period, which would total 5,400 over the plan period. Sites in and around Cookley have access to many services including Shops, Schools and a Doctor's surgery, good access to open space or sports facilities and therefore score highly for sustainability objectives. The Draft Plan identifies as a key principle that villages in the Rural East of the District are more sustainable than in the Rural West as they have more service provision and public transport</p> <p>As explained in the Development Strategy there is now a need to remove land from the Green Belt for both housing and employment development to support essential elements of the strategy. Under proposed Local Plan Review Preferred Options, three large sites near Cookley are proposed to be allocated. These sites are; WFR/WC/15 - Lea Castle Hospital, BW/4 - Hurcott ADR and WFR/CB/7, OC/4/5/6/12/13N, WFR/ST/1, FPH/27 - East of Kidderminster (N), all of which will require changes to the Green Belt boundary. Predicted benefits for these site options stem from the implementation of a Kidderminster Eastern Relief Road and the provision of sufficient, appropriately located education facilities but a question remains over whether these benefits will ever outweigh the disadvantage caused</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>by the large-scale of expansion to the east of Kidderminster.</p> <p>In the Preferred Options document which addresses the approach to the location of future homes, it is recognised the provision of small scale residential development, to meet specific local needs within the District's rural settlements will be encouraged. In order to help the Council address the shortfall in dwellings, an additional option for the future development of such a site in this category; WFR/WC/10 - Land off Kimberlee Ave, Cookley should be considered.</p> <p>The proposed sites; WFR/WC/15 - Lea Castle Hospital, BW/4 - Hurcott ADR and WFR/CB/7, OC/4/5/6/12/13N, WFR/ST/1, FPH/27 - East of Kidderminster (N) do not adjoin the village of Cookley or Kidderminster itself. However, the site; WFR/WC/10 - Land off Kimberlee Ave, Cookley is better related to the existing village facilities at the village core than the proposed sites submitted Preferred Options document.</p> <p>The reasons given by the Council for not allocating the site at WFR/WC/10 - Land off Kimberlee Ave, Cookley are not made clear in the Preferred Options document. Parts of the Strategic Green Belt Study (AMEC 2016) and a more detailed Second Stage Green Belt Study (AMEC 2017) which forms part of the evidence base seem contradictory, in that on the one hand the Green Belt is fulfilling its intended strategic purpose but on the other, sites for some 2500 dwellings are to be allocated from within the Green Belt.</p> <p>Deliverability</p> <p>Following the initial feasibility studies and during the early stages of the emerging Local Plan, the site; WFR/WC/10 - Land off Kimberlee Ave, Cookley was advised to the Council to be considered for suitability of development. Should this site come forward, it is available for immediate development and would be deliverable for</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>housing to meet local needs in appropriate circumstances.</p> <p>Potential access into the site; WFR/WC/10 - Land off Kimberlee Ave, Cookley from either of three corners (NW, SW or SE) could allow a varied range of site design but the most likely would involve a standard cul-de-sac streetscape of at least 35 dwellings. The site is well located in terms of the road network and any road safety impact could be mitigated by accessing it over an existing service road, currently maintained by a statutory undertaker. The unacceptable impact of the nearby A449 Trunk Road for future occupiers would be mitigated by surrounding agricultural land and with development not possible where the Elan Valley Aqueduct runs adjacent the site boundary, a buffer would be created for some of the present houses. Existing hedgerow areas on the western and southern site boundaries could be retained and enhanced to screen the development from existing houses on Kimberlee Avenue and Brampton Close.</p> <p>Relationship with existing services</p> <p>The site; WFR/WC/10 - Land off Kimberlee Ave, Cookley is very well located in the village in relation to existing services, with a good range of services within a significantly lower walking distance than the proposed allocated sites; WFR/WC/15 - Lea Castle Hospital, BW/4 - Hurcott ADR and WFR/CB/7, OC/4/5/6/12/13N, WFR/ST/1, FPH/27 - East of Kidderminster (N). A Public Footpath passes along the western and southern boundaries of the site providing possibilities to link into this footpath network directly from the site itself. The footpath leads to the canal tow path and the local recreational area with various sports facilities including Cookley Sports & Social Club and play equipment. Adjoining the recreational area are two Primary Schools. These facilities can equally be easily accessed via Castle Road where again a choice of access exits via a Public Footpath linking to Lea Lane or the local roads themselves.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Within 600-700 metres of the site; WFR/WC/10 - Land off Kimberlee Ave, Cookley, the village offers a Doctors surgery, Village Hall, two Public Houses, Post Office, Church, Restaurants, Shops and Supermarket. The proposed sites; WFR/WC/15 - Lea Castle Hospital, BW/4 - Hurcott ADR and WFR/CB/7, OC/4/5/6/12/13N, WFR/ST/1, FPH/27 - East of Kidderminster (N) would involve walking approximately a mile from the closest point of the sites, which may, in reality, not be the access points available once a site layout has been drawn.</p> <p>Summary</p> <p>It is considered the proposed site; WFR/WC/10 - Land off Kimberlee Ave, Cookley is ideally placed to provide family housing due to its excellent access to a full range of local facilities, including local school provision and medical services and access to the Church.</p> <p>Adequate vehicular access could be provided to the site. The site also offers an opportunity to join onto the existing excellent public footpath network in Cookley village, with links via pathways and cycle paths to employment, education and retail areas. All dwellings would be within 400m of a bus stop reducing need to travel by car, thus promoting energy efficiency.</p> <p>As a small scale residential development, there will be no requirement to provide additional roads which would have a cumulative adverse effect on the Green Belt and increase flood risk to the district.</p> <p>The site has historically been used as agricultural land and is currently an unused grazing paddock. Further fieldwork for archaeological potential is likely to be necessary but this is no different to the majority of land in the Wyre Forest area. There are no significant trees on the site and there are no Tree Protection Orders in force. There are no international conservation designations on or adjacent to</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>the site and there is potential for biodiversity enhancement and improved green/blue links.</p> <p>The site is both available for development and deliverable and is considered to be better related to village services than other sites proposed to be allocated. It is requested that this site is taken forward as an allocation within the Wyre Forest District Local Plan Review Preferred Options (June 2017).</p>
	LPPO404	6.57	Comment	See summary LPPO400.
Land Research & Planning Associates Ltd	LPPO549	Site submitted - Land at Pound Bank, Far Forest	Comment	Our Clients' land is adjacent to Far Forest, outside Green Belt and should be supported as promoted for at least 50% affordable homes and/or Starter Homes.
Land Research & Planning Associates Ltd	LPPO554	Alternatives	Support	<p>Planning Reasons</p> <p>1. Change of Policy increasing provision of Affordable Homes from 30% to 40% would help address shortage of affordable homes in schemes of over 10 dwellings and over 1000 gross square metres. Larger developers would see this affecting viability and profits, and would resist. At the same time this would reduce the amount of normal housing being provided so more land would need to be provided.</p> <p>2. If rural settlements outside Green Belt were allowed to expand where landowners were prepared to provide at least 50% affordable homes/starter homes this would provide for a considerable amount of the shortfall. It would take the burden away in the foreseeable future of massive infrastructure costs for a new relief road.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				POLITICALLY 3. It would reduce the amount of protests recently about the use of Green Belt land for housing.
	LPP0462	Extended Lea Castle	Comment	Why cannot the lea castle site as a whole be developed between the A449 and Stourbridge road to the east this would give good infrastructure in the form of transport links and as this is already a major site will have the drainage , site is not within the east and south site flood plains. This could be developed to be self sufficient as there would be enough houses built to justify a new primary school and have local amenities constructed .If the land to the east and west of the current proposals were also developed this would allow a sustainable bus route, have access to the local secondary school in Wolverley and provide a sustainable community.
	LPP0510	Alternative site suggestions	Comment	Extend the site to the Wolverhampton Road and at the rear of Lea Castle site up to Axborough lane. Link up to Sion Hill to link with the Sion Hill Middle school site. With the additional land proposed including sites in that area already identified by WFDC including Hurcott ADR a sustainable community of around 2000 to 2500 homes could be created. This would be large enough to support a 2 form entry primary school. It would support a village centre which is within the Cookley parish but would not become a burden on that community. It could sustain a bus service.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>it could produce live work units</p> <p>it would be with in the catchment of Wolverley CE High School catchment and so help with the long term viability of the school.</p> <p>A linear development to the east of Kidderminster would not be a sustainable community. It would not have a 'heart' and could not accommodate a neighbourhood centre.</p> <p>Offmore Primary school is full.</p> <p>Land to the rear of Offmore and Baldwin Road is higher and development would be visible.</p>
	LPPO692	Site submitted - The Oxleys, Tenbury Road	Comment	Call for sites submission: The Oxleys, Tenbury Road, Clows Top.
	LPPO697	Site submitted - Adjacent to Stone Hill North, Kidderminster (OC/13)	Comment	<p>Suggests additional site adjacent to Stone Hill North (OC/13). The land extends to approximately 19.5ha.</p> <p>The area is considered an essential addition to Stone Hill North (OC/13) and provided natural infill. The land would offer additional land area, is level and naturally screened in part.</p>
Hingley & Callow	LPPO699	Site submitted - Land off Bromsgrove Road, Kidderminster	Comment	<p>Suggests new site off Bromsgrove Road, adjacent to Stone Hill North (OC/13).</p> <p>The land extends to approximately 5.98ha adjoining red shaded core housing site listed as Stone Hill North. This land parcel gives a natural fill of the proposed Stone Hill North / Stone Hill South housing sites as identified and will provide for alternative access arrangements and infrastructure provisions as may be required by the overall scheme. Incorporation will also provide scope for protection for the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

				water course and similar. Topography is well suited and location essential for "gateway development".
Hingley & Callow Oils Ltd	LPPO701	Site submitted - Station Yard, Blakedown	Comment	Suggests new site at Station Yard, Blakedown.
	LPPO703	Site submitted - Fold Farm, Chaddesley	Comment	<p>Suggests new site, Fold Farm, Chaddesley</p> <p>We would like to add land, as shown edged red on the attached plan, extending to approximately 0.30ha located at Fold Farm Chaddesley Corbett.</p> <p>The site is suggested as suitable for low density housing with a sympathetic design scheme to enhance surrounding properties. The site is also considered an ideal location for accommodation for retired persons.</p>
Inshore Support Ltd	LPPO707	Site submitted - Hurcott Lane/Hurcott Kennels/Stourbridge Rd, Kidderminster	Comment	<p>The land, which extends to approx. 10.74 acres, is located to the south of the Stourbridge Road, east of Hurcott Lane and north of the property known as Hurcott Kennels (which is also owned by our client). The land is more particularly shown edged in red on the attached plan.</p> <p>To the west of our clients site is land which is currently subject to an outline planning application (ref: 16/0003/OUTL) for a residential development of up to 100 dwellings known as 'Land South of Stourbridge Road Kidderminster'.</p> <p>It is our view that our client's site would be a sustainable option for the delivery of further housing for Kidderminster in line with the potential delivery of housing both at the Miller site and on Lea Castle Hospital (part of which is also subject to an application for up to 600 dwellings, up to 3,350 sq m of Class B1 employment uses and 150 sq m of Class A1/A3/D1 uses under ref 17/0205/OUTL).</p> <p>Focusing some of Kidderminster's housing delivery along the Stourbridge Road</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>would, in our view, be more sustainable in terms of releasing land from the Green Belt than allowing the delivery of other sites which have a greater impact on areas of ecological and conservation interest such as those proposed further south along Hurcott Lane and around Hurcott village.</p> <p>Our clients are dedicated to trying to protect the cherished Hurcott Park which provides an important green ‘lung’ in towards the built up area of north east Kidderminster and, as such, feel strongly that development should be kept in close proximity to key arterial routes into the centre and away from key ‘green’ amenities which are so strongly valued by local residents.</p> <p>We trust that our clients site will be looked upon favourably and that it will be considered as a sustainable future release from the Green Belt for the delivery of housing</p>
Wyre Forest Community Housing	LPO722	Site submitted - Hayes Road, Wolverley	Comment	Call for sites form submitted - Hayes Road, Wolverley.
Wyre Forest Community Housing	LPO731	Site submitted - Land off Selba Drive	Comment	Call for sites form submitted - Land off Selba Drive
	LPO736	Site submitted - Land at Caunsall	Comment	<p>Call for sites form submitted - Land at Caunsall.</p> <p>It is infilling development across the site road frontage and therefore accords with NPPF para.89.</p>
Horton Estates Ltd	LPO825	Site submitted - Cursley Distribution Park, Curslow Lane	Comment	New site submitted - Cursley Distribution Park, which has not been promoted during previous rounds of consultation on the LPR. Request that Cursley Distribution Park be designated as a previously-developed site in the Green Belt

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>under draft Policy 34, to provide a development plan policy framework which explicitly supports the principle of replacement buildings, limited infilling and partial/complete redevelopment of this site, in accordance with paragraph 89 of the National Planning Policy Framework (NPPF). In addition, through a rationalisation of the substantial brownfield site it would be possible to release land from the Green Belt and allocate it for residential use to contribute towards your District's identified housing needs (housing need has already been identified as an "<i>exceptional circumstance</i>" to justify the release of Green Belt land throughout the District, in the context of NPPF para. 83). In addition we request that the site be considered through your Authority's Brownfield Land Register assessment process.</p> <p>Cursley Distribution Park extends to c.10ha of previously-developed land located c.3km southeast of Kidderminster and 4km east of Stourport-on-Severn, close to the border with Wychavon District Council. Hartlebury Railway Station and Hartlebury Trading Estate lie c.3km to the south-west. The site is accessed from Curslow Lane; with the site's single point of access taken 400m north of the Droitwich Road crossroads (A422). The village of Shenstone lies c.800m to the north-west.</p> <p>The site provides a significant quantum of floorspace (22,557 sq m) currently used for industrial purposes (B2 and B8 Use Classes, with ancillary administrative/office accommodation). The site boundary and buildings are identified on the Existing Site Plan. The floorspace is provided principally in the form of four significant high-bay warehouses (each ranging between 3,800 and 5,320 sq m), although there are ten other smaller buildings (including offices and housing for plant and machinery). There is an extensive internal road network and areas of external hardstanding (used as service/loading yards) within the site linking the various buildings. The buildings and roads/hardstanding are separated by areas of managed grassland, although there are only a small number of trees within the site and on the boundaries (the site is secured by a fence beyond existing hedgerows on the boundaries). It is understood that the site was originally</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>developed as a Ministry of Defence (MOD) storage depot (it appears that some of the building may have been aircraft hangars with blast walls) but it has been used for civilian employment purposes since at least 2005. The owners have invested in the asset to provide commercial units which can be let on flexible and competitive terms. However, some of the buildings are very old and there will be a need for redevelopment in the short-medium term to ensure that the buildings offer attractive facilities for the market. Save for the Green Belt designation, there are no significant environmental/physical constraints to development within or adjoining the site; there are no heritage assets (scheduled monuments, listed buildings or conservation areas); no nature conservation designations; and the site lies entirely within the Environment Agency's Flood Zone 1. This is supported by the site assessment within the Employment Land Review (June 2016, Site Ref. 10). To the north are two bungalows and to the south are two dwellings. To the east and west lies agricultural land (arable).</p> <p>Potential Site Development</p> <p>The owners are considering options to redevelop and modernise the site including the limited infilling of vacant land in-between existing buildings and/or the redevelopment/replacement of existing buildings. This would provide a more efficient and modern business environment, and would be an entirely acceptable form of development in principle given the fourth and sixth bullet points of NPPF para. 89 which state that the replacement of an existing building and the limited infilling or partial/complete redevelopment of previously-developed sites in the Green Belt is not "<i>inappropriate</i>" development (in the case of the latter two types of development the national policy requirement is that they must "<i>...not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development</i>"). These representations request that this national policy be made explicit in the LPR by designating Cursley Distribution Park under Policy 34 as previously-developed land (PDL) within the Green Belt (akin to the designation of the nearby Rushock Trading Estate). Representatives of the owners met with Development Control in May 2017 to discuss the emerging</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>proposals and it is understood they received positive feedback in relation to the potential for site rationalisation where this would comply with NPPF para. 89. I also understand that there was acknowledgement that a rationalisation of the site could potentially release areas of PDL which could be redeveloped for small-scale residential purposes, as part of a comprehensive mixed-use development whereby existing employment floorspace/use is retained. I am informed by my Client that your Authority assesses the <i>“impact on openness of Green Belt”</i> on the basis of existing building volume.</p> <p>The attached Illustrative Masterplan has been prepared to provide a broad indication of how the site could be comprehensively and efficiently rationalised to replace several of the existing older buildings with modern employment buildings resulting in a total building floorspace (c.21,363 sqm) and volume (c.223,435 m3) which is a reduction on the existing position (c.22,557sqm / c.231,293 m3). In addition, this form of development would enable the potential release of areas of brownfield land which could be redeveloped for residential use. It should be noted that the Masterplan indicates a level of residential development which will exceed the existing level of building floorspace and volume (this will need to be calculated in detail) but it does serve as an indication of how the site could be developed more efficiently, and where surplus land could be released to the north and/or south. In terms of the residential development, small housing sites (1.5ha <i>“Upper Residential”</i> and 1.9ha <i>“Lower Residential”</i>) could be provided with their own designated points of access from Curslow Road, each capable of accommodating circa 40 dwellings (representing a low density to reflect the site’s rural context). The attached Masterplan is purely indicative and we would welcome the opportunity to discuss the proposals with Officers of your Authority in further detail. However, we contend that the site can offer <i>“suitable”</i>, <i>“available”</i> and <i>“achievable”</i> brownfield land for residential development in the context of NPPF para. 47. It is, therefore, <i>“deliverable”</i> and can be considered for release from the Green Belt.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
Hurcott Village Management Committee	LPPO1629	Alternative suggestion - Extended Lea Castle	Comment	<p>I would like to make the following observations in favour of the development of the Lea Castle Site:</p> <ul style="list-style-type: none"> Options A and B of the WFDC current draft proposes using <u>some</u> of Lea Castle land for development. If the whole of the Lea Castle site were included in this proposed development then a new sustainable village, like Cookley, could be created. With a sustainable community of say 1500+ homes this could become a new Village with shops and a two form entry Primary School. It could support a village centre which, despite being in the parish of Cookley, would be a separate village. It would have good existing road links to Kidderminster, Stourbridge, Bridgnorth, Wolverhampton and beyond. It would be capable of sustaining a bus service. It would be within the catchment of Wolverley CE High School which would have a positive impact on the school's long term viability.
Gladman Developments Limited	LPPO1432	Additional site - Wolverhampton Road	Comment	<p>Gladman are promoting land straddling the Wolverhampton Road adjacent to the urban edge of Kidderminster to the south of the B4189. (HELAA ref. WFR/WC/16) 17Ha site capable of delivering up to 400 dwellings. Could bring it forward within 5 years of land being removed from Green Belt through Local Plan process.</p> <p>Eastern section already proposed under option A. Proposed release of western parcel as is also well contained and its release would help to establish recognisable urban edge to use as new GB boundary.</p>
Gladman Developments Limited	LPPO1433	Additional site The Lakes Road Bewdley	Support	<p>Gladman are promoting land at The Lakes Road Bewdley for housing. 9.52Ha site located within 2km of town centre. HELAA concluded that only 3Ha was deliverable. This reflects several factors which Gladman believe can be mitigated</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				for. Outline application for 195 dwellings now going to appeal (16/0550/OUTL). In accordance with NPPF, site is deliverable, available and offers suitable location for development now. It would help to significantly boost housing supply in location outside of Green Belt.
	LPPO2713	Alternative Options	Comment	<p><u>Other options for Building, Blue Sky Thinking</u></p> <p>a. Park Lane - numerous redundant industrial buildings which have no historical merit and a timber yard which should be relocated to an industrial estate. The site opens on to the canal and would be a prime housing development. Whilst it would actually be good if Park Lane were dualled to complete the ring road, I assume that this is unlikely.</p> <p>b. Glades Leisure Centre. This land already belongs to WFDC. The councillors have a vanity project to build a Multiplex cinema and extra restaurants etc which will further denude the town of retail facilities. It is immoral for Wyre Forest District Council to be building a Multiplex whilst ignoring the need for low cost housing. In reality no developer will invest in building a Multiplex cinema in Kidderminster as there is no financial justification and so this land will remain empty when it would be an ideal site for low cost housing within walking distance of the town. Any local council which wanted to protect its town centre would reject the idea of building outside it and would build much needed low cost houses on land which it already owns.</p> <p>c. The whole of the east side of Bromsgrove Street could be redeveloped into a mixture of low rise flats and small houses for people who cannot afford cars or public transport but who could then access the town centre.</p> <p>d. Worcester Street is a totally dead street. If there really is a market for a Multiplex cinema then it should be built on the site of the large retail units</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>(formerly Woolworths, Littlewoods), opening directly into the town and a bowling alley in the same complex. Current tenants could move into the former TJ Hughes shop bringing another part of the town back to life. The other developments envisaged for the Glades site could also be built in Worcester Street saving this part of town from total devastation. The rest of Worcester Street should be released from retail usage for housing because realistically the town is not going to require these retail units. Even if Worcester Street is kept as retail there is considerable scope to create housing above the retail units. WFDC seems to reject ideas of this nature because they are too difficult. The Council should ask as an facilitator and not take no for an answer. The council has greater powers for Compulsory Purchase than it seems to realise. It is ,however, far easier to build on green field sites and continue to allow the town to die.</p> <p>e. In the unlikely event of a Multiplex ever getting built on Worcester Street I envisage that a roof could be built over enclosing the current square outside the Littlewoods building. Above the Multiplex would be the ideal place to build flats for independent senior citizens. Independent people who no longer have cars are far happier having independent access to shops and other leisure facilities rather than having to rely on others for lifts. Building here would give direct access to Bromsgrove Street but also by lift to the Multiplex and to Worcester Street to access all the towns facilities.</p> <p>There is however an alternative for Worcester Street:</p> <p>f. Worcester Street could be re-designated on the east side as the Kidderminster Craft Quarter and on the west side as the Kidderminster Antiques Quarter. Instead of reopening the street to traffic, replace the street lighting with Victorian style gas lamps(LED really). Reface the shops to look like a high class Victorian Shopping Street. This obviously costs money and I am aware that the empty buildings do not belong to the council. However, it would surely be better to spend money on</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>upgrading the shops and ensuring that the upper floors were occupied as housing rather than wasting money creating a rat run. I do wonder whether because this would be a craft centre, that funding could be sought from the Arts Council or the Lottery Community fund. The east side properties would then be let to a mixture of jewellers, glass makers, potters, weavers, artisan bakers etc who would manufacture and sell from the premises. They might well do a large proportion of their business on the net enabling the properties not to be rated as retail. The antiques quarter could be similarly developed. Indeed if Bromsgrove Street East is redeveloped for housing the existing antiques shops could be relocated onto Worcester Street where they would get higher footfall and kick start the process. The major advantage of redeveloping Worcester Street in this way is that if done properly it would become a nationally acknowledged tourist attraction and bring the thousands of visitors to the Safari Park and SVR into the town. Whilst this is not directly associated with the plan, it would be possible immediately to start a monthly craft and antiques market on Worcester Street to establish the direction of travel.</p> <p>g. Green Street/ Meadow Mill Industrial Estate. Green Street has a derelict Industrial Unit, formerly the Frank Stone building. This has no architectural merit and should be demolished. New build on Green Street could be architectural structured to match heritage buildings. Behind this unit is the Meadow Mill Estate. The largest part of this estate is empty space, used by the tenants as car parking but there is a surplus of space. There are tributaries of the Stour crossing this land which automatically makes it attractive for housing. I see a massive opportunity to create better quality industrial units and housing on the site giving a much better usage and more attractive site. To do this it would be necessary to build two sets of roads. Imagine these as interlocking fingers of two hands. Entering down the fingers of one hand would give access to the ground floor industrial units. Entering down the fingers of the other hand would give access to the low rise housing units. This would provide total separation of the domestic and commercial traffic and</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>improve both the look and the usage of the site several times over. Whilst once again our council would dismiss this plan out of hand because it is too difficult, I envisage that the owners of the site would make a considerable profit from this scheme whilst increasing the number of small commercial units available and creating hundreds of residential units.</p> <p>h. Completely redesign the high school provision for Kidderminster. Start with Baxter College. This is a failed school that is losing students to the point that some of the current buildings are now being left empty. It shares its site with The Wyre Forest School which is a brand new building but was built for the wrong number of students and so is inadequate. A new, larger, school is required (including provision for 18-25 years olds). The solution to this is to close Baxter College completely and disperse its students between Wolverley and King Charles School. The Wyre Forest School should be rebuilt on the Sladen site. This fulfils the covenant for educational use and allows a school of the correct size to be built. The present King Charles 1 High School should be closed and an enlarged school be built on the site already earmarked behind the redundant Stourminster School. As an academy, KC1 school would find this attractive as it would profit from the sale and create a larger (and better financed) school. The final piece of the jigsaw would be to close Wolverley C of E High School and move it on to the vacated Baxter site. The brand new Wyre Forest School buildings will make an excellent sixth form centre. Two sites would be released for building. The KC1 site would give fantastic opportunities to build mixed housing within walking distance of the town and the station. The Wolverley site is enormous and would create a brand new village big enough to fill the gap between the brownfield availability and the 6000 units which WFDC has calculated that it needs. (not withstanding the fact that the 6000 units aren't required. At least if they were built on the West side they would be within commuting distance of Wolverhampton/ Bridgnorth,etc.)</p> <p>I. There is considerable scope to redevelop the land around the Harriers football</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>ground. The industrial estate is another example of grossly underutilised industrial land. This combines with the enormous problem of a lack of parking for the new Kidderminster station and the SVR. The solution is to dig the entire site out and create a two-storey underground carpark. On top of this at the level of the current Hoo Road would be the industrial units and above these would be low rise residential units. For a blueprint of how this could be achieved, look at the Victoria Centre in Nottingham (I am aware that the hole already existed). Again, because of the ability to charge for parking and the housing this would be a profitable and therefore viable project. This development could actually be a prestige project which would attract national attention for its brilliant use of space. I also envisage a profitable project in building a new East Stand at the Harriers ground. (Again to look for a blue print look at the current Chelsea Football ground). A new stand would incorporate seating for the football club, new changing facilities (Harriers Ladies team?) and flats. The great thing about the flats is that they would face the SVR. This could be a very profitable development as it would be ideal for high value flats with access to the station.</p> <p>Many of my suggestions will be rejected by Wyre Forest District Council, but I believe that they are all commercially viable. They could contribute to the positive development of Kidderminster unlike building on the greenfield land, or missing out on town centre development and allowing the town to continue its slide to dereliction.</p>
	LPPO2807	Alternatives	Comment	In Kidderminster, brownfield sites should be used. There are available empty properties owned by Wyre Forest District Council, which should be developed into affordable housing. Worcester street in Kidderminster is a street of empty shops with accommodation above. Why is this not being looked at before taking Green Belt land?
	LPPO2797	Extended Lea Castle	Support	Before building on this valuable Green Belt/farm land all the land at and around the old Lea Castle site should be used together with all brownfield sites no matter

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				how small and which are in an accessible position of which there are many around Kidderminster.
	LPPO2515	Site Suggestion - extended Lea Castle	Comment	Suggests a larger site at Lea Castle. Utilising all of the land proposed in both Option A and B and extending the site to include land up to the Wolverhampton Road and at the rear of Lea Castle up to Axborough Lane. There might also be a possibility of further development on the eastern side of Wolverley Road towards Sion Hill, which would link with development at the Sion Hill School site. With this proposed land, including the sites in that vicinity already included in the Plan, a sustainable community of around 2,000-2,500 houses could be created. This would be large enough to support a 2 form entry primary school within the catchment of Wolverley High School (thus positively impacting on the schools long term viability) and a sustainable bus service. It would also support a 'village' centre within the Cookley Parish without putting a burden on that community and would potentially be able to support live-work units,
	LPPO3033	6.57	Object	Question 4: further options? Not without further information other than to say that brownfield land should be used first
	LPPO737	Site submitted - Fingerpost Cottage, Cleobury Road, Rock	Comment	Call for sites form submitted - Fingerpost Cottage, Cleobury Road, Rock.
	LPPO2297	Options	Comment	Question the need for the amount of housing needed. Does not consider the release of housing from the older population as on Spennels. Affordable housing would be better placed nearer the town centre / or within reasonable walking distance of the railway station. Convert the "Courthouse", use the land where the auction / markets are presently. Make changes to the more derelict areas around the town – old carpet mills – horsefair - etc
	LPPO2877	Alternatives	Comment	It states there is insufficient brownfield sites and non- Green Belt land to

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>accommodate housing and employment growth.</p> <p>There are brownfield sites not even on the plan.</p> <p>Chuchfields Kidderminster , Brown Westhead Wolverley , park Lane , Kidderminster , Brown Westhead Wolverley. Kidderminster is a dead town and building affordable homes and bringing life and community back into the town should be a priority.</p>
	LPPO515	Extended Lea Castle	Support	<p>I support building on the Lea Castle site for the following reasons:</p> <p>Large number of the dwellings would be on existing brownfield ground and not reducing the amount of Green Belt land. The size of the area could be further increased by using the land up to Axborough Lane.</p> <p>A large number of dwellings could support a 2 form entry primary school, thus reducing the impact on the local facilities.</p> <p>It would be within the catchment of Wolverly CE High School and would positively impact the schools long term viability.</p> <p>It would be capable of sustaining a bus service</p> <p>It would support a village centre which would fall under Cookley parish, but would not put any burden on that community as it would be large enough to support its own park, village hall, school and shop.</p> <p>It would potentially be able to provide live-work units.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO577	Extended Lea Castle	Support	<p>I support building on Lea Castle for the following reasons:</p> <p>Large number of dwellings would be on existing brownfield ground, and not reducing the amount of Green Belt land around the town. The size of the area could be further increased by using the land up to Axborough Lane.</p> <p>A large number of dwellings could support a 2 form entry primary school, thus reducing the impact on the local facilities.</p> <p>It would be within the catchment of Wolverly CE High School and would positively impact the schools long term viability.</p> <p>It would be capable of sustaining a bus service</p> <p>It would support a village centre which would fall under Cookley parish, but would not put any burden on that community as it would be large enough to support its own park, village hall, school and shop.</p> <p>It would potentially be able to provide live-work units.</p>
	LPPO626	Alternative site suggestion	Comment	<p>A potential way to help preserve more of the Green Belt would be to revive the plan to rebuild King Charles I School on the Borrington Road site. This could increase school places at secondary level to support the proposed new housing developments. The original plan had much of the expansion into the Green Belt consisting of playing fields, which most people would find less objectionable than housing and also help to maintain clear land between Stone and Kidderminster. Old school site on Comberton Road could then be released for housing. This would be much more suitable than a site on the edge of Kidderminster since it is closer to town and facilities such as GP practices. It would be within walking distance of the railway station and so remove the need for extra</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				car journeys and also be within walking distance of the town centre.
	LPPO671	Alternative site suggestions	Comment	<p>I suggest that any of the following sites away from existing developments would make suitable sites as an alternative to Option A:</p> <ul style="list-style-type: none"> - Sion Hill school - Lea Castle - Land on A456 between Blakedown and Hagley - Land which is no longer used by Wyre Forest Golf Club - The old Brintons Golf Driving range on Stourport Road.
J & H Evans	LPPO690	Site submitted - Land fronting Rectory Lane, Rock	Comment	Call for sites submitted: Land fronting Rectory Lane, Rock
	LPPO693	Site submitted - Land North West of Ferndale Crescent, Kidderminster	Comment	<p>The land proposal off Ferndale Crescent has sustainable access to a wide range of services from bus stops to shops and schools to recreational space/facilities and represents a sustainable form of development.</p> <p>The land is grade 3 agricultural. There is a footpath crossing the site that would be retained.</p> <p>The site has attracted interest from several developers and, if removed from the Green Belt, would be deliverable within 5 years.</p>
	LPPO698	Site submitted - Land at Crundalls Lane / Grey Green Lane, Bewdley	Comment	<p>Suggests land off Crundalls Lane / Grey Green Lane.</p> <p>A total area of 6.95ha that would provide natural infill within the existing road structure network. Whilst part of the site is recognised as having limited flood risk this could be utilised effectively as open space giving an estimated 5ha of developable land. With a density of 20-25 houses per hectare on the net</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				developable area and allowing for public open space. It is also considered that this would be considered an ideal location to include an element of accommodation for retired persons.
Hingley & Callow	LPPO700	Site submitted - Land off Stanklyn Lane, Kidderminster	Comment	<p>Suggests new site - Land off Stanklyn Lane.</p> <p>The site, as shown edged red on the attached plan, extends to approximately 3.3ha adjacent to an existing blue shaded option A housing site. This area would offer additional land area, is superbly screened by existing natural features and give an alternative access back to Stanklyn Lane. The site is suggested as suitable for low density housing with a sympathetic design scheme to enhance surrounding properties.</p>
	LPPO702	Site submitted - Land adjacent to Chaddesley School	Comment	<p>New site suggested - Land adjacent to Chaddesley School.</p> <p>We would like to add land, as shown edged red on the attached plan, extending to approximately 2.4ha located adjacent to Chaddesley Corbett School.</p> <p>The site provides an ideal opportunity to enable modern housing development. It may be beneficial for the school to be incorporated within the village boundary.</p>
R & D Turner Charitable Trust	LPPO706	Site submitted - Land south of Arley Lane, Goods Green, Upper Arley	Comment	<p>New site suggested - land south of Arley Lane Goods Green, Upper Arley.</p> <p>The land is open farm land and includes a range of underutilised partially redundant farm buildings. The site in all extends to approximately 4.20ha, a plan showing the area outlined in red is attached for your information.</p> <p>The area is located opposite a previously developed residential site and offers scope for missed density housing to include starter and retirement homes. The land owners attitude towards development is positive and they desire to maintain a thriving village economy with employment and tourism generation, support for</p>

				<p>the school, sports/social grounds, and local businesses a key focus.</p> <p>Accessibility is good and we understand principal</p>
Rock Parish Council	LPPO1164	Site suggestion - Bliss Gate Inn	Comment	Would like a policy in the Local Plan to encourage the refurbishment of the Bliss Gate Inn to be converted into units of accommodation together with the use of the rear Car Park. The site has fallen into a poor state of repair and really does great harm to the gateway into the Bliss Gate Village.
Worcestershire Wildlife Trust	LPPO1053	Paragraph 6.57	Comment	<p>We strongly recommend a blend of Options A and B, amended to remove the Settling Ponds, Wilden Lane core allocation, the proposed eastern relief road and the Option A allocations to the east of Kidderminster because of their significant ecological impacts and the limited evidence underpinning the need for the road.</p> <p>We believe that such an approach would deliver the required level of development whilst taking a positive step towards reducing the overall environmental impact of the Local Plan. Notwithstanding this helpful improvement there will still be significant implications for biodiversity and Green Infrastructure arising from a number of the allocations and additional work to confirm the acceptability of their inclusion will be needed prior to finalising the Plan.</p> <p>Once the final allocations are agreed it will be essential for the Local Plan to set out mechanisms for the effective delivery of biodiversity enhancement and GI. The policy framework included in this consultation offers a helpful starting point, particularly in Policies 11D and 14, but we consider that the Plan needs to go further. With that in mind we would recommend that sites sitting in well defined geographic clusters be pulled together to form cohesive groups so that major developments are delivered using the GI led approach championed by the Worcestershire Green Infrastructure Partnership. In short such an approach would suggest that groups of contiguous or closely associated sites be covered by</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>overarching Green Infrastructure Concept Plans designed to maximise the environmental benefits available at each location. This fits closely with the policy framework already set out in policy 14 and offers a mechanism by which master planning of the major developments proposed can be guided towards the most sustainable outcomes. We would be pleased to discuss this with the council if that would be helpful.</p> <p>For further information please see our comments under the relevant allocations policies and our response to paragraph 6.54.</p>
	LPPO2170	Extended Lea Castle	Comment	Can the required number of new houses be provided by using the land around Lea Castle between the Wolverhampton Road and the Stourbridge Road? There are major highways already established in this area with good links to other urban areas and any development would not butt up to existing dwellings but could be a stand alone ‘village community’ with access to Wolverly High School.
Campaign to Protect Rural England	LPPO983	6.57	Comment	Grey Green Lane - Could potentially develop north on either side of Grey Green Lane but would hope that this was not required. At Low Habberley there is a viable urban extension. This would then mean the urban extensions east of Kidderminster would not be needed. Site is well contained plateau between Habberley Valley and tributary of Honey Brook. Not high grade agricultural land.
Sir Thomas White's Charity	LPPO899	Site submitted - Land North West of Kidderminster	Comment	Our client owns the land to the north-west of Kidderminster, adjacent to Habberley Road (B4190) and covers an area of approximately 36 hectares. A site location plan is submitted with this representation. The site is adjacent to the urban edge of Kidderminster and approximately 3.5km to the north-west of the centre. The site is bound by hedges which forms the boundary of the site. To the north the site is bound by Sandy Lane, which creates an access point to the site. To the east the site is bound by residential dwellings from Coningsby Drive, Harvington Close and Carlton Close. To the south the site is bound by High Habberley House and dense trees and to the west the site is bound by agricultural

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>land. Low Habberley Road transects the site from east to west.</p> <p>The site is deliverable for residential development and is situated within a sustainable location, with suitable accessibility. The site is within close proximity of a wide variety of services and facilities. Including a food superstore and post office 400m to the south, Franche Community Primary School 600m to the south, and Baxter College 700m to the south. The site is not constrained and could deliver housing immediately, which is supported by the Council's Housing and Economic Land Availability Assessment (HELAA), published in June 2016, through which the majority of the site forms part of a wider assessed area. The HELAA concludes that the site is potentially developable after five years, if the site were to be released from the Green Belt. Therefore the site has the potential to make a meaningful contribution to the housing requirements within Kidderminster and if necessary could be delivered in phases. The site location plan submitted with this representation shows the potential for a phased development depending on the Council's requirements. If there is a smaller, short term need, a smaller element of the site could be brought forward, as 'Phase 1' for approximately 120 dwellings. This would assist the Council in achieving its ambitious target of delivering 300 dwellings per annum.</p> <p>Of the five Green Belt tests, the site is only considered to conflict with the test of assisting in safeguarding the countryside from encroachment. However, this is inevitable given the Borough's housing needs and the fact the plan is not proposing a sufficient supply to meet its needs. Given these pressing needs the release of the site will not compromise the delivery of urban regeneration and the use of derelict and urban land. The Council has exhausted these sources of supply before releasing other sites from the Green Belt which are proposed for allocation.</p> <p>Development of the site would not result in unrestricted sprawl of large built-up areas. It represents a minimal extension to the north western edge of</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Kidderminster and would include landscaping to provide sufficient defensible boundaries to reduce its impact on the open landscape beyond the site.</p> <p>It would not result in neighbouring towns merging, there would remain a minimum 200m buffer between the edge of Low Habberley and the edge of phase 2, and in any case any proposals for the site would be sensitively designed, with open space provided on this edge to increase the buffer further. In turn this buffer would also ensure any development preserves the setting and character of Low Habberley.</p> <p>The representations above set out why our client considers that additional land needs to be allocated by the plan, as well as further flexibility should be incorporated within the Council's housing supply, if the plan is to be found sound. We also outline the reasoning the land north-west of Kidderminster being a suitable location for sustainable development and that it is an appropriate location for residential development to meet this shortfall.</p>
Stone Parish Council	LPPO1160	Additional Site - King Charles High School, Kidderminster	Comment	Suggests that King Charles High School on Chester Road, Kidderminster be re-developed for housing. Relocating the High School to the land adjoining the Lower School at Borrington Road.
Taylor Wimpey West Midlands	LPPO1553	Paragraph 6.57	Comment	<p>Potential issues with delivering solely Option 'A' or 'B,' a combination of the Options is most appropriate. There is concern that whilst the identification of a further urban extension in Option A is logical, deliverability will be dependent on all the land between Comberton Road (A448) and Worcester Road (A449) being secured.</p> <p>There is concern that the Council has not set out a balanced overview of Options A and B in setting out their consultation questions in paragraphs 6.54 to 6.56. For example, paragraph 6.55 outlines the benefits of Option 'A' and paragraph 6.56</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				largely discusses the dis-benefits of Option 'B', which provides a bias view in favour of Option 'A.' Taylor Wimpey consider there to be benefits and dis-benefits of both options which will need to be carefully considered in light of responses to this current consultation and further evidence prepared.
	LPPO709	Site submitted - Heath Lane, Shenstone	Comment	Call for sites form submitted for land at Heath Lane, Shenstone. Proposed use for Travelling Showpeople
	LPPO2173	Extended Lea Castle	Support	<ul style="list-style-type: none"> Leas Castle is ideal. Can provide school and shops. Has good roads north and south but Hurcott Road is already impossible.
Gladman Developments Limited	LPPO1424		Comment	Stourport-on-Severn is a sustainable market town that can accommodate more growth than currently identified under this policy. Non-Green Belt sites in sustainable locations also need to be considered. Land at Astley Cross also presents a development opportunity.
	LPPO2888	6.57 Alternatives	Comment	<p>Viable alternatives - do not accept that proper consideration has been given to all of the brownfield sites. Still scope for brownfield development of apartments and flats e.g. Park Lane, Green Street, site of Crown House, sites of former schools, Jobcentre etc best way to provide much needed affordable housing.</p> <p>An aging population need suitable housing to downsize to, near town centres and shops are ideal for this. Before releasing Green Belt you should demonstrate that there are insufficient brownfield (or green field non-Green Belt) alternatives. I do not believe you have done this in the current plan.</p> <p>I would support a 'Spennells type' development on the Lea Castle site, expanding the current proposal. A full development on that site would support a primary school. Creating a 'second Spennells' on the Lea castle site would have less impact</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				on local residents as it could be self-sustaining providing shops and live/work units providing employment opportunities. Lea Castle site has better road access, between two A roads it already has the necessary road infrastructure as the Wolverhampton Road and Stourbridge Road are already linked. This means there would be no 'rat runs' created through residential streets.
	LPPO3050	Alternatives	Comment	Shortfall of housing should be met by utilising Brownfield sites as was the case on the old Power Station site in Stourport and the sugar beet factory in Kidderminster.
	LPPO3051	Alternatives	Comment	What about the building in the Bull Ring that is not being pulled down now that could be made into accommodation?
Midcounties Co-operative Society	LPPO820	Site submitted - Land South of Wolverley Road, Kidderminster	Comment	<p>Suggests site: Land south of Wolverley Road, Kidderminster (site ref FHN/7)</p> <p>The owner is keen to see the land brought forward for development as soon as possible and there are no physical or legal constraints on doing so.</p> <p>The site is currently included in the Green Belt and the Local Plan Review Preferred Options maintains such a designation.</p> <p>These representations do not address in any detail the scale or nature of the need for new housing in Wyre Forest though the right to do so a later stages of the Local Plan Review process is reserved.</p> <p>The published evidence & other material which informs the Preferred Options demonstrates that there is a clear need to allocate a substantial amount of additional land for new housing; and that this need cannot be met without releasing for development a significant amount of land that is currently within the Green Belt. The Council's positive approach to addressing this challenge — a strategic review of the Green Belt, the development of a coherent spatial strategy and careful site selection - is to be welcomed. However irrespective of the nature of the spatial strategy adopted by the Local Plan Review, the release of land south of Wolverley Road for residential development is wholly justifiable.</p> <p>The site</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> • is bounded on three sides by the existing urban area and its development would represent a natural rounding off of the built form • it is framed by existing physical features and so and clear & defensible Green Belt boundaries can be defined in line with provisions of NPPF para 85 • its development would integrate well with & benefit adjoining development by facilitating & improving access from it to nearby countryside & recreation <p>New housing on the site would contribute to meeting acknowledged needs, be wholly acceptable at the site specific level and would not, by virtue of its modest scale and comfortable relationship with the existing area, prejudice whatever spatial strategy is pursued by the Local Plan Review or the functions of the Green Belt. The Council is urged to give positive consideration to its allocation for residential development by the Local Plan Review.</p>
	LPPO2057	Extended Lea Castle, Wolverley Road and Ferndale	Comment	<p>Extend the land at Lea Castle up to Wolverhampton Road and at the Rear of the site up to Axborough Lane. Also develop on the western side of the Wolverley Road towards Sion Hill to link with the development of the Sion Hill Middle School site. The sites are:</p> <ul style="list-style-type: none"> • within the catchment of Wolverley CE High School and could positively impact on the schools long term viability. • would be capable of sustaining a bus service. • would be large enough to support a 2 form entry primary school. • would support a village centre and would not put a burden on the Cookley Parish community. • could provide a sustainable community of 2,000 to 2,500 homes. <p>Also the WFDC are wrong to not propose ANY development on the North/West of Kidderminster, at least 100-200 homes could be developed at the rear of the existing Ferndale Estate.</p>
	LPPO2707	6.57 Extended Lea Castle	Support	We support the proposal for Lea Castle sustainable village which would allow for a

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				community development, complete with primary school and would be capable of sustaining a bus service.
	LPPO1974	Other site suggestions.	Comment	<p>Development could be carried out on:</p> <ul style="list-style-type: none"> the site of the old Leisure centre and adjoining car park that could integrate the disused shops in Worcester Street empty factory units behind Matalan the old builders yard in Park Lane Wyre Forest Golf Club (site now disused) Crown House <p>Development of the old Lea Castle site should be used before green fields sites.</p>
	LPPO2590	Extended Lea Castle site	Support	<p>I believe that a better option is for the brownfield site of Lea Castle to be developed to meet Kidderminster's needs, this makes much more sense as it is close to the 449 Wolverhampton Road and would eliminate the need for a very expensive bypass. The development would be large enough to serve a small primary school and feed on into the secondary school at Wolverley which has the capacity to take the children.</p> <p>With shops and doctors added it would become a desirable place for families to live.</p>
	LPPO2918	Lea Castle	Comment	Lea Castle would be perfect for this kind of development and work along the lines of Spennells. Also, this would benefit Wolverley High School and provide increased pupil numbers for them wouldn't it?
Stourport High School	LPPO1202	Alternatives	Comment	Surplus land in the control of Stourport High School should be allocated for development. Reasons to support this proposed allocation:

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> Stourport High School is in significant need of funding to repair and replace dilapidated buildings. Insufficient grant funding to undertake the substantial building work required to the school. The school are, therefore, in a position where they are having to generate their own funds. Intention of the school to pursue a residential planning permission on surplus land in their control and sell it to a developer. This funding will then be used to assist the funding of the building and repair works. It will improve the facilities available to the school's pupils and safeguard the future of the school for years to come. No other allocation within Stourport will have similar benefits, only site where money generated from the development will directly fund a community facility. The site has clear and strong defensible boundaries. Proportion of the site is previously developed land. Paragraph 89 of the Framework allows for the limited infilling or partial or complete redevelopment of previously developed land. whether redundant or in continuing use, which would not have a greater impact on the openness of the Green Belt for the purposes of including land within it. The proposed residential development on the previously developed section of the site will have a reduced footprint in height compared to the Sixth Form building. There is significant development to the north east of the site that helps define the built up edge of Stourport. Development in this location will not, therefore, erode the perceived gap between Kidderminster and Stourport. <p>The above factors, when taken in combination, constitute 'exceptional circumstances' that justify the release of the site from the Green Belt and its allocation for residential development.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> Site is appropriate location for development. The surplus land in the control of the school is in a less important Green Belt location than Wyre Forest Golf Club (LI/2). It is disappointing that the land in the control of the school has not been assessed through the Council's Green Belt Assessment, as it was previously advised by Officers that that would be the case. The surplus land in the control of the school is better related to the built up extent of Stourport. It will not have such a significant impact in terms of reducing the gap between Stourport and Kidderminster. The various proposed allocations at Stourport will result in the population of the settlement increasing placing additional pressures on the school. The additional funding generated by the sale of the site of the housing will help improve the school facilities and assist in meeting the increased number of pupils. <p>The site is in a suitable and sustainable location for development, performs a highly limited Green Belt role and is the only site that the site promoters are aware of that have direct tangible social benefits. The site should be allocated for development in the emerging Plan.</p>
Stourport High School	LPPO869	Site submitted - Land off Coniston Crescent, Stourport	Comment	Call for sites form submitted for land off Coniston Crescent, Stourport-on-Severn.
Strong Farms (LS) Ltd	LPPO878	Site submitted - Stour Corridor/Lea Castle, Wolverley	Comment	Call for Sites form submitted - Stour Corridor/Lea Castle, Wolverley.
Kidderminster Harriers Football Club	LPPO926	Site submitted - Kidderminster Harriers Football Ground	Comment	Call for sites form submitted for Kidderminster Harriers Football Stadium - To allocate for housing the existing Aggborough Stadium & adjacent car park. This combined site is estimated to be 2.38 hectares, thus has a potential capacity for around 96 new dwellings assuming a density of approximately 40 units /ha.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Housing in this close to town centre location would reduce the need to allocate other sites elsewhere in the district particularly those lying beyond the existing built up areas of the town and in Green Belt. The submission of this site for consideration for potential residential development is conditional upon the successful relocation of the current Kidderminster Harriers use to a suitable alternative site which will meet the club's future needs.</p> <p>The existing Aggborough Stadium and car park is a town site within easy walking distance from the rail station Kidderminster Station (approx.0.5 miles). Housing development here would help reduce the extent of encroachment into Green Belt currently proposed in the new Local Plan (Core Housing sites, as well as both options A & B). Housing on the outskirts of town currently proposed would not necessarily have the opportunity to be as well integrated into the existing Kidderminster town and the services/retail offer that a closer town centre location (i.e. the Aggborough site) would provide.</p> <p>Housing on the site would be more compatible with existing neighbouring uses, these being predominantly residential.</p> <p>The site is not subject to any particular designations that would otherwise impinge on redevelopment here. For example, it is not within a Conservation Area, there are no listed buildings or Tree Preservation Orders (TPO) and there are no flooding issues.</p> <p>The relocation of the existing football club to the new facilities south of Kidderminster will not happen immediately, but, with appropriate planning policies in place, could take place within the first five years of the proposed Local Plan period, thus freeing up this site for the required housing.</p>
Kidderminster Harriers Football Club	LPPO995	6.57 - Kidderminster Harriers Stadium	Comment	<p>To support development on previously developed land before land with greater environmental or amenity value, in accordance with NPPF para's 110 – 111. Add to list of Core Sites for allocation: <u>Aggborough Stadium and car park site for housing (total approx.96 units). Not</u></p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<u>currently in Green Belt so removal is not necessary.</u>
	LPPO2390	6.57 Alternatives	Object	We feel that a development on ground such as the old Glades Leisure Centre site or maybe the Cermaspeed site would be much more advantageous and would also enhance the town centre. There is no enhancement to be found by adding such a large number of council properties to a very small village.
	LPPO2540	6.57	Comment	There are lots of sites in Kidderminster , i.e., the grounds of Sion Hill school, Sion Hill, Sladen School, Hurcott Road. where people can get a school place, into a doctors surgery, regular buses & walk into Kidderminster town centre where they may work.
	LPPO2690	Selba Drive	Object	<p>I was dismayed to learn that "Land Off Selba Drive" (reference number BHS/22) is included in the Local Plan Review as suitable for housing development.</p> <p>I wish to strongly object to this, on the grounds of overcrowding of access routes and the terrible erosion of local amenities.</p> <p>For decades, this open land has been widely used by children of all ages, families and dogwalkers. As it is adjacent to the Selba Drive cul-de-sac, it is a safe area for children to play in sight of a number of homes and with no through access and therefore few cars. There is no other such area on Habberley estate. To build on this land would be to deprive the whole community of a valuable and much-needed recreational area.</p> <p>With the recent redevelopment of the Cooper's Arms public house and adjacent church and church hall, the land in question will be even more in demand for use by locals. The closing down of the public house, church and church hall leave precious few local amenities in the area, making this land an even more precious community resource.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				Access to Selba Drive is already difficult, with the adjacent Westminster Drive now very crowded with cars. When the new houses on the public house and church site are occupied, increasing pressure will be put on the area from parked vehicles and from traffic. The development of the open land next to Selba Drive would dramatically worsen this problem.
	LPPO2235	Para 6.57	Comment	<p>If Greenfield sites are made available to developers, there is danger that they will be used, because they are easier to build upon and present a better profit margin, while the blight zones around our towns remain. The council should take steps to ensure that all brownfield sites, such as the Sion Hill school site and the area adjacent to Tesco in Stourport are developed. Pressure should be put upon landowners not allowing their properties to be developed because they hope for greater profit. The many derelict buildings around the town centre, such as the old Law Court building, disused factories in Green Street and Park Lane, the old Woolworths and BHS buildings could be made into truly affordable apartments for first time buyers and provide social housing. Inclusion of Green Belt in the plan should not be considered until all of the brownfield sites have been used.</p> <p>Housing development around the town centre would help to regenerate Kidderminster whereas development almost two miles away on the edge of the town will not. People living in the town would have easy access to the town and to the station. There would be less car journeys and less pollution. Option B better meets this need.</p> <p>I am glad that steps are finally being taken to develop the waterfront areas in Kidderminster but when is the eyesore, Crown House (the old Post Office building), going to be addressed?</p> <p>I do not feel that the proposed cinema on the Glades site will help to regenerate the centre of the town. It will further draw attention away from the centre. This</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>area could better be used for housing, including housing for the elderly within walking distance of shops, restaurants, doctors, opticians, dentists etc.</p> <p>High property taxes have driven many small businesses away from Kidderminster town centre. Can the council find a way to reduce property taxes to encourage small retail businesses back into the town and improve local economy?</p> <p>I suggest that building west of Kidderminster should be take place instead. The expanded Lea Castle site should be fully developed for housing, with associated provision of a primary school, shops etc. The plan has not considered Blakedown. Parking at Kidderminster station cannot be expanded but there is scope at Blakedown. Consideration should also be given to building at Chaddesley Corbet and Wolverley, rather than focusing upon the area joining the east of Kidderminster. The plan should be revised to include this option.</p>
	LPPO2254	6.57 Alternatives	Comment	<p>The whole of the Wyre Forest including outlying villages like Wolverley, Blakedown, Chaddesley Corbett should be included within these proposals and any development spread across the whole district to ensure that urban sprawl is contained and building is within existing boundaries.</p> <p>The Government is not in favour of developing green field sites unless it is a last resort. There are many brownfield sites within the area that should be developed, some of which already have planning permission but are being held as land banks. The Council should not allow this and should lobby Parliament to ensure this is against the law.</p>
	LPPO2558	Site suggestion - extended Lea Castle	Support	<p>The alternative that I would please ask you to consider is the Lea Castle area. This is already an existing built upon site which could be expanded to create a brand new community. Why not create a new part of Kidderminster with a new school, shops, play area, pub which would be far more appealing to people moving to the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				area?
	LPPO1923	New site suggestion Wolverley.	Comment	There are brownfield sites that are not on the plan, e.g. Brown Westhead Park, Wolverley, partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.
	LPPO3061	Para 6.57	Comment	Suggested areas for development Development around existing housing estates in the North of the district; Ferndale, Habberley, Franche and in the South East; Offmoor, Spennells, Stanklyn would develop the Wyre Forest area along a North-South axis and not merely provide commuter residences for other districts to the East. Developing and regenerating the town centre would create a more natural demand for housing from the indigenous population, while attracting a younger element that would be attracted to a vibrant district hub. Building a large number of houses along the eastern edge of the district would not encourage growth from within.
	LPPO2483	Lea Castle	Support	I think there is enough housing in Kidderminster. But if there is a need for more, why not housing like mobile homes, modern, compact but permanent with communal laundries and gardens.
	LPPO1967	Extended Lea Castle	Support	<ul style="list-style-type: none"> • Lea Castle would be most appropriate for development. • A community could be set up. • Main road surround the site.
	LPPO1995	Lea Castle Hospital Extension	Support	<ul style="list-style-type: none"> • The Lea Castle site would be a better option.
	LPPO1837	Lea Castle Hospital	Support	Supports extended Lea Castle Development.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
		Extension		
	LPPO2629	6.57 - Alternative site	Comment	<p>As an alternative, we propose that the Local Plan includes ALL brownfield sites, developed to their maximum potential, especially the former school sites, and specifically a larger scale development on the former Lea Castle site and small amount of attached green fields, which we feel could support a 200-2500 home development. This site would facilitate the the building of a primary school, development of community facilities and a community heart as well as improving the longer term viability of Wolverley Secondary School. It would also provide a larger financial contribution to infrastructure. This development would not adversely impact on the existing Cookley village community, but would mean a regular bus service would be very viable. The derelict, disused Lea Castle site would become a vibrant community for the future.</p> <p>Development should also be actively pursued on the north western area of Kidderminster, e.g. extending housing development in the Ferndale area.</p> <p>We feel that these proposals would not only provide merely the sites for housing development, but sites which are sustainable, attractive and enhance the Wyre Forest as a whole.</p>
	LPPO2659	Callow Hill	Comment	<p>We feel the land is ideally suited for a small development (two detached houses affordable to second time buyers).</p> <p>Two modern detached house have been built opposite and there has been small infill development across the road on the main Kidderminster to Tenbury road. We know of many families looking to move out of first time buyer properties to a more rural location therefore freeing affordable properties at the bottom end of the market.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				This project would provide valuable accommodation to help with the housing crisis in the area. This area would particularly benefit from young families moving into it providing a healthy wide spread age band of residents therefore enhancing the community spirit.
	LPPO2672	Lea Castle	Support	<p>There is a particular need for more homes for one or two person households, and for people who need genuinely affordable homes, including social housing.</p> <p>I understand that one of the possibilities would be a development of the Lea Castle site. The site is large enough to support a community with a primary school and local shops and facilities, and a community of that size should also be able to support a regular bus service.</p>
	LPPO1461	Lea Castle Sustainable Village	Support	<p>Supports Lea Castle site being developed as it already has services such as power, phone connections etc. from past use.</p> <p>If it were to be developed would like us to overcome some issues such as traffic.</p>
Wyre Forest Green Party	LPPO1488	Additional Brownfield Sites - Kidderminster Town Centre	Comment	<p>The Council must make more effort in identifying suitable brownfield sites.</p> <p>The Council has made a number of attempts to attract more retailers to Kidderminster over the last few years, with limited success. It is clear that it is becoming more difficult for high street retailers to compete with Internet services in all but a few markets, but there is no recognition of this in the Plan. The trend nationwide is for a decline in the number of banks, building societies, estate agents etc. which make up many of the businesses in town centres. Kidderminster town centre has at least 40 large shops and office blocks that stand empty, some for well over a decade. The town centre is in urgent need of regeneration. We believe that Compulsory Purchase Orders should be made on some of the larger vacant shops. Planning needs to accept that the amount of shop frontage in Kidderminster is in excess of need and the area associated with retail and related</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>businesses in Kidderminster town centre be downsized to reflect likely future demand, and areas surplus to retail, such as Worcester Street, converted to apartments with some mixed use.</p> <p>Crown house on the Bull Ring in Kidderminster and the timber yard on Park Lane are significant examples of brownfield sites which should be in the Local Plan. Should the land owner not be amenable to housing development then we urge the use of Compulsory Purchase Orders.</p>
Wyre Forest Green Party	LPPO1492	Site suggestion - Wyre Forest Golf course	Comment	Stourport also has a number of Brownfield sites which are in need of development in order to meet some of the local housing needs of a growing/developing town centre. The now defunct Wyre Forest golf course has released some land and there is no reason why the whole of it should not be released for housing development. Growth of Stourport will require improvement in infrastructure, in particular public and private transport provision.
	LPPO2184	East of Kidderminster - Lea Castle	Support	<ul style="list-style-type: none"> • Supports Lea Castle Extension. • Would be able to sustain many houses, a school etc. which is badly needed.
	LPPO2791	6.57 Kidderminster town centre	Support	I would suggest that a large proportion of the existing retail zone in the centre of Kidderminster, in which properties are currently vacant, could be reallocated to housing before building on Green Belt. This would have the benefit of regenerating the town centre and putting housing close to local amenities.
	LPPO2793	6.57 Kidderminster town centre	Support	I am shocked by the state of Kidderminster town centre. It is very run down with derelict sites and empty buildings. Surely these sites should be used for housing before any green sites are even considered. Wyre Forest Council should be ashamed of the state of Kidderminster town centre, and it should be a top priority for any development.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO2794	6.57 Kidderminster town centre	Support	There are brownfield sites in the centre of Kidderminster which should be used to alleviate housing shortages, thereby improving the appalling state of the present town centre.
	LPPO2210	Extended Lea Castle and Ferndale	Comment	Develop land at Lea Castle, with a new school/shops, as a standalone community. Also fully utilise the sites of Sion Hill School/former Sladen School and develop land to the west of Wolverley Road towards Sion Hill. Land to the north/west of Kidderminster (Ferndale) should also be considered.
	LPPO1813	Alternatives	Comment	There are plenty of Brown sites around WFDC area you have the old school of Sion Hill/Sladen, the Old hospital Wolverhampton Road and the amount of property that could be used for residential around the area is ample for any district.
	LPPO1847	Lea Castle	Support	I totally support Lea Castle sustainable village.
	LPPO2846	Selba Drive	Object	<p>We wish to <u>object</u> in the strongest possible way to the inclusion and any consideration given to the “Land off Selba Drive — Kidderminster” in the local plan review.</p> <p>Any building work on this land will severely disrupt an important local community amenity with no substitute in the surrounding area. I will, in particular, draw your attention to the following issues:</p> <ul style="list-style-type: none"> • Daily, children of all ages play on the field. It is a safe area as there isn't any through traffic and there is an infrequent movement of vehicles in the cul-de-sac. Other green areas in and around the Habberley Estate are designated 'No Ball Games' and not big enough. • It is used daily by local people to walk their dogs, to exercise and to relax with friends. • Habberley Estate has little or no identified play areas that are easily and safely accessible by children and parents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> Infrastructure on Selba Drive would have to be revised. Any extra volume of traffic would have a detrimental effect on residents and the environment; this would have to be negated. Drainage would also have to be repurposed, currently rainwater from Selba Drive and the Habberley estate drains onto the road and into the field, causing some flooding. Without this run off, the effect on the existing residents could be catastrophic. At a time when our population needs more open, green areas, this open green area is being considered for development. We are of the understanding that when the original Kdderminster Self Build Association, who built the houses on Selba Drive, gave land to WFDC, it was to be used as open use land and not to be built on. We are currently waiting on a freedom of information request and pursuing the documentary evidence of this. <p>We very much hope that this area is removed from the local plan.</p>
Gladman Developments Limited	LPPO1431	para.6.57 additional sites	Comment	<p>Gladman believe there is a clear need to plan for more housing allocations than set out in options A & B. Large-scale sites proposed require release from Green Belt plus significant upfront infrastructure. Need to ensure there are no shortfalls in housing provision, especially in early years.</p> <p>BW believe OAHN should be 332 dpa. There are also clear links with Black Country and wider Worcestershire area. Also more flexibility should be built in to allow for sites not coming forward as anticipated. A 20% uplift is often suggested by Local Plan Inspectors.</p> <p>Suggest that site selection process is revisited and additional allocations made. This will help to secure rolling 5 year housing supply.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
Gladman Developments Limited	LPPO1435	Additional site - Areley Common	Support	Gladman seeks allocation of land at Areley Common (8.32Ha) which straddles boundary with Malvern Hills DC. 0.9Ha is in WFDC. The consideration of sites alongside the District's main settlements is vitally important and in cases where administrative boundaries run close to the settlement edge, it is vital that this is effectively managed through the duty-to-cooperate in local plan making. HELAA (AKR/13) considered development was achievable. Outline application 17/0045/OUTL proposed up to 125 dwellings plus C2. The site is well contained with defensible boundaries including hedgerow to the southern boundary, woodland to the east and existing residential development to the north and west. In accordance with NPPF the site is deliverable, available and offers a suitable location for development now.
Strong Farms	LPPO870	Site submitted - Land off Castle Road, to the South of Cookley	Comment	Call for sites form submitted - Land off Castle Road, to the South of Cookley.
Strong Farms	LPPO871	Site submitted - The Barracks, Wolverley Road, Wolverley	Comment	Call for sites form submitted - The Barracks, Wolverley Road, Wolverley.
Yew Tree Walk Ltd	LPPO745	Site submitted - Yew Tree Walk, Stourport	Comment	<p>Call for sites submission - Land at Yew Tree Walk, Stourport.</p> <p>The site was previously put forward in response to the Council's call for sites and was included in the Council's Housing and Economic Land Availability Assessment 2016 (HELAA). The HELAA identifies that the site is previously developed land (PDL) (a brownfield site) and that it is within the Green Belt. As this site at Yew Tree Walk is PDL, it is therefore requested that it be included on the brownfield register that is being prepared for Wyre Forest.</p> <p>The HELAA 2016 also identifies that 18% of the site is covered by a TPO (2013) and 25% of the site is within Flood Zone 3. Note that these proportions are based on the red line area that was submitted as part of the call for sites. The</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Promotional document submitted demonstrate through an Illustrative Masterplan that residential development can come forward on the majority of this site outside of the areas covered by the TPO and Flood Zone 3.</p> <p>The Preferred Option Sustainability Appraisal scores the site well against a number of objectives, including improving health and well-being, improving and enhancing the provision and accessibility to local services, meeting housing needs, promoting energy efficiency, protecting agricultural land, protecting and enhancing landscape/townscape and also maintaining and enhancing community and settlement identities. The SA does however score the site a major negative with regards to flood risk and a minor negative with regards to biodiversity. This scoring is based on the red line area contained within the HELAA.</p> <p>Informed by the SA and HELAA, para 6.47 of the Local Plan Review Preferred Options Document (June 2017) sets out that sites which are considered unsuitable (for example because of flood risk), are not viable or not deliverable have been excluded from the preferred options. Yew Tree Walk, is not currently identified as a preferred allocation in the Local Plan Preferred Options Document. In line with para 6.47 of the Preferred Options Document it is assumed that despite the site being PDL and appropriate for Green Belt release, the site has been discounted due to the fact the evidence base identifies the site as unsuitable given it is partly located in Flood Zone 3 and partly covered by a TPO. Such an assessment has been based on the red line area submitted to the call for sites which does not reflect the actual developable area of the site. In reality the Flood Zone 3 and TPO constraints do not cover the majority of the site. Sites should not just be discounted because part of the site falls within Flood Zone 3.</p> <p>The majority of the site is unconstrained PDL. The Illustrative Masterplan submitted as part of these representations demonstrates how a suitable residential development can come forward on this site. The red line area has now been revised from that shown in the HELAA to more accurately reflect the developable area of the site. This change to the red line is set out in the Promotional Document and sets out that built development can come forward</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>outside of the constrained areas. In light of this change the Council should revisit the sites scoring in the SA and reconsider this brownfield site for allocation. Note that this change has no impact upon the capacity of the site.</p> <p>The HELAA 2016 identifies that access would need to be through the adjacent housing estate off Yew Tree Walk. A Transport Technical Note has now been prepared by WSP which has been submitted as part of these representations. This note establishes that access from Yew Tree Walk can be provided for a proposed development of up to 85 dwellings.</p> <p>The site at Yew Tree Walk is sustainably located, is PDL and is on the edge of Stourport-on-Severn. The site is within the Green Belt, however in the context of the need to release land from the Green Belt to meet housing needs, it has been demonstrated that the release of this site would not compromise the role of the Green Belt. Given that development should be targeted towards Kidderminster and Stourport-on-Severn as the principle settlements, Green Belt sites such as Yew Tree Walk which are in sustainable locations, are unconstrained (as demonstrated in this letter), and particularly those which are PDL, should therefore be identified as suitable residential allocations through the Local Plan Review.</p>
	LPPO2419	6.57 Alternatives	Object	<p>There are so many sites in Kidderminster which can be built upon or regenerated. Spread out over a wider less destructive plan and included in option B. For example:</p> <ul style="list-style-type: none"> • Sladen school site • Sion Hill school site • Huge empty previously "sea line" unit of the A442 Worcester road • The old glades site (we don't need a cinema) Council have said it themselves we need homes on brownfield sites first. • Old brintons carpet site • Crown House

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> empty shops down the complete length of High Street. The empty previously "Barber-Ella hair salon" unit and flats opposite the town hall. Soon to be empty Debenhams building in weavers wharf <p>This would create a wonderful canal side residential town much like the Birmingham canal site which is thriving with bars and shops.</p> <p>Lets regenerate our town in a more modern less destructive way and bring young commuters in this way, who live in the centre, next to shops, bars, restaurants, and the train station.</p> <p>This would prevent traffic issues, over development of the already large Spennells estate. Spreading out the need for doctors, schools and policing needs evenly.</p>
	LPPO868	Site submitted - Adj. Red Lion Court, Bridgnorth Road, Arley	Comment	<p>Call for sites submitted - Adjacent to Red Lion Court, Bridgnorth Road, Arley. Former overflow car park for the Red Lion Inn (Red Lion Inn falls into Shropshire and has been developed for residential).</p> <p>The WFDC Core Strategy identifies the need for affordable housing and highlights a shortage as being a particular issue in the rural areas of the District where average house prices are highest. Policy CP04 encourages a proactive approach within rural areas. Furthermore policy DS04 again highlights the pressing need for affordable housing in the District's villages, rural settlements and other rural hamlets.</p> <p>The Wyre Forest Site Allocations includes policy SAL.DPL2 which identifies affordable housing in response to an identified local need being permitted as an exception to the general presumption against residential development in rural locations.</p> <p>Having established in the Core Strategy that there is a shortfall of affordable housing with the District overall, and furthermore, that the pressing need is felt most acutely in rural areas I would welcome your view of this site being advanced</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				as a rural exception site for affordable housing. I am also aware that the recent Housing Bill seeks to promote automatic planning permission in principle on brownfield sites to bring forward more land to build new homes quicker.
	LPPO1824	6.57	Comment	Have all the brownfield sites in the Wolverley / Cookley area been explored e.g Brown Westhead Park and the area on the opposite side of the road which I believe was the site of the Old Quarry? The same demands would be made on infrastructure but surely it makes sense to look at these areas rather any Green Belt locations.
	LPPO756	6.57	Comment	Why not include the section of land opposite Bunkers Hill i.e. the Eastern Section in Core Site? Not Highclere? Already planning permission for Safari Park Development on Bunkers Hill so would seem logical.
	LPPO704	Site submitted - North of Birmingham Road, Kidderminster	Comment	<p>Suggests site north of Birmingham Road, Kidderminster, located opposite core employment site WFR/CB/7. The land identified extends to approximately 8.9ha. Further land to the north and west could also be available.</p> <p>We confirm our clients are positive in respect of gateway development for the approach to Kidderminster on the Birmingham Road. The land area identified could provide a mixed use opportunity of employment generation, residential and/or retail as part of the overall development to the east of Kidderminster. Accessibility by virtue is excellent, land area is flat and available at short notice.</p>
Price, Price, Findley & Dormer	LPPO705	Site submitted - Land off Snuff Mill Walk, Bewdley	Comment	<p>Suggests new site - Land off Snuff Mill Walk, Bewdley.</p> <p>There is an area of underutilised land extending to approximately 3.5ha adjacent to the Bewdley Town centre boundary, as shown edged in red on the attached plan. Existing residential development adjoins, but the topography of the site would make development unobtrusive to neighbours. A sympathetic low density scheme would be proposed looking to complement the adjacent conservation site,</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				with particular thought to retirement accommodation that is needed within Bewdley. Topography limitations and preservation of screening and natural features further benefits the site and would give ample opportunity for amenity areas to be created in association with such a scheme. This site is envisaged to be suitable for low density development.
Hardwick & Prosser	LPPO714	Site submitted - 164 and 165 Sutton Park Road, Kidderminster	Comment	<p>The draft documentation, paragraph 6.2, acknowledges that it will not be possible to be entirely reliant on brownfield land. There will be a requirement for greenfield land take and it is preferable to create a scheme, such as that proposed at Sutton Park Road, within a residential development boundary, surrounded by residential use and in a sustainable location in comparison to releasing greenfield sites such as fields which adjoin a residential development boundary. For this reason we believe the site (164/165 Sutton Park Road) would be preferable to some options in the consultation document.</p> <p>This site, as a whole, would create a good boost to local housing supply as well as a viable scheme for a developer assisting its delivery. It is important to bring forward allocations of varying sizes too in order to allow varying builders and/or developer to bring them forward to create a variation of sites available in terms of design, layout and pricing to create some variety for the market.</p> <p>I note, from a previous application on 165 Sutton Park Road (acknowledged in the attached form), that an application for residential use was recommended at committee for refusal but I believe it was withdrawn, The reasons for refusal varied but essentially the application was very poorly put together - submitting too many dwellings on the plot and failing to leave sufficient space for access, parking turning as well as being unable to comply with the relevant design guides at the time. Any new proposal should be viewed on its merits and not with this previous history in mind. It is noted that there are a number of TPOs on site but it is not to say, given the larger site, that these cannot be successfully retained with the guidance of a qualified arboriculturalist.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				Furthermore I note there was concerns over access. Having spoken to planning officers about this site, during pre-application advice, it was considered there may be overall potential as part of a land assembly project which could include The Grange (Care Home for the Elderly) which adjoins the site. It is also understood that no. 163 has queried potential for development of this site. Overall — 164 and 165 Sutton Park Road could contribute to a successful housing scheme as has been the case in recent years off Sutton Park Road (examples including The Croft). Overall this site is one which represents a sustainable location for development with minimal impact or impacts which could successfully be mitigated.
Peacock & Devitt	LPPO710	Site submitted - Land South of Fairfield Lane, Wolverley	Comment	Call for sites submitted - Land South of Fairfield Lane, Wolverley.
	LPPO711	Site submitted - Bentley Grove, Curslow Lane, Kidderminster	Comment	<p>Call for sites form submitted for land adjacent to Bentley Grove, Curslow Lane.</p> <p>This land is delineated on the attached plan. The land edged blue comprises a single dwelling and its curtilage; and the land edged red is managed grassland. These representations relate to both parcels.</p> <p>The land does not feature in the Council's 2016 Housing & Economic Land Availability Assessment but the owner is keen to see the land brought forward for development as soon as possible.</p> <p>Published evidence & other material which informs the Preferred Options demonstrates that there is a clear need to allocate a substantial amount of additional land for new housing; and that this need cannot be met without releasing for development a significant amount of land that is currently within the Green Belt.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>The Council's approach to addressing this challenge needs to consider all options available and the potential of releasing land in the Green Belt which is of little functional value or landscape importance should be seriously explored. New housing can help sustain currently less than sustainable patterns of development, for example by making public transport serving the existing network of rural settlements more viable and by supporting local businesses & services.</p> <p>Such development at a relatively modest scale would not detract from the thrust of whatever overarching spatial strategy is pursued and should be supported as making a positive contribution to meeting both rural policy objectives and Borough wide housing needs.</p> <p>The land at Bentley Grove provides a good example of where such development could take place. The site</p> <ul style="list-style-type: none"> • lies within the hamlet of Mustow Green close to the villages of Harvington and Chaddesley Corbett and its development would help sustain those settlements, notably by improving the viability of existing bus services (42 & 133) which run through the area to Kidderminster & Bromsgrove and by supporting local businesses & schools • is of little functional or landscape value, containing no productive farmland or mature trees or hedgerows • could be easily accessed from either Curslow Lane and/or Bromsgrove Road and has no known physical or other constraints on development <p>Therefore the Council is urged to give positive consideration to the allocation of the land known as Bentley Grove for residential development in the Local Plan Review.</p>
	LPPO713	Site submitted - Land	Comment	Call for sites for submitted for Land adjacent to The Wain House, Lye Head, Rock

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
		adjacent to The Wain House, Lye Head, Rock		
Wyre Forest Community Housing	LPPO733	Site submitted - Severn Grove, Kidderminster	Comment	Call for sites form submitted - Severn Grove, Kidderminster
Wyre Forest Community Housing	LPPO735	Site submitted - Queens Road, Stourport	Comment	Call for sites form submitted - Queens Road, Stourport
	LPPO2421	Alternative sites - brownfield	Comment	<p>Plan states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.”</p> <p>There are brownfield sites not in the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p>
	LPPO2857	Alternative Options	Comment	Brownfield sites could create housing developments. New housing must be affordable for local young people trying to get onto the property ladder. Flats and apartments in empty shops in Kidderminster town centre would be better. Build bungalows to free up family homes. Do not destroy our countryside.
	LPPO2862	Proposed alternatives	Comment	Plans not focused on need for centralised high density housing in Kidderminster rather than low density housing on greenfield land. Half of the tower blocks were demolished in the Horsefair. The majority of housing plans since have been low density out of town estates moving the population out of the town centre, increasing traffic into the centre and requiring the construction of additional link roads. The plan should promote centralised housing development that reduces the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				dependency on car travel and lowers Co2. Rural bus service in Cookley has been threatened. If more people live out of town we are not solving the travel issue or supporting the communities requirements for easy travel to work/school.
	LPPO2889	Extended Lea Castle	Support	I would support a 'Spennells type' development on the Lea Castle site, expanding the current proposal. A full development on that site would support a primary school. Creating a 'second Spennells' on the Lea castle site would have less impact on local residents as it could be self-sustaining providing shops and live/work units providing employment opportunities. Lea Castle site has better road access, between two A roads it already has the necessary road infrastructure as the Wolverhampton Road and Stourbridge Road are already linked. This means there would be no 'rat runs' created through residential streets.
	LPPO1899	Lea Castle	Comment	I propose that the new development should be built on the Lea Castle site as this would then connect with the Wolverhampton Road, allowing a small community to be built that would be large enough to support a primary school and be able to have a better bus route and create a village atmosphere. It would also be in the Wolverley High school catchment area which would allow the school to prosper too.
	LPPO2636	Alternative sites	Comment	I would like to suggest the following sites be added into the core plan. <ul style="list-style-type: none"> The whole of Worcester Street from Coventry Street up to the old magistrates court. This area of Kidderminster's town centre is currently 'dead'. Redeveloping these empty shop units as housing would revitalise other areas of the town centre, making it a more vibrant place to visit. Disused factories at various sites including Green Street and Park Lane. In Bridge Street Stourport, the large retail unit formerly occupied as an

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				indoor market. It has been empty for several years and is now in a state of chronic disrepair. It would therefore be an ideal site to develop, similarly to what WFDC are currently doing in nearby New Street.
	LPPO2812	Extended Lea Castle Site	Support	Support proposals for a Lea Castle Sustainable Village which is an option that should be considered
Strong Farms (LS) Ltd	LPPO873	Site submitted - ExCamp, Land Off Brown Westhead Park Road, Wolverley	Comment	Call for Sites form submitted for ExCamp, Land Off Brown Westhead Park Road, Wolverley.
	LPPO2920	6.57 Alternative options	Support	If really necessary the old Lea Castle site could be used for affordable housing, as all the Utilities are in place, along with a road structure. A new school could be built on the old Sion Hill site, providing education for children on the new estate.
	LPPO2393	6.57 Alternatives	Comment	<p>The amount of building proposed seems excessive. I can't see many people wanting to move into Kidderminster unless the town has more to offer them. Parts of the town have been neglected for far too long and have become an eyesore. Many people use Kidderminster for the large supermarkets and little else.</p> <p>If it is really necessary to build in such numbers, I don't understand why the plans do not include much more building of homes and employment opportunities in the town centre. If the population is going to increase vastly, then the town has to be improved. If houses are built round about, I fear that the town will be even more soul less and become a commuter town with an empty centre.</p> <p>I welcome the improvements that are going to start soon to the railway station and this will be a big draw for commuters coming in and out of Kidderminster.</p> <p>On the plans, the Lea Castle site is marked for development. Why can't this area</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>be expanded to form a proper little village? It could have a primary school, a few shops, a GP surgery and a starter industrial units. Major roads are already there, and a bus service would also be viable. This would avoid all the strain that building in soul less patches around the town would cause. The school at Offmore is full to capacity the GP surgeries are all stretched. If planned properly Lea Castle village could have a heart with a purpose built school, a medical centre. It could become a place where families really would choose to live, work, and play.</p> <p>It seems that there is no plan to develop the north west of Kidderminster, I can't understand this.</p> <p>I support the call for the use of brown sites in and around the town of Kidderminster and also a village in and around the Lea Castle site.</p>
	LPPO2423	Selba Drive	Object	<p>I was disturbed to discover that under the Local Plan review so many smaller sites were being included for consideration without any mention to those living close by.</p> <p>I therefore wish to strongly object to the inclusion of the "Land Off Selba Drive" HELAA Reference number: BHS/22. I am objecting on the grounds of <u>poor access</u> and what I consider to be <u>a dangerous erosion of local amenities</u>.</p> <p>With the removal of the public house, the Catholic Church and St Johns annex there is no longer any facility within the Habberley estate apart from the private club and a small scout hut. The Habberley estate has lost a venue for people to meet and congregate, removing any exercise or family option's, from coffee mornings and parties through to Zumba, all have now disappeared.</p> <p>And now there are plans to remove the only free open space on the estate where children can safely play within hailing distance and in reasonable view of a good</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>number of homes.</p> <p>Land used for exercising the dog, playing cricket and football so to remove this amenity would be a considerable loss to this area, once again forcing people to take transport to go outside of the local area, using their cars and thus contributing to a negative environmental impact within the Wyre Forest district area.</p> <p>Residents would also suffer from the addition of extra vehicles on already overcrowded roads with people parking on pavements, verges and anywhere else they can find that is safe to leave their vehicles.</p> <p>Selba Drive and the roads that lead to it are not wide enough to provide access for the additional cars and people. Westminster Drive is almost none negotiable on occasions and there is the expectation of extra vehicles parking on Truro drive and Canterbury Road generated by the occupation of the new homes on the old pub site. Making the fearful prospect of Emergency vehicles being unable to reach properties at those crucial times, when so often needed.</p>
	LPPO2168	6.57	Comment	Brownfield sites should be looked: Sion Hill School, The lion's Fields and Crown House.
	LPPO2186	New area suggested - Blakedown	Comment	If there is an absolute necessity for housing I believe the area surrounding Blakedown should be considered – there are existing transport links to Birmingham and Worcester from there.
	LPPO2648	Lea Castle - whole site	Support	If more houses are needed I propose they are built on the Lea Castle site creating a self contained village with its own school, shops and GP practice. But I believe there needs to be much more investment in the local NHS to support more people moving in.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO2308	Alternatives	Object	<ul style="list-style-type: none"> • brownfield sites should be developed first • In town centre empty shops used for housing as the need for retail units is diminishing . • jobs are required, currently there are empty factory units ie easter park.offices are empty in green st. • Housing needs to run in conjunction with employment • Do something about employment. • Preserve Green Belt not build on it.
	LPPO2587	6.57 Alternative Sites	Object	<p>As an alternative I would like to propose the use of land at Lea Castle, this could be extended to use land up to the Wolverhampton Road and at the rear of the Lea Castle site, extending up to Axborough Lane. There could also be some development on the Western side of Wolverley Road towards Sion Hill which would link with the development at the Sion Hill Middle School site.</p> <p>This development could create a sustainable village with all the required infrastructure to support it, a village centre and a primary school. The village would be able to sustain a bus service and would not impact on the community of Cookley.</p> <p>In addition to this I feel that, WFDC should propose some degree of development on the north/west of Kidderminster and feel it would be reasonable to develop land at the rear of the existing Ferndale estate which could accommodate 100-200 houses.</p>
	LPPO1462	Lea Castle Sustainable Village - Policy 31	Support	Supports Lea Castle Sustainable Village.
	LPPO2601	6.57 Alternative Sites	Object	Other sites, such as Lea Castle would be large enough to warrant their own, new amenities and therefore not add pressure to other locations or require constant

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>trips into the town.</p> <p>Other sites already have existing plumbing and sewerage - Lea Castle, Sladen School site, Sion Hill school site, industrial units off Stourport Road, other disused factory sites within central Kidderminster.</p> <p>These other sites are an eyesore, that attracts vandalism and metal theft, and should be used first, before fresh green sites are even considered. Why haven't they been built upon if housing is so urgently needed? Please ask the building firm why?</p> <p>The majority of employment is based nearer other parts of Kidderminster.</p>
	LPPO2080	East of Kidderminster - Lea Castle Extension	Support	<ul style="list-style-type: none"> • Supports Lea Castle site. • Could create sustainable community with new school and bus service.
	LPPO2190	Lea Castle	Support	<ul style="list-style-type: none"> • Lea Castle would be a better proposal.
	LPPO1463	Lea Castle Sustainable Village - Policy 31	Support	Feels Lea Castle Sustainable Village is the best option for new housing.
	LPPO2759	6.57 Lea Castle	Support	<p>I think an alternative proposal to use the Lea Castle Site is more suitable.</p> <ul style="list-style-type: none"> • it is a larger site with room to include a central communal and commercial area, • It's size could provide many more houses, of varied size and price, and also support a large primary school within the catchment for Wolverly High. • It would not rely on one major road to access, nor major construction to provide sufficient access.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> Redevelopment of this site would provide an opportunity to use unused land in the true spirit of regeneration.
	LPPO2788	6.57	Comment	<p>Justification 31.1 states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” I would counter that:</p> <p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p> <p>I strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO2963	6.57	Comment	<p>Development should be dispersed across the district as equally as possible so that no one area alone has to bear the brunt of the associated negatives. Use only greenfield sites where there is no public access to lessen impact on loss of recreational use.</p>
Offmore Comberton Action Group - Local Plans	LPPO1568	Site suggestion - Rear of Ferndale Estate	Comment	<p>We believe WFDC are wrong not to propose ANY development on the North/West of Kidderminster. We feel that 100-200 houses could quite reasonably be developed at the rear of the existing Ferndale estate and would have easy access to the A449 at the Lea Castle cross roads.</p> <p>We believe that our alternatives will create viable and sustainable communities, protect valuable, productive farmland, preserve endangered bird species and other wildlife and, by prioritising Brownfield development, ensure that our towns</p>

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				and town centres are viable and thriving.
	LPPO2946	Lea Castle & Hurcott ADR	Support	<p>Advantages of alternative option at Lea Castle brownfield site and Hurcott ADR.</p> <ul style="list-style-type: none"> • Current proposals for Lea castle site are for only 600 houses and those proposals avoid rather than tackle the issue of underground tunnels at the site. Development would impact the residents of Cookley village, with increased need for primary school places and other facilities. If the development of Lea Castle site extended to Axborough Lane and included 2000 – 2500 houses, then this should provide enough profit to address the issues of the tunnels and would result in the development of a sustainable community with its own primary school, shops etc, similar to when Spennells was developed. This would support a village centre which whilst in Cookley Parish would not produce a burden on that community. • Where 2500 houses are developed the developers contribute to road improvement which could address the issues of Hurcott Lane / Hurcott Road. • The expansion of Lea Castle development would be capable of sustaining a bus service. • It would be in the catchment area of Wolverley High School which is currently undersubscribed and would positively impact on the schools long term viability. • A large site would also be able to provide a combination of affordable housing/social housing as well as Larger more executive homes ensuring that the housing needs of all residents and communities are met. <p>I would also like to stress that WFDC should not build on any Green Belt land until all brownfield sites have been developed first. Consideration should also be given to regenerating the old part of Kidderminster town centre to utilise unused shops etc for conversion into flats/apartments. Why can't some of the existing retail</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				shops have accommodation converted above the premises similar to properties in London and other large cities. Weavers Wharf has been developed and regenerated. Young people would be attracted to living in a cosmopolitan type of community where residential flats/apartments are developed amongst restaurants, wine bars and coffee shops etc.
Wyre Forest Community Housing	LPPO1685	New Site Suggestions	Comment	<p>We recommend the inclusion in the Plan of the following sites:</p> <ul style="list-style-type: none"> • Severn Grove, Kidderminster - This site, owned by TCHG, is included in the site allocations policy but not referenced in the Local Plan Review we would expect to see its inclusion as a core site. • Queens Road, Stourport -This site, owned by TCHG, is included in the site allocations policy but not referenced in the Local Plan Review we would expect to see its inclusion as a core site. • Yew Tree Walk, Stourport – We are in discussion with the owner of this site and believe that the site should be incorporated into the Local Plan Review as a Core site. • Rock Works, Kidderminster – We are in discussion with the owner and believe that the site should be forward incorporated into the Local Plan Review as a Core site. • Selba Drive, Kidderminster – This site, owned by TCHG, should be incorporated into the Local Plan Review as a Core site.
	LPPO2002	Lea Castle - Sustainable Village	Support	Supports the Lea Castle ‘Sustainable Village’ idea.
	LPPO2034	Lea Castle - Sustainable Village	Support	Use Lea Castle site and Sion Hill School sites for Sustainable Village saving Green Belt land.
	LPPO2045	Extended Lea Castle and	Support	<u>Lea Castle:</u> already has several access roads and is currently overgrown, underused

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
		Ferndale		<p>and a magnet for anti social behaviour.</p> <p>Could include school/would have less impact on the countryside and wildlife/negate cost of upgrading road system.</p> <p>Build houses not factories/industrial units</p> <p><u>Ferndale:</u> Support, smaller so less impact, no need to upgrade road.</p>
Spennells Against Further Expansion	LPPO1739	New site suggestion	Comment	We are reliably informed that an offer to vacate Kidderminster Harriers Football Club has been made by the Club to the Council and has been put forward as additional land for housing development, conditional on the football club being allowed to move to the training ground as an alternative venue. We suggest this be added to the existing brownfield sites to be used for residential development.
Spennells Against Further Expansion	LPPO1741	6.57 - site suggestion	Comment	Development of an entire rural village on Lea Castle Hospital and School site.
	LPPO4412	Alternatives	Comment	I would challenge that not enough brownfield sites are available. There is still room for further development on the Silverwoods site and the Lea Castle campus. Also, Burlish Top Golf Course has been closed for about a year and, I believe, will not open again as a gold club viable for business venture, as there is already sufficient provision in the area. It is common knowledge that the golf course is not viable agricultural land as it is of very poor quality and would provide space for hundreds of homes (and possible school). There is also the old Parsons Chain site in Stourport, at present it is being used by Severn Trent Water to store pipes etc. for the Birmingham Relief Project. However, that will be completed in a couple of years at most, leaving the site empty again, I assume.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO3268	Brownfield	Support	Brownfield sites available not listed in the plan. What about locating more development in other areas, such as Wolverley, Franche, Bewdley, Stourport and others?
	LPPO4583	6.57	Comment	There are Brownfield sites that are not even on the plan, for example Brown Westhead Park; and the site of the old quarry on the opposite side of the B4189 to the above site. I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.
	LPPO4842	Extended Lea Castle	Support	Alternative sites need to be given greater consideration, Eg brownfield sites esp Lea Castle.
	LPPO4610	Extended Lea Castle	Comment	An alternate option would be to develop the Lea Castle site increase some of the land to make it into a sustainable community. To develop an eastern bypass around the A449 / A450 junction which would help alleviate traffic / pollution along the Chester Road corridor.
	LPPO4399	Alternative Sites	Comment	Recommend that in achieving dispersal of housing, further areas are considered. For example Blakedown, conspicuous by its absence, has good rail connection with its station. Harvington & Chaddesley Corbett have good road connection to Birmingham, Bromsgrove & Worcester. All are capable of accommodating medium developments with little impact on the nature of the villages. The expanded Lea Castle site within Option B is preferable to the smaller allocation identified in Option A.
	LPPO4227	Alternatives	Comment	Kidderminster has many brownfield sites to build on and the existing building on the old sugar beat site and for example the area where the Glades was sited which may bring life back to a what seems to be a dying town.
	LPPO4228	Alternatives	Comment	Brownfield sites should be used first.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4778	6.57 Alternative Sites	Comment	<p>I support the regeneration of the area around the former Glades and Magistrates Courts, principally for apartments. I feel the proposal for a multiplex cinema is out of proportion with the demand in the District, which is already met by a regional company. Additional shops and restaurants in this area are not desirable or economically sustainable. Many other attractive old and empty buildings are ideal for conversion to attractive town centre living.</p> <p>There is waste land where Sladen School on Hurcott Road once stood as this was demolished in 2009. This is also the case for Sion Hill School where planning permission has been granted on this site but progress has not been made. Stourport also has a number of brownfield sites which are in need of development in order to meet some of the local housing needs of a growing/developing town centre. The now defunct Wyre Forest golf course has released some land and there is no reason why the whole of it should not be released for housing development. Growth of Stourport will require improvement in infrastructure, in particular public and private transport provision.</p> <p>Consideration should be made of small-scale development at Blakedown, Chaddesley Corbett, Harvington or Wolverley which would provide the opportunity for improved, sustainable facilities and services for those villages. I support development of a new community on the Lea Castle Hospital and School brownfield site, provided that:</p> <ul style="list-style-type: none"> • Consideration is given to the local environment and ecosystems; • The development is built with good housing principles (as described in section 14, below); • The local community is fully engaged with planning the development; • Infrastructure, such as transport, schools and GPs are provided. <p>Crown House on the Bull Ring in Kidderminster and the timber yard on Park Lane</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				are significant examples of brownfield sites which should be in the Local Plan. Should the land owner not be amenable to housing development then I urge the use of Compulsory Purchase Orders. The Council must make more effort in identifying suitable brownfield sites.
	LPPO4229	Alternatives	Comment	IF YOU HAVE TO BUILD THEN LEA CASTLE SHOULD BE BUILT ON AS IT HAS BEEN BUILT ON PREVIOUSLY .
	LPPO4806	Alternatives	Comment	The Preferred Options Document shows a small part of the golf course between Kidderminster and Stourport (formerly Wyre Forest GC and Birchen Coppice GC) for house building. Surely the whole of the golf course should be used as I understand it is in liquidation, has land owned by WFDC, is unsuitable for agriculture, is not in the Green Belt and is not an essential leisure facility, as there are an abundance of golf clubs in and around Wyre Forest all looking for new members. The area is vast (about the size of Spennells) and could accommodate a separation zone between residents at its Stourport boundary.
	LPPO4807	Alternatives	Comment	There are areas to the north of Kidderminster not considered in the options document, because of the fixation for an eastern relief road. An example that should have been considered is at Habberley where the community is shielded with a road and verges.
	LPPO4384	Alternatives	Comment	Could the area of Lea Castle included in Option B not also be included in Option A?
	LPPO3549	Alternatives	Comment	There are sufficient current and future sites on brownfield land, (lea castle, Kidderminster Town Centre and outer areas) To be used first. I would like to see regeneration in Kidderminster Town Centre bringing communities into the Town.
	LPPO3479	Lea Castle	Support	The Lea Castle Hospital site should be enlarged to develop a larger and more sustainable housing.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>It would also enable the development of</p> <ol style="list-style-type: none"> 1. A two form school 2. Doctors surgery 3. Bus Service to and from Kidderminster 4. Local Shops
	LPPO3343	Alternatives	Comment	Must use existing brownfield sites in Stourport.
	LPPO3388	Alternatives	Comment	Housing can be built on brownfield sites.
	LPPO3976	Extended Lea Castle	Object	<p>I would suggest as an alternative to building around Offmore & Comberton, a bigger site at Lea Castle. The Plan currently proposes using some of this land in both Option A and B but I would suggest combining the land under both options and then extending the site to include land up to the Wolverhampton Road and at the rear of Lea Castle up to Axborough Lane. There might also be a possibility of further development on the western side of Wolverley Road towards Sion Hill, which would link with development at the Sion Hill School site. With this proposed land, including the sites in that vicinity already included in the Plan, a sustainable community of around 2,000-2,500 houses could be created. This would be large enough to support a 2 form entry primary school within the catchment of Wolverley High School (thus positively impacting on the school's long term viability) and a sustainable bus service. It would also support a 'village' centre within the Cookley Parish without putting a burden on that community and would potentially be able to support live-work units.</p>
	LPPO4628	Alternative Sites	Comment	Kidderminster town centre is in desperate need of regeneration and perhaps using land closer to the town centre will help invigorate it and mean that we don't just

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				have charity shops and empty shops.
	LPPO3662	Selba Drive	Object	As a resident of more than 20 years I am fully aware of how frequently this amenity land is used by residents of the whole estate from children playing football, dog walkers, parents with very small children to safely run around and many other recreational pursuits. The only other area on Habberley Estate is the play area behind Habberley Club which is not big enough or suitable for any of these activities. All other land around this area is privately owned and not accessible by right to the public.
	LPPO4061	Alternatives	Object	<p>Bewdley can contribute to additional housing needs not by building on identified greenfield sites but by amongst other things:</p> <ul style="list-style-type: none"> • Conversion of workhouse in High Street and derelict underused neighbouring land near the R.C.Church into flats • Imaginative use of the Dog lane site not just for parking but small scale housing in keeping with existing Dog Lane historic cottages and possibly some small business premises etc. • Wholesale redevelopment of Bridge house/surrounding Rowing Club site in Wribbenhall and adjoining camping site to maintain some business/sport related capacity but also to create significant additional housing - hopefully more in keeping with and enhancing older existing housing along this part of the river . • Renovation/conversion of empty retail properties into flats e.g former HSBC site • Renovation of Ribbesford House
	LPPO4075	Selba Drive	Object	Regarding the “Local Plan Review” in connection with the suggested proposal to build community housing on land adjacent to Selba Drive in Kidderminster.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>I wish to register my “Strongest Objection” to the proposal to use the land adjacent to Selba Drive for community housing for the following reasons.</p> <p>This area is frequented on a daily basis by children of all ages as it is a safe play area. This allows them to be involved in many different types of sports, games and other recreational pursuits. Safety is enhanced by the absence of any through traffic and infrequent vehicle movements in the Cul-de-Sac.</p> <p>The area is also regularly used by many adults for dog walking and exercising activities. In particular local residents acknowledge it as a place of peacefulness and somewhere to meet friends and relax.</p> <p>Habberley Estate has little or no identified play areas that are easily and safely accessible by children and parents.</p>
	LPPO4082	Alternatives	Comment	<p>Suggested proposal:</p> <ul style="list-style-type: none"> Having looked at the proposal for the development of the Lea Castle site would it not be better to enlarge this development up to the A449 and Axborough Lane. This would then allow for a development along with the Hurcott ADR and any other additional parcels of land within the surrounding area (west of A449) a sustainable community of some 2000 homes which could be afforded its own ‘village centre’ thereby not impacting on Cookley. The A449 is a major trunk road that could easily accommodate any additional traffic with no on route villages to be affected. This development would be significant enough to support its own primary school and with Wolverley CE High school on its doorstep answer the education development requirements.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				The Horsefair is an eye sore and should be an embarrassment to any inspiring forward thinking Council that wants to promote Kidderminster as a town worth investing in. This is an area that should be fully reviewed and with careful planning could be a super development for both housing and leisure and a be a gateway into the heart of town rather than the eyesore it is now. Although it will not be too long before it can be developed if the collapsing of the old Post Office building is anything to go by.
	LPPO4595	6.57	Comment	<p>It appears from the press the Lion Fields is due to be offered for development of cafes, restaurants, leisure and cinema. This will introduce yet another 'centre' to Kidderminster. The town needs to be consolidated not made even more sprawling; we already have three centres, Weavers Wharf, Swan Centre (which appears to be dying on its feet along with Worcester Street) and the Rowland Hill Centre. Why can this large Brownfield site not be used for housing, which would effectively bring more people and life into the town centre.</p> <p>There are various derelict/empty Brownfield sites around the District. Where owners are not willing to 'offer these up for housing' why can't the Council issue Compulsory Purchase Orders on these sites, in order to protect our precious Green Belt?</p>
	LPPO4599	6.57 Alternatives	Comment	<p>Has anyone considered that to the north of Kidderminster there is an area which is between Habberley, Franche, Fairfield and Wolverley that has a lot of open land, little of it actively farmed and what looks like some brownfield areas. This area is serviced by the Bridgnorth Road (A442) with the B4189 giving direct access to Wolverhampton Road (A449) and Stourbridge Road (A451). I do not know whether these areas are Green Belt or not but I am aware that Wolverley School is short of pupils for the future, so in some ways these needs could be matched by some new houses locally.</p> <p>The Ferndale Estate built at the north of Franche, has the ability to cope with more</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>houses, with access roads already in place. Could this be considered for a larger community with many existing facilities available locally on the Franche Road nearby with direct access to the town, factories and Bewdley.</p> <p>There is an obvious choice for at Lea Castle Hospital, which is effectively brownfield. There are plans to build 600 houses. Surely if the whole site i.e the triangle of land from A449 -B4189 -A451 and topped off at Axborough Lane was used this would give a village community, that not only could it gain its own facilities, school, shops, Doctors and bus's etc., but would help nearby Cookley with its lack of Primary School places and top up Wolverley's shortage of older pupils.</p> <p>I gather that Sion Hill School site has now been sold to developers, so why not use the small parcel of land south of the B4189 in Broadwaters next to the A449 and make a worthwhile job of building houses in this area, which already has some level of facilities which would be available from day one.</p> <p>The centre of Kidderminster Town has so many possibilities for improvement that if we made an effort, the vibrancy would again return to what used to be a destination for shopping and entertainment.</p> <p>Worcester Street area is waiting to happencompletely rebuild all the shop fronts and above build back and fill with modern apartments for people to live in and enjoy the town, with access and parking from the rear in Bromsgrove Street. The proposed new cinema and eating establishment with parking is a great idea but some parking area needs to be kept for shoppers.</p> <p>At the Eastern end of Worcester Street there are buildings being left to deteriorate. Park Lane in town has old buildings and a canal, all around the country these areas are sought after to build new or converted apartments for modern</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>life.</p> <p>Green Street opposite Aldi there is another old building that lies empty waiting for a refurb. Maybe this could possibly be more apartments close to local amenities. Or a mini version of SALTS MILL which is located in Saltaire on the outskirts of Bradford. Crown House. Developers love to build on open land and don't want to get involved in what can be expensive and difficult work, surely this is a chance for one of them to shine.</p>
	LPPO4600	6.57 Alternatives	Comment	<p>Further building of houses to the Lea Castle Hospital site under Option B. We believe that this site could accommodate at least two thousand five hundred houses. The result of this would be a more 'sustainable village' environment with the following advantages:</p> <ul style="list-style-type: none"> • Would be within the catchment of Wolverley High school and would positively impact on the school's long term viability. • Would be large enough to support a two-form entry primary school. • Would support a village centre whilst not encroaching on the Cookley Parish. • Would be capable of sustaining a bus service. • Would potentially be able to provide live-work units. <p>In addition it is wrong of WFDC to not consider development on the north/west of Kidderminster. One to two hundred houses could be developed to the rear of the existing Ferndale estate.</p>
	LPPO4602	6.57 Alternatives	Comment	<p>I appreciate the need to increase the number of houses in the Wyre Forest but would suggest there are more suitable sites, with greater opportunities, local community services; employment etc...in closer proximity such as the Burlish Park Golf Course that has recently closed, or the development of the sites in</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				Kidderminster Town Centre of the old Glades Leisure Centre and/ or Woolworths. And in Stourport there is again the site of the old Leisure Centre that has yet to be sold/redeveloped.
	LPPO4606	Extended Lea Castle	Support	<p>Lea Castle has been out of use since 2008 and is now a derelict site. I would welcome the redevelopment of the site to its own community as it previously was. Building on existing footprints alone, would not provide a community as these are spread distances apart across a huge site. Far more than 600 houses could be built. Extend this site up to the Wolverhampton Road, Axborough Lane and the Stourbridge Road and look at the option of developing the western side of Wolverley Road incorporating Site Hill site. This would mean that there would be enough houses for it to be a sustainable community which would be able to have its own primary school, shop etc, thus reducing pressure placed on existing services which are already at full capacity. This school could then feed into Wolverley High School and Baxter College which are able to accommodate additional students. The road structure is already in place to facilitate the development of this community and would be capable of sustaining a bus service. Live/work units could be included in these plans.</p> <p>Further develop behind the Ferndale estate to spread the development across Kidderminster.</p> <p>Instead of industrial units by Hodgehill nurseries, use existing sites such as Greenhill Industrial Estate, Hartlebury Trading Estate, Hoobrook etc where there are empty units and would be preferable to fill those first before building on Green Belt land.</p> <p>I strongly believe the above suggestions are a far more positive way forward, limiting the impact on local residents and existing services.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4508	6.57 Alternatives	Comment	The obvious choice for your 1st phase would be Lea Castle and that area around Wolverley X roads/A449 as you already have good land available and the added use of a vacant school at Sion Hill.
	LPPO4522	Extended Lea Castle	Object	A larger development of the Lea Castle site as suggested by OCAG-LP would seem to merit serious consideration.
	LPPO3155	6.57	Object	As an alternative I would like to see a rejuvenation of town centre brown belt land for proposed housing development. The town, and areas close by, have much land that could be used to provide the housing growth demanded by the Government and also drastically improve the aesthetics of what is at the moment a very run down and derelict space.
	LPPO4645	6.57 Alternatives	Comment	<ul style="list-style-type: none"> - Put all 3000 dwellings on existing brownfield sites - Expand Lea Castle - Encourage division of barn conversions into smaller units. - Regenerate the town centre with affordable housing in empty buildings - Inc numbers of houses on Sion Hill school site
	LPPO1925	Lea Castle Hospital Extension	Support	<ul style="list-style-type: none"> • Supports extended Lea Castle site.
	LPPO3044	6.57	Comment	<p>The Woolworths and Littlewoods sites in Worcester Street should be purchased, compulsorily if necessary, to facilitate the building of a leisure complex in the existing town centre in order to help to rejuvenate the town centre, with multi-storey parking incorporated into the development. This would then free up the entire Lionfields site for residential development, including the old Victorian Market building which could be converted into in-town apartments, with local town shopping and railway access conveniently alongside.</p> <p>An alternative development would be for the Lea Castle Hospital site to be</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				developed as a self-contained, out of town residential village site, initially on brownfield land and only if necessary, extending into Green Belt land within the third 5-year phase.
	LPPO3071	Suggestion for Town Centre and Lea Castle	Comment	<p>I also feel there are plenty of other sites which could be used like for instance lea castle, sion Hill school.</p> <p>What about building apartments in the town centre where all the empty shops are.</p>
	LPPO2996	Alternatives	Object	<p>As already identified it is good to read about the development of brownfield sites for residential dwellings; the District and especially Kidderminster town centre has declined and so utilising some of these buildings and converting them for affordable living will bring people back into the centre of town to utilise the town amenities and within walking distance use the added new attractions and eateries that the town has accommodated in central locations such as the alongside the River Stour. This should mirror the success that Worcester has achieved through their regeneration and riverside location with places such as Diglis where homes are affordable to buy and rent and are in the lower quartile of housing prices. Kidderminster and Stourport have their heritage to protect so revamping and converting industrial buildings would keep the integrity of the town and make the buildings both desirable and unique.</p> <p>The Lea Castle Hospital site is a site that should be developed and it was pleasing to hear the Conservative MP Mark Garnier agree with our vision to use this site. This area could be an ideal location to house a new village to support Cookley and Wolverley, I also believe the site could house more than the proposed 600 homes as seen in the plan. This location is also near good A roads and links to Birmingham through the A451, A456 and the A449 for those that are commuting to</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Birmingham and other local West Midland locations.</p> <p>Blakedown- Travel and Railway Links</p> <p>Another consideration is our travel and Railway links, why is Blakedown not considered for development? You state that Kidderminster Railway station is the 2nd busiest in Worcestershire, it requires improvement especially for parking and the projection of greater passengers in the future but Blakedown is a station that could be developed and also on the line to Birmingham. You state in your report that Blakedown and Cookley have reasonable public transport but Blakedown we could make much better use of. If we are to develop the Lea Castle Hospital Site it would be vital to develop Blakedown too to accommodate the numbers which would use the rail network to access local commuter towns and cities. You must consider the local needs for Blakedown, and the boosting factor that this growing village has a railway station for the local residents as this would help to disperse the numbers and demand that is currently placed on the Kidderminster town station. Blakedown needs to be suitable developed, it should not be omitted or overlooked from your plans.</p>
Offmore Comberton Action Group - Local Plans	LPPO1566	Additional Site - Lea Castle	Comment	<p>The current draft WFDC Proposals in Options A and B propose using some of the land at Lea Castle. We propose extending this by including not only Options A and B but also extending the site to use the land up to the Wolverhampton Rd and, at the rear of the Lea Castle site, extending the site up to Axborough Lane as well as across to the Stourbridge Rd.</p> <p>We believe that an additional 37.73 Hectares can be brought into the Lea Castle site in this way. • We further believe that there MIGHT be a possibility of some development on the western side of Wolverley Rd towards Sion Hill to link with development at the Sion Hill Middle School site.</p> <p>With the additional land and including sites in that vicinity already identified by</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>WFDC, we believe a sustainable community of around 2,000-2,500 houses could be created. This would:</p> <ul style="list-style-type: none"> • be large enough to support a 2 form entry Primary School. • support a village shopping centre and potentially some employment land. • support a village centre which whilst within Cookley Parish would not produce a burden on that community. • be capable of sustaining a bus service. • potentially be able to provide live-work units. • be within the catchment of Wolverley CE High School and would positively impact on the school's long term viability. <p>We believe that our alternatives will create viable and sustainable communities, protect valuable, productive farmland, preserve endangered bird species and other wildlife and, by prioritising Brownfield development, ensure that our towns and town centres are viable and thriving.</p>
	LPP01868	Extended Lea Castle	Comment	I think Option A Lea Castle "Sustainable Village" would be suitable for the building of houses. A two form entry primary school and a bus service.
	LPP02089	Extended Lea Castle and Ferndale	Support	We support Lea Castle sustainable village with 2 form entry primary school and village centre sustainable bus service. Live-work units.
Spennells Against Further Expansion	LPP01740	6.57 - site / strategysuggestion	Comment	<p><u>Phase 1 (first 5 years):</u> Use existing empty properties in the town centre e.g. Woolworths site for a leisure complex (cinema/bowling alley) and ideally the adjacent ex-Littlewoods building for a multi-storey car park. The remaining Lionfields site could then all be dedicated to housing/residential; plus other brownfield sites such as the Churchfields site (3000 houses could be constructed on these sites). If Worcester Street was not returned to through traffic, the Council would immediately save £500,000 of taxpayers moneyto purchase the vacant</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Woolworths building.</p> <p><u>Phase 2 (5-10 years)</u> : Use Lea Castle hospital site (brownfield site) for 600-700 houses.</p> <p><u>Phase 3 (after reviewing housing need, 10 – 15 years)</u>: Lea Castle Hospital and School site - use of Green Belt extension if absolutely necessary. Green Belt at Lea Castle only released at this stage if deemed necessary for increased housing.</p> <p>No Green Belt site to be released until housing needs are reviewed after 10 years.</p>
	LPPO3254	Lea Castle	Support	<p>A far more sensible proposal would be to build on the whole of the Lea Castle site as I appreciate houses need to be built somewhere in the area. Building on that site would not interfere with the local community or cause excessive traffic in an already built up area. Wolverley high school is not over subscribed so would have spaces for the new community. This would also support their long term viability.</p> <p>I would urge the council to think about these arguments rather than rushing into easy options that end up causing long term problems.</p>
	LPPO3854	6.57	Comment	Looks to far ahead. Silverwoods needs finishing with appropriate infrastructure, recreational and green areas. Brownfield sites should be used for building rather than greenfield, such as Stanklyn Lane.
	LPPO4681	6.57 Alternatives	Comment	<ul style="list-style-type: none"> would like to suggest that another review is done to check your housing figures needed. Then a further review needs to take place to check the <i>now</i> available brownfield sites to build on. New sites have come vacant since your plan, some of considerable size such as the land next to Matalan (ex-Wood Yard), possible further land at Victoria Carpets, and land at Kidderminster Harriers.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> There are also very many empty factories and buildings in and around Kidderminster town centre and ring road. The Magistrates Court being a prime example of this. All of these should be used first to build apartments for our younger or elderly population near the town centre and amenities (thus freeing up more 'family' sized homes negating the need to build more of these), and if these long standing empty buildings where not put forward in the Call for Sites, compulsory purchase orders should be used to acquire such. The proposed 'new cinema' on Lionfields should be located elsewhere. If the Debenhams building becomes vacant or one of the large units over by Sainsbury's, this should be utilised first. Lionfields is a prime location for residential development, thus being able to breathe life back into Worcester Street with an array of attractive cafes, restaurants, gyms and bespoke shops. The larger buildings (Woolworths e.g.) could be used for such cinema or a bowling alley itself. The amount of trendy 'urban' living apartments would encourage young people to stay in Kidderminster, and also give elderly people the chance to live somewhere safe and with facilities and release larger homes for families in existing suburbs. The money saved on not opening Worcester Street back up to traffic, could be used to regenerate this area as the night life / social eating area of Kidderminster. The current REEL cinema would become vacant if the new cinema is built, thus creating further opportunity to convert to apartments, or reduce the need for further industrial units at Easter Park. Another option is to expand the development of Lea Castle and make it a village in its own right (develop from both options A and B). This should be developed in its entirety with local shops/facilities and a good road network, this supporting the Cookley and surrounding residents in getting to Birmingham and relieving the much maligned Horsefair and Ring Road.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4647	6.57 Alternatives	Comment	Kidderminster town centre has a lot of scope for development. You have Crown House, the swimming baths and the old Law Courts immediately spring to mind. It may even put some life into the town which at the moment is sadly lacking. I note there are brownfield sites that have not even been mentioned eg Brown Westhead. I would be very interested (along with a large number of people) to know the reasoning behind not developing these 'hidden' brownfield sites.
	LPPO3400	Alternatives	Comment	I would also prefer WFDC to look at revitalising the town centre by including as much housing as possible in new developments in the centre by combining it with retail and leisure i.e. shops/cafes on the ground level with flats/apartments above. A number of premises which have been empty for a considerable time would benefit the town by an imaginative conversion into housing including housing as part of the development of the Glades Leisure Centre site, and making provision for housing combined with new retail units along an improved road lay-out along that part of Blackwell Street leading to the Horsefair would be of great benefit to a gateway into the town. The old Victoria Carpets sports ground on Spennells Valley Road may be worth looking at also, as would the defunct golf course between Kidderminster and Stourport.
	LPPO4393	Paragraph 6.57	Comment	Empty units in the town could become apartments, industrial estates with empty units could be redeveloped. Plenty of areas where building would not upset so many lives like on Spennells.
	LPPO3666	Alternative sites	Support	<ol style="list-style-type: none"> 1. Blakedown to share some of the development. As you suggest this has a rail link and school. You have not included Blakedown in your plans. Why is this? It has a road link, good rail way and access and school. 2. Increases to housing near to the Safari Park, 3. Increases to housing towards the west of Kidderminster – in Franche and Woverley, distribute the housing rather than all on one site which will create an urban sprawl. 4. In old Sion Hill school

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>5. At the back of Morrisons</p> <p>6. The old Woolworth site and to the rear.</p> <p>7. Place permanent housing on the large caravan sites in Stourport.</p> <p>8. Use The town centre – build apartments in areas where the town is no longer vibrant. This will make the town more vibrant and safe.</p>
	LPPO3654	Alternatives	Comment	<p>Clearly as WFDC have a target to meet of 300 new homes annually, until 2034. I appreciate that building new homes has to take place. To the east of Kidderminster we have the Lea Castle site which should surely be a primary development location. I would like to make the following observations in favour of the development of the Lea Castle Site.</p> <p>Options A and B WFDC current draft proposes using <u>some</u> of Lea Castle land for development. (Development plans for 600 homes were displayed at St Oswald's Church Hall on 17th November 2016mber 2016) If the whole of the Lea Castle site were included in this proposed development then a new sustainable village, like Cookley, could be created. I also understand that with over 1000 dwellings a first school and shops become a viable option for a "Lea Castle Village". Advantages of the Lea Castle site:</p> <ul style="list-style-type: none"> • With a sustainable community of say 1500 homes this could become a new Village with shops and a two form entry Primary School. • It could support a village centre which, despite being in the parish of Cookley, would be a separate village. • It would have existing road links to Kidderminster, Stourbridge, Wolverhampton and beyond. • It would be capable of sustaining a bus service • It would be within the catchment of Wolverley CE High School which

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				would have a positive impact on the school's long term viability
	LPPO3964	Paragraph 6.57	Object	<p>New Road is full of shops that could be relocated (perhaps some to the vacant shops within the town centre and vacant units on the Stourport Road) and housing built on both sides of the road. This would provide housing that is near the town centre, railway station and canal.</p> <p>I also think lots of care should be taken to provide quality, free, places to go. Sanders Park in Bromsgrove is much nicer than any park in Kidderminster and could be used as a model for Spennells Park.</p>
	LPPO3354	6.57	Comment	<p>- Employment that could be within the South Kidderminster Enterprise Zone: 'Adjacent Ceramaspeed', 'Victoria Carpets Sports Ground' and land between Hoo Farm & Summerfield and opposite Easter Park.</p> <p>- Core Housing Sites that could replace Option A to the South of Kidderminster: 'Timber Yard Park Lane' and 'Bromsgrove St' (excluding the Glades site).</p> <p>- Create a large housing estate on the 'Lea Castle Hospital' site that has its own shops and services.</p>
	LPPO3295	Alternatives	Comment	Land at Yew Tree Walk, Stourport is brownfield - this should be given precedence to greenfield land. The land is near to the town centre and immediately available.
	LPPO4456	Alternatives	Comment	Large buildings in Kidderminster town centre lay empty ready to develop.
	LPPO4526	Extended Lea Castle	Comment	I support the development of the vast Lea Castle site which has been idle far too long. This site is perfect for a sustainable community. Advantages it is large enough to support a 2 form entry Primary School - it is in the catchment area of Wolverley High School. It is capable of sustaining a bus service. This is a compact area and would easily become a community heart - not like the straggled Eastern

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>By Pass proposal.</p> <p>WFDC DO NOT MAKE A DISASTEROUS MAJOR PLANNING DECISION - LISTEN TO THE PEOPLE - LEA CASTLE IS THE OBVIOUS SITE TO DEVELOP WITH THE LEAST ENCROACHMENT ON GREEN BELT.</p>
	LPPO4672	6.57 Alternatives	Comment	<p>Justification 31.1 states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” I would counter that:</p> <ul style="list-style-type: none"> There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.
	LPPO4541	Extended Lea Castle	Support	<p>We feel that the proposed development at Lea Castle is the answer to your apparent need of more housing and could be further maximised without impacting on Green Belt land. There is sufficient land to encompass this and there is already infrastructure on site to accommodate a larger building project than proposed. This would seem more like a little village, better than a strip of land stretched into Green Belt at Offmore with a lack of community heart. The local schools are under subscribed, Wolverley CE High School being one, whereas Offmore Schools are over subscribed and can't be extended. Wouldn't a small primary school also on the Lea Castle site then become necessary for the extra houses and an answer to the locals needs anyway. A larger development at Lea Castle would also affect less householders directly than on the proposed East Offmore development.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				The roads that surround the Lea Castle Site are already in place and further roads for the extra traffic wouldn't then be necessary, money saved. This money could be better spent then than on new bridges, new infrastructure and new roads to allow then possibly to help improve areas like Comberton and the Horsefair.
	LPPO4159	Alternatives	Comment	Build on brownfield sites in Kidderminster.
	LPPO4711	6.57 Alternatives	Comment	There are other options for housing the older inhabitants and younger people. Kidderminster has not made adequate efforts to make use of inner city land, especially in the more central areas, where most of the services are located. Canal side locations have been successfully developed in other towns and cities and the canal opposite Weavers Wharf would lend itself to the development of flats and apartments close to services. At the moment the huge timber yard and other semi-industrial uses will not attract shoppers to our retail district. Also the old shopping area, now declining could be rezoned for residential use. As our population is static, but the number of individual households is increasing, smaller developments close to facilities might be the answer. This is especially important for the more elderly residents who would not wish to be physically isolated in a vast housing development.
	LPPO4733	6.57 Alternatives	Comment	<p>6.57 What alternative option would I suggest? I would suggest a pragmatic approach to the requirement to build more dwellings.</p> <ul style="list-style-type: none"> • Start the Plan by completing the proposed housing on Silverwoods site (70 dwellings) and the other brownfield sites around the Wyre Forest (783 dwellings) in accordance with Policy 30 Table 30.0.1 on page 173. Total 853 • There are dwellings already being constructed. From the figures supplied by WFDC these will number 441 during 2016. There may be more by the time we get to the end of 2017. • Most residents I have spoken to at the consultation meetings agree that

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>the Lea Castle Hospital site would be a suitable area to put a large scale development. The core site would provide 600 dwellings. If this is then combined with the 2 sites from option A (150 dwellings) and option B (360). this would give a total of 1110. There used to be a school on the Lea Castle site (Alexander Patterson School). I don't know if the building is still there but, if so it could be refurbished and bought back into use. This would follow the view expressed in the Plan to minimise the number of sites in a more concentrated strategy.</p> <ul style="list-style-type: none"> • The Sion Hill School site is close enough to Lea Castle to consider using the land for a school rather than 60 dwellings. The shortfall could be taken up by encouraging larger existing houses to be converted to flats (Policy 18D) or old factories down Green street or elsewhere to be developed into flats. • This could take us at least 10/12 years into the future to get these dwellings built or at least agreed. At this time the plan could be reviewed in the light of the changed requirements at this time which may or may not require the need to develop on greenfield sites. I know people who have houses on the Spennells estate. They have been advised when purchasing the property that there are in place plans to build on land on the edge of this estate. Presumably, this land already designated could be used for more dwelling if required.
	LPPO4770	6.57 Alternative Sites	Comment	<p>The following are either brownfield, empty or vacant properties that should be developed before any Green Belt land is used thus creating a mixture of low cost starter houses, inner city living apartments and canal side properties which would bring people and life back into the centre of Kidderminster, will support shops, coffee shops, restaurants, pubs and in turn create a vibrant town centre without building on Green Belt.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> Lea Castle – Potential for 1000 houses which would also then be eligible for a new school. If the planned number of house on this site increases then a new school could be accommodated here to avoid further congestion, it is well screened from major roads which would also add to the look of the area. Sion Hill (School) now derelict and in need of demolition Timber yard (opposite Weaver's Wharf) Empty buildings (by Matalan) Wyre Forest Golf Club site (owned by the council) now unused. Crown House – develop into flats for inner city living or demolish The old Magistrates Building could provide refurbished apartments <p>I understand there are currently over 1000 empty residential properties around Wyre Forest, these need to be utilised before any building work on new homes begins.</p> <p>Outlying areas such as Stourport, Bewdley, Wolverley, Chaddesley Corbett, Blakedown, Mustow Green etc appeared to have been left out or hugely overlooked in this review.</p> <p>In addition any land lords with empty properties should be made to put these back into the housing stock either for rent or for sale. We cannot have properties sitting empty whilst we use up Green Belt land. The Council should also lobby Parliament to change any laws to ensure landowners do not keep empty properties which are detrimental to the local area e.g. Crown House and Worcester Street.</p> <p>Further to this we may have land in the area which is owned by developers who are not building due I expect due to the lack of profit available. Any planning permission already granted to such developers need to develop these sites without delay, any future planning permission given should have a time period</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				that states any building work is started & completed within that time scale.
	LPPO4747	6.57 Alternative Sites	Comment	Lea Castle could accommodate 1000 houses as the infrastructure is already in place, by increasing the planned number of houses on this site a school could be accommodated here to avoid further congestion.
	LPPO4543	6.57	Comment	I would request also that other brownfield sites within the parish of Cookley and Wolverley are also considered i.e. Brown Westhead Park in Wolverley which was a former army hospital in WW2.
	LPPO3426	Brownfield Sites	Comment	I urge the Council to re-consider brownfield sites such as space left by Glades and Lea Castle. Developing our pitiful town centre would help to regenerate this area. The town definitely does not need any more supermarkets.
	LPPO3853	6.57	Comment	<p>Develop all the small plots of land that has already had buildings on previously.</p> <p>The old Sladen school site, Sion Hill Middle school site the Glades on Bromsgrove Street site instead of taking what seems to be the easy option of churning up large swathes of virgin Green Belt land.</p> <p>A village at Lea Castle has been suggested which would be large enough to support economic advantages to schools/education and infrastructure in the immediate community.</p>
	LPPO4608	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site.</p> <p>There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p> <p>I also strongly suggest that you consider other brownfield sites such as those I have outlined in Wolverley to share the housing quota which is due to Wolverley</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				and Cookley Parish.
	LPPO4613	Extended Lea Castle	Support	I understand the need for more houses in Britain, but I fully believe that these houses have to be built with sustainability in mind. If you are looking to encourage people to move to Kidderminster and invest in the local area, you need to provide these residents with services, such as schools and public transport. This would all be possible with extending the planned building on the Lea Castle site. Developing a sustainable village would allow for a school to be built, a bus service and a village centre. This would be much more desirable. To me, it is clear that building a village on Lea Castle is the only option that is viable and sustainable.
	LPPO4614	Extended Lea Castle	Support	The Lea Castle ‘Sustainable Village’ plan as put forward by ‘Offmore Comberton Action Group-Local Plans’ should be taken up. This proposal is futuristic, a new community which many people would love to live in, not dollops of development strung out across the Green Belt.
	LPPO4663	6.57 Alternatives	Comment	<p>I strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p> <p>On page 178 Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” I would counter that:</p> <ul style="list-style-type: none"> • There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				not built on behind The Range at Crossley Park in Kidderminster.
	LPPO4524	6.57	Comment	<p>There are many empty and unused sites: The old Magistrates Courts and other empty units in Worcester Street; Park Lane factory buildings - empty and decaying; Mill Street seems to have numerous unused and empty sites; Crown House; Easter Park still has empty units - perhaps a change of land use should be considered here since, after seven years we still do not need so many retail units there.</p> <p>There is still a long way to go with the new development at the former British Sugar site - why can't we hold off on any drastic commitment until we see a clear need?</p>
	LPPO4531	6.57	Comment	Are you sure there are no more brownfield sites that could be utilized. Let's start by pulling down Crown House and replacing it with a residential property. Are there no buildings in New Road and Green Street that are not being used but could be converted into homes.
	LPPO4016	Paragraph 6.57	Object	<p>I note that the current local plans propose using some land at Lea Castle to help meet housing allocation targets. Consideration should be given to not only including Options A & B but also extending the site to sue land up to Wolverhampton Road and extending the site up to Axborough Lane. The additional land at these sites could create a sustainable community of 2,000-2,500 houses and:</p> <ul style="list-style-type: none"> • be large enough to support a 2 form entry primary school • also support a village centre, but not put a burden on that community • capable of sustaining a bus service • offer scope for live-work units • and be in the catchment of Wolverley High School- positively impacting on

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>its long term viability</p> <p>I'm concerned that no consideration has been given to looking at meeting some of housing allocation targets by developing out on land to the North/West of Kidderminster. For example some new stock could be reasonably developed near the Ferndale estate.</p>
	LPPO4028	Alternatives	Support	<p>A possible alternative is to start using brown sites to build on such as Sion Hill middle school and derelict buildings inside the town such as the old Woolworths and many more buildings down Worcester Street. Other weaknesses of Kidderminster that could be worked on includes the stretched GP services, few major high value employers and Kidderminster town centre, none of which will be achieved through increasing the population.</p> <p>The plan in option A mention building 600 hundred houses, on the old Lea Castle site, would it more viable to build more houses in this area as well as a school and shops, not only would this be a beautiful place to live you will be generating more jobs.</p> <p>The plan also hasn't considered other surrounding areas such as Blakedown which would be much more viable for access to Birmingham.</p>
	LPPO4881	6.57 Alternatives	Support	<p>Transferring the Option A Lea Castle extension land, to Option B</p> <p>Your plan also makes no reference to the possibility of using the extensive land surrounding Blakedown. This would be an important consideration, as here, there is scope to extend car parking at Blakedown train station.</p>
	LPPO4874	6.57 Extended Lea Castle	Support	<p>Providing the stops are in place on Hurcott Lane and Hurcott Road full development of the Lea Castle site, which I understand could provide up to 2000 dwellings, seems the most logical step to develop the eastern side of</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				Kidderminster, if that is deemed necessary, despite there being availability of land in other areas. If Lea Castle were developed to its full potential there would be cost savings on infrastructure and in particular utilities. It would also offer the ability to offer a mix of affordable housing far in excess of that which would be provided on the Hurcott sites. Additionally it would be self sufficient in terms of local amenities, schooling and medical facilities, which would then not be a drain on overstretched Cookley.
	LPPO4457	6.57	Comment	We urge the government to build on the brownfield sites within Kidderminster which will regenerate the town centre.
	LPPO4226	Alternatives	Comment	Redevelop the old post office and derelict factory buildings in Kidderminster.
	LPPO4300	Alternatives	Comment	I would also like to suggest the use of the Kidderminster golf course as part of the re-development plans. The golf course could be re-located in some of the proposed building area and hence maintain the precious Green Belt.
	LPPO3805	Paragraph 6.57	Support	I suggest that the tower above the old post office at the Bull Ring Kidderminster is converted into affordable apartments clad in non-combustible material to improve aesthetics.
	LPPO3143	Alternatives	Comment	Under Planning Policy Statement 3 for housing priority for development should be previously developed land, in particular vacant and derelict sites and buildings. This area of land has only a small footprint of buildings. Other areas with more previous development in particular vacant and derelict sites and buildings would be more suitable. Without development previously used land has a detrimental affect on area.
	LPPO4511	6.57 - Extended Lea Castle	Support	As an alternative, I'm throwing my weight behind the Lea Castle "Sustainable Village" plan outlined by the OCAG-LP. The current draft WFDC Proposals in Options A and B propose using some of the land at Lea Castle. I propose extending

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>this by including not only Options A and B, but also extending the site to use the land up to the Wolverhampton road and at the rear of the Lea Castle site, extending the site up to Axborough Lane. I also believe that there might be a possibility of some development on the western side of Wolverly Rd towards Sion Hill to link with development at the Sion Hill Middle School site.</p> <p>This plan would be large enough to support a new 2 form entry Primary school, a new village centre, a sustainable bus service and would also be in the catchment area of Wolverley High School. And that's only scratching the surface.</p> <p>Please at least seriously consider this alternative plan.</p>
	LPPO4548	Extended Lea Castle	Support	<p>It would be far preferable to create a sustainable village at the Lea Castle site. Extend the site up to Wolverhampton Road and to Axborough Lane. Include the required primary school and a village centre to minimise impact on Cookley. It would be in the Wolverley High School catchment.</p>
	LPPO3643	Paragraph 6.57	Comment	<p>I would like to suggest:</p> <ul style="list-style-type: none"> • Lea Castle blue print only. • Westhead park Wolverley • Site of the old Quarry. <p>Plus we have a town centre sitting empty, why not turn he empty shops, disused offices into dwellings, thus surrounding the new eateries, making Kidderminster a more attractive enticing place to live and socialise.</p> <p>I also believe that our area needs to be more innovative in our buildings and become a known area for a sustainable district of innovative non traditional building method. We started off right with the council building why not for all</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>future homes and business development more fitting to our landscape, after all Wyre Forest is known for its Oak trees and we have vast farming for straw/hay for strawbale.</p> <p>This alone would bring in visitors to our area and make people want to migrate.</p> <p>I hope we can all work together closely to make the Wyre Forest an area we can all be proud of for future generations.</p>
	LPPO3334	Alternatives	Comment	There are brownfield and infill sites available that have not be considered/identified, these need to be used before any development on greenfield sites.
	LPPO3120	Alternative Sites	Comment	<p>Bromsgrove St. (BHS/2): I do not feel that Kidderminster needs another cinema with a multi-storey or more shops. This would release more land for housing. Perhaps some of the empty shops in the town could be converted into housing thus bringing life back into Worcester Street.</p> <p>Sion Hill School (WFR/WC/18): Develop the playing fields and extend this development down to the Wolverhampton Road.</p> <p>Lea Castle (WFR/WC/15): Extend the Lea Castle site to use the land up to the Wolverhampton Road and at the rear of the Lea Castle and extending the site up to Axborough Lane. This is my preferred option as it would create a sustainable community with its own Primary School, health facilities, shops etc. This larger community would alleviate any issues that a smaller site would have on Cookley Parish.</p> <p>There are no proposals for any development on the north/west of Kidderminster e.g. The rear of Ferndale Estate could be developed.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO3327	6.57 Alternative Sites	Support	<p>An alternative would be to develop brownfield sites and Kidderminster Golf club, potentially widening Deansford Lane.</p> <p>Using the Lea Castle Centre would offer a centred separate community for new housing.</p>
	LPPO3107	Alternatives	Comment	<p>Alternative proposals to be considered:</p> <p>Increase Lea Castle land up to the Wolverhampton Rd, Axborough Lane and the Stourbridge Rd. Also on the western side of Wolverley Rd linking to the Sion Hill Middle School site. to create a sustainable community with new primary school and shops and the capacity to sustain a bus service. As a feeder school to Wovlerley CE High School it will also have a positive impact on the high schools long term future.</p> <p>Proposal of industrial development at Hodge Hill other empty units at industrial sites not being filled so need no further development.</p> <p>I hope these alternative proposals can be taken into consideration</p>
	LPPO4041	Paragraph 6.57	Comment	<p><u>My proposals</u></p> <p>I believe the number of properties required in the Wyre Forest from 2019 to 2034 has been vastly over-estimated by both the Objective Assessment of Housing Need (OAHN) by AMION and the Local Plan Review (the Wyre Forest housing requirements has only grown by 1000 in the last 15 years) and I believe the housing requirements should be met in order as follows:</p> <ul style="list-style-type: none"> • identify and bring back into use all vacant housing properties in Wyre Forest

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> • identify and develop housing on all vacant brownfield sites • use the land banked areas • review the Kidderminster Town centre plan to revitalise the centre of the town as follows: <ul style="list-style-type: none"> ○ consider converting to living accommodation many of the empty smaller shops ○ scrap the plans to build a cinema on the old leisure centre and build properties (flats and small houses on this area) ○ convert the old Woolworths and if necessary the Littlewoods store into a cinema and bowling alley ○ demolish the old Crown House building and redevelop this area as originally planned ○ build an enclosed two-way escalator access from Worcester Street to the Bromsgrove Streetcar park to bring people into town ○ consider making the Bromsgrove Streetcar park multi- storey with apartments on top. If not build on the "smaller areas" nearer Prospect Hill ○ convert the old law courts to apartments ○ is the old health centre now fully utilised now the new one has been built? If not part-demolish and build housing ○ develop the area that was fire damaged on the corner of New Road and Bridge Street • consider small scale developments in Wolverley • consider developments in Blakedown as the station is being upgraded and a bigger car park is being built Although they now have a neighbourhood Plan this was not in existence when this consultation started and should be ignored • develop Lea Castle for housing as per the Local Plan <p>If it is found after developing all brownfield sites that further housing is still</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>required THEN and ONLY THEN extend Lea Castle to Axborough Lane to the east towards Stoubridge Road and the west towards the Wolverhampton Road and get the developers to contribute to new roundabouts on both roads. The roundabout on the Stoubridge Road will hopefully help to cut down the number of serious and fatal accidents on this stretch of road. This developed area in and around Lea Castle could then become a new village with it's own school, shops and health centre.</p> <p>This village could also be extended south of Park Gate Road if there was the need.</p> <p>If you still a requirement after this has all been completed the take up the remaining parts of option B as this is much more dispersed and requires less Green Belt than option A</p> <p>I believe there are enough suggestions in "My Proposals" above that would enable significant housing demands to be met in a priority which will not only be fair and satisfy most of the Wyre Forest population but will also bring life back into the town which Kidderminster desperately needs.</p>
	LPPO3746	Selba Drive	Object	<p>The land was handed to the Council on the understanding that it would be left as open access land and green space for people to enjoy, not to be built on.</p> <p>It is well used by a great amount of people both young and old for many purposes and should remain as such.</p>
	LPPO4129	6.57 extend Lea Castle	Comment	<p>As a first point we are surprised that the development of the largest brownfield site in the area, (the former Lea Castle complex) is subject to such a restricted plan whereas the major part of the plan is centred on Green Belt land. The complete development of this site would simply be a return it to being fully developed, albeit for a different purpose. The full development of this would directly</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>inconvenience by far the lowest number of existing house holders and due to the fact that most of the site is hidden from people travelling through the Wyre Forest area so the impact on the general attractiveness of the east of the town would not be impacted to such a great degree. We accept that the development of the land bordering the Stourbridge Road, between the Park Gate and Axborough, would be visible to travellers, but less than a dozen existing residents would be directly affected.</p> <p>The nature of the former use of this site means that the subterranean infrastructure is far greater than the footprint of the former buildings. This infrastructure and existing utilities on site, would also make development cheaper, quicker and inflict less disturbance on residents surrounding the site.</p> <p>There would also be the advantage of the development of a village atmosphere that would not be true of the ribbon development proposed. This site also provides existing access to major roads into and out of the 'village' that would not impact the locality so badly. It also completely eliminates the danger of providing a 'cut through' and provides a selfcontained safe village type community</p> <p>We are also surprised by the lack of utilisation of the Sion Hill school site. The explanation that it is to be retained for St Oswald's school does not bear scrutiny. The former school playing field was far too large for the former secondary modern school. The adjoining fields leading down to the A449 would also increase the available building land by an extensive extent, again with little or no impact on the tiny number of local residents. This would also add to the village feel to the development, benefit existing schools and provide a local infrastructure of shops and community buildings. We submit that this would far better serve all concerned than the poorly thought out ribbon development of Offmore, that will blight the area for a far larger number of existing residents and at a greater cost, both financial and aesthetic to locals and visitors alike.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4590	6.57	Comment	Why is the expanded Lea Castle site included within Option B not included in Option A and why is Blakedown excluded completely.
	LPPO4504	6.57 Alternatives	Comment	<p>Before any Green Belt is built on all Brownfield sites should be used first including Sladen and Sion Hill School sites. There are also many empty shops in Kidderminster which should be considered perhaps to provide apartments at reasonable prices. It would enhance the area which is very run down and does nothing to encourage visitors to return. There are also empty factory sites within the town which could be utilised in the same way.</p> <p>What about the area to the North of Kidderminster between Habberley, Franche Fairfield and Wolverley where there is a lot of open unused land surely this should be a consideration.</p> <p>I believe that a better option would be to create a new village on the Lea Castle site. The current proposal is for 600 homes, if this was extended to use land at the rear of the site and also include land up to the Wolverhampton Road and up to Axborough Lane it would become a fully sustainable community of 2000 homes or more. It could support its own Primary School, Bus Service and shops etc. It is a perfect site which is surrounded by Woodland and trees and therefore would not have a negative visual impact.</p>
	LPPO4603	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p> <p>I also strongly suggest that you consider other brownfield sites such those I have</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.
	LPPO4635	6.57 Alternatives	Comment	There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the Council and with limited economic benefit to the area. Similarly the site of the old quarry on the opposite side of the B4189 to the above site seems to have also been overlooked. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. I strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the new build quota.
	LPPO4642	6.57 Blakedown	Comment	I believe the Local Plan should include Blakedown given the recent new residential development there and as parking at Kidderminster station cannot easily be increased but could be at Blakedown.
	LPPO4527	Ferndale	Comment	WFDC are wrong not to propose ANY development on the North/West of Kidderminster where 100-200 houses could be developed at the rear of the existing Ferndale Estate.
	LPPO4441	Alternatives	Comment	<p>Kidderminster no longer has a thriving carpet factory industry and indeed there have been a number of well publicised redundancies at the remaining carpet factories in recent months. Another major employer in the area, SeaLine, has also closed down in the last couple of years. We do not have the industry, manufacturing or otherwise, to support a growth in the population and there is little to attract young, ambitious people to work in the area outside of retail and tourism jobs. Highly skilled workers and those with advanced qualifications such as degrees, frequently have to go elsewhere to find jobs suited to their requirements as they cannot find them in Wyre Forest.</p> <p>The town centre has a considerable number of empty retail units, some of which</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>have unfortunately been vacant for a number of years. Worcester Street presents a depressing sight with lots of empty shops and “to let” signs.</p> <p>As an alternative, I would prefer that the Council focusses on using existing brownfield sites for housing and development instead of unnecessarily destroying designated Green Belt. I feel that there are a number of opportunities to rid Kidderminster of unsightly and often derelict properties, some of which have been in this condition and blighting the town for years rather than months. For example, the area near Matalan on Park Street has several old, unsafe buildings and also the old timber yard next to Matalan. The old law courts building has also been empty for a long time and I am sure that there are a number of other possibilities. I would also urge the Council to use the land at the former Lea Castle Hospital for housing development instead of Spennells Fields and The Captain’s Pool and The Lodge areas.</p> <p>In summary, I do not think that the numbers projected by the Council are realistic, based on the lack of population growth over the last 10 years and the lack of industry and jobs to attract new people to the area. If these numbers are in dispute, there is no need to build 6000 new homes on Green Belt land. I accept that some new homes will be required, but think that existing brownfield sites and the former Lea Castle Hospital site should be used instead of destroying our beautiful countryside.</p>
	LPPO4686	6.57 Alternatives	Comment	<p>On page 178 Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing, and employment growth required in the plan period.” This is not so I would counter that for two reasons:</p> <p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings located all</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>over it, partially owned by the council. These appear to have very limited economic benefit to the area.</p> <p>There is also the site of the old redundant quarry on the opposite side of the B4189 to the above site. There is also brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p> <p>There was also an application to build housing on the Churchfields site Kidderminster that remains un-developed, since the application was not allowed in 2015.</p> <p>Why is it these sites are not under consideration? Just because the government of the day allows you to build on greenfield sites, it does not mean you have to, especially when the above sites could be considered.</p> <p>I believe you have a duty to fully explore these options and give clear and transparent reasons to the public why you may not take them into account. I strongly suggest that you consider brownfield sites such those I have outlined.</p>
	LPPO4692	6.57 Alternatives	Comment	<p>Suggestions:</p> <ul style="list-style-type: none"> Development of Lea Castle for sustainability. Widening of Deansford Lane - offers a sensible non destructive alternative. <p>There are plenty of other development sites that will not impact local residents.</p>
	LPPO3646	Selba Drive	Object	<p>This area is used by many local residents for social activities (children playing or dog walking) removal of this would cause local people to have to go further away from their homes to continue these activities</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>9 homes would approximately mean another 18 vehicles (2 per household seems quite normal), which would need to be catered for in Selba Drive.</p> <p>In addition, the current excessive parking at the junction of Selba Drive & Westminster Road has already caused many people to complain to the council. This is before the introduction of more vehicle traffic.</p> <p>With the new houses also built in the site of the Cooper's Arms (again with inadequate parking), it will increase on road parking at the other end of Westminster Road.</p> <p>There are plans to remove the old garages and put 4 more houses in the same site. Many cars go up there as it is, where are those meant to park once the work starts / completes?</p> <p>There is not enough space for the current number of vehicles. Adding potentially 18 more vehicles to park and use these roads will cause more problems.</p> <p>I can see a future of parking problems that will be a constant source of complaints.</p> <p>In a nut shell, this area cannot accommodate the traffic that will arise from this development.</p>
	LPPO4429	Alternatives	Comment	The council should prioritise the development of brownfield land such as the rest of the Silverwoods estate, the old Sladen School site and Sion Hill School, to meet the shortfall in housing which is provided as the reason for the proposal.
	LPPO4702	6.57 Alternatives	Comment	Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>employment growth required in the plan period.” I would counter that:</p> <ul style="list-style-type: none"> There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. <p>I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4707	6.57 Alternatives	Comment	<p>Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” I would counter that:</p> <p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. 	LPPO4157	Lea Castle	Support	<p>The Lea Castle site could be adopted as suitable for an initial large scale development, incorporating appropriate infrastructure such as schools, shops, GP</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				surgery, transport links, etc.
	LPPO3160	Alternatives	Comment	We would like more consideration of developing brownfield sites, including the town centre.
	LPPO3166	Alternatives	Comment	We would like more consideration of developing brownfield sites, including the town centre.
	LPPO3168	Alternatives	Comment	<p>Land is a precious resource, we need affordable housing to be built, but there are alternative Brownfield sites in Kidderminster and the surrounding areas. These could and should be used first.</p> <p>Kidderminster town centre has opportunities for housing development. Use the existing infrastructure and consider building residential units or change of use.</p>
	LPPO3212	Alternatives	Comment	<p>Extend the area to build on at Lea Castle include all the land from the A449 to A451 and to Axborough Lane.</p> <p>Consider land at the rear of Ferndale estate.</p> <p>Brownfield sites should be built on before destroying the Green Belt. Sladen school and Sion Hill school sites have still not built on. Do we need so many houses?</p>
	LPPO3608	Extended Lea Castle and Ferndale	Comment	<p>I would like to propose the use of land at Lea Castle, this could be extended to use land up to the Wolverhampton Road and at the rear of the Lea Castle site, extending up to Axborough Lane. There could also be some development on the Western side of Wolverley Road towards Sion Hill which would link with the development at the Sion Hill Middle School site.</p> <p>This development could create a sustainable village with all the required infrastructure to support it. It would support a village centre and would be large enough to support a primary school. The village would be able to sustain a bus</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>service and would not impact on the community of Cookley.</p> <p>In addition to this I feel that, WFDC should propose some degree of development on the north/West of Kidderminster and feel it would be reasonable to develop land at the read of the existing Ferndale estate which could accommodate 100-200 houses.</p>
	LPPO4891	6.57 Alternatives	Comment	<ul style="list-style-type: none"> There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. <p>I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4893	6.57 Alternatives	Comment	<p>Green Belt land should not be removed when suitable alternative sites could – and should - be used e.g. further development of the Sugar Beet site, the Lea Castle campus and city centre developments.</p>
	LPPO3828	6.57	Comment	<p>I would like to propose the following:</p> <p>That consideration is given to developing firstly all the existing brownfield areas within Kidderminster. The most significant being the former Sladen and Sion Hill school sites.</p> <p>The former Lea Castle hospital site near Cookley, which is already earmarked for a development of 600 dwellings. This will put pressure on the existing facilities in Cookley namely the primary school and doctor's surgery. If this were to be</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				increased to around 2,000 dwellings then the development would be eligible for its own school, bus service route and doctor's surgery, taking the pressure off the village of Cookley. As this area is on the other side of the A449 and already well screened by woodland it would not have a significant visual impact on the village.
	LPPO3555	Alternatives	Comment	Brownbelt land must be utilised, empty Kidderminster shops to incorporate apartments above, utilise the top of Park Lane, behind Matalan in Kidderminster, properties in Green Street opposite Aldi.
	LPPO3860	6.57 Lea Castle and Ferndale	Object	<ul style="list-style-type: none"> • Other options are more suitable. • why not development at the rear of existing Ferndale Estate.
	LPPO3763	Alternatives	Comment	<p>There is flatter land potentially available where the recently closed golf course is. It is a much larger plot of land so could accommodate quite a significant estate rather than the 80 properties being considered at present. It would also seem to be suitable on other levels such as traffic access as it is in closer proximity to the Stourport/Kidderminster dual carriageway.</p> <p>The only down side I can see compared to the existing proposal is that the council do not currently own the golf course land.</p>
	LPPO4907	6.57 Alternatives	Comment	<p>It states "there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period." I would counter that:</p> <p>There are brownfield sites that are not even on the plan, for example Brown West head Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Kidderminster.</p> <p>I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4915	6.57 Alternatives	Comment	<p>The plan has not considered Blakedown. Section 13.21 and 13.22 recognises that parking at Kidderminster Railway station cannot be expanded easily but there is scope at Blakedown. I believe the Local Plan should be revisited to include Blakedown particularly given the recent new residential development in that area.</p> <p>The Local plan is biased. It should also cover Blakedown. It is not in accordance with the guidelines for Public Consultation and falls short of both YouGov and Rural and Town Planning Institute best practice and needs to be revisited.</p> <p>Kidderminster town centre as it is now is devastated. With the retail sector hit so hard by internet sales it seems unlikely that we can revitalise the old high street to sustainable levels. So why is nobody talking about converting the old Woolworths/Littlewoods buildings into nice new apartment blocks with plenty of accessible parking at the rear and only a short walk to both the station and weavers wharf and how this might help to stimulate the local economy in more effective ways?</p>
	LPPO4533	Extended Lea Castle	Support	<p>I believe a larger development at the Lea Castle site should be built to create a sustainable community with a new Primary School and a village centre. This would incorporate options A and B at Lea Castle and extend the site to the Wolverhampton Road, to the rear of the Lea castle site and to the Axborough Lane.</p>
	LPPO4454	Alternatives	Comment	<p>Are there really no brownfield sites left to develop?</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>I would like to see a more dynamic approach to bringing the centre back to life with apartments. Perhaps reduce the number of shops to provide land. Many shopping streets are now a relic of pre-retail park days. There are also tracts of old carpet factories used for small businesses. Not a good use of city centre land.</p> <p>I can't see any mention of eco-housing. Surely all proposed housing should far exceed minimum insulation standards and incorporate solar panels as standard.</p>
	LPPO4460	Alternatives	Comment	Use brownfield sites plus significant use of the Lea Castle area which will have minimal impact on the present residential population.
	LPPO4751	6.57 Alternative Sites	Comment	<p><u>Objective: To plan for Long Term Sustainable Development</u></p> <p>There's a clear need for a robust and approved local plan to be in force and for adequate land to be set aside for realistic, planned future development. However before any consideration, at all, is given to the re-designation of Green Belt land, there are other alternatives which should have prior consideration:-</p> <p>Brownfield sites – These include:- Victoria carpets' former sports ground; Kidderminster Golf Club and Car Park; Land North of Bernie Crossland Walk (Rear of Chester Road South); Land South of Bernie Crossland Walk; Chester Road South Service Station; Land at 78 Cherry Orchard; Comberton Place; Lea Street School; Stadium Close (also Aggborough Stadium); The former Polish Club;</p> <p>Other sites, including those in Stourport and Bewdley should be identified. These include, but not exclusively: Former school sites (including playing fields) at Sladen, Sion Hill, Stourminster and Blakebrook Schools, in Kidderminster and, maybe others in Stourport and Bewdley; the former Sugar Beet Factory site – A higher density of housing is probably feasible; the Lea Castle site – suitable for high density, affordable housing; the former Wyre Forest Glades site – should be re-designated for high density affordable housing; Redundant shops/offices in town</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>centres and elsewhere are suitable for conversion, or demolition and redevelopment:</p> <p>Kidderminster has numerous longstanding vacant premises, which are likely to attract only low rental occupation. Competition from Merry Hill, Worcester and, ever increasingly the internet, has had and will continue to have, adverse effects on the retail trade. The future retail needs of the town can be met by the Weavers Wharf development and Vicar Street. The remainder of the town (including the former 'Woolworths' and 'Littlewoods' sites and other empty shops in Worcester Street) is, therefore, potential for redevelopment. A massive area, extending to the former 'Glades' Centre and the Ring Road, is ideally suited for high density, affordable housing, which in present circumstances, appears to be much more important than more shops/cinema etc.</p> <ul style="list-style-type: none"> • Stourport has vacant shops and office space which could be considered for domestic use. • Bewdley also appears to have unoccupied properties and, in particular the HSBC has recently moved out of its premises. Town centre domestic units can be very attractive, particularly to young people. • Crown House – One of the worst eyesores in the UK. This would be best suited for urban open space but the site could be considered for domestic redevelopment. • Swan Centre – One of the least frequented shopping centres in the region. This could be demolished and re-developed. <p>N.B. Compulsory purchases of town centre properties should be considered, where owners of designated units are reluctant to sell.</p> <ul style="list-style-type: none"> • Park Lane Kidderminster – vacant sites include long disused mill units opposite the Matalan site, the former 'Jewson' site and other possible

				<p>development land nearby. These may have been earmarked for an extension to Weavers Wharf but, in present circumstances, housing appears to be the priority.</p> <ul style="list-style-type: none"> • Aggborough Stadium. -The prospect of Kidderminster Harriers removing to the training ground site in Stourport Road has recently come to light. This would leave the stadium and car park site available for substantial, high density housing, in keeping with existing development of the surrounding area. This, it would appear, has not been taken into consideration in the Council's planning. • The large site adjacent to 'Tesco' in Stourport – this is already fenced off and designated for development, but has remained undeveloped for several years. • The former sewerage treatment site in Wilden Lane, Hoobrook (backing on to McDonalds). • The development of open areas presently used for car parking. This would require the provision of multi-level car parking in the 3 towns. • Existing domestic properties within the 3 towns and available for purchase and redevelopment - possibly small sites suitable for one or two houses, properties available for demolition and use of large gardens. • The Countryside - Sensitive developments, especially where existing main roads provide essential access, e.g. Shenstone (A450), Mustow Green/Harvington/Stone (A448/A450), Low Habberley (B4190) and land at the junction of the A449 Wolverhampton Road/B4189 Wolverley Road and Park Gate Road etc. etc. • Local villages/residential areas – small housing developments in keeping with existing structures and avoiding essential Green Belt where possible. e.g. Chaddesley Corbett, Cookley, Wolverley etc. etc. <p>N.B. "The modern trend of developing small 'pocket' communities has much to</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>commend it, when compared to the impersonal facelessness of large estates”.</p> <ul style="list-style-type: none"> Reviews - Sites where previous applications for planning permission have been refused should be reconsidered – these are likely to be numerous. Priorities for the future are changed and decisions now outdated. <p>N.B. It is unfair that the south-east of Kidderminster has borne the brunt of expansion over the last 4 decades and is again in the forefront for planned new development.</p> <p>There are other Green Belt and other areas in Wyre Forest, around Kidderminster, Stourport, Wribbenhall, Bewdley and the local villages (not considered in either Option A or Option B), with potential access from existing main roads.</p>
	LPPO4505	6.57 - Extended Lea Castle	Support	Support Lea Castle
	LPPO4172	Alternatives	Comment	Has site of Glades Leisure centre been considered for apartments? Can old part of the Kidderminster Town Centre be turned into apartments?
	LPPO4509	6.57 Alternatives	Comment	<p>Primary areas for development need to be areas already used, brownfield sites. The development of Lea Castle site is a much needed area of development. The site itself already contains the basic needed for a housing complex and the road network is such that it can take the weight of traffic.</p> <p>Development that allows for the building of the eastern relief road enables people to be connected to major road networks, allowing them to commute without getting gridlocked in town traffic.</p>
	LPPO4638	6.57 Alternatives	Comment	Use brownfield land for affordable housing
	LPPO3793	6.57	Comment	I am emailing to oppose the planning for building to take place on Green Belt land to the east of Kidderminster. I cannot see why these proposals would be made

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>when there is perfectly good land to be built on at Lea Castle, especially as this site could be used as a sustainable village. There is also land to be used on the existing Ferndale estate that seems perfectly reasonable to me for at least 200 houses.</p> <p>To build on the proposed Green Belt land would be an intrusion on the beautiful wildlife that inhabit there and a visual intrusion to the stunning land also. There are many endangered bird species that would be affected and I personally think it would be a crime to damage that.</p> <p>I truly hope you take Lea Castle and the Ferndale estate into consideration before destroying our lovely countryside.</p>
	LPPO4652	Extended Lea Castle	Support	<p>I would suggest that an <u>Option C</u> should be considered, that utilises more than the designated area around Lea Castle, and builds sufficient houses there to justify a school, and a shopping and community centre. Residents could then do local shopping on site and not need to travel so often to the town centre.</p> <p>I am not commenting out of self-interest, I am thinking of future generations who could have their own school in an enlarged Lea Castle complex.</p>
	LPPO4679	6.57 Alternatives	Comment	<ul style="list-style-type: none"> Use existing empty properties in the town centre (eg. Woolworths site), for the proposed leisure complex (cinema/bowling alley) or move it more towards the Weavers Wharf area to stop the town centre becoming divided and further disjointed. The Lionfields site could then all be dedicated to housing/residential. Other empty buildings here could then be made into restaurants/cafes and the road not opened up to traffic to allow a 'café culture' with outside seating etc. <p>The monies saved (£500,000) from opening up the road (keep it pedestrianised to promote said café culture) could be used to compulsory purchase these buildings</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>and revamp this area of town. It is also closer to the main shopping areas on Weavers Wharf than Lionfields thus stopping even further segregation of the town centre.</p> <ul style="list-style-type: none"> • There is waste land where Sladen School on Hurcott Road once stood as this was demolished in 2009 and also Sion Hill School. The Magistrates Court and offices should be made into residential housing. • Churchfields site should also be developed (some 3000 houses can be built here according to Ian Hardiman). • Use Lea Castle Hospital site (brownfield site in options A and B combined) for 600-700 houses. Then 10 – 15 years on, further development of Lea Castle Hospital and School site - use of Green Belt extension if absolutely necessary. Green Belt at Lea Castle only released at this stage if deemed necessary for increased housing. No Green Belt site to be released until housing needs are reviewed after 10 years. • I also think that the idea of a cinema on the ex-Glades site is not a good plan. This land could be used for housing and the proposed cinema (if really needed) sited nearer the heart of Kidderminster, and not cut the town into two parts. Is a cinema the future or are green fields for our children and children's children? What then of the vacant REEL cinema...more housing? <p>We need small scale town centre apartments and flats for our younger people and older residents and not large mass housing 3 to 4 miles outside of a town with poor transport or facilities. Building retirement housing near the town centre will also free up more large family sized homes as per your report, thus negating any need for further building. Smaller flats and apartments will have smaller land footprints too, making the land mass an important factor in determining housing numbers and reducing the overall land required.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> • Development of an entire rural village on Lea Castle Hospital and School site. • Kidderminster town centre has at least 40 large shops and office blocks that stand empty, some for well over a decade. The town centre is in urgent need of regeneration, and I believe that Compulsory Purchase Orders should be made on these. There is waste land where Sladen School on Hurcott Road once stood as this was demolished in 2009 and also Sion Hill School. The Magistrates court and offices should be made into residential apartments. • Re-evaluate the whole 'need' for housing figures and reassess land availability to include recent windfall sites such as Kidderminster Harriers site, Victoria Carpets, Wood Yard next to Matalan etc. Build higher rise, or convert more flats in the town centre to boost numbers (smaller build footprints) for the elderly and younger generation (a good example is Comberton Hill), therefore freeing up existing larger homes. • Stourport in particular also has a number of brownfield sites which are in need of development in order to meet some of the local housing needs of a growing/developing town centre. The now defunct Wyre Forest Golf Course has released some land and there is no reason why the rest should not be released for housing development. <p>I therefore state that all brownfield sites and existing sites must be developed first, and that no land be removed from the Green Belt for at least a minimum period of 10 years.</p>
	LPPO4168	Alternatives	Comment	<p>There is also alternative land abutting south east of Highclere (Land Registry Title no WR95003) that could be incorporated to support improved highway access and additional residential development to avoid the traffic congestion and dangers for both pedestrians and vehicles that already exist at the higher levels in the Park Lane area. This site could also provide improved recreational facilities. It also</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				offers easy access to Bewdley town centre without the need to traverse and negotiate the hazards of Park Lane.
	LPPO4626	Alternative Sites	Comment	There are many alternatives available to develop and expand in and around Kidderminster - several buildings are derelict and have been for several years which could be used for the 1700 homes that you wish to implement. In turn, this could improve the regeneration of Kidderminster town centre and bring the business you desire to the area.
	LPPO3529	Selba Drive	Object	<p>Our own children and their friends made good use of this space playing football, cricket, hide n seek, etc as do our grandchildren.</p> <p>You are building or built Family homes on garage, pub, hall and church sites I assume FAMILY means people with children, just where do you think these families are going to go for a kick about hide n seek, ride their bikes exercise etc (NO BALL GAME SIGNS ARE AROUND THE ESTATE) in a fairly safe environment without being a nuisance to other residents or shop owners children have to play somewhere!The existing parks great for smaller children but not adequate for older ones in the area.</p> <p>We sincerely hope that you can leave us and future residents of Habberley Estate A little bit of green space for us all to enjoy.</p>
	LPPO3997	Paragraph 6.57	Object	There are viable alternatives in Wyre Forest, some of which do not appear to have been fully considered in the current proposals. I do not feel that you have given full consideration to all of the brownfield sites in the Wyre Forest District. We need affordable homes and these do not have to be houses, there is still considerable scope for brownfield development of apartments and flats e.g. Park Lane in Kidderminster, Green Street, site of Crown House, sites of former schools, the Jobcentre etc. Furthermore, with an aging population, we need suitable housing for elderly people to downsize to, developments near town centres and

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>shops are ideal for this. Releasing Green Belt land for development looks like the easy (or lazy) option. You have a responsibility to the people of Wyre Forest to protect our Green Belt wherever possible and I do not believe you have demonstrated that there are insufficient brownfield (or green field non-Green Belt) alternatives.</p> <p>To ensure that any development has good road access and facilities I would support a 'Spennells type' development on the Lea Castle site, which would mean expanding the current proposals for that site. A full development on that site would support a primary school, providing a much needed additional feeder school for Wolverley High school. Creating a 'second Spennells' on the Lea castle site would actually have less impact on local residents as (like Spennells) it could be self-sustaining with the opportunity to provide shops and live/work units providing employment opportunities. Also the Lea Castle site has better road access, being situated between two A roads it already has the necessary road infrastructure as the Wolverhampton Road and Stourbridge Road are already linked (similar to the Spennells Valley Road). This means there would be no 'rat runs' created through residential streets, unlike the Baldwin Road scenario, which would create havoc on the residential streets in the Greenhill area.</p> <p>If you simply built the number of houses proposed for the Baldwin Road site on the Lea Castle site instead – you would create no traffic problems for the immediate neighbours?</p>
	LPPO4466	Alternatives	Comment	Support infill development to south of Kidderminster
	LPPO4690	6.57 Alternatives	Comment	There are still plenty of brownfield sites that should be developed before building on Green Belt land. Half of Kidderminster town centre is empty and abandoned. Town centre development would massively enhance the centre of Kidderminster and reduce the need to travel which would benefit air quality and cause less traffic

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>congestion. The old Glades site and Bromsgrove Street car park which is always empty now. The old abandoned law courts, countless old factories. Old school sites such as Sladen and Sion Hill. The falling down buildings in the Horsefair which I think most people would agree is the street that most desperately requires the Council's help and vast improvements could be made. There are many options that should be implemented first instead of the Council choosing the 'easiest' for development.</p> <p>If houses still have to be built then the Lea Castle site could be extended up to the Wolverhampton Road which I believe wouldn't cause as much upset and loss of quality of life as Options A or B would.</p>
	LPPO4434	Alternatives	Comment	<p>Although the plan states that Brownfield sites have been included, there are more that should be added for Core Housing sites. There are two disused school sites in the Kidderminster area alone, that should be considered; as well as the Lee Castle site and the rejuvenation of the Kidderminster town centre sites such as Bromsgrove Street, the old Law Courts (that have been empty for several years) and of course Crown House, to name just a few. Surely it makes more sense to develop all Brownfield sites to maximum capacity first and only then should Green Belt areas be considered as a last resort.</p>
	LPPO4430	Alternatives	Comment	<p>The poor state of Kidderminster town centre in combination with poor traffic management and congestion around the station do not make Kidderminster an attractive base for commuters working in Birmingham. I believe that development of those brownfield sites closer to the town centre should be maximised to their full potential to ensure housing is affordable and in the right location to provide easy access to amenities and employment for those with both limited means and reduced mobility, particularly the elderly.</p> <p>I propose WFDC also make sustained efforts to encourage development of the Lea Castle, Sion Hill and Sladen school sites which are in prime locations and for which</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				local infrastructure is already present.
	LPPO4625	Alternative Sites	Comment	Derelict school area at Sion Hill, the old Sladen School site are two I passed yesterday on the way home. Both of these are large areas with the ability to host adequate parking.
	LPPO3410	Alternative sites	Object	<ul style="list-style-type: none"> • Kidderminster town centre could provide more housing. • Could use Worcester Street, Bromsgrove Street and The Glades - those housed would then be in walking distance to a lot of services. • 'Political will' at national level needed to deter land banking.
	LPPO3087	Development Suggestions	Comment	<p>Extensions to the Lea Castle site (as in WFDC Options A and B) should be utilised; and land on the Lea Castle site which constitutes the field(s) alongside the Wolverhampton Rd and a "rear" extension of Lea Castle up to Axborough Lane should also be included. This use of land could create a "Lea Castle Village" with around 1,800-2,000 houses. This would create a wholly sustainable community which would be large enough to have a village centre, primary school, community facilities and sustain a bus service. In addition, being in the catchment area of Wolverley High School it would help to make that school sustainable.</p> <p>Further some extension into land adjacent to the Wolverhampton Rd/Wolverley Rd area and Sion Hill Middle School site could also be considered and could provide another 200-300 houses. Development in this area is supported by two main A roads the A449 and A451.</p> <p>I have noted that there is no proposed development at all to the western Kidderminster estates. However a development of 100 – 200 houses as an extension to the Ferndale estate could and should be considered. This estate also has reasonable access to the A449 via Wolverley and could support such a development. In addition there are surplus Secondary School places available to</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				serve this area as Baxter College is seriously undersubscribed.
	LPPO3109	Lea Castle Hospital	Support	This site would be large enough to warrant building all the facilities lacking on the Baldwin Road site. This option would generate a feeling of community spirit and a nice area to live. This choice of site would also please the hundreds of people affected by the use of any of the other proposals.
	LPPO4928	6.57 Alternatives	Comment	<ul style="list-style-type: none"> • Create two clear focus development areas and <u>not</u> a long featureless strip as current. • Maximise development on Lea Castle Hospital site. Include all land up to Axborough Lane, Stourbridge Road and Wolverhampton Road. Include the South (WC/16) and East (WC/32) extensions also. Create a community to include shops, school and bus routes. • Maximise housing development at or near the Kidderminster Enterprise Park – for obvious traffic congestion and environmental reasons. This all include AS/10 and OC/13. Can even more land be obtained in and around Stone? • Ensure Hurcott Lane issue is resolved. Access to Hurcott Woods to be preserved for everyone in the WF community and beyond – but terminating access at the Hurcott Woods car park (in effect making Hurcott Lane a no through road) is a serious option for consideration. Traffic calming chicanes or humps at the edges of Hurcott Village should be considered also. • Existing Core Housing Sites to be reviewed and abandoned if possible. If parts of them must be used – ensure they are done last in the development calendar – after the above two focus development areas are completed.
	LPPO4537	Alternative Sites	Comment	Kidderminster itself would benefit from further regeneration. This could include developing new, quality and affordable homes in Kidderminster itself and on

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				undeveloped brownfield sites. This could be resolved by a smaller development south of Park Gate Road only.
	LPPO4518	Alternative Sites	Comment	The town centre is like a ghost town as it is with all the derelict shops people are moving away from the area not into it.
	LPPO3382	Paragraph 6.57	Comment	The Proposal of a sustainable Village at Lea Castle could be explored more thoroughly allowing 2,000 houses, large enough for a primary school and a bus service, services are already available. Ferndale estate could be extended further, Sladen Site or Sion Hill Middle sch site, the old GPO offices and Magistrates Court? I believe the Brownfield sites within Kidderminster should be looked at as a priority before destroying our beloved and precious Green Belt land, cost alone should not sway this.
	LPPO4523	Alternative Sites	Comment	Any buildings needed would first be built on the brownfield sites that w.f.d.c. have at their disposal. Such as Lea Castle, Sion Hill, Sladen, the old Wyre forest golf course, disused factory units, Stourminster School, the old Victoria cricket ground to name a few that I know of.
	LPPO4525	Alternative Sites	Comment	I believe that there are other sites under consideration which would seem more suitable, in particular the Old Ceramaspeed site in Kidderminster.
	LPPO4375	Alternatives	Comment	Core Housing Sites that could replace Option A to the South of Kidderminster: 'Timber Yard Park Lane' and 'Bromsgrove St' (excluding the Glades site).
	LPPO4365	Alternatives	Comment	There are numerous brown site areas in the area namely Sion Hill school Lea castle hospital Stourminster school also land in park street and various other small sites in the area although we realise would be more costly would undoubtedly clear up some derelict eyesores.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4624	Alternative Sites	Comment	I am at a loss to understand why the site of the former Glades leisure complex cannot be used for house building instead of a cinema etc., at least this will bring necessary footfall to the shops. There are many empty shops in Worcester Street, why cannot these be turned into dwellings?
	LPPO4387	Paragraph 6.57	Comment	Rear of Ceramaspeed - It is on an industrial estate and has wide roads leading to it, which are able to cope with large vehicles. More suitable fpor Travelling Showpeople site. The surrounding roads also seem to be less busy with day-to-day traffic.
	LPPO4388	Paragraph 6.57	Comment	Rear of Ceramaspeed -This is a far more suitable space for Travelling Showpeople: the industrial estate offers wide roads leading into it, specifically built for large and often articulated vehicles. The roads are less congested by heavy day-to-day traffic so the impact on the general public would be much less.
	LPPO4298	Alternatives	Comment	<ul style="list-style-type: none"> • Under-used warehouse buildings around the centre of Kidderminster • The redundant leisure centre / health centre site. • The large number of empty shops in the town centre including so many redundant upper storeys above the shop fronts.
	LPPO4544	6.57	Comment	<p>I believe it would be more beneficial to make use of the brownfield sites to create more homes and to re-generate the town itself, there are several buildings which would be better utilised in this way rather than left to rot and make the town look like an eyesore. My suggestions are:</p> <ol style="list-style-type: none"> 1. The land which used to be the Glades Leisure Centre, I know there is consultation for it to become a multiplex Cinema which in an ideal world I think would be a brilliant idea, however, realistically speaking young

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>people, families etc. do not attend cinemas as it is far too costly and with modern technology such as Sky, Virgin, Amazon firesticks etc, they can watch all they want by using these methods of viewing at a lot less cost. This is why I think this land would be of more benefit by using it for housing.</p> <ol style="list-style-type: none"> 2. All the empty shops in Worcester Steet, i.e. the old Woolworths, Littlewoods stores and the large amount of charity shops. 3. The Old Magistrates Court. 4. The disused timber yard and warehousing behind Matalan, this would be perfect for town houses or Apartments for canalside living similar to areas in Birmingham which have been re-generated with fantastic restaurants etc. 5. Sion Hill School. 6. Sladen School. 7. The Old Lea Castle Hospital would be ideal as it has two major roads either side of it which would be able to handle the extra volume of traffic no problem, I am confident of this as I travel along these roads everyday to work and there is nowhere near as much traffic on these roads as there is around the Spennells/Aggborough/Offmore areas. The plan to use Lea Castle would also mean using less Green Belt Land than the Spennells proposition. <p>I have lived in Kidderminster for 34 years and have watched the decline of the town over a number of these years I desperately would love the council to carry on rejuvenating the town itself and make it a pleasurable place to visit with more restaurants, maybe an entertainment venue for concerts, shows etc rather than taking away our valuable Green Belt land which once gone will be gone forever.</p>
	LPPO4763	6.57 Alternative Sites	Comment	On page 178 Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				necessary housing and employment growth required in the plan period.” Why are there no brownfield sites on the plan? ie Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it), partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. Why have these areas not been considered and if so then please can you advise on why they are unsuitable ?
	LPPO4766	6.57 Alternative Sites	Comment	On page 178 Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” Why are there no brownfield sites on the plan? ie Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it), partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. Why have these areas not been considered and if so then please can you advise on why they are unsuitable?
	LPPO4865	6.57 Alternatives	Comment	We have numerous brownfield sites, that should and must be built on first, they include old derelict factory units in Green Street, same in Park Lane, the old magistrates court bottom of Comberton Hill, Bromsgrove Street, empty premises in Worcester Street, the land where Sladen school once stood, Sion Hill school. In Stourport we have two parcels of land next to Tesco, plus the old leisure centre land.
	LPPO4870	6.57 Alternatives	Comment	A further and up to date review must be made of available development land in Kidderminster. The Wood Yard to the side of Matalan and buildings behind are all now vacant since the review was completed, as well as the Magistrates Court and many other buildings. If these are not released by the owners, then WFDC should

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>utilise funds and compulsory purchase these sites to develop.</p> <p>It has also been suggested that discussions are ongoing around land available at Kidderminster Harriers for housing. This must be factored into numbers. Some accountability must be taken for further windfall sites occurring, such as the recent carpet factory closures.</p> <p>Move the proposed cinema off Lionfields to one of the empty buildings in the town centre, with associated pubs and restaurants, thus bringing it closer to the Weavers Wharf development, freeing up a lot of space at Lionfields for retirement housing, or young people apartments that would breath more life and energy into Kidderminster, especially early evenings as other towns and cities have done. Comberton Hill development is a very good example of this.</p> <p>With the building of a new cinema, this would release the site of the current 'REEL' cinema for further apartments or resolve the need for additional employment spaces at Easter Park. Many small business owners find it difficult to lease small offices. All that is proposed are large industrial units, there should be a mix.</p> <p>Use both option A and option B for the Lea Castle site, with further development of the site to create a new village with its own identity and facilities, thus supporting the much needed provision of new infrastructure in that area and creating a road to take the traffic to Birmingham from this side of Kidderminster away from the Horsefair and ring road.</p> <p>Development of the array of empty premises in Kidderminster for housing use. Revisit all 'vacant' property in Kidderminster and the use of CPOs as required. Approach Housing associations to support with this.</p>
	LPPO4494	6.57 Alternative	Comment	<ul style="list-style-type: none"> Worcester St; Bromsgrove St car park (exc Fabric shop) plus Glades area.

		suggestions		<ul style="list-style-type: none"> • Vicar St – over the shops esp former WFDC offices. • Corner of Coventry St/Blackwell St – appears in disrepair • Green St l/h side – the building backing onto Morrisons car park appears to be unoccupied and further down on the left hand side (past Dixon St opposite B&Q) inc the building currently partly used as offices. • Corner of Church St/Ring Rd – shop unoccupied since it was the “Medical Hall”, Church St further accommodation to let . <p><i>I am sure if you look there's plenty more.</i></p> <p>CROWN HOUSE – a car park with accommodation/just accommodation? Maybe inc walkway to the Swan Centre.</p> <p>Make Kidderminster an attractive place; to live, work and shop– be innovative - a forerunner!</p> <p><u>Planners:</u> -Look at towns on the Continent for inspiration eg France and Germany.</p> <p>Kidderminster town has the potential to be an attractive town with some very nice brick built buildings housing shops, an attractive Town Hall and buildings eg Lloyds Bank but we do have some very unattractive buildings, many empty shops.</p> <p>Along Worcester St there are 12 exc the old Woolworths building. All of the one side of Worcester St backing on to Bromsgrove St could be converted into living accommodation/OAP complex (location pos alleviate loneliness). Incentivise any remaining shops there to move to empty shops elsewhere in town. Any objections/obstacles must be overcome before Green Belt land is considered for building . Bromsgrove St car park and Glades area could be regenerated with housing only inc some green spaces but not so as to encourage anti social</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>behaviour as in Coronation Gardens.</p> <p>Crown House must be demolished; it is an eyesore taking up valuable land. As a nation we cannot afford to continue using land for car parks so multi story car parks must be built rather than surface car parks. So I suggest we demolish Crown House and replace with an attractive brick built multi story car park with the money ear marked to be spent on Worcester St) with living accommodation on the top (as on the Continent) with own secure parking.</p> <p>Nationally as well as locally we should look at every available space for living accommodation. Towns are not what they used to be so we should regenerate them into vibrant areas where people want to live.</p>
	LPPO3465	Para 6.57	Comment	<p>All on going sites that have been left and not developed and are now in a disgusting state, should be finished before any green fields are even touched eg. Sion Hill School, Yew Tree Pub in Broadwaters and Lea Castle Hospital.</p> <p>The centre of Kidderminster is a disgrace. The retail premises that will never ever be used again for business should now be redeveloped for both residential and commercial use, bringing life back into a dying town. This will make it a young vibrant place to live (not everyone wants a house with a garden). The development of the inner town must the priority long before any further outward expansion of Kidderminster is even dreamed of.</p> <p>All roads and transport infrastructure must clearly defined and planned for before any future developments are contemplated.</p> <p>Education provision should be firmly planned for now, not left for future thought. Health care also needs to be planned for jointly with the NHS.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4538	Extended Lea Castle	Support	<p>We believe that there may be a better option that would safeguard the habitats and lives of the mammals, birds and bats in this area. We suggest that more should be considered on the Lea Castle Site. The footprint of the old hospital has been ear marked for the building of 600 dwellings but the site could accommodate many more. And with a little development on the fringes there it would provide sustainable community that could support its own primary school, and wouldn't be a burden on the Cookley Parish.</p> <p>We ask you to seriously consider the development of the Lea Castle site as a sustainable community and a viable option which would reduce the impact on the proposed Green Belt diminution.</p>
	LPPO4697	6.57 Alternatives	Comment	<p>On page 178 Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” I would counter that:</p> <ul style="list-style-type: none"> • There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. <p>I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4542	Extended Lea Castle	Support	<p>I note Lea Castle site is included in your options but I feel this could be further developed to create more of a brand new sustainable community rather than</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>numerous “add ons” to already established existing areas</p> <p>If the site at Lea Castle were expanded, as it could be, to provide all the current additional housing required this would create more of a community which in turn could provide a new primary school (Offmore school, as I’m sure you are aware, is full to capacity and cannot be extended), also shops and a community area. This would also appeal more to people moving into the area, a brand new site including new local amenities</p> <p>Traffic and new roads could also be better managed and accommodated at this site rather than adding some form of eastern bypass, which would also have to take into consideration the rail track and possible very costly new bridge</p> <p>I would please ask that you consider alternative options and work on creating a new community within Wyre Forest as opposed to causing disconcert to your already established areas.</p>
	LPPO3494	Para 6.57	Comment	<p>There are many sites that should be used: Lea Castle, Sion Hill, Sladen and particularly the old town centre, which is a disgrace, before dwellings are constructed on virgin land. Before any of this building goes ahead the plans for the infrastructure should be passed. Where is the money for the infrastructure coming from? We will need new schools, new Doctors Surgeries and hospitals. The current local hospitals have reached crises point and GP practices are not coping; they cannot get the staff. More doctors and medical staff need to be trained and that takes years. The local schools are full, so more money will need to be spent building new schools. Where is the money coming from?</p> <p>Kidderminster has great potential; it has canals and rivers and a few years ago was a thriving market town surrounded by beautiful country side, but if we are not careful it will become a commuter town that no one wants to visit. Before any</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				more dwellings are built we need to sort the old town centre out, by replacing the empty shops with desirable dwellings and businesses and making it once again a rural town that visitors want to visit.
	LPPO4303	Alternatives	Comment	I propose the use of existing brownfield sites in the centre of town! I appreciate this is more costly to the local council but we really do have to protect the Green Belt at all costs. With rising obesity levels, reduction in emissions and reduction in food miles being the governments prerogative I don't see how you can justify building on green and with so many brownfield sites available.
	LPPO4361	Alternatives	Comment	Rezone areas of Kidderminster town centre for housing.
	LPPO3237	Alternatives	Comment	Plan heavily focused on large development in one area ie Option A Spennells and Hurcott. Fairer to have spread out whatever homes that are needed across more areas. Why nothing in other areas?
	LPPO4258	Alternatives	Comment	Build your houses in the old, empty Woolworths site, on the old Glades site, on Lea Castle, on the old Sladen Site, on the old Sion Hill site, bulldoze the The Horsefair and regenerate this area!
	LPPO3194	Extended Lea Castle	Comment	<p>Alternative Proposal: A Lea Castle “Sustainable Village”</p> <p>Proposed lea castle land extending to the edge of the wolverhampton road at the rear of the site, possibly some development on the western side of wolverly towards sion hill to link with the new development at the sion hill school.</p> <p>Advantages of this proposal: with the additional land we propose including sites in the vicinity already identified by WFDC we believe a community of 2500 houses could be created</p> <ul style="list-style-type: none"> • it would be large enough to support a 2 form entry primary school

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> it would support a village centre and cookley parish without burdening existing facilities it would be capable of sustaining a bus service provide like-work units good impact on the longevity of Wolverly CE high school.
	LPPO4196	Kidderminster Town Centre	Comment	<ul style="list-style-type: none"> Building more homes around the town centres will reduce car journeys and pollution. This will regenerate the town centres, to make them more attractive It is the centre of Kidderminster for example which requires the major investment. Spreading the home building requirement around other smaller sites will reduce the radical changes in communities across the region.
	LPPO3424	6.57	Comment	<p>Whilst I understand the need for development and understand that inevitably this land will eventually be developed as an expansion of Kidderminster, the immediate development I feel should take into account previously developed land of other areas in Kidderminster, including:</p> <p>Lea Castle hospital site and the former school sites of Sion Hill and Sladen and also the empty buildings along the canal behind Matalan. Once the empty shops in Kidderminster have been regenerated then the space above these stores could also be converted in to flats.</p> <p>I would like to propose the following concerning the general development of the eastern Kidderminster area.</p> <ul style="list-style-type: none"> That consideration is given to developing firstly all the existing brownfield

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>and/or previously developed areas within Kidderminster. The most significant being the former Sladen and Sion Hill school sites and Lea Castle Hospital site near Cookley</p> <ul style="list-style-type: none"> The former Lea Castle hospital site near Cookley, which is already earmarked for a development of 600 dwelling will put pressure on the existing facilities in Cookley namely the primary School and doctor's surgery. If this site was to be extended to include the land up to the Wolverhampton Road and then Axborough Lane at the rear of the Lea Castle site, then this would enable around 2,000 dwellings to be built. The development would then be a sustainable community and be eligible for its own school, bus service and doctor's surgery, taking the pressure off the village of Cookley. As this area is on the other side of the A449 and already well screened by woodland it would not have a significant visual impact on the village. It would then also be in the catchment area for Wolverley CE High School.
	LPPO4555	Alternative Sites	Comment	<p>There are far more obvious choices to build much needed housing than the Spennells proposed site.</p> <ul style="list-style-type: none"> Firstly the old Lea Castle grounds Also Kidderminster Town Centre, so many empty buildings – make use of this The Old Post Office building. Yes this is an ugly building but make use of it
	LPPO3318	Lea Castle - Sustainable Village	Support	<ul style="list-style-type: none"> Supports Lea Castle proposal so we don't use Green Belt.
	LPPO4428	6.57 Alternatives	Object	<p>On page 178 Justification 31.1 it states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>necessary housing and employment growth required in the plan period.” I would counter that:</p> <ul style="list-style-type: none"> There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster. <p>I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4464	Alternative sites	Comment	<p>The plan has not considered Blakedown. Section 13.21 and 13.22 recognises that parking at Kidderminster Railway station cannot be expanded easily but there is scope at Blakedown. I believe the Local Plan should be revisited to include Blakedown particularly given the recent new residential development in that area.</p> <p>The Local plan is biased. It should also cover Blakedown. It is not in accordance with the guidelines for Public Consultation and falls short of both YouGov and Rural and Town Planning Institute best practice and needs to be revisited.</p> <p>Kidderminster town centre as it is now is devastated. With the retail sector hit so hard by internet sales it seems unlikely that we can revitalise the old high street to sustainable levels. So why is nobody talking about converting the old Woolworths/Littlewoods buildings into nice new apartment blocks with plenty of accessible parking at the rear and only a short walk to both the station and weavers wharf and how this might help to stimulate the local economy in more effective ways?</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO3557	Alternatives	Comment	Any new developments should be in brownsites wherever possible.
	LPPO3943	6.57	Comment	<p>I would urge the Council to explore fully and rigorously pursue all brownfield sites and Green Belt use 'would be a last resort'.</p> <p>There are redundant, buildings in Kidderminster town centre that are ripe for conversion. Buildings are becoming available, even since the publication of the Draft Local Plan, for example the re-location of the Job Centre. Regeneration of Kidderminster town centre must be central to WFDC priorities. In the absence of any SWOT analysis, how can we assume that we can attract people to the area and fulfil the anticipated population growth? Without a commitment to and rapid development of the town centre, we run the risk of depleting our Green Belt for the purposes of unfounded WFDC aspirations.</p> <p>We may face the scenario of many empty newly built houses, sacrificed Green Belt, serious disregard for environmental issues, a nebulous plan for an Eastern Relief Road, but no plan for a road to alleviate traffic congestion from both the Wolverhampton and Stourbridge roads, areas to which the OAHN Report suggests we have greatest connection.</p>
	LPPO3091	Alternative sites	Comment	Extensions to the Lea Castle site (as in WFDC Options A and B) should be utilised; and land on the Lea Castle site which constitutes the field(s) alongside the Wolverhampton Rd and a "rear" extension of Lea Castle up to Axborough Lane should also be included. This use of land could create a "Lea Castle Village" with around 1,800-2,000 houses. This would create a wholly sustainable community which would be large enough to have a village centre, primary school, community facilities and sustain a bus service. In addition, being in the catchment area of Wolverley High School it would help to make that school sustainable.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Further some extension into land adjacent to the Wolverhampton Rd/Wolverley Rd area and Sion Hill Middle School site could also be considered and could provide another 200-300 houses. Development in this area is supported by two main A roads the A449 and A451.</p> <p>I have noted that there is no proposed development at all to the western Kidderminster estates. However a development of 100 – 200 houses as an extension to the Ferndale estate could and should be considered. This estate also has reasonable access to the A449 via Wolverley and could support such a development. In addition there are surplus Secondary School places available to serve this area as Baxter College is seriously undersubscribed.</p>
	LPPO4884	6.57 Extended Lea Castle	Comment	<p>The Lea Castle site offers a great opportunity to have a comprehensive plan for a sustainable community with every amenity available that would make a first class environment. With the Wolverley High School available, a new primary school would be warranted. The entire area should be included by immediately approaching the landowner of the remaining area, with a generous offer. The areas on the other side of the A449 would complement this development, with good access to major roads.</p>
	LPPO4500	Extended Lea Castle	Support	<p>Proposal: To FULLY develop the Lea Castle site with the construction of 1000 plus dwellings supporting its own schools, shops, businesses and other amenities which smaller developments would be incapable of. This would ameliorate the necessity of travelling to other locations so overall traffic would be reduced.</p> <p>I acknowledge and accept that, with increasing population, provision has to be made for additional housing. Thus, my recommendation would be to FULLY develop the Lea Castle site to its FULL potential of in excess of 1000 homes etc as above. Lea Castle can be accessed by TWO main routes, namely A491 and A449 in addition to secondary roads and is of sufficiently far from Stourbridge to maintain</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				substantial “green” areas for environmental and aesthetic advantage. This single development, if adopted, would more than compensate for several of the lesser projects such as Baldwin Road and South of Stourbridge Road, Hurcott.
	LPPO4501	Extended Lea Castle	Support	Proposal: To FULLY develop the Lea Castle site with the construction of 1000 plus dwellings supporting its own schools, shops, businesses and other amenities which smaller developments would be incapable of. This would ameliorate the necessity of travelling to other locations so overall traffic would be reduced. I acknowledge and accept that, with increasing population, provision has to be made for additional housing. Thus, my recommendation would be to FULLY develop the Lea Castle site to its FULL potential of in excess of 1000 homes etc as above. Lea Castle can be accessed by TWO main routes, namely A491 and A449 in addition to secondary roads and is of sufficiently far from Stourbridge to maintain substantial “green” areas for environmental and aesthetic advantage. This single development, if adopted, would more than compensate for several of the lesser projects such as Baldwin Road and South of Stourbridge Road, Hurcott.
	LPPO4789	6.57 Alternatives	Comment	Develop land at rear existing Ferndale estate and on western side of Wolverley Road to link up with the Sion Hill school site.
	LPPO4791	6.57 Alternatives	Comment	<ul style="list-style-type: none"> • Develop the Lea Castle site as a sustainable community with own Primary School so as not to impact on Cookley Village. • Positive impact on Wolverley High School’s long term viability. • Regenerate the town centre/empty sites through area • Include other sites in the North/West of Kidderminster, Bewdley and Stourport on Severn

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4792	6.57 Alternatives	Comment	<ul style="list-style-type: none"> • Develop the Lea Castle site as a sustainable community with own Primary School so as not to impact on Cookley Village . • Positive impact on Wolverley High School's long term viability. • Regenerate the town centre/empty sites through area • Include other sites in the North/West of Kidderminster, Bewdley and Stourport on Severn.
	LPPO4828	6.57 Alternatives	Comment	<p>There is an overprovision of retail within the town particularly around Worcester Street.</p> <p>There may well be potential for further development along the River Stour and canal.</p> <p>With 2500 on the housing waiting list and the sort of affordable housing for which there is the greatest need would be best provided within the town centre vicinity where amenities are greatest.</p> <p>Development should be based initially on brownfield sites as well as the Lea Castle hospital site. The quantum of these appear to be well over 4000 plots. Greater scrutiny is needed to ascertain additional redevelopment potential within the town centre where over provision of retail accommodation is leading to large numbers of empty and underutilised shops.</p> <p>The sort of affordable housing for which there is the greatest need would be best provided within the town centre vicinity where amenities are greatest.</p> <p>Should be greater emphasis on town centre redevelopment, wider dispersal across the District as set out in Option B. This would include Lea Castle and potentially sites to the west of the District and also potential expansion of Chaddesley,</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				Harvington and Blakedown which are nearer Birmingham and the Black Country.
	LPPO4796	6.57 Alternatives	Comment	Kidderminster Town Centre requires urgent attention to revive it. The removal of the outdated and outmoded shops on the left side of Worcester Street, the Woolworth building etc, would give room to emulate the successful conversion of the Wyre Forest Housing offices. This would give reasonable density, affordable housing in the middle of town. Owners/tenants would be close to shops, bus and train connections, as well as the Council Hub and new Medical Centre. We need to lobby the Government if need be, to rejuvenate the centre of town, there are many small areas of brownfield sites which are still waiting to be taken in hand. Please, for everyone's sake, ignore the blandishments of large building companies, and use local builders to make the town hum again.
	LPPO4795	6.57 Alternatives	Comment	Kidderminster Town Centre requires urgent attention to revive it. The removal of the outdated and outmoded shops on the left side of Worcester Street, the Woolworth building etc, would give room to emulate the successful conversion of the Wyre Forest Housing offices. 				outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.
	LPPO4819	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with VWWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site.</p> <p>I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO3416	Alternatives	Comment	Are sufficient brownfield sites in Wyre Forest area to accommodate the housing needs.
	LPPO4057	Alternatives	Support	Use Parson Chain/Brownfield sites first.
	LPPO3563	Alternatives	Comment	Redevelop housing in the town centre i.e. Worcester Street and Park Lane.
	LPPO4216	Town centre sites	Comment	The Council need to redevelop housing within the town centre, i.e. Worcester St and Park Lane.
	LPPO3982	Lea Castle	Support	The proposal of an alternative site is more suitable i.e. 'land on Lea Castle' area, for said developments.
	LPPO3991	Extended Lea Castle	Support	<p>I propose an alternative: Lea Castle 'Sustainable Village' using WFDC proposals for land at Lea Castle (Option A & B) extended to the Wolverhampton Road/Agborough Lane as site would:</p> <ol style="list-style-type: none"> 1. accommodate 2,000-2,500 houses

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> 2. be large enough to build/support 2 primary schools. 3. enhance Cookley parish facilities. 4. be within Wolverley CE High School catchment. 5. support its own village centre
	LPPO4008	Alternative suggestions	Comment	<p>Use:</p> <p>Lea Castle site which has road systems in place/would have less impact.</p> <p>Zortech Avenue/the former golf course plus former Parsons Chain Company before Green Belt</p>
	LPPO3104	Alternative Sites	Comment	<p>I would propose further development of the Lea Castle site which could provide 2000-2500 houses.</p> <p>This development would provide a small/medium sized community, which would be large enough to support a Primary School and a Bus Service. It would also be in the catchment area of Wolverley High School to give a positive impact on the school's long term viability.</p> <p>Whichever options are chosen the road network needs significant improvements to maintain safety and minimise congestion.</p>
	LPPO3101	6.57	Comment	<p>I believe that the OCAG-LP group proposal for a sustainable village located at Lea Castle shows far more merit than the proposal put forward by WFDC, and request that you consider this as a viable alternative.</p> <p>In addition, I would like to see serious consideration given to the creative regeneration of the town centre, to include converting some of the unused warehouses into living accommodation.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO3108	6.57	Comment	I suggest not only the use of all available brownfield sites before considering any reduction of the Green Belt, also, there are many thousands of empty or derelict houses in this country, these should be renovated & put back into use.
	LPPO4510	Paragraph 6.57	Comment	<p>Anyone driving into Kidderminster from Stourbridge, via The Rose Theatre junction, must feel instantly depressed, it looks so awful!</p> <p>There are all the depressing closed shops. They could bring life to the town centre as housing, if they were developed into apartments and flats.</p> <p>All around Kidderminster there are Brownfield sites, standing derelict and depressing.</p> <p>There should be a time limit set for development of these sites. Again, re-vitalising the town centre.</p> <p>Kidderminster could be in the for- front of town centre revival in a new and different way. With on-line shopping, town centre shops will never be the same!</p> <p>Make the residents of Kidderminster, proud of all areas of our town and the impression which it gives to visitors.</p>
	LPPO3249	Lea Castle - Sustainable Village	Support	I do support the proposal from OCAG for a Lea Castle Sustainable Village.
	LPPO4514	Lea Castle	Comment	<p>Building on that site would not interfere with the local community or cause excessive traffic in an already built up area.</p> <p>Wolverley high school is not over subscribed so would have spaces for the new community. This would also support their long term viability</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO3256	Alternatives	Comment	<p>To regenerate the Centre of Kidderminster, has any body thought of demolishing the shops from the old Woolworths downwards and building residential homes and flats to blend into the walk and shopping area.</p> <p>I believe it would add to the housing shortage and also bring life back into the centre of town by attracting new business due to there presence.</p>
	LPPO3507	Alternatives	Comment	There are lots of brown sites not used yet before using Green Belt
	LPPO3264	Lea Castle	Support	<p>I believe that a better option is for the brownfield site of Lea Castle to be developed to meet Kidderminster's needs, this makes much more sense as it is close to the 449 Wolverhampton Road and the Stourbridge road, also would eliminate the need for a very expensive bypass. The development would be large enough to serve a small primary school and feed on into the secondary school at Wolverley which has the capacity to take the children.</p> <p>With shops and doctors added it would become a desirable place for families to live, providing a very substantial income for the council at minimal cost.</p>
	LPPO4535	Alternative Sites	Comment	Wouldn't it be far better to build a totally new village within the district thereby, again, giving residents what they want - access to green space all around?
	LPPO4188	Alternatives	Comment	Look at alternative sites outside of the town on the Kidderminster side with direct access to the by pass opposite the safari park. This will at least keep the extra traffic away from passing in and out of an already busy little town.
	LPPO4515	Alternative Sites	Comment	There are large areas in Kidderminster which need redevelopment.....sion hill school site, old glades site, town centre empty units and flats above to name a few. These should be redeveloped BEFORE green sites are built on. This would prevent the town centre dying and Kidderminster being spread out thinly until it meets surrounding villages.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4620	Paragraph 6.57	Comment	I would feel the most safest route for cyclists and people wanting a footpath would be down Kendlewood Road and then on to the main Stourbridge Road and through Broadwaters and then down into Kidderminster town centre.
	LPPO4621	Paragraph 6.57	Comment	<p>Some people would be better positioned on the Lea Castle site e.g those people commuting to Wolverhampton and Stourbridge daily.</p> <p>There are many disused buildings and abandoned sites in Kidderminster that could be put to use before carving up the countryside. In particular, the Horsefair area has been in severe need of redevelopment since I first came to live in Kidderminster in 1972. If I was visiting Kidderminster for the first time from the Stourbridge side of town, I wouldn't bother stopping.</p>
	LPPO3369	6.57 Alternative sites	Object	<p>There are alternatives, Lea Castle, the Ferndale estate, the Old magistrates court and market building, standing empty for many years. Brownfield sites first please. The old telephone exchange is a good example of using existing buildings. Now housing for nice flats. More of this sort of planning would not only be better for Kidderminster generally but would put life back into the town itself.</p> <p>Let them be a role model to show that Kidderminster people and wildlife matter in these days of capitalism.</p>
	LPPO3372	Lea Castle - Sustainable Village	Comment	The Lea Castle Option would be the least disruptive all round and should be given very serious consideration. Create a large housing estate on the 'Lea Castle Hospital' site that has its own shops and services.
	LPPO4374	Alternatives	Comment	Employment could be within the South Kidderminster Enterprise Zone: 'Adjacent Ceramaspeed', 'Victoria Carpets Sports Ground' and land between Hoo Farm & Summerfield and opposite Easter Park.
	LPPO3457	Alternative Sites	Comment	My preferred option is for the council to develop all the brownfield sites and disused building around Kidderminster, including revitalising the town centre,

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				before any further plans are considered. Allowance for current negotiations with Europe should be completed before any agreement regarding proposed housing requirements are made.
	LPPO4623	Alternative Sites	Comment	<p>There are many areas in Kidderminster town centre that would benefit from homes being built within them, above shops, renovating old buildings or flattening them and re-building flats, not everyone has transport so the need to stay in the town close to the bus/train station is a necessity. There are plenty of alternatives.</p> <p>We have a very beautiful town that could be made better, by making the town centre a place people will want to live and be happy.</p>
	LPPO3578	Selba Drive	Object	<p>This land was given to the Council on completion of the Self Build on the understanding that it would not be built on but be left as open access land for people to enjoy. To now contemplate its use for building flies in the face of that understanding. It is well used by a great many people both young and old for many purposes and should remain as such.</p> <p>A wonderful outlook, on an open aspect and where so many can enjoy themselves.</p> <p>Please register my objection against this land being used for accommodation either now or in the future.</p>
Kidderminster Golf Club	LPPO3162	Crown house	Object	<ul style="list-style-type: none"> • I fail to understand why you have not considered demolishing the Crown House/bldgs in the Bull Ring to make way for a new development. • Three storey flats or shops/offices could provide income for the Council in lieu of present income. • The building is a disgrace and does deter visitors from the town centre. • The exterior is dirty and detracts from other welcome developments.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4198	Paragraph 6.57	Comment	Please look at alternative sites i.e. town centre and regenerate a dying and sad town centre
	LPPO4239	Option B	Comment	The WFDC proposals at the Leas Castle site would be more suitable to incorporate community, facilities to sustain a 'village community' and, I believe that the site does not hold 'Green Belt' status.
	LPPO4825	Alternatives	Object	Development of all the brownfield sites should take place before using any other land. Whilst the council have identified some brownfield sites, we take the view that there are more which should and could be considered. There is a large disused property behind Matalan (Park Lane), there is an old building, (inhabited by pigeons) opposite Aldi on Green Street and there are many empty town centre shops. The old Woolworths for example could be turned into an indoor market with small shop units on the ground floor and flats above.
	LPPO3477	Extended Lea Castle	Support	Facilities of gas, electric and sewage, plus a foot print of a previously existing school. Would extend the long term viability of Wolverley CH High School. <ol style="list-style-type: none"> 1. Contained on one site. 2. Less disruption to the Green Belt. 3. Lower costs.
	LPPO4199	6.57 Extended Lea Castle	Support	We support the proposal for Lea Castle sustainable village which would allow for a community development, complete with primary school and would be capable of sustaining a bus service.
	LPPO4187	Alternatives	Comment	We are strongly in favour of small scale sympathetic housing development at the following sites; <ol style="list-style-type: none"> 1. The old workhouse at 64 High Street, Bewdley 2. The existing Fire Station and surrounding land off the Load street car park

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				in Bewdley. We understand both these sites are included in the extant local plan so cannot understand why they are not included in this revised draft plan.
	LPPO5113	Alternatives	Comment	<p>The Council are also suggesting the building of a multiplex cinema (again been proposed since they knocked down the original cinema) and yet more shops and restaurants in Bromsgrove Street, but they need a developer for this. Why not use the land for building low cost housing within walking distance of the town and station? That would regenerate the area more than a cinema.</p> <p>Greater vision is needed by the Council. In the report they talk about people wanting to come to Kidderminster to live. Have they actually walked round Kidderminster town centre lately? There is a vast amount of empty factories, shops, etc. that could be knocked down and used for houses. I have been here 36 years and many of the factories that were empty and derelict when we came here are still empty and derelict. Before building on Green Fields the council should look to compulsory purchase some of these premises to rebuild as living accommodation.</p>
	LPPO5111	Alternatives	Comment	Serious consideration should be made in redevelopment of all Brownfield areas within Wyre Forest especially Kidderminster, where we have a lot of smaller sites within residential areas which are standing empty(some for many years) and not being used. Some Brownfield areas such as Lea Castle (again empty for years) are a larger area which could sustain a community in its self If these areas were redeveloped at least the public could see the town is being regenerated, like the Silverfields ongoing project. Although this has slowed down considerably of late....are houses actually being sold? is there the demand for the properties being built there?

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				There may not be the land area through Brownfield sites to accommodate the number of dwellings required overall but would be less impact on the environment and nature by using these previously used sites instead of Green Belt!
	LPPO5010	6.57	Comment	<p>Kidderminster town is run down, untidy, and lacks investment. The only upside to the town is the location of Green Belt countryside that surrounds it.</p> <p>The town has numerous locations that require redevelopment that would create lots of housing opportunities which would regenerate the centre. This would surely be the better option for the town and it's people and would show that the Council are committed to building a better Kidderminster.</p>
	LPPO5119	Alternatives	Comment	There a number of old unused buildings in and around the town which should be redeveloped and provide an infrastructure to support the houses before further houses are built.
	LPPO5126	Alternatives	Comment	<p>Sites which are brownfield and not part of the town's natural surroundings should be built on first. The Lea Castle area will not affect Kidderminster residents the way the Spennells proposals will.</p> <p>There is also a large number of vacant properties, residential and commercial, around Kidderminster and the rest of the district.</p>
	LPPO5120	Alternatives	Support	In and around the town centre there are disused building and unoccupied plots which if not built on must be subject to compulsory order in the first instance. The Crown House typifies our very poor use.
	LPPO5116	6.57	Comment	Please reconsider with thoughts of a realist rather than an idealist. Many people commuting to Birmingham and Worcester desire to live in the country and you should work on a plan to build more villages on some green field sites outside Kidderminster to give people this option. This would disperse the concentration of

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>people entering an already grid locked system.</p> <p>Younger people prefer to live nearer town centres so housing should be provided close to or in the town centre where there is a wealth of entertainment and recreation and this could help revitalise the area. Young people do not tend to want to live on housing estates far away from all the amenities which is what you suggest in the easier option A.</p> <p>The present road between Black Bridge and Hagley should become a major dual carriageway with housing near it to rid the Worcester Road Island of its bottleneck.</p>
	LPPO4936	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p> <p>I strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4931	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.
	LPPO5096	6.57 Alternatives	Comment	<p>If more housing is needed in Wyre Forest District (there is a big question mark over that presumption), then wouldn't it be far better to build a totally new village within the district thereby, again, giving residents what they want - access to green space all around?</p> <p>Just one other point, why is there no proposed development in Wolverley?</p>
	LPPO5142	Alternatives	Comment	I believe there are several more suitable sites available, Lea Castle, Sion Hill old school, Forest Glades area come immediately to mind.
	LPPO5151	Alternatives	Comment	With regard to housing development Lea Castle was identified, and we would hope this would be confined to housing, but we cannot recall mention of the use of Sladden or Sion Hill Schools as being potential development sites. There is now a substantial vacant plot in Park Lane previously occupied by timber merchants and this appeared nowhere in the proposal.
	LPPO5140	Alternatives	Comment	A more appropriate site for development would be the derelict use Lea Castle Site which could provide a functioning village community. There are also sites within Kidderminster which could be developed such as Worcester Street, Crown House and the Old Leisure Centre area.
	LPPO5139	Alternatives	Support	<p>Until all of the brownfield sites, of which there are many, have be used and/or considered, no building on Green Belt land should go ahead. The Green Belt is for all to enjoy for many generations to come and if it is constantly used for building projects there will be none left for future generations.</p> <p>All councils should stop looking at cost of everything and start considering the</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>value of the Green Belt for everyone to enjoy.</p> <p>Look more closely at the available brownfield sites and we are sure you will find enough for the developments that are planned. This will take more time but the easy option is not always the best</p>
	LPPO5131	Alternatives	Comment	My proposal would be for Lea Castle site to be developed with the Sion Hill School being included in the development.
	LPPO4944	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p> <p>I strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.</p>
	LPPO4476	Extended Lea Castle	Comment	<ol style="list-style-type: none"> 1. This site is large enough to build beyond the existing foot print of the old hospital, therefore making it a viable proposition for a large site that could include a variety of houses, shops a school and a doctors surgery, it could also have its own bus route. 2. The area is also isolated by tree's and wouldn't be as visible 3. The area already has all the utilities 4. The community at a Lea Castle site (Lea Castle Village) would be in the catchment area for Wolverley School, which secure the Schools future. 5. We feel such a large development would promote its own vibrant, sustainable community. 6. The Spennell's site was developed in the 70's and has proven to provide

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				housing and a community feel, could a similar development to this not be considered for Lea Castle?
	LPPO4545	6.57	Comment	<p>I believe it would be more beneficial to make use of the brownfield sites to create more homes and to re-generate the town itself, there are several buildings which would be better utilised in this way rather than left to rot and make the town look like an eyesore. My suggestions are:</p> <ol style="list-style-type: none"> 1. The land which used to be the Glades Leisure Centre, I know there is consultation for it to become a multiplex Cinema which in an ideal world I think would be a brilliant idea, however, realistically speaking young people, families etc. do not attend cinemas as it is far too costly and with modern technology such as Sky, Virgin, Amazon firesticks etc, they can watch all they want by using these methods of viewing at a lot less cost. This is why I think this land would be of more benefit by using it for housing. 2. All the empty shops in Worcester Steet, i.e. the old Woolworths, Littlewoods stores and the large amount of charity shops. 3. The Old Magistrates Court. 4. The disused timber yard and warehousing behind Matalan, this would be perfect for town houses or Apartments for canalside living similar to areas in Birmingham which have been re-generated with fantastic restaurants etc. 5. Sion Hill School. 6. Sladen School. 7. The Old Lea Castle Hospital would be ideal as it has two major roads either side of it which would be able to handle the extra volume of traffic no problem, I am confident of this as I travel along these roads everyday to work and there is nowhere near as much traffic on these roads as there is

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>around the Spennells/Aggborough/Offmore areas. The plan to use Lea Castle would also mean using less Green Belt Land than the Spennells proposition.</p> <p>I have lived in Kidderminster for 34 years and have watched the decline of the town over a number of these years I desperately would love the council to carry on rejuvenating the town itself and make it a pleasurable place to visit with more restaurants, maybe an entertainment venue for concerts, shows etc rather than taking away our valuable Green Belt land which once gone will be gone forever.</p>
	LPPO4305	6.57 Alternatives	Comment	<p>Kidderminster Town Centre has now shifted towards Weavers Wharf Shopping Centre and therefore I cannot see that Worcester Street will ever become a vibrant shopping street again as peoples' shopping habits have changed dramatically over the last decade. All the derelict shops could be changed to town housing, flats and apartments, making it ideal for affordable housing where people will be in the heart of the town which will help local businesses enormously. This would then alleviate the "ghost" town part of Kidderminster and link up with the proposed building on the old Glades Sports Centre and the old Magistrates Court complex.</p> <p>Where the British Heart Foundation shop burnt down on New Road, Kidderminster would also be ideal for flats.</p>
	LPPO3948	6.57	Comment	<p>Rather than building on land resulting in a loss of community leisure space and affecting an SSSI, why not build flats and apartments above the empty shops in the town centre or build at the rear of the Ferndale estate?</p>
	LPPO4549	6.57	Comment	<p>Is the land by Tesco in Stourport to be developed at last. Is the land on Ferndale where the Eagles Nest pub used to stand to be developed at last? How many more houses are there to be built on the Silverwoods site? What about the old school sites such as Sladen in Hurcott Road or the site on Sion Hill? There are several</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				other sites which look in need of tidying up and developing where housing would enhance the area.
	LPPO4307	6.57 Alternatives	Comment	<p>I would love to see a regeneration programme that really lifts the spirits of the people of Kidderminster. Can we have proposals that would enhance the Wyre Forest and make it an area we would be proud to live in?</p> <p>In the light of the Kidderminster/Stourport link road, my vision would include:</p> <ul style="list-style-type: none"> • re-purposing empty units and building new units in Stourport Road area to provide retail (like Primark) and companies (like OGL). • look at what attracts people to the Merry Hill and include those shops in this area to encourage people to stay and shop local. • relocate all the warehouse companies from New Road to the Stourport Road area. • build all the affordable housing you require on New Road. Young people will be most attracted to this area because of its close proximity to the Railway Station and Town Centre. • provide affordable housing very near the town centre and railway station. • regenerate current town centre to provide excellent retail and attract shops. • more businesses with highly paid jobs • bungalows with beautiful views lots of generous sized rooms and a nice sized plot for well off elderly people to encourage old people to move from their family homes • new spacious four bedroomed houses with beautiful views, three/four reception rooms, quite large garden, definately not open plan and overlooked. • relieve congestion, making journeys to work easier. • regenerate parks that are free for people to visit.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<ul style="list-style-type: none"> • help schools regenerate and develop • help hospitals provide the best care for all local people. <p>The following makes me feel sad:</p> <ul style="list-style-type: none"> • only retail, tourism and leisure jobs being provided. • 50% of the extra houses on the Green Belt land on the edges of town being for affordable housing that are a stepping stone to help people get on the housing ladder and not forever homes, beautiful houses/bungalows. • a new road near housing that will create noise and pollution. • turning the top of Spennells from a desirable, quiet, place to live, on the edge of town to a dreadful place to live. • taking away habitat for wildlife. • taking away free green space for Spennells' people to visit on foot. <p>Please consider creating:</p> <ul style="list-style-type: none"> • Housing within close proximity of the railway station (easy walking distance). • Housing within close proximity of the town centre (easy walking distance). <p>With this in mind could the following be considered:</p> <p>New Road is full of shops that could be relocated (perhaps some to the vacant shops within the town centre and vacant units on the Stourport Road) and housing built on both sides of the road. This would provide housing that is near the town centre, railway station and canal.</p> <p>I also think lots of care should be taken to provide quality, free, places to go.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				Sanders Park in Bromsgrove is much nicer than any park in Kidderminster and could be used as a model for Spennells Park.
	LPPO3950	Lea Castle	Support	Concentrate development in one area, ie Lea Castle with a shop/school so that it is independent. Cookley and Wolverley village schools are already under stress and this site has easier road access than most.
	LPPO3211	Extended Lea Castle	Support	There are many derelict and empty buildings in Kidderminster town centre, and the Council should use its power and compulsory purchase orders to acquire these and make good living provisions for the elderly and young (flat type apartments) and rejuvenate the existing town centre. Use the Lion Park for 100% housing, and move the proposed cinema 'leisure complex' to another area of the town centre, rather than separating the town even further. Lea Castle site needs to be developed in its entirety and made into an urban village which would accommodate all housing needs. Any vacant houses in the area need to be bought back to use. There are currently very many vacant and 'for sale' properties in Kidderminster, and with the suggestions as above, including the review of housing numbers, there is plenty of available land for development and I cannot see any need for building or removing the Green Belt in Option A for at least 10 – 15 years, so it is the Councils duty to protect this for as long as possible.
	LPPO4398	Alternative Sites	Comment	Use brownfield sites instead of Green Belt land
	LPPO4502	6.57 Alternative suggestions	Comment	I suggest use of Brownfield sites/empty buildings in town first to help the smaller numbers of new residents integrate more easily.
	LPPO3973	Pra 6.57	Comment	I feel that if extra homes really do need to be built the Lea Castle site should be developed as it is currently unused. Also Crown House could be re-developed into flats instead of being the eye-sore it is now, and the old Wyre Forest Glades site is not showing much signs of anyone being interested in developing it, so this could also be used for flats. There is also the land previously occupied by a builder's

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				merchants at the back of Matalan.
	LPPO4195	Extended Lea Castle	Comment	<p>Extending the current Lea Castle proposed development site could provide a ‘village’ style community with shops and a primary school.</p> <p>This site would be much less of an impact on agricultural land</p> <p>It would be within catchment area for Wolverley High School and help to sustain the long term viability of that school.</p> <p>It would not require major new road building schemes.</p>
	LPPO4578	6.57	Comment	<ul style="list-style-type: none"> Develop the Lea Castle site with additional land proposed which we believe would sustain a community of between 2000 and 2500 house, which would support a 2 form entry Primary School and would not impact on Cookley Village Centre. It would be within the catchment area of Wolverley CE High School and would positively impact on its long term viability. There are many empty sites around the Kidderminster area, i.e. Sladen School site, Sion Hill School site, the Horsefair, and land in Park Lane leading to Matalan to mention a few which could be used for housing. Also the town centre needs regenerating — why not use the Crown House for flats, the top of shops in Worcester Street as flats and also use the Glades land and surrounding land for housing. Kidderminster does not need a Multi complex cinema and more shops. The cinemas in the surrounding areas are empty because of the cost of tickets. <p>We believe Wyre Forest District Council are wrong not to propose any development on the North/West of Kidderminster, Bewdley or Stourport on Severn as we feel there are areas which could be developed within these</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				catchment areas.
	LPPO4579	6.57	Comment	<ul style="list-style-type: none"> Develop the Lea Castle site with additional land proposed which we believe would sustain a community of between 2000 and 2500 house, which would support a 2 form entry Primary School and would not impact on Cookley Village Centre. It would be within the catchment area of Wolverley CE High School and would positively impact on its long term viability. There are many empty sites around the Kidderminster area, i.e. Sladen School site, Sion Hill School site, the Horsefair, and land in Park Lane leading to Matalan to mention a few which could be used for housing. Also the town centre needs regenerating — why not use the Crown House for flats, the top of shops in Worcester Street as flats and also use the Glades land and surrounding land for housing. Kidderminster does not need a Multi complex cinema and more shops. 	LPPO3572	Alternatives	Comment	Question: Why has it not been possible to develop the brownfield site – formerly Parson’s Chain. Reilloc Chain was developed almost immediately after closure?
	LPPO3987	Extended Lea Castle	Support	My proposal is to extent the Lea Castle site WFR/WC/15/16/32 to include all the area between Axborough Lane, Stourbridge Road, Park Gate Road and the Wolverhampton Road. This would form a liveable village community, which should include shops, amenity for children, a Primary School and possibly a surgery and bus service. In making a self contained community its impact on Cookley would be greatly reduced and it would be in close proximity to Wolverley CE High School,

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				enhancing its long term future.
	LPPO3999	Alternative suggestions	Comment	<ul style="list-style-type: none"> The inclusion of land not previously in the local plan would distribute development. Development of the readily accessible Lea Castle site by combining options A plus B/Wolverhampton Road/Axborough Lane to create a community with schools/bus service would have less environmental impact and minimise loss of Green Belt. The Hurcott ADR site has good road access, is isolated from other Greenfield reducing cultivation capacity and would have less environmental impact developers' profit margins are not a factor
	LPPO4002	Extended Lea Castle	Support	Develop the Lea Castle as a small 'village' and Sion Hill school sites both currently not used
	LPPO4005	Extended Lea Castle	Support	Lea Castle is a better option commercially with all necessary utilities remaining from its previous use as a hospital. The land area is trust with two point access to free flowing roads.
	LPPO4169	Alternatives	Comment	Alternative sites for development: Area of land next to All Saints Church Wribbenhall, The land area off the B4195 Bewdley to Stourport Road opposite Cooks nursery, The field on the left coming from the roundabout into Bewdley. The area of land between New Road and the old Heath Hotel. The land opposite the Bewdley Leisure Centre is ideal the field between Blackstone Car Park and Leisure Centre. Park Lane in Kidderminster, conversion of redundant buildings at the bottom of Park Lane near to Matalan and the old Jewson Builders supply yard the old Riverboat buildings in Blackwell Street all need to be considered.
	LPPO4197	Paragraph 6.57	Comment	As stated before there are enough Brownfield sites to build a sufficient number of houses, before looking at Greenfield sites.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO3439	Alternatives	Object	I cannot see why the council feels the need to develop the outskirts of Kidderminster when there is plenty of available space already vacant within the town centre. There are several empty premises that could be turned in to flats and where the infrastructure would not need to be extended.
	LPPO3446	Extended Lea Castle	Support	<p>The former Lea Castle Hospital brownfield site should be utilised first and foremost as the site already has good access and existing utility supplies.</p> <p>Incorporate a two-form school, (2,000-2,500) houses, also a bus service and would support Cookley Parish.</p>
	LPPO4058	Alternative suggestions	Comment	<p>An element of building could be considered in all four corners of Wolverhampton/Wolverley and Park Gate Roads. We realise that this farmland also produces food year in year but the fields are surrounded by pollution. We also concur with the advantages of the OCAG's proposals.</p> <p>The fields at the rear of Ferndale is farmed but it is not extending building towards the West Midlands and should sadly be considered before any development to the east of Kidderminster.</p> <p>The Horsefair: we are unable to understand why the shops/houses in Blackwell Street, are still allowed to be occupied. A compulsory purchase order should become effective and the buildings demolished and the road extensively widened. 'The Peacock' is unworthy of 'listed' status and should be reviewed – resolution of daily congestion requires priority. It is an eyesore for everyone who passed thorough.</p> <p>Could a compulsory purchase order on Crown House be a consideration? An apartment block, with underground and/or ground and first floor security parking,</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>could replace this neglected building.</p> <p>Are the derelict factory buildings all taking part in the review?</p> <p>If there must be building on the Offmore site – maybe Munro Close and Rosetti Close could become a crescent with the building of complex bungalows only – bus stop and show near by.</p> <p>Future building of shops and industrial units must consider energy efficiency.</p> <p>Community care in all its aspects through to hospitals. A major consideration to be taken on board.</p>
	LPPO3473	Selba Drive	Object	<p>When the properties in Selba Drive were built this piece of land was left as is was deemed unsuitable due to difficult drainage . The land was gifted to the Council on condition they cleared it and maintained it for the use of the children on Habberley Estate to play on, also for other recreational pursuits including picnics, exercising dogs, ball games.</p> <p>This area is safe, away from traffic and well used by children. Dog walkers also use this space on a regular basis. It is used by lots of people from the estate for leisure activities.</p> <p>Kidderminster is beginning to become a concrete jungle! We have noted that expensive houses are springing up all over the place, and now there appears to be a panic to build more community builds. May I suggest you use the land of the now derelict Lea Castle Hospital, which would make a lovely new estate for this purpose, and meet the quantity demanded of the government, and leave Selba Drive and others in the area alone. Lea Castle has the capacity to build 800 houses or more, and as it is land that has been built on, more suitable than squeezing in a</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				few houses here and there.
	LPPO3978	Extended Lea Castle	Object	I would suggest as an alternative to building around Offmore & Comberton, a bigger site at Lea Castle. The Plan currently proposes using some of this land in both Option A and B but I would suggest combining the land under both options and then extending the site to include land up to the Wolverhampton Road and at the rear of Lea Castle up to Axborough Lane. There might also be a possibility of further development on the western side of Wolverley Road towards Sion Hill, which would link with development at the Sion Hill School site. With this proposed land, including the sites in that vicinity already included in the Plan, a sustainable community of around 2,000-2,500 houses could be created. This would be large enough to support a 2 form entry primary school within the catchment of Wolverley High School (thus positively impacting on the school's long term viability) and a sustainable bus service. It would also support a 'village' centre within the Cookley Parish without putting a burden on that community and would potentially be able to support live-work units.
	LPPO4804	Extended Lea Castle	Support	The land around Lea Castle could be more utilised to fill the complete area bordered by the A449, B4189, A451 and Axborough Lane. The field to the west and adjacent to the A449 could also be considered with suitable separation from local housing. The development could form a new village.
	LPPO4805	Alternatives	Support	The retail land in the town centre (the Forest Glades site, old indoor market, old court house, old Woolworth building etc) should be developed in its entirety for affordable housing and accommodation for the elderly, to help regenerate the centre and remove the dereliction.
	LPPO4808	Alternatives	Comment	The villages within Wyre Forest could be expanded to accept some of the new developments and relieve some of the pressure to use the Green Belt around the towns. This could help revitalise the villages and help their retail premises, age balance and school viability.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4801	Extended Lea Castle	Support	<p>There is a perfectly viable alternative at the Lea Castle site.</p> <p>I fully support a sustainable village at Lea Castle as I see it as a solution to all the problems development brings with the necessary infrastructure that is required to go with it.</p> <p>As I understand it you are responsible for maintaining protection of the environment and for the selection of the planning sites for the 5,400 homes in the Wyre Forest that are demanded by the government. This can surely be achieved by development of Lea Castle site proposed as an alternative by the OCAG.LP.</p> <p>The Lea Castle site is also an opportunity to preserve the existing wildlife habitats and sites of scientific interest around Offmore and Baldwin Road.</p>
	LPPO5080	Alternatives	Comment	<p>In the town centre there are so many large premises empty - the eyesore which is Crown House, and derelict Worcester street etc. With imagination and planning the town could be revitalised and used productively. The old courts, the Brintons building by the Town Hall for example are crying out for redevelopment and a second wind of growth. With so much more online business it is clear that not only in Kidderminster but nationwide, retail business will never be the same as it was 30 years ago. Scant recognition of these observations is made in the plan. Retail businesses should be downsized to reflect future demand, and the historical heritage buildings should be sympathetically developed, and there should be living accommodation built centrally based. I'm confident that if flats/small affordable housing was to be built on central town sites it would attract young professionals and entrepreneurs. The town centre would become vibrant again, with more leisure, restaurants, and tourist attractions centrally based.</p>
	LPPO5011	6.57	Comment	<p>Rather than encroach upon our countryside we urge the council to develop and regenerate town centre sites including unused shop premises which should be</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				considered as a priority in all three Wyre Forest towns. There is the land adjacent to Tesco Stourport that has already been passed for housing and the land where Wyre Forest Golf was. It has also been brought to our attention that there is some land (No mans land and not owned by anyone) between Kidderminster and Wolverley B4190.
	LPPO5066	Lea Castle	Comment	I understand housing has to be built for the future, but would it not be possible to use somewhere like Lea Castle Hospital grounds and use some of the facilities already there, for instance existing roads existing drainage and good access from both the Wolverhampton and Stourbridge roads
	LPPO5067	6.57 Alternatives	Comment	<p>1. The Council need to build on brownfield sites and not greenfield, within the Kidderminster area.</p> <p>2. The Town Centre has developmental potential, Bromsgrove Street, Worcester Street, knock down the old Post Office building and build small apartment block, develop the old Sladen site and Sion Hill sites. Consider building in Blakedown on any brownfield sites.</p>
	LPPO5083	6.57 Alternatives	Comment	<p>The aim surely should be to create better existing neighbourhoods of affordable housing for mixed income families and newcomers and not just to boost housing numbers ad hoc. Surely it would be better for Kidderminster to regenerate areas around the district where public transport systems are already established reducing car journeys for example, local businesses can prosper and new businesses see a value in setting up in the area.</p> <p>Derelict buildings such as those on Park Street have remained an eyesore for all the years we have lived in Kidderminster (27). Surely some form of housing development could be considered to improve this area of town and other brownfield/derelict sites in the district to help say first time buyers and perhaps also the towns hard-pressed businesses.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO5009	6.57 Alternatives	Comment	Kidderminster Town Centre is dead, it needs regeneration and would be more suited to future generations consequently. There are a number of large buildings, such as Woolworths, which have sat empty for far too many years, that could be refurbished into plush apartments - surely this would be a more satisfactory solution? I would whole heartedly support the regeneration option.
	LPPO4894	6.57 Alternatives	Comment	<p>There are a number of buildings in Kidderminster town centre, some of them previously used as part of the carpet industry, which would lend themselves to conversion to apartments suiting both the young and the old. The Glades site should only have planning permission for residential use. Kidderminster town centre is crying out for improvement and regeneration if new businesses and economically active people are to be attracted to the area. The council should be giving incentives to developers prepared to improve and provide housing in the heart of the district, rather than the easy option of allowing Green Belt sites to be developed.</p> <p>There should also be a concentration on the development of the brownfield sites that still exist, along with the sites already granted planning permission that haven't been developed as yet, and also more effort to bring the 1,404 vacant dwellings identified in the Objective Assessment of Housing Need back into use.</p> <p>Core sites in Kidderminster proposed for allocation. The potential for 510 dwellings are identified in this list, along with some developments for mixed use, ie. housing and employment. So the potential is for far more than this figure. Also, 24.36 hectares are allocated for employment use, 15.51 hectares for housing. If the primary need in the area is for housing why not reallocate some of the land to housing rather than employment, given there are so many industrial units vacant and able to be used for industrial or office space.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
	LPPO4902	6.57 Alternatives	Comment	<p>Areas which should be utilised first are as follows:-</p> <p>Lea Castle site, ideal for large housing estate with good existing road access</p> <ul style="list-style-type: none"> • Sion Hill School site, an absolute eyesore and magnet for criminal behaviour at present, ripe for development. Easy access to junior school, on bus route and within walking distance of High School. • Sladen School site, ideal for low cost housing for those without own transport as within walking distance of town centre and has local convenience shops even nearer. • Old Market building should be utilised in some way, either converted or demolished and built on. • Old Leisure Centre site should not be a cinema, should again be low cost housing for those without own transport as actually in town and close to Health Centre. If a cinema is desired by the Council why not in one of the empty shops in the town centre. Might hopefully bring some life to the town. • Old cricket ground at bottom of Chester Road South, again has good road access. • Old warehouse adjacent to Matalan could be turned into flats with car park on ground floor for residents. <p>All these sites and others, should be utilised first before even considering ravaging our Green Belt.</p>
	LPPO4903	6.57 Alternatives	Comment	<p>Every attempt should be made to build on the known Brownfield sites, Lea castle; Sladen School, Sion Hill thus spreading the impact on traffic density. There are many more available sites in Kidderminster and surrounding areas that should be developed first.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>There are large areas next to the New Leisure Centre that are lying vacant at the moment.</p> <p>The ex leisure centre site could be built on with affordable housing instead of a cinema, put that on the site of the burnt down building next to Iceland and near the Library. This would bring a bit of life back into the centre of the town, rather than on the fringes as the leisure centre site is.</p> <p>More effort needs to be put into reviving the town centre instead of unneeded housing. The local population has remained fairly static, where is the need for 600 houses? Unless we are to become an over spill town for Birmingham!!</p>
	LPPO5104	Alternatives	Comment	<p>The resultant requirement of around 3600 dwellings should be built on the identified brownfield sites in the Plan; on the previously developed land in the Green Belt; and on the whole of the Lea Castle site.</p> <p>Expand the scope of the Plan to include Blakedown, Wolverley and Chaddesley Corbett.</p>
	LPPO4841	6.57 Alternatives	Comment	<p>The 'either/or' question is constraining without reason. It strikes me that development at the Lea Castle Hospital and adjoining areas could answer pressures on the infrastructure. This would include parts of Options A and B and the red core with what appears to be relatively easy access to major roads. I would be concerned about the intensity of this concentrated development without detailed analysis of its impact on the environment, infrastructure and traffic congestion. Again I am not convinced that there is a need for the extent of this development within the Wyre Forest District.</p>
	LPPO5114	6.57	Comment	<p>Please reconsider with thoughts of a realist rather than an idealist. Many people commuting to Birmingham and Worcester desire to live in the country and you should work on a plan to build more villages on some green field sites outside</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				<p>Kidderminster to give people this option. This would disperse the concentration of people entering an already grid locked system.</p> <p>Younger people prefer to live nearer town centres so housing should be provided close to or in the town centre where there is a wealth of entertainment and recreation and this could help revitalise the area. Young people do not tend to want to live on housing estates far away from all the amenities which is what you suggest in the easier option A.</p>
	LPPO4925	6.57 Alternatives	Comment	<p>Maximise the use of brownfield land in Wyre Forest. There are so many unused buildings in the area, including Kidderminster town centre, which is totally under used and feels almost derelict. The development of the old Glades site should be used for housing rather than a cinema. If the empty town centre sites were developed for housing then this may give renewed life to the centre and provide more people who would rely on the central and local businesses. New houses will be unaffordable for younger people and young families. Not all home-owners require houses and back gardens. Flats near to facilities can be a great starter home and a stepping stone onto the property ladder for younger residents. They can also provide homes for the older generation who are unable to use their own transport to travel into the town centre. The Council should also concentrate on developing on Lea Castle and making it a viable village. This can also provide housing and a community in one area without having to develop on greenfield sites and take away good farming land.</p>
	LPPO4940	6.57 Alternatives	Comment	<p>There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				I strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.
	LPPO5145	Alternatives	Comment	Referred to the Horsefair and building 300 new homes - suggested this as a more appropriate site, especially with the regeneration of Kidderminster Town and its railway station ideal for commuting.
	LPPO4848	6.57 Alternatives	Comment	Has Kidderminster Town Centre been properly considered? Town centres all over the country are dying because of changes in the way we live and purchase goods. In any case Kidderminster is well served with two modern shopping areas, Weavers Wharf and Carpet Trades, leaving much of the original town centre a shabby run down area, comprising charity shops, pop-up shops and the ubiquitous mobile phone stores, which no amount of dressing up will improve. Why not creatively re-design the town centre and rebuild it as an innovative 21st century example of a vibrant and exciting urban living area. This will be a more expensive option than building houses on fields, but if developed properly would be held up as an example throughout the UK, putting Kidderminster well and truly on the map.
	LPPO4886	6.57 Alternatives	Comment	<p>31.1 states “there is insufficient sustainably located readily available brownfield or non-Green Belt land to accommodate the necessary housing and employment growth required in the plan period.” I would counter that:</p> <ul style="list-style-type: none"> There are brownfield sites that are not even on the plan, for example Brown Westhead Park in Wolverley (former army hospital with WWII buildings all over it, partially owned by the Council and with limited economic benefit to the area; and the site of the old quarry on the opposite side of the B4189 to the above site. There is brownfield land still not built on behind The Range at Crossley Park in Kidderminster.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO PARAGRAPH 6.57

Company / Organisation	ID	Part of Document	Type of Response-	Summary of Response
				I also strongly suggest that you consider other brownfield sites such those I have outlined in Wolverley to share the housing quota which is due to Wolverley and Cookley Parish.
	LPPO4799	6.57 Extended Lea Castle	Comment	There is a more viable option available at the former Lea Castle Hospital site which does form part of the plan review but also lends itself to even more capacity by extending that site to include land bordering the A449 Wolverhampton Road and Axborough Lane. This option would create a sustainable village community whilst at the same time provide the capacity needed for future housing quotas. It is an existing brownfield site with very large potential and has capacity to include local shop/public house, GP surgery, school and the like. Giving it a sustainable village model that will not have a great impact upon the surrounding or immediate locality
	LPPO5133	Alternatives	Comment	Reduce the number of empty properties by charging their owners extra council tax giving them a deadline date for when charging to start. Suggest buildings are adapted to living in, or indoor market.
	LPPO4910	6.57 Extended Lea Castle	Comment	Support Lea Castle site for the following reasons: <ul style="list-style-type: none"> • A sustainable community could inc 2,000-2,500 (include affordable) houses with schools, shops and community/social support • Easy direct access to major roads yo minimise congestion.
	LPPO5130	6.57	Comment	A 'ready made' site at Lea Castle – so use it.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
	LPP0695	Policy 7	Comment	<u>Policy 7 and 31</u> — We agree with the notion that the Green Belt has not been reviewed, in WFDC since the 1970s and note WFDC acknowledges that previously developed land alone will not be sufficient to meet the growth requirements of the district. This policy draft states that the Spatial Strategy seeks to minimise impact on the Green Belt. Minimal impact would be better achieved as discussed above, by removing a larger volume of smaller sites across the district rather than a smaller number of large sites which will have greater impact. This would better contain development and prevent urban sprawl in larger volumes in more limited areas which is in conflict with the requirements of the Green Belt as outlined in the NPPF	Comments are noted. However, we have to ensure the allocation of sites are in sustainable locations. The allocation of large extension sites enables services to be provided on site if sufficient local services are not available nearby. The Sustainability Appraisal sets out the alternative options that have been considered.
Homes England	LPP0804	Policy 7	Comment	Policy proposes amendments to the Green Belt boundaries to enable sustainable urban extensions around Kidderminster. The HCA supports the proposals to removal of the Lea Castle Hospital site from the Green Belt. Whilst this is a previously developed site within the Green Belt, it is considered to be logical to amend the boundary at this location, removing the site from the Green Belt to enable its re-development.	Support of Lea Castle site redevelopment is noted.
Kidderminster Harriers Football Club	LPP0935	Policy 7	Comment	<ul style="list-style-type: none"> First paragraph - See comments (in relation to Policy 25) and the incompatibility with NPPF. Amend paragraph 3: In accordance with paragraph 8283 of the National Planning Policy Framework. (NPPF Para 82 refers to the creation of new Green Belt) 	Agree with suggested changes to paragraph 3. The Kidderminster Harriers proposed relocation site will need further consideration as the emerging Local Plan progresses.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<ul style="list-style-type: none"> To provide clarity to the plan - amend paragraph 3 to make clear that the review of the Green Belt is to exclude land from it, rather than expand Green Belt in these locations. To provide clarity to the plan and support for the new sports facility in this location. Add to bullet 2: Minor changes to the Green Belt boundary will also be made at southern Kidderminster to allow the development of a centre of sporting excellence including sports facilities and related development, Stourport on Severn and Bewdley to enable local development needs to be met most sustainably and economically. 	
Worcestershire Wildlife Trust	LPP01054	Policy 7	Comment	This policy seems to offer an appropriate way forward though we reiterate our position that the Green Belt release to the east of Kidderminster should be more limited than that proposed by Option A. In this regard we note that Option B has a reduced impact on Green Belt (by area) which is welcome and would be broadly in line with the Government's stated position on Green Belt release.	Comments are noted.
National Farmers Union West Midlands Region	LPP01118	Policy 7	Comment	We welcome the support for affordable housing on rural exception sites in the Green Belt. This policy should also make a specific reference to the need for agricultural and diversified businesses to develop within the Green Belt. Even if the support for businesses in these areas is implied elsewhere within	Support and comments are noted. The NPPF para 89 already provides an exception in Green Belt Policy for the construction of agricultural buildings as follows:

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				the document, it ought to be more stridently expressed within this section of the plan. We would like to see a can do attitude to development that recognises that farming businesses have an essential role in maintaining the local landscape by grazing livestock, maintaining hedgerows and participating in agri-environment schemes.	"A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are: Buildings for agricultural and forestry."
Wolverley & Cookley Parish Council	LPP01152	Policy 7 - ADRs	Comment	The three Areas of Development Restraint (ADRs) in the Wolverley & Cookley Parish (Land off Hayes Road, Wolverley, Land off Lowe Lane, Wolverley and Land off Kimberlee Avenue, Cookley) should be retained and safeguarded and not be used for Housing Development.	Comments are noted.
Taylor Wimpey West Midlands	LPP01498	Policy 7	Comment	Releasing land from the Green Belt to deliver sustainable growth, are endorsed Kidderminster most sustainable location for growth is enveloped by Green Belt. Brownfield sites are diminishing or difficult to bring forward for development. Green Belt release is necessary to support sustainable growth and to ensure identified issues and objectives are met within the plan period. Land at Rectory Lane, Areley Kings is not within the Green Belt and should be prioritised as an allocation through the Local Plan Review. Do not support the approach set out in respect of	Comments are noted. As per NPPF para 89, there will be 'safeguarded' sites allocated which will enable future development to come forward if required at the next Local Plan Review. The Sustainability Appraisal (SA) sets out the alternative options for development.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Areas of Development Restraint within the District.</p> <p>Local Plan needs to consider future development needs within the District beyond the proposed Plan period (2034). NPPF paragraph 85 states that ‘safeguarded land’ should be identified in order to meet longer term development needs stretching well beyond the plan period</p> <p>In determining the appropriate quantum of safeguarded land to identify within Wyre Forest District it is necessary to consider the local context, including: the opportunities for meeting longer term development needs outside of the Green Belt beyond the plan period; and, the likely level of future housing and employment that will be required to meet the needs of the District beyond the plan period including cross boundary pressures.</p> <p>In the longer-term Kidderminster will need to retain a key role in providing new homes to meet the objectively assessed housing needs of the District, including identified needs for affordable homes. Necessary to release land from the Green Belt in the longer term to ensure future needs can be met and the vitality of services and facilities can be maximised in the longer term.</p> <p>In addition, the supporting settlement of Stourport-on-Severn will also retain a key role in providing new</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>homes to meet the objectively assessed housing needs of the District, including identified needs for affordable homes.</p> <p>Whilst the draft Local Plan proposes to roll forward safeguarded land at Stourport on-Severn and a number of villages, this level and location of provision is ineffective in ensuring long term development needs can be met and Green Belt boundaries will endure in the long term.</p> <p>To ensure Kidderminster continues to play an important role in meeting longer term housing needs and to ensure an enduring Green Belt boundary beyond the plan period, safeguarded land should be identified around Kidderminster within this Local Plan.</p>	
Stanmore Properties Ltd	LPP01511	Policy 7	Comment	Strategic Green Belt review is necessary having regard to the amount of housing required. The more detailed Second Stage Green Belt Study (AMEC 2017) is welcomed.	Comments are noted.
Persimmon Homes Limited	LPP01595	Policy 7	Comment	Need to consider the extent of need in the District and that the right locations for growth have been selected so can make an informed assessment of how much Green Belt land release is required. Failure to do so will result in an unsound strategy which does not balance the need for housing with the appropriate quantum of housing sites.	Comments and support for the Catchems Ends site are noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Green Belt boundaries should only be amended in exceptional circumstances, through the preparation of the Local Plan (Para 83 NPPF) The Council recognises that exceptional circumstances are justified through the need to facilitate the development that is needed and promote sustainable patterns of development.</p> <p>Locations for growth that are integrated into the built form of the town of Bewdley should be looked at that provide a reasonable prospect for housing. Development to the north, south and west of the town should be limited due to topography which would give rise to prominent developments with significant landscape impacts. Land at Catchems End is an appropriate location for Green Belt release however, as identified in response to the Council's Development Options, RPS considers that the Council needs to provide more certainty that this site can come forward, further to release from the Green Belt.</p> <p>Greater consideration should be given to land to the east of the town, south of existing development at Catchems End. This land is of a lower landscape value and could be developed in a way to integrate with the existing development and enhance the sustainability of the area. It is considered that this release would be necessary in order to meet the requirements of the strategy under the test of exceptional circumstances, expressed in paragraph 83 of the NPPF.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response						
				<p>The Wyre Forest Green Belt Review Part II Site Analysis (2017) reviews Catchems End (referred to as site WA/BE/3) against to 5 principles of the Green Belt identified in Paragraph 80 of the NPPF. The Council’s assessment indicates is that the site makes a significant contribution towards three of the five Green Belt purposes. RPS does not agree with the Council’s evidence and considers that the analysis of the site is flawed and that amendments should be made as set out in the table below.</p> <table><tr><th>Green Belt Purpose</th><th>Council Analysis</th><th>RPS Analysis</th></tr><tr><td>To check the unrestricted sprawl of large built-up areas</td><td>Contribution Whilst the site is relatively small and well bounded, it does make a contribution to preventing local sprawl along the Kidderminster Road and the A456.</td><td>Limited Contribution The site is well bounded by the west midlands safari park, Bewdley and Wribbenhall and does not contribute towards preventing local sprawl as the site is surrounded by other uses.</td></tr></table>	Green Belt Purpose	Council Analysis	RPS Analysis	To check the unrestricted sprawl of large built-up areas	Contribution Whilst the site is relatively small and well bounded, it does make a contribution to preventing local sprawl along the Kidderminster Road and the A456.	Limited Contribution The site is well bounded by the west midlands safari park, Bewdley and Wribbenhall and does not contribute towards preventing local sprawl as the site is surrounded by other uses.	
Green Belt Purpose	Council Analysis	RPS Analysis									
To check the unrestricted sprawl of large built-up areas	Contribution Whilst the site is relatively small and well bounded, it does make a contribution to preventing local sprawl along the Kidderminster Road and the A456.	Limited Contribution The site is well bounded by the west midlands safari park, Bewdley and Wribbenhall and does not contribute towards preventing local sprawl as the site is surrounded by other uses.									

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response			WFDC Officer Response
				To prevent neighbouring towns merging into one another	Significant Contribution The site is part of land which separates Bewdley, Kidderminster and Stourport and is judged to make a significant contribution to this purpose, albeit bounded by the A456.	Limited Contribution The site does not contribute to separating the settlements as the West Midlands Safari park lies between the site and Kidderminster with Wribbenhall to the south which separates the settlement from Stourport.	
				To assist in safeguarding the countryside from encroachment	Contribution The site is contained on its northern and southern sides, although the western boundary is less clear.	Limited Contribution The site is well contained on all sides with the West Midlands Safari Park to the west.	
				To preserve the setting and special character of historic towns	Significant Contribution As part of the north eastern gateway	Limited Contribution The site does not contribute to the

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				is brown field.	
Hagley Parish Council	LPP0776	Policy 7	Object	Green Belt Review - NPPF says that the Green Belt Boundaries should only be reviewed in “exceptional circumstances”, which it does not explain further. The Housing White Paper, which is presumably relevant as emerging government policy, indicates that this means boundaries should be changed only when all other options have been considered. In other words, changing Green Belt Boundaries should be a last resort. Neither the Consultation Document nor any of the background research that we have seen provides any explanation of why this last resort needs even to be considered.	<p>The NPPF in para 83 states “Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.” Wyre Forest District Council is undertaking a ‘Local Plan Review’ so this meets the requirements set out in para 83 of the NPPF.</p> <p>The Sustainability Appraisal (SA) forms part of the evidence base for the emerging Local Plan and will set out the alternative options that have been considered and why Green Belt release is necessary.</p>
Campaign to Protect Rural England	LPP0934	Policy 7	Object	<p>Current text does not make clear the 5 purposes of Green Belt.</p> <p>Green Belt boundaries can only be altered by a Local Plan Review and in exceptional circumstances. NPPG says meeting housing numbers on its own is not 'exceptional circumstances'. Housing White Paper is consulting on adding explanation that review should only be done if all other options have been considered. Plan fails to establish if this has been done. We</p>	The NPPF in para 83 states “Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.” Wyre Forest District Council is undertaking a ‘Local Plan Review’ so this meets the requirements set out in para 83 of the NPPF.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>challenge assumption that there is not enough housing land without using Green Belt land. Sites in Bewdley and Stourport to west of River Severn are outside of Green Belt. Option to use such sites should be explored prior to reviewing Green Belt.</p> <p>One objective of Green Belt is to stop towns coalescing. For this purpose, Cookley should be included. Concerned that release of Hurcott ADR and development of hospital site will lead to joining up of Kidderminster and Cookley and urban sprawl. However, leaving hospital site as derelict is not an option.</p>	The Sustainability Appraisal (SA) forms part of the evidence base for the emerging Local Plan and will set out the alternative options that have been considered and why Green Belt release is necessary.
Persimmon Homes Limited	LPPO1428	Policy 7	Object	<p><u>Support</u> Green Belt boundary review. <u>Object</u> to the time period used for the Green Belt review.</p> <p>In order to accommodate longer term development needs a date of 2051 should be used to assess future development needs. This timeframe will allow land to be released now which could be used for development in the next two Local Plan reviews, providing a long term Green Belt boundary whilst allowing all parties to plan positively for the future of the district as well as accommodating future overspill from the Black Country and Birmingham conurbations.</p>	The NPPF para 157 states that Local Plans should “be drawn up over an appropriate time scale, preferably a 15-year time horizon, take account of longer term requirements, and be kept up to date.” The emerging Local Plan will be for a 20 year plan period which is typical of the time period used in most adopted Local Plans. As per NPPF para 89, there will be ‘safeguarded’ sites allocated which will enable future development to come forward if required at the next Local Plan Review.
	LPPO2313	Policy 7	Object	Policy 7 - It says it all in the opening sentence. It is therefore your job to produce a) Accurate figures and then b) Justify the reasons why Green Belt should be	Objection is noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>housing would destroy the character of the area and could detract from local heritage assets.</p> <p>It is anticipated that a housing development at the top of Bigbury Lane would not integrate effectively with its surroundings as it would destroy the rural, wooded character of the lane, substantially increase the housing density, destroy the existing layout and detract from the setting of heritage assets. Two locally listed buildings are located adjacent to the base of the site. It is anticipated that any housing development would completely destroy current design and layout and substantially increase the density of housing and would be unlikely to blend with the locally listed buildings and rural character of the lane. The ADR borders onto the fence of a private residential dwelling and, I assume, would transform the landscape adjacent to this locally listed Mock Tudor building.</p> <p>Section 11.18 of the LPRPO states that <i>“the benefits of conserving and enhancing heritage assets include: ..influencing the character of an area and giving it a sense of place”</i>. Policy 11C states that <i>“new development must protect and where possible enhance the unique character of the landscape including the individual settlement or hamlet within which it is located”</i>. Policy 11D states that development should <i>“support the conservation, enhancement and restoration of biodiversity and geodiversity across the Plan Area”</i>. It is hoped that this rationale would be</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>applied to any proposed development at Wilden Top if any development is permitted.</p> <p>Section 32.3 of the LPRPO states that the <i>“land at Burlish Crossing is near the Lickhill Road North sites and would require extensive planting along the northern boundary to soften the impact of built development as viewed from the Bewdley direction”</i>. If a new housing site or site for Travelling Showpeople was approved for the Wilden Top site would the same conditions be made upon imposed on any new development?</p> <p>There are numerous references in the Baker Report detailing why the site at Wilden Top would be unsuitable as a site for Travelling Showpeople. It states that <i>“mitigation would be required to protect the character of the lane regard should be had for the footpath”</i>. I assume that most of these would also apply to any proposed housing development?</p> <p>B2.The site may not be well served by facilities.</p> <p>The Local Plan Review Preferred Options Sustainability Appraisal Report states that all of the Stourport sites <i>“score well in terms of access to services apart from the sites at Wilden Top and Sandy Lane”</i> which are not served well by facilities. Appendix G6 continues that the site scores negatively in relation to other criteria. I assume that these scorings apply both to the continuation as an ADR or a site for Travelling</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Showpeople. It is assumed that these issues could potentially make the site unsuitable for either type of development?</p> <p>Since the closure of Wilden Lane Post Office last year there is no longer a local shop to serve any new housing development. There may be issues relating to power supply and sewerage for any new development at the Wilden Top ADR. I am concerned that any new housing development would further exacerbate the frequent interruptions to the electricity supply experienced by residents of Bigbury Lane. The sewers in this area are narrower than modern sewers and thus more prone to blockage. I don't know whether or not this would affect any housing development further up the hill.</p> <p><u>C: Concerns Relating to Both Proposals</u></p> <p>As far as I am aware , unlike the other sites included in the LPRPO it does not include an indicative number of dwellings for the ADR at Wilden Top or for the number of pitches proposed for a site for Travelling Showpeople, which makes it difficult to comment on the scale of the impact of the proposals. The number of dwellings or pitches proposed would obviously affect the scale of the impact of any development on the local area. Is it possible to provide this information? The Baker Report, Appendix 4, 2011, states that availability of the site "is currently unknown" - I assume</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>that this is still the case as there appear to be no references in the document to the owners wishing to sell/ make available the land.</p> <p>The Planning Team should walk around the site before proceeding any further with this proposal as, in light of the points above, we cannot understand why this site is being considered as a potential site for Travelling Showpeople or retained as an ADR.</p> <p>C1. Any additional pedestrian footfall must substantially increase the risks to pedestrian safety on Bigbury Lane due to the narrowness of some sections of the lane and absence of a footpath along the majority of the lane. These risks would also be substantially increased by wide vehicles attempting to pass pedestrians on narrow sections of the lane where there is no footpath.</p> <p>Bigbury Lane is a narrow lane and is not suitable for any additional pedestrian traffic. One section is particularly narrow and bendy and is located on a hill, which can encourage traffic travelling downhill to gather speed. The creation of either a housing site (or a site for Travelling Showpeople) could potentially result in increased pedestrian footfall to the base of Bigbury Lane and could lead to major pedestrian/road traffic incidents. Although I imagine that any plans to create housing in the ADR at the top of Wilden Lane could include the creation of a footpath alongside such</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>housing I cannot envisage how the lower section of Bigbury Lane could be made safe for pedestrians.</p> <p>Problems occur when motorists try to travel either up or down the Lane and encounter a vehicle travelling in the opposite direction. Cars often have to wait and sometimes pull onto the drive of private properties, in order to pass oncoming traffic. This can be further complicated by pedestrians trying to negotiate a safe route along the Lane, which must present a significant risk to pedestrian safety. Any increase to the footfall along this section of the Lane would, in my view, substantially increase this risk.</p> <p>At present I think most of the pedestrians from the housing estate at the top of the hill travel down Bigbury Lane.</p> <p>It has been suggested by a Local Councillor that some of the residents of the housing estate at the top of the hill, use Wilden Top Lane to access Hartlebury Road or use the public footpath that leads to the community centre to access Wilden Lane. I have visited this footpath and would like to invite other representatives of WFDC to do the same. The path includes several sections which have a very steep gradient, one section has many steps which would not be accessible for anyone using a buggy or pushchair or for many older people. Therefore I believe that existing and additional pedestrians are most likely to use Bigbury Lane to</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>access Wilden Lane. Some residents will not feel safe using an off road public footpath especially in the dark whereas Bigbury Lane has street lights. The top section of Hillary Road and majority of Wilden Top Lane do not have streetlights which, I expect, would encourage further pedestrian footfall along Bigbury Lane from any new development at Wilden Top when it is the dark.</p> <p>I think many people will understandably have to weigh up the risks between walking down an isolated footpath (with a steep gradient but with no traffic) to walking down a busy narrow lane with no footpath.</p> <p>Bigbury Lane is also frequently used by horse riders, which can add to the risk from traffic and pedestrians trying to pass in narrow sections of the lane.</p> <p>Any significant housing development in the Wilden Top ADR, even if it included the provision of a footpath in that section of the Lane, would substantially further reduce road safety along the lower section of Bigbury Lane where there is no footpath. This is particularly important given the high volume of young families that walk down the lane to access Wilden Primary School, older children who access the bus route to Stourport High School, and workers who walk to bus routes and the main road via Wilden Lane.</p> <p>C2. Destruction of the natural environment and the impact upon local wildlife, particularly some</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>protected species including the local bat population.</p> <p>It is expected that the development of any new housing would completely destroy the habitat of resident wildlife and a site for Travelling Showpeople, to a slightly lesser extent, could destroy the habitat of and displace local wildlife.</p> <p>This piece of land has been allowed to grow wild for a significant period. Any development, either a site for Travelling Showpeople or a housing development could destroy local wildlife, which may include protected species.</p> <p>The land located at Wilden Top was taken out of the Green Belt in 1989 and designated as an Area of Developmental Restraint and this designation has not been adjusted since then. However as this action was taken 18 years ago I believe that there is significant reason to review this decision.</p> <p>During the last 18 years the land in question and the surrounding land, at the top and middle of Bigbury Lane, must have matured further and I believe that the site is now home to a broad spectrum of wildlife. I believe that before any plan for housing or for the creation of a site for Travelling Showpeople is approved an independent bat survey and a full wildlife survey should be undertaken in order to assess the potential impact of any development upon the environment,</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>particularly any protected species of wildlife nesting and living within this site.</p> <p>Bats have been observed frequently in the gardens of the houses immediately below the proposed site at Wilden Top. Without a thorough independent survey there is a major risk that substantially changing the nature of the Wilden Top site either as a housing development or a site for Travelling Showpeople could risk breaking the law if it causes “<i>damage or destroy a breeding or resting place</i>” or “<i>obstruct access to their resting or sheltering places</i>”.</p> <p>C3. Exacerbation of existing congestion issues in Bigbury Lane.</p> <p>Difficulties are frequently experienced in passing oncoming traffic and in parking, particularly in the middle and lower sections of Bigbury Lane. This would be made much worse by the increased volume of traffic that would accompany a new housing development but would also be exacerbated by any additional traffic, particularly wide vehicles.</p> <p>Bigbury Lane already suffers from major congestion and a lack of adequate parking spaces. There is not sufficient room for visitors to residential properties to park.</p> <p>Passing vehicles frequently have to pull over to allow</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>traffic to pass, either in the stopping places or sometimes onto the edge of private driveways in order to pass oncoming vehicles, often causing tailbacks.</p> <p>Increased congestion and parking issues also increases the risks to pedestrian safety as pedestrians have to navigate between and around vehicles without a suitable footpath.</p> <p>Any additional proposed housing development must increase the number of vehicles and pedestrians using the lane exacerbate parking issues and thereby further increase the risks to pedestrian safety. Would it be responsible to propose a development at Wilden Top that would create these problems, particularly as it could pose a threat to public safety by encouraging and increasing pedestrian footfall in this steep narrow lane, mostly without a footpath, used by many families and other pedestrians to access the local school and Wilden Lane.?</p> <p><u>Conclusion</u></p> <p>In the light of the information above we would like to object to the proposals for the site at Widen Top to either create a site for Travelling Showpeople or to continue to allocate the site as an Area of Development Restraint. Due to the number and gravity of our concerns my neighbour and I would appreciate the opportunity to meet representatives of Wyre Forest</p>

				<p><i>demonstrate that they have fully examined all other reasonable options for meeting their identified housing requirements</i>". WFDC have not met this criteria and reference two documents AMEC 2016 and AMEC 2017 which are not accessible.</p> <p>There appears to have been no discussion with Wychavon with regard to any housing development as is proposed by the White paper.</p> <p>The Green Belt changes in relation to Stourport are all to the North —West of the town and include house density building which is much higher than normal for this region. The choice of small Green Belt sites with high density building will exacerbate the already overloaded transport and education facilities in that area. No mention is made 01: use of the land south of Kingsway (Previously, also Wyre Forest Golf Club) which would provide a housing area similar to or larger than two of the proposed core sites and with access to schools and transport.</p>	<p>options that have been considered in the emerging Local Plan.</p> <p>The Green Belt Study produced by AMEC was available during the consultation period for public viewing. Copies were available to download on the Council website and hardcopies were available at the 8 drop-in sessions held throughout the District for public viewing.</p> <p>We have consulted with Wychavon District Council and continue to do so as part of our Duty-to-Cooperate requirements.</p>
	LPPO4604	Green Belt	Object	<p>On page 47, in Policy 7 it states "The current approach to "insetting" and "washed over" status of specific villages will be retained although village envelopes will be revisited to allow for development to meet local needs." How is a development of 1200 – 1400 homes joining Cookley at the northern end, to Broadwaters, Kidderminster at the southern, in any way a development that meets the needs of Cookley as a</p>	<p>Disagree. Cookley village is separate from the Lea Castle site and will remain as a separate village.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>village. Our village envelope will be stretched to Kidderminster and our Green Belt will be decimated.</p> <p>Cookley is referred to as Inset Green Belt. How will Cookley be Inset Green Belt when our southern Green Belt is completely removed? I would infer from this that your intention is to join Cookley to Kidderminster, therefore negating your obligation to protect Cookley as a village Inset Green Belt.</p> <p>Cookley is a Village INSET in Green Belt. It has its own strong identity and provides key local services. As a council WFDC should be supporting Wolverley and Cookley Parish Council to meet it's local needs in a sustainable way and not by destroying our Green Belt and putting a development larger than our village, joining our village and forming a development large enough to join Cookley to Kidderminster. I am happy to see a residential development on the Lea Castle Hospital site on the brown field part of the site and without the destruction of the woodland.</p>	
	LPP04958	Cookley ADR	Object	<p>I object to the blue and sandy coloured areas being developed. The red area which is the original Lea Castle site is sustainable in size and amount of dwellings originally proposed which I believe to be 600.</p> <p>The options A&B in addition to the red area is too much for surrounding villages/areas to sustain. More definition needs to be revealed as to infrastructure</p>	Objection and comments are noted. The Infrastructure Delivery Plan sets out the infrastructure plans for the Local Plan period.

				going in place, schools, GP's shops etc.	
	LPP04960	Cookley ADR	Object	I strongly object to the development of the orange, purple and blue zones in and around Lea Castle, as this will join Cookley Village a rural community to Kidderminster Town and therefore lose the village status. It is not necessary to build on as there variety of brown belt land still to be redeveloped nearer to the town centre which would meet the school, doctor, roads needed for the extra people.	Objection is noted.
Horton Estates Ltd	LPP0852	Policy 7	Support	We support the reference to development proposals in the Green Belt being assessed against relevant national planning policy. However, this policy should accord with, and cross-refer to, draft Policy 34 which permits certain forms of development at PDL sites in the Green Belt. In addition, we wish to highlight that PDL within the Green Belt could be released at Cursley Distribution Park through site rationalisation which could be allocated for residential development. This site lies within Parcel SE4 of the Strategic Green Belt Review (Strategic Analysis, Amec, September 2016) which was assessed as making a "limited contribution" to four of the five Green Belt purposes (NPPF para. 80). As described in more detail above, two areas of PDL could be released (1.5ha and 1.9ha), each of which could accommodate in the order of 40 dwellings. This would require the land to be released from the Green Belt and reflected in Policy 7.	Support for Policy 7 noted. Cross-reference to Policy 34 will be considered. Comments regarding Cursley Distribution Park site are noted.
Miller Homes	LPP0951	Policy 7	Support	Our client supports the proposal to allocate the	Comments and issues raised are noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>Hurcott Area of Development Restraint (ADR) (land between A451 and Hurcott Village) for residential development.</p> <p>The Preferred Options consultation document highlights that the availability of previously developed sites within the District is insufficient to accommodate the higher objectively assessed housing need (OAHN) based requirement for the District. Furthermore WFDC reporting identifies a total availability of 2,956 dwellings based on a combination of completions (April 2016-April 2017), existing and lapsed planning permissions, previously developed land (Green Belt) and previously developed land (non Green Belt) against an OAHN target of 5,400 dwellings and a Local Plan target of 6,000 dwellings. This represents shortfalls of 2,444 and 3,044 dwellings respectively. Therefore greenfield sites need to be identified and allocated to enable the residual requirement to be met.</p> <p>As identified in our client's response to proposed Policy 6C, the Local Plan Review Preferred Options consultation document also identifies that <i>"the urban areas of the District have the greatest housing needs and are the locations where the cost of public service delivery is relatively low"</i>. The WFDC Settlement Hierarchy Technical Paper proposes that Kidderminster is classified as a Strategic Centre at the top of the District settlement hierarchy, and accordingly is</p>	<p>Agree that the ADR site has already been removed from the Green Belt, however Green Belt restrictions remain in place as it is safeguarded land.</p> <p>There are ecological issues in the southern area of this site as the ADR site backs onto an SSSI.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>considered to be the most sustainable settlement in the District and the main focus for future development within the District. It is noted that this proposed settlement hierarchy formed the basis for both the current adopted Core Strategy Policy DS01 and proposed Policy 6B of the emerging Local Plan.</p> <p>It stands to reason therefore that the development need that cannot be met on previously developed land should be focussed on the settlements higher up in the settlement hierarchy, especially to greenfield sites on the edge of Kidderminster, as advocated by proposed Policy 6C of the emerging Local Plan.</p> <p>The National Planning Policy Framework (NPPF) states that local planning authorities can, where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt in order to meet longer-term development needs stretching well beyond the plan period.</p> <p>Kidderminster is surrounded by Green Belt, with the exception of one ADR, between the A451 and Hurcott Village, Kidderminster. The land within this ADR was removed from the Green Belt and designated as ADR through the Wyre Forest Urban Areas Local Plan (1989) in order to meet longer term development requirements. Whilst WFDC has been able to adopt subsequent Development Plan Documents without requiring incursions into the Green Belt or requiring</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>the development of ADRs to meet development needs, the time has come for WFDC to look beyond the boundaries of its urban areas for sites to meet the District's development needs.</p> <p>As a non Green Belt site which has already been identified for meeting longer term development needs, the ADR between the A451 and Hurcott Village presents the most logical and most sequentially preferable first option for accommodating residential development adjacent to the most sustainable settlement in the District. Moreover the development of this site reduces the amount of land required to be removed from the Green Belt through the new Local Plan to meet the District's development needs.</p> <p>Although the site is not located within the Green Belt, this area of ADR is assessed within the WFDC Green Belt Review Part II – Site Analysis report as if it was in the Green Belt. The site is assessed in two parts. With respect to the northern area the reporting states that <i>“Development of the site would not significantly damage Green Belt function in this location”</i>. The report does also comment that the development of both the northern and southern areas would reduce the openness of these areas. The report does however continue to propose both sites for development.</p> <p>This ADR has previously been assessed in the 2009 Strategic Housing Land Availability Assessment</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>(SHLAA), which reports that the SHLAA panel considered that the ADR may be suitable for housing (up to 250 dwellings) if greenfield land releases are required at the end of the Plan period. Whilst the Housing and Employment Land Availability Assessment (HELAA) identifies in principle that the site is suitable, available achievable and potentially developable after 5 years, it should be noted that this is predicated on the assumption that there is a need to remove the site from the Green Belt and our client wishes to highlight that the site is not in the Green Belt and is actually therefore deliverable within the next 5 years.</p> <p>The Sustainability Appraisal (SA) for the Preferred Options consultation document highlights the positive implications of housing coming forward on this ADR site, including with respect to affordable housing provision. Whilst the SA identifies potential issues relating to the impact of development on biodiversity and the Kidderminster road network, it is considered that these potential concerns can be alleviated or mitigated, as is already being demonstrated through the planning application submitted in outline for up to 100 dwellings (not up to 82 dwellings as stated in paragraph 31.3 of the consultation document and within the evidence base documentation) on the northern part of this ADR, which is pending determination. This planning application, submitted by a national housebuilder (our client), provides further demonstration of market confidence in this location,</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>the confirmed availability of the land, and the deliverability of housing development on this site. The National Planning Policy Framework (NPPF) recognises the need to take 'market signals' into account in drawing up new development Plans.</p> <p>In terms of the location of this site, it should be noted that the site is adjacent to the north eastern edge of Kidderminster, with existing residential development along the site's western boundary. The site benefits from extensive frontage to the A451 Stourbridge Road, which is an existing bus route and has an existing pavement that can be extended up to this site. The nearby Broadwaters area contains a collection of local services and facilities. Residential development is therefore considered to be a suitable and compatible use for this site.</p> <p>In addition, extensive technical assessment has been undertaken with respect of the northern area of the ADR in relation to ecology, drainage, transport, noise, landscape, agricultural land quality, ground quality, sustainability, archaeology and trees. The site is of limited archaeological interest. The ecological features of most interest are located around the boundaries of the site, which can be retained and enhanced through residential development proposals (with the exception of the creation of access points). The site is within flood zone 1 and development can take place on the site without increasing the potential runoff from the site.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>There are limited views into this site and the impact of development on the landscape can be further reduced through enhanced boundary planting.</p> <p>Sufficient noise mitigation measures can be incorporated into the development to provide appropriate amenity and it is considered that development on this site would not cause an adverse impact on the operation of the highway network and would only have a permanent minor adverse impact on the supply of best and most versatile agricultural land.</p> <p>If the northern area of the ADR is developed first, it can be developed in a way that would not compromise the ability for the rest of the ADR to be developed at a later date. The wider ADR also offers potential for green infrastructure connectivity through to Broadwaters Park / Podmore Pool and the facilities and amenities in Broadwaters. If housing need requires further land release then there is an opportunity for additional land to come out of the Green Belt in the vicinity of this location. The allocation of the ADR for development would not be dependent on, or prejudice, a wider area being allocated, but the allocation of a wider area would provide further opportunity for creation of a critical mass and provision of additional facilities to further enhance the sustainability of this location.</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>development alongside settlements that may otherwise be significantly constrained from growth. The approach to identifying locations for growth should also fully consider how sustainable development options can be brought forward through the Local Plan to meet the needs of settlements in locations that are not constrained by the Green Belt in reaching a decision on the circumstances relevant to the removal of land from Green Belt.</p> <p>Gladman welcome that the Green Belt Review acknowledges that the development needs of the area will need to be balanced against other factors, which together could constitute ‘exceptional circumstances’ meriting the removal of the Green Belt designation from areas of land to allow for development. Further consideration should also be given to the Framework’s expectation that regard should be given within Green Belt reviews to the intended permanence of Green Belt boundaries in the long term, so that they are capable of enduring beyond a plan period. As such, consideration should be given through up-to-date evidence to the need to identify additional or alternative areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the end date of the Plan.</p>	
	LPP0299	7	Support	Support for Section 7.	Support is noted.
	LPP03806	Paragraph	Object	I object to the Council’s development strategy and	Objection is noted. It is a legal

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
Worcestershire County Council, Planning Economy & Performance	LPP01140	7.6	Comment	The plan states that "minor changes to Green Belt boundaries may be appropriate to meet local needs or aspirations and to facilitate local and neighbourhood planning in the future". As national policy requires exceptional circumstances to justify alterations to Green Belt boundaries, and that Green Belt boundaries should be set for the plan period, we question whether local needs would be sufficient. As currently phrased this could result in both uncertainty and false expectations for local communities.	Comments noted. Agree that amendments to the text should be made.
	LPP03811	7.6	Object	I object to this statement and the Council's strategy for development which is not supported by independent analysis. The statement is contradictory and shows that the Council does not believe that the Green Belt is important.	Objection is noted.
	LPP03627	7.6	Object	<p>Development should not be considered around Cookley apart from a small portion on the blue print on the existing Lea Castle site. We already have a stretched and dangerous infrastructure and our facilities and services are already stretched to the maximum capacity.</p> <p>Cookley housing needs are for 33 affordable rented homes, I cannot therefore see the justification for option A 150 homes, option B 360 homes and an outlined planning application for an additional 600 dwellings, this would obviously mean building away from the blue print of existing buildings. We also need to take into account the bat population at Lea Castle.</p>	Objection is noted. Please note that the proposed 600 dwellings on the Lea Castle site is on Brownfield land. Development at the Lea Castle site would be kept separate from Cookley Village and would not merge into one. Infrastructure requirements are being considered alongside the emerging Local Plan in the Infrastructure Delivery Plan. Ecology issues on site are also being considered which includes the bat population on site.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
	LPP04723	7.7	Comment	<p>7.7 Although I understand the reason why WFDC is now looking at Green Belt land and is to be applauded for concentrating on brownfield sites please can the plan give some regard to the fact that local, national and world circumstances change very quickly and assumptions made now will be out of date next year. The Brexit debate is one example. How many Kidderminster residents who are EU citizens will leave the area after Brexit?</p> <p>Once Green Belt land is gone it can never be replaced so Councillors and their Officers need to be sure that they are taking the right decisions with the right evidence</p>	Comments and issues raised are noted.
	LPP03628	7.7	Object	7.7 Yes I agree that a Green Belt review needs to be carried out and included on the updated Local Plan, however I believe that it should remain the same.	Objection is noted.
	LPP03630	7.7 ii	Object	7.7.ii - I commend you on being successful in utilising previously developed land and urge you to exhaust all these avenues first for future developments, I do not believe however that some of your ideas would be limited strategic adjustments to Green Belt boundary. I would see these as being damaging to our beautiful countryside and wildlife.	Objection is noted.
	LPP03812	7.7	Object	I object to the Council's development strategy and this statement. It is not 'entirely appropriate' nor 'necessary' for the reasons I have supplied elsewhere. The perceived need is based on flawed analysis and is	Objection is noted. It is a legal requirement for the Local Authority to have an up to date Local Plan that meets the identified housing need. The

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>in the meantime people will continue to travel.</p> <p>Immediate need is for fresh radical thinking that optimises the use of brown field sites throughout the LEP areas for residential use and enables Kidderminster itself to become a modern, contained and attractive town centre that incorporates retail leisure and residential opportunities rather than pursue outdated models from the past - 'mixed use' communicates little other than the elements of 'wishful thinking' so often reported in the local press over numerous years.</p>	
Save the Green Belt Surrounding Villages in North Worcestershire	LPPO680	Green Belt	Comment	<p>Save the Green Belt surrounding villages in North Worcestershire Wyre Forest District Council has stated the aim of its Local Plan Review is to "make sure the right development happens in the right places". However the planning maps show a disproportionate and aggressive housing development that will mean that the villages of Cookley, Hurcott and Stone will be joined onto the nearby town of Kidderminster. There is a need for housing development, shared throughout the Wyre Forest district, but providing that need by destroying Green Belt and annexing villages to the town of Kidderminster, is not a sustainable or proportionate way to do this. North Worcestershire is a green and pleasant landscape, with a mix of towns and villages. It is your duty to make sure it remains so and not to sacrifice the Green Belt leaving an urban sprawl as a legacy for future generations.</p> <p>Save the Green Belt online petition received. Contains</p>	Comments noted.

				4. Improvement of damaged and derelict land around towns. 5. The securing of nature conservation interests. 6. The retention of land in agricultural, forestry and related uses.	
	LPP02164	Green Belt	Comment	<p>A detailed response received regarding the proposed development to the east of Kidderminster. A summary of this response is listed below:</p> <ul style="list-style-type: none"> Residents are demonstrating/opposing development in these Green Belt areas, in part, as they enjoy using the immediate countryside on the east of Kidderminster for walks, running, cycling, even driving into and out of the area via scenic countryside. Any development should retain these elements by the planning that is granted specifically stating developments are of a low-medium density. Fields can still exist between pockets of development. The dwellings in these pockets of development should reflect, to a certain degree, buildings found in rural areas. Green Belt land should always come with extremely strict planning that is appropriate to the area. Regarding the scenic countryside along major roads in and out of Kidderminster. Planning could prevent development immediately 	Comments are noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>adjacent to the main roads in and out of Wyre Forest so that the 'image' of scenic countryside in and out of the area is not compromised.</p> <p>Please do not underestimate the importance of this to an individual's view of an area and their daily commute. I have friends from outside the area that complement the rural feel of Kidderminster due to these scenic routes in and out of the town.</p>	
	LPP04582	Green Belt	Comment	<p>On page 47, in Policy 7 it states "The current approach to "insetting" and "washed over" status of specific villages will be retained although village envelopes will be revisited to allow for development to meet local needs." It also states that that the Plan will endeavour to maintain the identity and integrity of individual settlements and check the unrestricted sprawl of large built up areas. How is a development of 1200 – 1400 homes joining Cookley at the northern end, to Broadwaters, Kidderminster at the southern, in any way a development that meets the needs of Cookley as a village. Our village envelope will be stretched to Kidderminster and our Green Belt will be decimated.</p> <p>In the table on page 29, Cookley is referred to as Inset Green Belt. How will Cookley be Inset Green Belt when our southern Green Belt is completely removed? I would infer from this that your intention is to join Cookley to Kidderminster, therefore negating your</p>	<p>Comments are noted. Agree that Cookley Village does have its own identity and this should be preserved. Proposals in the emerging Local Plan will not merge Cookley into Lea Castle or northern Kidderminster. The separation of Cookley Village from these areas will be protected. However, development in the Green Belt does need to happen as there are not enough deliverable brownfield sites to accommodate the future housing requirement. The emerging Local Plan seeks to locate future development in sustainable locations.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				<p>obligation to protect Cookley as a village Inset Green Belt.</p> <p>It seems that the reason the WFDC is putting forward Option A is that if the development is sufficiently large enough i.e. over 1000 houses then this could warrant additional infrastructure, roads, doctors, schools etc. which wouldn't be forthcoming for a smaller development. So in order to support this massive development, effectively an extension of Kidderminster, we need to decimate the Green Belt and the identity and integrity of the individual settlement of Cookley be taken away. The whole point of living in a village is that it has its own identity, its own parish council, facilities and sense of belonging. We do not want this taken away from us by the unrestricted sprawl of a large built up area and we definitely want to keep our Green Belt which prevents this from happening.</p> <p>It appears that Wolverley is 'washed over' for some reason which is not made clear. Why is Wolverley washed over? It is the sister village of Cookley and Caunsall with the same Parish Council so should be treated equally. Both inset in Green Belt. With sensitive building on these Brownfield sites together with the same on the Lea Castle site I am sure we would meet the needs of our village and deliver our quota of housing proportionately to the rest of Wyre Forest.</p>

				<p>the countryside from encroachment.</p> <ul style="list-style-type: none"> Preserving the setting and character of villages and other settlements. Assist in urban regeneration by encouraging the re-cycling of derelict and other urban land. Avoiding taking out of Green Belt prime agricultural land. <p>From the north passing to the east and south will be housing development culminating in a massive loss of at least 266 ha. of Green Belt land.</p> <p>The Preferred Options are contrary to the aims and objectives of both Wyre Forest's stated planning objectives and those of the NPPF. The concentrated loss of good quality Green Belt land is unacceptable.</p>	
	LPP03682	Section 7	Object	Green Belt; by constantly eroding the Green Belt Wyre Forest is in danger of destroying the main reason why people come to Wyre Forest. Once gone it can never be returned and the impacts will be realised by our children when it is too late. Kidderminster will be turned into a soulless commuter town such as Redditch – which has been destroyed and lost its character and distinctiveness.	Comments are noted.
	LPP04114	7 Green Belt	Object	All brown field sites should be used for housing before any green field site is made available - we would be taking our children's heritage if fields were built on.	Brownfield sites have been considered as part of the proposed site allocations. However, there are not enough

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 7: STRATEGIC GREEN BELT REVIEW

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	WFDC Officer Response
				They cannot be regained.	deliverable brownfield sites to accommodate the housing need for the District.
Bournewood Nurseries	LPP01962	Green Belt Review	Support	<p>We fully support commitment to Green Belt Review through its plan preparation process. It is fully acknowledged that this will enable development to be brought forward in a number of sustainable locations that would otherwise be constrained from growth without compromising too heavily the purposes of including land within the Green Belt.</p> <p>Removal of any site from the Green Belt will have some impact but the perceived impact could be minimised (across the district) by removing a larger volume of smaller sites rather than a smaller number of large sites which will have greater impact in their respective locations. This would better contain development and prevent urban sprawl in larger volumes which is in conflict with the requirements of the Green Belt as outlined in the NPPF. It is felt preferable that release of smaller sites across the area would reduce the impact on the Green Belt, and its purpose as a spatial planning tool, by allowing small growth parcels instead of larger volumes with great impact.</p>	Support and comments are noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
Homes England	LPP0805	Policy 8A	Comment	<p>Policy requires average of 35 dwellings per hectare on new greenfield sites. Important that the Council's density requirements are flexible, particularly on peripheral greenfield/Green Belt sites where a lower density may be more appropriate or in cases where a particular type or size of housing is required. Density required for developments should be determined on individual circumstances of a site and as part of a masterplanning exercise that takes into account site specific constraints and also opportunities for higher density development such as close to public transport routes and facilities.</p> <p>The provision of an indicative mix for market and affordable dwellings is welcomed, but it must be recognised that this is indicative only as it could change considerably throughout the plan period.</p>	<p>We will follow the NPPF guidance regarding density on sites.</p> <p>The policy states that an average density of 35dph will be sought for Greenfield sites, although densities should reflect the density of surrounding areas. Where site specific policies are proposed, specific densities will be considered in accordance with masterplanning principles.</p> <p>The threshold and mix for affordable and market housing will be based on evidence from within the Objectively Assessed Housing Needs/ Housing Market Assessment and Viability work which is updated on a regular basis.</p>
Bewdley Town Council	LPP0827	Policy 8A	Comment	Neighbourhood Plan consultation responses show that starter, low cost market and affordable 1 & 2 bed dwellings are most needed followed by housing specifically for the elderly. Young people are leaving town due to lack of affordable housing.	Comments noted.
Miller Homes	LPP0962	Policy 8A	Object	<p>Object to the suggested housing mix within Policy 8A.</p> <p>The National Planning Policy Framework (NPPF) requires 1 Local Planning Authorities (LPAs) to plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups</p>	The split proposed is between types of affordable housing e.g. the ratio of rented to low cost home ownership. This is based on income data and housing costs for Wyre Forest. The OAHN follows the guidance for determining housing needs as laid out in guidance available at the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>in the community, as well as identify the size, type, tenure and range of housing that is required in particular locations, reflecting local demand. To inform the Local Plan, the NPPF also requires² LPAs to prepare a Strategic Housing Market Assessment (SHMA).</p> <p>The latest Objective Assessment of Housing Need (OAHN) report for the District³ includes a suggested dwelling mix for market and affordable dwellings based on a review of the current stock profile for the District, general household preferences (from household survey data) and affordable requirements and notes that this has been carried forward into the body of proposed Policy 8A.</p> <p>It is not clear from the OAHN report : (i) why dwelling size data has been split based on assuming a 66.6% market and 33.3% affordable apportionment given that both existing and emerging Wyre Forest District Council (WFDC) affordable housing policy seeks affordable housing provision on new developments of 30%; (ii) why the use of household survey data on dwelling stock occupancy is appropriate for forecasting the future housing mix for the District; and (iii) how the proposed separate dwelling size apportionment for market and affordable dwellings was worked out.</p> <p>The NPPF⁴ makes it clear that each local planning authority should ensure that their Local Plan is based on adequate, up-to-date and relevant evidence. With so</p>	time and will be updated to reflect changes in the NPPF and PPG.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>much uncertainty behind how the suggested housing mix figures taken from the OAHN report have been derived, and how it should be applied, our client questions the appropriateness for including a housing mix within the body of the policy wording, even if it is badged as only being a suggested mix.</p> <p>Support the inclusion within the policy wording of the requirement for new housing developments to: be well designed; address local housing needs; incorporate a range of different types, tenures and sizes of housing to create mixed communities; and for the make up of individual developments and their design and density to be in sympathy with the development context and existing neighbouring development.</p> <p>However to provide the flexibility that house builders require, suggest that this policy wording could be expanded to allow the housing mix to be considered on a site by site basis to reflect not only the location and context of the site, giving regard to the latest SHMA or other up to date OAHN assessment reporting, but also to take account of demographic trends, market trends, the needs of the community and viability considerations, to allow house builders to continue viably building and selling houses.</p> <p>This is therefore not suggesting that the suggested dwelling mix taken from the OAHN report should be ignored, but it may be more appropriate for this to be</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				included within the supporting text justification for the Policy as an example of the latest evidence base reporting position rather than in the body of the Policy wording. The OAHN figures are more useful we suggest, as part of a wider evidence base underpinning the housing mix proposed when sites actually come forward, reflecting adequate, up to date and relevant sources.	
Moor Park Trustees	LPPO1103	Policy 8A	Comment	Policies should not seek to rigidly apply generic district wide housing mix and density requirements but be relatively flexible in order to be responsive to matters such as the individual characteristics of sites and evidence, independently verified or reviewed if required, from the market at the time of application. One of the key elements for such sites is that they are deliverable and sustainable.	Comments noted.
Rentplus	LPPO1108	Policy 8A	Comment	<p>This policy should seek to maximise the delivery of affordable housing appropriate to its context; delivering housing that meets local needs, and aspirations whilst integrating with the wider community and contributing to the delivery of mixed neighbourhoods. We recommend the following amendment to set this out more clearly:</p> <p><i>“New housing developments must be well designed and address local housing needs <u>and aspirations</u>, incorporating a range of different types, tenures and sizes of housing to create mixed communities.”</i></p> <p>This is important because the full range of affordable</p>	Comments noted. We will support the provision of a range of affordable housing types on sites but the most acute need within Wyre Forest is for households who are unable to afford anything other than social rent so we will work with Registered Providers and Developers to meet our identified housing need.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				housing models, including rent to buy offer a new, more widely accessible route to home ownership than those models already explicitly defined in the NPPF. We have responded to the White Paper consultation, setting out that rent to buy is not an intermediate tenure, but should be defined separately to take into account its unique characteristics. As rent to buy homes are rented at an affordable rent for a defined period (in the case of the Rentplus model for 5 year-periods of 5, 10, 15 or 20 years), during which the property is managed by a partner Registered Provider and tenants are able to save towards full purchase of that home. This tenure enables aspirant households with no savings, and thus no access to a mortgage for a shared ownership or open market property, to save for full purchase within an affordable rented property. As these households do not have to move home to purchase, this also provides them with stability and contributes to developing successful places by enabling greater integration of households within their community.	
Wyre Forest District Council - Development Control	LPP01205	Policy 8A	Comment	Why is table 8.0.1 based upon a 33.3% affordable split, when policy 8B talks about a policy requirement for 30%?	This refers to the split between different types of affordable housing product not the percentage that is affordable units on open market sites (30%).
West Midlands HARP Planning Consortium	LPP01334	Policy 8A	Comment	We support what has been written, but it would remain useful to have a note in the Policy stating that density and housing mix will be determined with reference to identified local needs and viability.	Densities of housing site will be determined through a response to the character and nature of the surrounding locality.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
Gladman Developments Limited	LPP01348	Policy 8A	Object	Gladman are of the view that planning policies should not seek to rigidly apply generic district wide housing mix and density requirements. Any such policies should be suitably flexible in order to be responsive to matters such as the individual characteristics of sites, viability and changes to the market conditions over time. In this regard, Gladman would highlight that Table 8.0.1 provides an indication of district wide need at a fixed point in time based on analysis undertaken by Amion in 2016/17	Agree that housing densities should reflect surrounding area. Site specific policies, where large enough, will look at densities as part of a masterplanning process.
Stanmore Properties Ltd	LPP01512	Policy 8A	Comment	The policy states it is anticipated that new greenfield developments will have an average density of 35 dwellings per hectare. This does not appear to be followed through to the number of dwellings allocated on Core Housing Site South of Stourbridge Road (including Hurcott ADR) (BW/4) which is proposed for 200 dwellings. The site as proposed to be allocated is 13.80 ha gross. Even allowing for a generous reduction of 35% for Green Infrastructure, 314 dwellings could be provided at 35 dwellings per hectare ($13.80 - 35\% = 8.97 \times 35\text{dph}$).	Comments noted.
Taylor Wimpey West Midlands	LPP01515	Policy 8A	Comment	Policy overly prescriptive given that in different locations there may be an excessive amount of a particular dwelling size and, therefore, any new proposal should not be constrained from delivering an appropriate mix to achieve a better balance overall. Further, the annual base dwellings is incorrect as it specifies that the affordable proportions will achieve 100 dwellings and 200 market dwellings. This is inconsistent with the	Comments noted. Policy will be amended to ensure consistency of figures throughout the document. Please see the Affordable Housing SPD for more information on determining the mix on a site specific basis.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				development requirements set out in Policy 6A, which requires 90 affordable and 210 market dwellings. Average density requirement consistent with the NPPF however, there should be some flexibility to reflect local character, may be at a lower/ higher density.	
Wyre Forest Community Housing	LPP01654	Policy 8A	Comment	Group's records, as demonstrated by Homes Choice Plus, indicates a slightly higher need for 3 + bedroomed homes. In consideration of this data, we would recommend that the mix of homes proposed in the Local Plan Review Document is reviewed and restated with an increased number of 3+ bedroomed homes. Please also see comments made by West Midlands HARP Planning Consortium.	The Amion report uses data from HC+ after certain household types have been removed (e.g. those seeking shared ownership and transfers) so the percentages will appear different. This is to ensure we only consider the housing needs of those in the greatest need.
Persimmon Homes Limited	LPP01554	Policy 8A	Comment	Not clear in the policy where the required need for 35 dwellings per hectare for Greenfield has been derived from and so this figure is unjustified. The Council is required to justify this figure using the most up to date evidence that is available.	Comments noted.
	LPP03633	Policy 8A	Object	New housing developments should be made from eco friendly materials and be more gentle on our landscape and be run on renewable self sufficient energy.	Comments noted.
	LPP03819	Policy 8A	Comment	Stourport, like most of Wyre Forest has a population structure skewed to +65 age group. However, whilst there is concern in the plan with providing affordable housing, this is to the detriment of the requirements for	Comments noted. The updated OAHN will include further details on household requirements and we understand that Homes England will publish more

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				a mixed housing stock and one which addresses the down-sizing needs of retirement and ageing. The plan makes poor consideration of 'future-proofing' house designs, mix or adaptability, through policy guidance in the document, or through requirements for masterplans, action plans or details required at outline. To offer the alternatives to +65's of 'institutions' or 'a bungalow' is derisory and dismissive of aspirations of older people as well as defining new developments without recognition of social/age mix/future needs or technologies. Sustainability can be delivered by all communities, rural and urban, but there must be recognition of the need for adaptability/flexibility and changing technologies at the outset in requirements for new development sites for housing, but not uniquely so.	information about Lifetime Homes shortly. These requirements will be given consideration in the pre-submission policy.
	LPPO4534	Policy 8A	Comment	<p>Kidderminster needs centralised high density housing rather than low density housing on greenfield land. Half of the tower blocks were (rightly) demolished in the Horsefair under a previous plan that involved the development of land behind Sainsbury's. The majority of housing plans since have been low density out of town estates moving the population out of the town centre, increasing traffic into the centre and requiring the construction of additional link roads.</p> <p>A key point should be that in order to meet lower Co2 targets the plan should be promoting centralised housing development that reduces the dependency on car traffic.</p>	We will follow NPPF requirements on housing density in urban areas.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPP04724	Policy 8A	Comment	<p>I would make a plea in this section for more bungalows to be included in any plans for housing type within the plan. Building a range of bungalows which are attractive to residents of both social housing and owner occupiers will free up family homes in other areas of Kidderminster as people can downsize into something more suitable. (Para 2.9 table 2.0.1)</p> <p>I understand that developers don't like building bungalows as the 'footprint' is bigger and they can't cram in so many 'dwellings' to maximise their profits but, for once, I would like to think that my council would put the needs of residents over that of the developers.</p>	The updated OAHN will provide more information on the housing requirements of older people. The Council must consider the financial viability of a site alongside meeting a range of needs.
Worcestershire County Council, Planning Economy & Performance	LPP01143	Policy 8A	Comment	Table 8.0.1 refers to 96.2% of affordable dwellings being one-bed or two-bed dwellings. This is an extremely high, particularly in comparison to 3% of 3 bed dwellings and it would be helpful to set out the local issues justifying such a proportion. Section 8.6 refers to the AMION report, which presumably sets out the more detailed evidence behind the figures, but from a cursory scan through this report, the relevant section wasn't immediately obvious. Given the proportion is so high, it may be worth summarising the evidence within the Local Plan itself.	This information is included in the Amion report. This will be updated by a new OAHN.
	LPP04655	Policy 8B	Comment	<p>The need for social housing and genuinely affordable housing:</p> <p>Section 8 of the local plan provides compelling evidence of the need for more social housing locally. The over-</p>	Comments noted. The council works with Empty Property owners who want to bring properties back into use and would support conversion of units where it is appropriate to do so.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>estimate of all dwellings confirmed may disguise the urgent need for social housing. The Spennells will not provide the social housing and affordable housing needed as it is traditionally mixed housing.</p> <p>Worcester Street, from the old Woolworths premises to the estate agents adjoining Prospect Hill looks tired and detracts considerably. With the uptake of internet shopping footfall is unlikely to increase. Surely, the few un-boarded retail businesses on Worcester Street could relocate by a few yards, attracting more business and a greater buzz. The vacated properties could then be converted or replaced to provide the social and affordable housing desperately required</p>	
	LPP02989	Policy 8B	Comment	<p>* I broadly support Option A because I feel that the infrastructure gains are very important.</p> <p>*Policy 13 on Public Transport needs to recognise the appalling bus services which we have at the moment. I feel that we should go back to municipally owned, supported and operated bus services. The three towns could be connected by a tram system.</p> <p>I fully support the idea that people should live in town centres. It makes sense to use the unused space over shops and business premises for housing. Worcester Street and Oxford Street should be redeveloped for housing as the retail units in these streets are either empty or under-used.</p>	Comments noted. Affordable housing has a local connection criteria applied to it.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>New housing developments need to be based on affordability for residents, with an emphasis on smaller, cheaper homes costing £130,000 and less.</p> <p>A "St Ives Scheme" which reserves new homes for local people has a lot to recommend it. Residents need to be able to afford to live and work in Wyre Forest. There is nothing gained by providing 6000 homes if they are filled with people who move into the area from elsewhere.</p>	
	LPP04496	Policy 8B	Comment	Social housing must only be provided on the proviso that it is not for life but for a particular time. OAPs living cannot expect to occupy 3 bedroomed social housing when families need somewhere to live.	Comments noted. Please see the Councils Tenancy Strategy.
	LPP03636	Policy 8B	Object	<p>The 100 affordable homes to be built per annum should be increased % wise to 50% of the overall total of homes built. Affordable housing provision should be increased to 40% on sites of 11+ splitting for 20% rent 20% buy shared ownership.</p> <p>The build to rent scheme should be encouraged and matched to working partnerships and non traditional methods should be compulsory.</p> <p>You say that you support such projects, however when The Balanced Oak proposal was set before you, even though most departments were in favour, no support was offered at all.</p>	The percentage of affordable homes is based on the Viability study undertaken alongside the Local Plan review. At the time this indicated that 30% was an appropriate and deliverable threshold. The split between affordable rented to shared ownership products is outlined in the Amion study based on the evidence of affordability and incomes across the district.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
Persimmon Homes Limited	LPP01555	Policy 8B	Comment	<p>Do not dispute that there is a considerable shortfall in affordable housing in the District.</p> <p>The current wording of the policy seeks to achieve a minimum of 30% affordable housing, suggesting that the rate sought may indeed be higher. The Council's viability assessment has appraised the affordable housing threshold of 30%, but has not tested any alternative scenarios and as such, the Council is unjustified in seeking these requirements.</p> <p>It should be expected that the affordable housing target should be guided by the level of need, derived from the SHMA and the financial capability of schemes to contribute towards the target.</p> <p>Do not agree with the Council's current evidence as part of this policy and would expect that this is given further consideration prior to submission, to ensure that the evidence is proportionate and takes into account local data surrounding including land values, construction costs and the implications of the Community Infrastructure Levy (CIL) charging schedule.</p>	The council will use an updated viability study to determine thresholds for affordable housing but has tested a range of affordable housing thresholds across a range of sites – please see the viability technical evidence.
Wyre Forest Community Housing	LPP01657	Policy 8B	Comment	<p>The Group would recommend including the possibility of mixed tenure housing on rural exception sites where open market homes can be proven to make sites viable.</p> <p>Please also see comments made by West Midlands HARP Planning Consortium.</p>	Comments noted and inline with current policy.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
Taylor Wimpey West Midlands	LPP01519	Policy 8B	Comment	<p>Level of housing provision is stated to be 100 dwellings per annum, which is 10 dwellings higher than that identified in Policy 6A. Level of provision should be consistent with the development requirements.</p> <p>Policy outlines a level of 30% affordable, no evidence examining the viability of delivering this level of affordable housing. Such evidence needs to demonstrate the policy aspiration is deliverable.</p> <p>Tenure split - 65 rented and 35 intermediate tenure target, Table G4 shows four years of affordable housing provision this is a very short period and the individual years show very different proportions, which on average overall represent 65 rented and 35 intermediate. Plan should not be too prescriptive setting out targets should be flexible to allow for site specific circumstances where it may be appropriate to offer a different proportional split.</p> <p>Build to rent schemes, policy requires security of tenure through tenancy agreements of 3 years or more. This may not be appropriate for all build to rent proposals, should be some flexibility of this requirement.</p> <p>In terms of encouraging a scheme to consider non-traditional building methods where poor viability has been demonstrated, such methods may offer a cost saving, this is unlikely to be the case for national volume housebuilders who have particular house types and</p>	<p>Policy will be amended to ensure consistency of figures throughout the document.</p> <p>The viability study was included as part of the evidence available on the website.</p> <p>Comments noted.</p> <p>We will follow PPG and NPPF requirements.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>processes that currently maximise efficiency in both design and build.</p> <p>The concept of starter homes, in the Housing White Paper 2017, is not referred to within the emerging policy. The White Paper states that they want local authorities to deliver starter homes as part of a mixed package of affordable housing that can respond to the local needs and markets and that the Government will commence a general duty on Council's to promote the supply of starter homes. Finally, it is proposed that the Government will amend the NPPF to introduce a clear policy expectations that housing sites deliver a minimum 10% affordable home ownership units. It is considered that the Council should review the affordable housing policy and incorporate starter homes within the definition, which will serve to meet the needs of households in Wyre Forest District.</p>	
Wyre Forest District Council - Development Control	LPP01206	Policy 8B	Comment	States that a min average annual of 100 Affordable dwellings will be delivered. Table 6.0.1 at Policy 6A states need as 90 per year. 65/35% tenure split - is that correct, I would have expected rental split to be higher (75%?)	<p>Policy will be amended to ensure consistency of figures throughout the document.</p> <p>The split is based on affordability and income correct at the time the OAHN was completed in 2017.</p>
Victoria Carpets	LPP01502	Policy 8B	Support	We support the flexibility in Policy 8B which recognises that the proposed level of provision (30% on sites of 11 or more dwellings) may not be achievable on all development sites and this would need to be evidenced	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				through independently verified financial viability assessment. This is in accordance with the NPPF.	
Gladman Developments Limited	LPP01358	Policy 8B	Comment	<p>The affordable housing target should be fully justified through an assessment of whole plan viability.</p> <p>The proposed tenure split is expressed as being indicative. The definition of affordable housing may well change over the life time of the Local Plan. The exact split will also need to be determined by market conditions on a site by site basis.</p> <p>Local planning policies should allow the housing density and mix on individual sites to be determined on a case by case basis according to individual site requirements and prevailing market conditions to ensure that sites are viable and responsive to the particular circumstances associated with them.</p>	Comments noted.
West Midlands HARP Planning Consortium	LPP01335	Policy 8B	Comment	<p>The following line in Policy 8B needs to be reviewed or deleted from the Policy: <i>“Individual site characteristics may mean that this level of provision is not achievable on all development sites and this will need to be evidenced by the applicant through an independently verified financial viability assessment.”</i> This sentence does not clarify that a viability assessment will be required if provision fall below 30% meaning that the Council could request a full viability assessment for every application even if they are over-providing which is unreasonable and unjustified. We recommend that the Council clarify this policy and recommend that the</p>	Comments noted. We will follow NPPF requirements regarding viability testing the plan and only further viability testing if schemes are non-compliant.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>Council seek to negotiate delivery that suits individual circumstances.</p> <p>We recommend removing the NPPF definition in this section as you don't need to repeat national policy. Further, the definition of affordable housing in the NPPF is under proposals to be amended to include such tenures as discount open market rented. Including a line which aligns the definition of affordable housing within the NPPF will ensure that the Local Plan stays up to date with changing national policy and innovative new models of affordable housing which can maximise delivery across the Plan period.</p> <p>The reference to sub-market private rent is not in the current definition of affordable housing as set in the NPPF and therefore should be removed as it is not consistent with national policy.</p>	
Homes England	LPPO813	Policy 8B	Comment	<p>Policy states minimum of 30% affordable housing will be required on sites of 11 dwellings or more. The policy recognises that in some cases this level may not be achievable, and in such instances evidence is required by a financial viability assessment. This policy is supported as it recognises that 30% may not be viable in all cases</p> <p>With regards to the indicative tenure split of 65% rented and 35% intermediate, it is agreed that this provision should be subject to housing need at the time of construction, and the viability of individual schemes</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				as the required split could change over the plan period.	
Campaign to Protect Rural England	LPP0936	Policy 8B	Comment	30% requirement for affordable housing is lower than Bromsgrove and Birmingham which have 40% achieved by allowing % of intermediate tenures. Oppose use of thresholds. This policy implies no rural affordable homes unless on rural exception sites which would require public funding making delivery harder.	Please see the separate rural housing policy.
Miller Homes	LPP0972	Policy 8B	Support	<p>Support the inclusion of the explicit recognition within the wording of this Policy that individual site characteristics may mean that the stated 30% affordable housing provision is not achievable on all development sites, if evidenced through a financial viability assessment, and that the exact tenure split will be determined on a site by site basis based on housing need and viability (if relevant).</p> <p>The National Planning Policy Framework (NPPF) requires¹ that:</p> <p><i>“Local planning authorities should set out their policy on local standards in the Local Plan, including requirements for affordable housing. They should assess the likely cumulative impacts on development in their area of all existing and proposed standards, supplementary planning documents and policies that support the development plan, when added to nationally required standards. In order to be appropriate, the cumulative impact of these standards and policies should not put implementation of the plan at serious risk, and should</i></p>	The policy will be updated to include current NPPF guidance.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p><i>facilitate development throughout the economic cycle. Evidence supporting the assessment should be proportionate, using only appropriate available evidence”.</i></p> <p>It is therefore important for the new Local Plan to take appropriate evidence and development viability into consideration when setting and applying affordable housing policies, to account for the fact that every development site is different.</p>	
Rentplus	LPPO1109	Policy 8B	Comment	<p>The minimum annual average target given in this policy differs from that set out in Policy 6A; we support the higher target figure, but note that to achieve higher delivery the Council should be as flexible as possible in negotiating mix and delivery mechanisms with providers of affordable housing. This includes being flexible on the tenure split, as already set out in the policy; this should include allowing for the delivery of rent to buy as a hybrid model which provides a route to home ownership through affordable rent. The need for rented homes is well recognised by the Plan, and this need will be met by the delivery of an appropriate range of social rented, affordable rented and rent to buy housing. The statement that the Council will reflect the White Paper proposals should be reflected in the final version of this policy:</p> <p><i>“An indicative tenure split of 65% rented (including social, affordable and rent to buy) and 35% intermediate</i></p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p><i>tenure (including sub-market private rent and shared ownership) will be sought for affordable housing provision on new sites. The exact split to be determined on a site by site basis based on housing need and viability (if relevant)."</i></p> <p>The above recommended alteration will enable the Council to be responsive to the Government's emphasis on widening opportunities for home ownership, whilst still meeting the significant levels of need for rented properties.</p>	
	LPPO1706	Plough Lane, Far Forest	Object	<p>Objects on the following reasons:</p> <ul style="list-style-type: none"> • Change of character to the area. 	Objection is noted.
Chaddesley Corbett Parish Council	LPPO1037	Policy 8C	Support	<p>We support this policy, but suggest that the criteria for rural exception sites should include additional wording from the NPPF:</p> <ul style="list-style-type: none"> • "...housing should be located where it will enhance or maintain the vitality of rural communities." • "...authorities should avoid new isolated homes in the countryside unless there are special circumstances..." 	We will consider this amendment to the policy.
National Farmers Union	LPPO1119	Policy 8C	Comment	Welcomes the support for small scale residential development to meet local needs in rural settlements.	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
West Midlands Region				Also welcomes the policy on Rural Workers Dwellings. Encouraging that the council has recognised proposed rural workers dwellings need to be of a size commensurate with the functional requirement and financial capabilities of the enterprise. When new dwellings are constructed for farm businesses it is important that they are large enough to cope with the many demands of the farm business (such as an office entrance porch and utility), together with the needs of a farming family. This is important for maintaining adequate bio security measures. An agricultural dwelling must be flexible enough to accommodate families at a range of life stages. Farming families do not have the option of moving house if they should outgrow their home and this must be recognised when planning new accommodation.	
Wyre Forest District Council - Development Control	LPP01213	Policy 8C	Comment	We mention comprehensive marketing for 12 months to support COU in Policy 21A. Should we be specifying a similar timeframe within policy 8C (rural workers dwellings).	Comments noted. We will consider if this is necessary in policy update.
Wyre Forest District Council - Development Control	LPP01214	Policy 8C	Comment	We mention comprehensive marketing for 12 months to support COU. Thinking back, should we be specifying a similar timeframe within policy 8C (rural workers dwellings) above.	Comments noted. We will consider if this is necessary in policy update.
West Midlands HARP Planning Consortium	LPP01336	Policy 8C	Comment	The policy seeks to require all affordable housing to be retained <i>in perpetuity</i> ; this is not appropriate. The NPPF does not require all affordable housing to be retained <i>in perpetuity</i> , instead stating that it should “include	We will amend the policy to ensure compliance with the NPPF.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p><i>provisions to remain at an affordable price for future eligible households or for the subsidy to be recycled for alternative affordable housing provision” (Annex 2 definition). It is only when defining rural exception sites does the NPPF mention affordable housing being retained <i>in perpetuity</i>. The Council’s policy should be amended to reflect this, as even with intermediate affordable homes can residents ‘staircase out’ to full ownership, and the Right to Buy will also remove affordable housing stock in the long term. The Government’s Proposed Changes to National Policy has also recently recommended changes to affordable housing policy, including that some models of affordable housing “<i>may not be subject to ‘in perpetuity’ restrictions</i>”. This policy should remove any reference to affordable housing being retained <i>in perpetuity</i>, focusing instead on transferring dwellings to Registered Providers at an appropriate cost.</i></p> <p>Further, we believe that the reference to replacing lost units with a replacement unit is not deliverable or justified and should be removed.</p>	
Worcestershire County Council, Planning Economy & Performance	LPPO1360	Policy 8C	Comment	<p>Under 'Rural Exception Sites', the first three words of part (i) should be deleted.</p> <p>Under 'Replacement Dwellings in the Open Countryside', part (ii) should refer to "curtilage only being amended if required", rather than "of".</p>	Comments noted.

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				Part (iii) should introduce the list with a colon, not a semicolon.	
Gladman Developments Limited	LPP01376	Policy 8C	Comment	<p>Strategy of accommodating development in Kidderminster and the market towns should not be at expense of meeting housing and employment needs of other settlements. The needs of the sustainable rural settlements should be assessed and meaningful growth apportioned to them to ensure their ongoing vitality and viability. Consideration of setting and character of a village must be balanced against the needs of the local community for new housing.</p> <p>In allocating sites, the Council needs to maximise housing supply by having the widest possible range of sites by size and location. Key to increased supply is the number of sales outlets offering a wide range of products and across different types of locations. It is vital that the evidence base considers how rural communities will sustain and enhance their sustainability over the plan period to avoid the risk of a negative approach that could directly lead to a decline in population and services.</p>	Comments noted.
Taylor Wimpey West Midlands	LPP01520	Policy 8C	Comment	No comments.	No comments necessary.
Wyre Forest Community Housing	LPP01659	Policy 8C	Comment	In the first paragraph in the Rural Exception Sites section, it states that the District Council “will work closely with.....” and then list various bodies / organisations. We would strongly encourage the	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				inclusion of Registered Providers in this statement. Notwithstanding this, we agree with Policy 8C.	
	LPP02975	Policy 8C	Object	<p>The Local Plan Review proposes inflexible policy towards housing in rural areas.</p> <p>The local Plan Review seems to discredit and deny rural areas opportunity to contribute to housing mix by its narrow site approach, contrary to the approach advocated in NPPG guidance May 2016 Rural Housing. ‘ALL settlements can play a role in delivering sustainable development in rural areas (para 55 NPPG , Delivering a wide choice of high quality homes/paras 54, 55-), and so blanket policies restricting housing development in some settlements and preventing others from expanding should be avoided, unless their use can be supported by robust evidence’.</p> <p>For example boundaries to Callow End settlement exclude Fingerpost Cottage, which is probably one of the oldest houses in the locality. Houses developed on part of its former frontage have been included in the defined settlement of Callow End, but Finger Post Cottage was not.</p> <p>It is hoped that policy 8C of the Local Plan Review can be amended so as to provide a more robust and relevant consideration to housing development and include sites such as Fingerpost Cottage site in the plan for housing, providing for a real diversity of housing supply, so as to provide for rural housing need with a range of high quality homes, appropriate to the site and its locality as</p>	<p>Comments noted. As part of the pre-submission work we are reviewing village boundaries in non-Green Belt areas, such as Rock Parish. As a large part of the district is covered by Green Belt, we have commissioned consultants to undertake a Green Belt review. The Green Belt review has informed the site allocations and the policies within the emerging plan. Settlements washed over by Green Belt are constrained by Green Belt policy which limits the amount of development that can take place in these locations. Policy 8C does include Rural Exception Sites for affordable housing in Green Belt locations where this is deemed suitable and meets the criteria set within the policy.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				flexible spaces and homes for the future.	
	LPP02937	Policy 8C	Object	<p>Rural areas can contribute more to housing mix without detriment to landscape and sustainability. Government guidance considers rural housing essential to the sustainability and viability of local facilities. The LPR recognizes that Bewdley for example, as a local market town, provides local services that will be used by the surrounding local community. The existing rural community travels to Bewdley and supports this vibrant town. This may be associated with tourism but it also a significant reflection on the income levels of the surrounding rural area. The 40 houses on 2 sites at For Forest represent a concentration of new development, with the only additional contribution at Bliss Gate, of 5 houses, as the only small scale contribution to rural housing need. Sustainability, as NPPF indicates, includes widening the choice of high quality homes. Responding to different opportunities in different areas must be provided for by taking local circumstances into account. Particularly in relation to the provision of housing in the more expensive but rural parishes in the west of the plan area, such as Rock, by policy beyond that of 8C and settlement boundaries drawn up years ago- would these be a 'blanket policy' described by Rural Housing policy guidance as to be avoided?</p> <p>The Local Plan Review proposes inflexible policy towards housing in rural areas.</p>	Comments noted. We will support housing in rural areas with a demonstrable need and in sustainable locations.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				LPR also seems to discredit and deny rural areas opportunity to contribute to housing mix by its narrow site approach contrary to the approach advocated in PPG guidance May 2016 Rural Housing. 'All settlements can play a role in delivering sustainable development in rural areas, delivering a wide choice of high quality homes', and so blanket policies restricting housing development in some settlements and preventing others from expanding should be avoided, unless their use can be supported by robust evidence'.	
Worcestershire County Council, Planning Economy & Performance	LPPO1144	Policy 8C	Comment	<p>The policy begins by referring to "small scale residential development". This is currently ambiguous as to whether this is referring to market or affordable dwellings or a combination of both.</p> <p>The third sentence states that "Small scale residential schemes that take account of local housing needs on windfall sites will be proactively considered within the rural areas". It is unclear what "proactively considered" means. Would "positively considered" provide greater clarity if it is the intention that these sites would be looked upon favourably for a grant of planning permission (subject to meeting policy requirements, etc.)?</p> <p>Under 'Rural Workers Dwellings', part (iii) refers to the "financial capabilities of the enterprise". It is unclear what this means and this could benefit from some supporting text or a footnote to provide clarity.</p>	We will consider this amendment to the policy.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPP01831	Housing for older people	Comment	Senior living apartment blocks should be developed in the town centre, encouraging people to downsize and freeing up larger properties. There are two large buildings in Kidderminster that would appear to be suitable for conversion to this type of living accommodation. Crown House and a large building in Worcester Street (formerly Council offices) are standing empty. There is also the former Glades site on which really nice living accommodation should be incorporated into any development that happens.	Comments noted.
	LPP04073	Housing Type	Comment	Retirement/low level housing: I would like to see on any development, particularly on Lea Castle, housing and a community for the elderly. A safe and secure complex with services for the elderly, shops, community centre, hair salon, doctors etc. A site of this nature would not necessarily have commuters at peak times, not impact on schools and local shops would mean no heavy impact on current supermarkets in the town. This may well have the desired effect for local elderly residents who currently live in 3/4 bedroom houses, who wish to downsize but do not want to leave the area, thus in the process freeing up current housing for families. If Lea Castle were to be expanded even with a good mix of this type of housing with other housing this would be a good way forward. We have a responsibility for affordable housing but we also have a responsibility to our ageing population to give them an opportunity to downsize but stay close (in a 'village') to where they have lived all their life, in a safe environment, easier to	Comments noted. We will ensure development on Lea Castle meets the range of affordable housing needs identified.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				manage property (bungalow), with resources on their doorstep. Lea Castle is the perfect site for this. It will also create jobs and business opportunities.	
	LPPO4900	Policy 8D	Comment	<p>Housing objectives in the Kidderminster Central Area Action Plan, adopted in 2013 include the following:</p> <ul style="list-style-type: none"> • Increase the amount of people living within the town centre. • The elderly may want to downsize to smaller residential units which could free up family sized accommodation. Therefore, we need to ensure that residential development caters for all groups in society. <p>Objective assessment of housing need report says:</p> <p>‘Building properties designed for older people was overwhelming ranked the highest priority for Wyre Forest with 75% of respondents recognising this as a high priority and the remaining 25% a medium priority. Building affordable homes to rent was also recognised as important, with 63% of respondents ranking this as a high priority and 31% a medium priority. Building affordable homes to buy, including shared ownership or shared equity, was considered a medium to high priority, with 44% of stakeholders ranking this a high priority and 44% a medium priority. Building properties designed for people with specialist needs in the District was rated highly with 40% ranking this a high priority</p>	The OAHN revision should provide more detailed requirements for certain groups identified by the NPPF.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>and 60% a medium priority’.</p> <p>There seems to have been little regard for this in the preparation of the preferred options document.</p>	
Anonymous	LPP05094	Policy 8D	Comment	<p>Agrees that in order for the area to prosper, we need to encourage working age families to the area so that there is a better balanced ‘Circle of Life’ in the area. This makes sense as there does need to be room to allow younger generations to come through and make Wyre Forest an aspirational place to live.</p> <p>Wyre Forest has an ageing population that most probably had young families 20-30 years ago. There is perfectly sufficient housing within Wyre Forest for young families, however, these family homes are not being vacated by the 45-64 & 65+ residents. There is a need to free up existing ‘family’ housing stock.</p> <p>There is a need for properties to be built to suit these groups of people. Not traditional bungalows, but properties that include: two parking spaces and a guest space; <i>some</i> garden; at least two spacious bedrooms; a bathroom each; a study/office area; a garage or outhouse building for garden items; some sort of separate utility. Essentially incorporating everything they already have, minus a bedroom and a smaller garden. The solution could be to create a different type of property that takes into account the items above?</p>	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>Given that Green Belt areas are being considered for development, perhaps modern barn complexes that look aesthetically pleasing across countryside views should be considered. These could be specifically designed, within courtyards, to be 2 bedroom properties that have a study on the ground floor (that could be used as a third bedroom), with a small area of private garden and an outhouse <i>storage/utility</i> attached. There would be two personal car parking spaces and plenty of communal guest parking centrally. Possibly 3-4 of these courtyards could form pockets of development to enable a community feel, avoid isolation and ensure it is economically viable to install utility / broadband services to each pocket of development. Whilst these modern barns would be relatively expensive however, relative to the equity saved up in a family home, the hope is they would be affordable to the target market, freeing the more affordable per square foot 'family homes' for younger generations</p> <p>While it is noted that the target residents would still be of a mobile age, some barns could be designed as single floor living; for example the ground floor being one apartment for those requiring no stairs and the 1st floor being accessed by stairs (or a lift dependent on cost).</p>	
	LPP04656	Policy 8D	Comment	Much of the extra requirement for dwellings results from the aging demography, which requires targeted solutions:	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				The plan suggests that the occupation per household is falling with static population growth (Table 2.0.1) less than 20% between 20 and 39 years of age. The requirement for more affordable housing with fewer bedrooms is clear; this cannot be accommodated solely by new build. Other, more targeted, creative and exciting solutions are required, such as co-housing, where the community is central to the design of the living space (for example Marmalade Lane or 'Owch). These insightful developments could utilise land better and provide improved lifestyle for residents. Supported through tax breaks and grants, the oxygen of publicity, favourable planning consent, provision of lists of active groups and individuals in search of groups this would be a positive, proactive response to the demographic problem. Section 8 (Summary of Consultation Responses) shows great foresight and suggests a comprehensive review of specialist housing. Doubtless the Council has many other creative ideas (such as providing annexes for the elderly suggested in section 8.29) that can be explored.	
Wyre Forest Community Housing	LPP01672	Policy 8D	Support	We particularly note and support the requirement within the Local Plan for "Housing for Older People and others with special housing requirements".	Support is noted.
Taylor Wimpey West Midlands	LPP01521	Policy 8D	Comment	Requirement for developers to provide evidence that they have considered self/ custom build, difficult to achieve in respect of both making efficient use of land; and to achieve design consistency. Could impact on viability. Further work needed to find out where	A more detailed self/custom build policy will be included in the pre-submission document.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>households would like to undertake a self build, so policies can provide for need rather than asking developers of all large sites to offer land.</p> <p>Regarding evidence to demonstrate that housing development proposals have considered tenures and types and for the need for 540 residential units to be met on sites allocated for housing. The care accommodation industry is very different to the house building industry. On larger schemes care homes can be provided for, on smaller schemes it is more difficult to make a viable and meaningful contribution.</p> <p>Policy should be flexible in requiring such specialist development given the complexities. Likely that opportunity sites will exclusively come forward for homes for older people and/ or specialist housing, which may meet the needs identified.</p>	
Persimmon Homes Limited	LPPO1556	Policy 8D	Comment	<p>The Council has introduced a further new requirement as part of this policy relating to the provision of self-build housing. Introduced through the Self-build and Custom Housebuilding Act 2015, there is a clear mandate for Local Authorities to understand the scale and requirement for self-build properties to provide evidence for the demand for this type of housing. The PPG proposes that this is done through the compilation of a Self-build register</p> <p>The Council has not provided any evidence of the total</p>	The number of households on the register were included in the draft planning policy. A specific custom/self build policy will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>need for self-build properties in the District, it is currently unknown how much provision is needed for the purposes of the Local Plan. As the evidence base for the self-build register is not available, the Council's justifications for this policy are unclear and unfounded. In the absence of credible evidence, the policy needs to be made more flexible in order for self-build to be included in the plan, though not to the prescriptive extent expressed in the current policy.</p> <p>Do not agree with the Council's current evidence as part of this policy and would expect that this is given further consideration prior to submission, to ensure that the evidence is proportionate and takes into account local data.</p> <p>Housing for older people and others with special housing requirements should also be considered in viability reports for sites, which is not included in the current policy as it stands.</p>	
Summerfield Against Land Transformation	LPP01613	Policy 8D	Comment	<p>You make much of the proportion of older people in the District. Despite this, developers are only required to have "fully considered" such needs and you have a target of only 540 C2 units over the life of the Plan.</p> <p>Specialist housing for older people needs a greater commitment and C2 provision needs to be more ambitious.</p>	Housing for older people can be met through provision of a range of different tenures and types in addition to the C2 requirement.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
Gladman Developments Limited	LPP01383	Policy 8D	Comment	<p>Note proposal to require consideration of self-build plots in major housing developments. Flexibility needs to be built in to ensure plots are not prevented from being developed as a result of low demand for such products.</p> <p>Intention to plan for C2 accommodation is welcomed. Specialist housing with care for older people is a type of housing which provides choice to adults with varying care needs and enables them to live as independently as possible in their own self-contained homes, where people are able to access high quality, flexible support and care services on site to suit their individual needs (including dementia care).</p>	Comments noted.
Persimmon Homes Limited	LPP01434	Policy 8D	Object	<p>Acknowledge the need for all forms of housing where it can be demonstrated that provision is needed and is appropriate to that particular location.</p> <p>In the case of supported living, such provision should be regarded as fulfilling all or part of the affordable housing requirement for that particular site. Supported living accommodation is a specialist form of provision developed to meet the needs of those whose housing requirements will not be catered for by normal market or affordable housing provision.</p>	We will support the inclusion of supported housing on sites where it meets an identified housing need.
West Midlands HARP Planning Consortium	LPP01337	Policy 8D	Comment	It is recommended that the Council set out clearly what they mean by 'Housing for Older People' there are a number of different types of specialist housing for older people from 'age-restricted' housing to 'extra-care accommodation'. The common features of all four types	The new OAHN will further identify housing needs for older people and this will be incorporated into the policy.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>are the age restriction, their specific design to meet the needs of older people, and a range of support services and shared spaces.</p> <p>Additionally the policy should explicitly support the development of specialist housing scheme which are separate to large scale housing developments. Example wording is provided below:</p> <p><i>“Homes for the elderly</i></p> <p><i>The Council will encourage the provision of housing for the elderly and for people with special needs, where appropriate whilst avoiding an undue concentration in any location.</i></p> <p><i>BDP10.2 The Council aims to ensure that older people are able to secure and sustain their independence in a home appropriate to their circumstances and to encourage developers to build new homes that can be readily adapted to meet the needs of those with disabilities and the elderly, as well as assisting independent living at home.</i></p> <p><i>BDP10.3 The Council will, through the identification of sites and/or granting of planning consents in sustainable locations, provide a wide range of elderly accommodation including the development of residential care homes, close care, ‘extra care’ and assisted care housing; and in particular Continuing</i></p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p><i>Care Retirement Communities which encompass an integrated range of such provision.</i></p> <p><i>Sites should be sustainable by virtue of their location and there will be a preference for sites within defined settlements. Where such sites are not available regard will be paid to the potential for development to be self-contained to reduce travel requirements and the availability and accessibility of public transport.”</i></p>	
Wyre Forest District Council - Community Led Housing	LPP01203	Policy 8D	Comment	<p>Support paragraph 1: ‘The local plan will seek to allocate plots for self build and custom build housing to address the demand for the self and custom build register. Provision will be reviewed on an annual basis as part of the residential land availability assessment and will be based on the demand as set out in the register of need maintained by the council.</p> <p>The District Council will require all major housing development proposals to provide evidence that they have fully considered the provision of self / custom build within the overall housing mix on the site’.</p> <p>Having analysed the self- build and custom-build register, key points for WFDC to consider:</p> <ol style="list-style-type: none"> 1. Out of the 50 individuals who are registered, a total of 36 are residents of the Wyre Forest district and therefore have a local connection. There are 16 individuals registered who do not 	There will be a specific policy on self/custom build in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>have a local connection.</p> <ol style="list-style-type: none"> 2. Out of the 50 registered, a total of 34 would consider a custom-build plot / home that was part of a new build housing development 3. A total of 42 out of the 50 registered would consider the conversion of an existing building as an alternative to building a new property. 4. A total of 12 individuals have expressed their interest in building eco-friendly homes (as highlighted in the 'comments' field of the register <p>These figures reflect conversations with members of the public at the consultation drop-in sessions. There is real interest in town centre living and support the idea that empty buildings/old factories in around Kidderminster and Stourport centres could be considered for renovation as there is potential for bringing these empty buildings back into use and making them both affordable and desirable places to live.</p> <p>To support the consultation sessions, the register also demonstrates that 42 out of 50 individuals registered 'would consider the conversion of an existing building as an alternative to building new property.' If these can be prioritised it would reduce the amount of Green Belt land that will be required to meet future housing needs. The sticking point is likely to be 'location' but if empty</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>buildings were converted, they would appeal to those people who want the benefits of living in a central and accessible location, but without the high rents that can be associated with it. More town centre living would help make the town centre feel safer at night time, increase the night time economy and help support the newly established restaurants opening in the town centre.</p> <p>The self build / custom build register is a live portal and strongly support that the register be reviewed annually. As content for the WFDC website is created it will likely generate more interest and support for community-led housing as local people gain a better understanding about the umbrella term for 'community-led' and what it could mean for them.</p> <p>Hope that WFDC would be able to make a tangible offer to the self-build / custom build community and offer plots that could be considered for their projects. In time, there may be interest generated in a housing co-operative, co-housing or self-help housing. As it is a relative unknown in terms of where and if this might happen, it is hoped that the housing needs of all Wyre Forest residents could be taken into account and supported, despite there not being a definite timescale for when it might happen.</p>	
Bewdley Civic Society	LPP0843	Policy 8D	Support	Policy 8D Specialist Housing Requirements: BCS supports this policy but with a more sympathetic	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

	LPPO306	Policy 8D	Support	I support draft Policy 8: Accommodation for Family Members and Carers, but it would be strengthened by the addition of “and Dependant Relatives”	Comments noted.
Homes England	LPPO815	Policy 8D	Support	The Council require development proposals to fully consider the provision of self/custom build within the overall housing mix on site. However, in relation to housing for older people and specialist requirements, it is considered that the policy needs to be clearer as to what it means by “...proposals to provide evidence that they have fully considered the provision of the following tenure and type within the overall housing mix on site.” The policy needs to provide clearer guidance as to what evidence the Council required, as currently this statement is open to interpretation.	This policy element will be revised once we have undertaken the revised OAHN which will include greater identification of the needs of older people.
Chaddesley Corbett Parish Council	LPPO1034	Policy 8D	Comment	<p>The provision of care homes and sheltered/extra care units needs close collaboration with County-level Social and Health services; they should have a clearer picture of the scale and type of provision needed. For residential and nursing care, there may be benefits in encouraging more purpose-built properties as well as conversions.</p> <p>Linking the provision of sheltered/extra care units to specific/separate developments may lead to pepper-potting (scattering) of these facilities, which may not be the most suitable or effective way of providing or supporting these properties. Again, Social and Health care input would be beneficial.</p>	Comments noted. We work closely with Commissioning Managers at WCC in meeting supported housing needs.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
Worcestershire County Council, Planning Economy & Performance	LPP01145	Policy 8D	Comment	<p>This policy would benefit from being divided into two, with Policy 8D concerning self-build and custom housing, and a new Policy 8E on housing for older people and others with special housing requirements (with consequent amendments to policy numbering for the current Policy 8E and 8F).</p> <p>We welcome the policy's requirement for all major developments to consider bungalows and extra care needs within the overall housing mix. Specific policy support for accommodation for family members and carers is also welcomed.</p> <p>Specific support for those with disabilities should also be included in this policy.</p> <p>We would, however, encourage the Local Plan to require all new housing, or a proportion of new housing, to be built to design standards that allow people to remain in their own homes for as long as possible. The majority of people prefer to remain in their own homes as they grow older, where necessary making changes and adaptations to their properties should their needs change. New homes should be encouraged to meet the Lifetime Homes standard (www.lifetimehomes.org.uk/) which is intended to allow homes to meet changing needs over the course of people's lives. The application of such standards to new build properties can help to realise some older people's aspirations to stay in their homes for longer.</p>	<p>Agreed.</p> <p>There is currently provision for lifetime homes and this will be updated in line with any national guidance.</p>

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPP04726	Policy 8E	Comment	Gypsy sites are always a problem and I don't have any quick fix for this except to say that both options look reasonable although it may not appear so to local residents and businesses.	Comments noted.
	LPP0742	Policy 8E	Comment	Comments made confidentially on behalf of a client.	Comments noted.
Worcestershire County Council, Planning Economy & Performance	LPP01361	Policy 8E	Comment	The text at the end of the policy should refer to "medium-term needs up to 2020".	Comments noted.
Historic England	LPP01270	Policy 8E	Comment	Policy 8E relates to potential development sites for Gypsy and Traveller Accommodation - what assessment has been undertaken as to the impact for the historic environment? How will these issues and opportunities be included within the Plan? This comment also relates to Policy 8F.	A Heritage Impact Assessment Study is being prepared and will be published at pre-submission stage. This study considers the sites and the potential heritage impacts. The purpose of the Heritage Impact Assessment is to support the Local Plan by demonstrating how the historic environment has been considered in the site selection process and to assess the likely impact on heritage assets, (both designated and non-designated) and whether any impact can be mitigated.
National Federation of Gypsy Liaison Groups	LPP03349	Policy 8E	Object	Restricting sites to those which are "on previously developed land or in areas allocated primarily for residential development subject to all relevant policies" will effectively prevent any sites being acceptable since	Comments noted.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				sites which comply with this restrictive policy will be equally acceptable for mainstream housing and will thus inevitable be beyond the reach of Travellers.	
	LPP03540	Policy 8E	Comment	I would also like to say that any proposals regarding the travelling community for further sites in the future should be done in Kidderminster, Bewdley or any other areas in Wyre forest except for Stourport as i feel that Stourport has already done their provision and other areas need to step up if any more sites are needed	Comments noted.
	LPP03542	Policy 8E	Object	Park home sights, classed in your mandate as Caravan and Holiday sights. It is with interest that you are committed with venom NOT TO ALLOW, 12 months occupation of these dwellings. You point out that the elderly could down size, surely these dwellings are ideal for the older population, but because of the Shutdown of the sights yearly, it is neither viable, ideal or cost worthy to vacate a family home for this option.	Caravan and holiday sites are not seen as appropriate long term housing solutions due to the insecurity of residency.
Worcestershire County Council, Planning Economy & Performance	LPP01146	Policy 8E	Comment	The text at the end of the policy states that "Further small scale sites to meet the indicative need of 21 pitches to 2034 will be allocated in the Local Plan". Should the preferred options not seek to meet identified needs at this stage? There doesn't seem to be any evidence of why these additional pitches have not been identified.	Current need for pitches provision has been met. A revised GTAA will be undertaken in the future to form the evidence base for need requirements.

				<p>will cause an extra hazard on an already very busy road. Local business will suffer, particularly the hotel.</p> <p>Wribbenhall schools are already overcrowded, and showpeople's children will need places there.</p>	continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPPO3111	8.0.6	Object	<p>This plan is contrary to previous planning advice. Access will cause an extra hazard on an already very busy road. Local business will suffer, particularly the hotel.</p> <p>Wribbenhall schools are already overcrowded, and showpeople's children will need places there.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPPO2208	BR/RO/1	Object	<p>Objects to BR/RO/1 as a potential site for travelling show people.</p> <p>Believes the site is unsuitable because some years ago the yard was subject to a Public Inquiry as it has been created without the necessary permissions being obtained.</p> <p>Responsible authorities do not appear to have enforced the resulting directions of the Public Inquiry. There is a belief that the original construction was undertaken by using unsuitable materials including scrap vehicles.</p> <p>The land is unsuitable as a parking place for large numbers of heavy vehicles.</p> <p>As an alternative, there are former factory sites in</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>Stourport and Kidderminster which would be eminently more suitable for the proposed use, having been properly constructed and more accessible.</p> <p>Problems with main drains in Clows Top - currently residential and business premises have no access to main drains - the dependence on septic tank drainage has caused the local authority to impose conditions on any proposed residential developments that any new builds would need to be connected to main drains.</p> <p>Therefore, the increased use/occupation of this site would necessitate the requirement for appropriate foul drainage provision in line with the local authority requirements to prevent any hazardous environmental damage being caused.</p> <p>Traffic - this has increased in recent years. Pavements provision in this part of the village is less than adequate with an interrupted pavement on only one side of the road. It is hazardous enough at the present time and any increase in the levels of danger and inconvenience to pedestrians and other road users would be unacceptable.</p> <p>Any Local Plan should address the real Community issues that exist, rather than create more detrimental ones.</p>	
	LPP02146	BR/RO/1	Object	High volume of traffic that passes through the cross	Objection noted. The proposed sites continue to be evaluated to identify the

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				roads. Insufficient facilities to cater for travellers community, no school doctors etc.	most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP02149	BR/RO/1	Object	The large increase in traffic both leaving and joining the carriageway in the close vicinity of the busy crossroads which already has bad visibility and is an accident hotspot. In my opinion a site of this type and of this density will cause levels of noise and disturbance that will result in infinite complaints from the surrounding residents Detrimental to the area	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP02215	BR/RO/1	Object	Objects to BR/RO/1, Section 19, Clows Top due to the following reasons: <ul style="list-style-type: none"> It is dangerous for vehicles, especially large lorries at the crossroads. The footpath opposite the site is already damaged - when the lorries using it now leave and enter the site they have to go on to the opposite footpath to be able to get on to the road. This has an impact on local residents who have to use the footpath with potholes. Safety - if fairground lorries and their families reside there, access onto the A456 by children should be considered. 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<ul style="list-style-type: none"> • The ability to manoeuvre trailers, caravans and lorries, crossing the carriageway of the A456 to get on site. • Sewerage - would it be that the families would have to be responsible to get their sanitation needs onto a septic tank set up, how would that work? • Electricity - would dwellings have to be put onto the normal power supplies? • Drainage - where would all the sink and bath water waste be directed? • As a local resident, all of the above issues have presented problems. • 9. Clows Top water is dependant on the pumping station just outside the village at the bottom of the bank towards Bayton. As soon as there was anything like a problem, Clows Top water was first to stop. Extra families drawing from that would not help. • 10. Any sort of housing is going to put a strain on the facilities as it stands at the moment but if housing has to happen then let it be a sensible amount of houses on the right sanitation set up, with sensible access to the A456. That way the village of Clows Top will remain just that a "village". 	
	LPPO2379	BR/RO/1	Object	<p>Object to the Clows Top site for Travelling Showpeople:</p> <ol style="list-style-type: none"> 1. Increase in traffic, especially heavy vehicles 2. Dangerous site access 3. Noise pollution 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission

				think would help sustain this village and local community.	
	LPP03501	BR/RO/1	Object	<p>We object to the proposed Traveller/Show People and Gypsy Site at Clows Top. The land has already been disregarded for this use in previous consultations.</p> <p>Clows Top needs more affordable housing. This would encourage local young people to stay in the village and keep this community alive and help to sustain local businesses such as the village store, post office and butchers.</p> <p>Access to and from the site would result in the crossroads becoming even more dangerous crossroads and access to the current car park is wholly unsuitable for large, slow moving vehicles. Changes to the road infrastructure would be costly and would cause traffic problems. Works relating to a housing development should be carried out and paid for by the developer.</p> <p>As a brown field site, there is likely to be significant ground remediation before any development can take place. This should be paid for by a developer, as should the cost of providing a sewage and storm water system</p> <p>As you will be aware there is a government incentive to build more new homes where deferred infrastructure charges relating to new water connections are waived, provided that new homes meet strict water usage criteria. This would be a significant and unavoidable cost</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>born by tax payers if the development is not designated for new homes.</p> <p>We understand that travellers and gypsy communities prefer to be located near better transport systems, doctors and schools, which are not present at Clows Top.</p> <p>We are sure there is no support from Rock Parish Council or the local community for Travellers, Show people or Gypsies to be located on the land at Clows Top</p> <p>We would support for residential building on this site which we would help sustain this village and local community. Clows Top needs more affordable housing. This would encourage local young people to stay in the village and keep this community alive and help to sustain local businesses, as has happened in other villages.</p>	
	LPPO4318	BR/RO/1	Object	<p>Objects to further development and traffic at Clows Top. It has become increasingly busy and the crossroads at the top can be quite a challenge to negotiate, further traffic near the junction is sure to make the situation even worse.</p> <p>Suggests the land under discussion would be better served to the community as it is i.e. a garage or similar which would offer a service which would benefit residents.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				There would be extra traffic, large vehicles turning in and out of the site onto as busy road/steep hill. Sewerage and water supply would be a problem.	
	LPP0667	BR/RO/1	Object	<p><u>Old transport yard, Clows</u></p> <p>Objects to site due to:</p> <ul style="list-style-type: none"> • site at summit of steep hill and dangerous crossroads - not suitable for heavy vehicles • adjoining land recently bought by builder - proposal would make sale of homes harder • sewage - not on mains • noise and light pollution • electricity - overhead cables - issues with strong winds • environmental waste from site not wanted • horses not welcome <p>Personal perception that there may be security concerns for shops and homes and a belief that property would be even harder to sell.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP0668	BR/RO/1	Object	<p><u>The Old Transport Yard off A456, Clows Top</u></p> <p>We do not want permission given for this site to be allowed for travelling/show people in our hamlet due to</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>the following points:</p> <ul style="list-style-type: none"> • Infrastructure - no mains sewerage, low water pressure and old pipes, increased run-off/drainage, busy road frontage near crossroads, on steep hill. • pollution from trucks/trailers, damage to road surface, noise and light pollution, unreliable electricity supply, extra waste • Personal perception that there may be issues around security and potentially increased costs to local residents • A perception that the new owner of adjacent site will have problem building/selling houses <p>Concern that there may not be enough school provision and transport.</p>	included in the pre-submission documents.
	LPP04666	Ceram-aspeed	Comment	This site isn't ideal because it is close to existing houses.	Comment noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP01713	Clows Top	Object	<p>Objecting to travelling show people or houses being developed at Clows Top for the following reasons:</p> <ul style="list-style-type: none"> • Drainage - Clows Top houses not connecting to mains sewer and relies on septic tanks so an 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>influx of residents would not be suitable.</p> <ul style="list-style-type: none"> • Road Safety - access to the site is at a very narrow point in the road and on the brow of the hill so has poor visibility. Issues with the current entrance being suitable for access, particularly for slow, heavy vehicles, which have potential to cause damage to vehicles opposite as well as mounting the pavement which is a safety issue for pedestrians. Drivers already break the 30mph speed limit on the road. • Inadequate Utilities - due to being a remote location and the local topography electricity and water supply is often disrupted which will be affected further if additional requirements are added to the systems. • Stability of the Land - site is in a poor state of repair; worried without major work to stabilise the ground it could fall away if used by heavy vehicles. 	
	LPPO2076	Clows Top	Object	<ol style="list-style-type: none"> 1. The turning for proposed site is on the brow of the hill on a road with a 30mph; large slow moving vehicles would be a traffic hazard and add to pollution. 2. There is no provision for sewerage 3. Property value will decrease. 4. Site already put forward and refuse in 2010; nothing changed. 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPP02086	Clows Top	Object	<p>Unsuitable for a travelling/show people site; no mains sewerage and septic tanks could not be provided.</p> <p>Fairground lorries would create pollution/noise and poor access will result in traffic tailbacks/dangerous driving conditions.</p> <p>This site was deemed unsuitable at the last consultation what has changed?</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP02127	Clows Top	Object	<p>I strongly object to the proposal in policy 8F regarding the site at the rear of the village hall potentially being used for travellers and show people.</p> <p>Firstly, there is no mains sewage in the village of Clows Top and septic tanks would be highly controversial in that site as there is a runoff from this land into Dumbleton Brook on the opposite side of the road leading down to Pensax. This brook runs into a SSSI site.</p> <p>We have no schools, doctors, street lights, public transport to speak of. The electricity supply to Clows Top regularly fails due to poor infrastructure.</p> <p>Very poor access to this for large vehicles, as site at top of the steep hill where smaller vehicles approach at speed.</p> <p>The actual land itself is unstable and is likely to subside</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				unacceptable. Any Local Plan should address the real Community issues that exist, rather than create more detrimental ones.	
	LPP02649	Clows Top	Object	Please register my objection to the use of the above site by travellers/show people. There are no facilities to house anyone on that land.	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP02764	Clows Top	Object	<p>Objection relates to any part of the document (e.g. paragraph, policy, map, and table or figure reference) where the site at Clows Top is shown or proposed as potential site for Traveller, Showpeople, and Gypsy use.</p> <ul style="list-style-type: none"> • Proposed site is in contravention of government policies: This proposal is in direct contravention of various components of the government guidelines, policies and previous statements made by the WFDC on this matter. • The land at Clows Top has already been disregarded as potential Traveller site: In 2011 the land at Clows Top was shortlisted as a site to be further investigated. After much debate and opposition of the local community the Clows Top Garage site (former Old Transport Yard) was confirmed as not suitable and not available as potential site for Gypsies, Travellers and Travelling Showpeople and was therefore 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>disregarded from any future considerations by the WFDC. Circumstances regarding availability have not changed. It is our understanding that the current owner of the Clows Top Garage site is seeking to renew the planning permission for housing with a potential of approximately 30 dwellings.</p> <ul style="list-style-type: none"> • Land at Clows Top is not suitable for use as Traveller site: Central government policies and guidelines state that when identifying Traveller sites consideration must be given to the relationship of the site to the surrounding community. The site should not be located on contaminated land nor have unacceptable impact on the landscape or have adverse impact on the health, safety, and living conditions, be sustainable, supporting the lifestyle of the residents of these sites, offering access to facilities and scope to manage an integrated coexistence with the local community and the environment. Similar provisions can be found in the local policies and guidelines of WFDC. These criteria make it unlikely for the land at Clows Top to be utilised as such for a multitude of reasons. The site is neglected, has a public footpath, is possibly contaminated and does not have provisions in place to safeguard visual and acoustic privacy. Surface water drainage and storm water drainage must be installed but the foul drainage connection is at some distance

				<p>away in Rock.</p> <p>Access onto the A456 for use as Travellers site is poor. Not suitable for large show and fairground vehicles and equipment enter and exit the site. Commercial vehicles would be entering and leaving the proposed site at all hours, including night time. There is increased noise transference on main roads such as the A456, resulting in disproportionate nuisance and high noise disturbance to the wider community. For the same reason, this usage is not conducive to the health of the residents living in mobile homes even more so if joint commercial/residential use is envisaged.</p> <p>Many Gypsies and Travellers express a preference for a location that is on the edge of or closely located to a large town or city consistent with traditional lifestyles and means of employment. There is only one bus service from Tenbury Wells to Kidderminster, which is a limiting factor for employment. Furthermore, there is no easy access to General Practitioner and other health services.</p> <p>There is no aesthetic compatibility with the local environment. A Traveller site at Clows Top would not be in keeping with the local environment.</p> <ul style="list-style-type: none"> • It is not feasible to develop the land at Clows Top as Traveller site: service water drainage and storm water drainage is not present and 	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>installing these facilities would cost at least £800,000 in addition to the costs of clearing up the heavily neglected site. These costs would largely be picked up by developers if it the site would be used for much needed housing development. In order to connect the sewage to Rock or Bayton all involved property owners would in principle need to agree to this and be compensated for the pipes going over their land. It is difficult to see how public support can be attained to make the land suitable for Travellers regardless of whether or not the same site could also be developed for much needed housing. There is a potential for approximately 30 dwellings if this site would to be used for housing development.</p> <p>The prevailing and emerging policies for Traveller, Travelling Showpeople, and Gypsy use state that any site should have adequate access to services and utility infrastructure such as mains water supply and mains electricity. Appropriate arrangements for sewerage treatment must be submitted as part of the application in addition to satisfactory drainage measures. The prevailing and emerging policies for housing list the criteria under which residential development will be permitted. One of the criteria is that the developer must ensure that appropriate sewage/drainage measures are provided.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>The emerging Local Plan policy 8F proposes that to meet the immediate needs of Travelling Showpeople within the District the land at Clows Top should be considered as a potential site for this use and that following allocation, any proposals brought forward should submit suitable arrangements for sewerage treatment in addition to satisfactory drainage measures. As Traveller sites are essentially a residential use, applicants will be required to demonstrate that they have sought a connection to the mains foul sewer in the first instance.</p> <p>The same requirements that apply to residential development must also be met for allocation of a site for Traveller, Showpeople or Gypsy use. Even if exceptions to some requirements could be made to meet the immediate needs of Travelling Showpeople, which we fail to see how this would serve the interest of the local community and, why residential requirements should be eased in any case. Even if certain requirements could be eased this use would be neither suitable nor feasible or attain public support.</p> <p>Policy 8F should be formulated in a way that necessary conditions should be met prior and not subsequent to such an allocation as a site can only qualify as appropriate if all requirements are met. It should also clarify that the same requirements that apply to residential</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>development such as appropriate drainage measures should also be met when allocating a site for Traveller, Showpeople or Gypsy use. If there is a willingness to lower certain standards for this particular use then the standards for housing development should be lowered equally.</p> <p>The prevailing policy <u>DPL10</u>, should also be incorporated in the equivalent emerging <u>policy 19</u> or separately adapted and continued, as this policy contains certain requirements to safeguard appropriate granting of planning permission for this use which have not been incorporated in the aforementioned emerging policy.</p> <p>Given the history and the way this policy is formulated, the impression is created that the intended use is justified by the policy instead of the other way around and that the conflicting potential secondary purpose (Potential Site for Travelling Showpeople) is in reality the primary and currently only purpose (Core Housing Site). Plan Policies are in place not only to guarantee that due process is followed but also to ensure that the limited land and local tax revenues are allocated appropriately. If a short cut is taken in formulation or application one is essentially passing on the immediate allocation issue of one local community to another.</p> <p>If WFDC is serious the about designation of the</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>on 31 July 2017 to express their opposition and frustration regarding the proposed Traveller site at Clows Top. The Rock Parish Council has also objected in disbelief to the land at Clows Top being in consultation for this use again.</p> <ul style="list-style-type: none"> • Earmarking the land at Clows Top as Traveller site is in contravention of WFDC broader strategy on sustainability: The emerging Local Plan objectives insofar here relevant are to encourage the long-term sustainable development of Wyre Forest District and its communities and to address housing needs in order that the existing and future residents requirements are met and the economic development of the area is supported. In the emerging Local Plan the allocation of the land at Clows Top as Core Housing Site is confirmed. The broader strategy for accommodating growth in the Wyre Forest Area behind option 7 by allocating more development to the villages and settlements within the District's Rural West is explained further. The consideration of the land at Clows Top as a potential site for Traveller use in the aforementioned emerging Local Plan policy 8F is in contravention of policy 35 and WFDC broader strategy on housing development and community cohesion. If WFDC surrenders the only available and sustainable allocated land in the WFD in this village to this proposed 	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>secondary purpose it does not support the broader strategies of WFDC for housing development and communities cohesion in Clows Top. In the assessment of the potential sites for this use the WFDC has recognised that the land at the site at Clows Top is at the heart of a remote rural village, that there is poor public transport links to local urban centres and that such a use does not fit in with the requirements of their Core Strategy.</p> <ul style="list-style-type: none"> • Earmarking the land at Clows Top as Traveller site would disjoint this small settled community: In one form or another, all central government policies express that the interests of the settled community must be respected and local amenities as well as local environment protected. Local planning authorities should ensure that any Traveller site to be considered is sustainable economically, socially as well as environmentally and avoids placing undue pressure on local infrastructure and services. Similar provisions can be found in the local policies and guidelines of WFDC. Clows Top is a small village with about 20 dwellings in Rock Parish and about 60 dwellings in Bayton Parish. It simply does not have the infrastructure to support this usage. It would completely dominate the settled community. From this perspective alone, it follows that the site at Clows Top should not be considered now 	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>or in the future as potential location for Travelling Showpeople or Gypsy use. Such a usage is not and cannot be made sustainable and would have a destabilising and disjointing effect on this small settled community. Such a usage would also have an unacceptable impact on the landscape and townscape as well as maintaining and enhancing the community identity. Therefore, the site at Clows Top is not a viable option for this purpose.</p> <p>Conclusion</p> <p>In conclusion, the land at Clows Top is not available nor suitable for this use and it is not feasible nor deemed good governance or socially desirable to develop it for this purpose. Such a purposing is in direct contravention of various components of several local and central policies and government guidelines, not in the least of which WFDC broader strategies for housing development and community cohesion.</p> <p>We trust we have provided sufficient grounds:</p> <ul style="list-style-type: none"> to disregard the land at Clows Top from any future considerations as a potential site for Traveller, Showpeople or Gypsy use and thus to reject the potential dual purpose of this land (Core Housing Site or Potential Site for Travelling Showpeople) and maintain the single purpose of

	LPP02919	Clows Top	Comment	<p>Objects to BR/RO/1 as a potential site for travelling show people.</p> <p>Believes the site is unsuitable because some years ago the yard was subject to a Public Inquiry as it has been created without the necessary permissions being obtained.</p> <p>Responsible authorities do not appear to have enforced the resulting directions of the Public Inquiry. There is a belief that the original construction was undertaken by using unsuitable materials including scrap vehicles.</p> <p>The land is unsuitable as a parking place for large numbers of heavy vehicles.</p> <p>As an alternative, there are former factory sites in Stourport and Kidderminster which would be eminently more suitable for the proposed use, having been properly constructed and more accessible.</p> <p>Problems with main drains in Clows Top - currently residential and business premises have no access to main drains - the dependence on septic tank drainage has caused the local authority to impose conditions on any proposed residential developments that any new builds would need to be connected to main drains.</p> <p>Therefore, the increased use/occupation of this site would necessitate the requirement for appropriate foul</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>drainage provision in line with the local authority requirements to prevent any hazardous environmental damage being caused.</p> <p>Traffic - this has increased in recent years. Pavements provision in this part of the village is less than adequate with an interrupted pavement on only one side of the road. It is hazardous enough at the present time and any increase in the levels of danger and inconvenience to pedestrians and other road users would be unacceptable.</p> <p>Any Local Plan should address the real Community issues that exist, rather than create more detrimental ones.</p>	
	LPPO3000	Clows Top	Object	<p>Looking at the various options outlined in the proposals, I would like to comment on the land at Clows Top. As I understand it from the paragraph 8.40, (p65), there should be provision for mains drainage for such a site and there currently is none at Clows Top. The site is also adjacent to village residents and countryside beyond. Although this site is classed as brownfield, access from the A456 in either direction for large heavy goods vehicles transporting large scale fairground equipment could be extremely hazardous. Many users of the A456 do not adhere to the 30 mph speed limit and therefore an entrance and exit to this site could impact detrimentally to the safety of road users and pedestrians at Clows Top.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPP03370	Clows Top	Object	<p>1) The site is at the top of a very steep hill, close to a busy road junction and due to the site's restrictive access, would create added dangers to traffic</p> <p>2) The turning circle required for large vehicles off the main A456 would be inadequate and cause a danger to other road users and pedestrians.</p> <p>3) This is a Green Belt area and the site would be inappropriate for such a development.</p> <p>4) Clows Top is a settled community, with facilities supporting many neighbouring small villages and this development would conflict with the lifestyle of the current population and have a detrimental effect on the area.</p> <p>5) Such developments should be situated closer to larger settlements where the existing facilities can cope.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP03515	Clows Top	Object	<p>As residents of Clows Top, we would like to notify you of our objection to the proposed development of a traveller, travelling showpeople or Gypsy site on the former transport yard site at Clows Top as described in the Wyre Forest District Local Plan Review Preferred Options consultation documents.</p> <p>Our primary reasons for this objection are listed below:</p> <p>1. That, in 2011, this site was nominated as such at</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>which time the plan was rejected for a number of valid reasons. Issues of noise, incompatibility with the local, rural community, lack of appropriate, safe access to the site, lack of local amenities and the unsuitability of the site for development (see point 2 below) due to lack of drainage and sewerage treatment options were cited at the time as reasons for the rejection of this plan. Since the situation has in no way altered during the intervening time and no modifications have been made to the site it follows that all the above mentioned objections, of which your office is well aware, would still apply.</p> <p>2. The same issues of sewerage and drainage which have so far been one of the key objections to any and all attempts by the site owner to gain planning permission for a housing development both on the transport yard site and the former public house site would entirely apply to the use of the site for travelling show people or Gypsy accommodation. If these issues can be resolved for one proposed use they can just as easily be resolved for the alternative proposed use.</p> <p>3. Clows Top is a small, rural community from which the majority of people travel by road to work in the local towns of Tenbury, Bewdley and Kidderminster or further afield to Birmingham and surrounding areas. As such, the facilities available within the village (Small shop, post</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>office, butcher, village hall) are limited because the majority of highly mobile residents are quite capable of locating and accessing additional services elsewhere. The village does not offer a primary school, GP surgery, public house nor adequate transport links to access these or other facilities apart from by private car. The village is, by definition, currently not well suited to any lifestyle other than that outlined at the beginning of this paragraph. The development of the proposed site for housing would allow additional families with a rural/commuter lifestyle to augment the village population. Such population might very well benefit the small business currently offering facilities within the village. However, these constraints make it obvious that any other settlement other than that outlined would lead to frustration at lack of facilities and a poor quality of life for those forced into such a situation by the limited availability of alternative traveller sites.</p> <p>4. Government policy has, for a long time, been that all residential development should offer mixed accommodation. For the housing developer this means a strictly regimented blend of luxury through to affordable properties. Developing the site in Clows Top as a traveller, show people or gypsy site would, in effect, create a large concentration of a single property type within a very small, rural community</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>lacking the capacity to absorb such a development. Community cohesion is a buzz-word used by councillors but such cohesion would inevitably be a casualty should this development go ahead.</p> <p>Summary:</p> <ul style="list-style-type: none"> • It is our contention that development of the former transport yard site for mixed housing could, if designed sensitively and in keeping with the local housing stock and community demographic, be of benefit to the village of Clows Top. • Any objection to the development of the site for housing on the basis of access restrictions to the busy main road (A 465), drainage or sewerage would apply to all residential use of the site including that by travellers, show people or gypsies. • That every objection raised and validated by the rejection of a similar proposal in 2011 still stands. • Any development type considered for this site will have a disproportionate impact upon the community and the village of Clows Top due to its small size and this should be taken into account before any development is approved. 	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPP04096	Clows Top	Object	<p>We are writing with regards to the above proposal as outlined in the Wyre Forest Local Plan Review Preferred Options (June 2017) Policy 8F, on page 64.</p> <p>We wish to object on the following grounds:</p> <ul style="list-style-type: none"> • very poor access: access from the A456 to the proposed site is very limited and not at all suitable for large, heavy duty transport vehicles and trailers. The turning access into the site is narrow and long vehicles would have to mount the kerb on the opposite side of the road, causing danger to pedestrians, children playing and long term damage to both the road and path infrastructure. • major traffic hazard: the site's access is at the top of a steep incline and the turning point is at the brow of the hill. Large vehicles turning at this point in the road would create a considerable road block, resulting in possible collision with other vehicles travelling in both directions. Traffic through the village would also build up considerably and create traffic jams on what is already a very busy major A road from the West Midlands to mid and west Wales. • poor condition of the land: the local community have been led to believe that the land is not stable, as it was used for the disposal of many materials in decades gone by. This has resulted in insufficient drainage and created an unstable 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>ground for any large heavy vehicles to be stored without possible danger of earth movement and slippage onto the dwellings below this land on Clows Top bank. WFDC would need to invest valuable resources to research this, when they could spend their limited funds in other areas to improve the village facilities.</p> <p>We would also like to ensure that WFDC are aware the area allocated for the proposed provision detailed on the map on appendix a (Villages and Rural West) is incorrect and very misleading, as it gives the impression that the whole area in yellow is being considered as a Potential Site for Travelling Showpeople. Whereas some of this area is owned by Matthews Construction and should indicate accurately its potential for housing.</p> <p>Finally, as this is a 'Brown Field Site' and amongst dwellings, within the village perimeter, we feel WFDC need to consider proposals that ensure the long term sustainability for the village and work with the local community to support the installation of main sewerage, an improved water supply and provide a small number of long term housing options that contribute to village life. If Clows Top is able to develop into a thriving community with more services and a healthy infrastructure, this will enable the village to become a 'community hub' supporting the many hamlets and small villages in its surrounding area that have lost their own local provision over the years.</p>	

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
	LPPO4224	Clows Top	Object	<p>I object to the land at Clows Top being used for travelling showpeople. I wish to comment as follows, In particular for the showpeople but has relevance in respect of the proposed housing site:</p> <ol style="list-style-type: none"> 1. Difficult vehicular access to and from the site from the A456. Access is on the brow of the hill. The site is not capable of safe, visible access from the A456 highway and will have an adverse impact on the safety of the highway network and its users. 2. Turning into and out of the site will be difficult- A456 is not wide and there are houses opposite the access. 3. Speed of vehicles and motor bikes through Claws Top. There is a disregard of the 30mph limit. 4. The type of vehicles and trailers used can be large and extremely long. When they are entering or exiting the site, they will be slow therefore blocking the A456. This, coupled with 3 above, could be an accident waiting to happen. 5. There could be numerous vehicles, trailers and caravans entering/exiting the site at all times of the year. 6. There is no mains sewerage/drainage. How will the showpeople's sewage be disposed of? This also applies 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>to any housing development.</p> <p>7. The site is flat but is on the top of the hill. Therefore the sides along the perimeter form a bank. The land on the site is unstable and is falling away and is now close to a neighbour's field and also a public right of way. There is movement around the perimeter of the site, this before any heavy vehicles and trailers are using the area. Equally, this will be issue for house build.</p> <p>8. There is a lack of adequate access to services and utility infrastructure. Mains water supply and mains electricity services are currently working to capacity. There are Interruptions to these services during the year.</p> <p>9. In respect of proposed houses, the number of houses proposed of 30 (I believe) could result in around 70 people (say 2 adults plus 1child per house) which will really stretch comment 8 above. It could also mean there would need to be parking for 70 motor vehicles on the site. Schooling could be an issue. Bus services are very limited.</p> <p>10. The cumulative impacts of the site would harm the character and appearance of the area.</p>	
	LPPO4319	Clows Top	Object	<ol style="list-style-type: none"> 1. The proposed site has insufficient amenities i.e. water/sewage (low water pressure). 2. Clows Top area/crossroads has traffic 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>congestion/very poor visibility at junctions.</p> <p>3. The site is well known for poor and instability due to its previous use for mining /disposal waste metal.</p> <p>4. The infrastructure for this and nearby villages (schools, doctors etc.) are full to capacity.</p> <p>5. Thus I consider the site is only suitable for a small business venture i.e. garage or similar to support local needs.</p>	for the Travelling Showpeople site will be included in the pre-submission documents.
Anonymous	LPPO4486	Clows Top	Object	<p>Object to this site for the following reasons:</p> <ul style="list-style-type: none"> • There are no mains drainage/sewage. • Poor access with the speed and amount of traffic. 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

Corbett Parish Council				would seem the preferred option.	
Pensax Parish Council	LPP01086	Clows Top	Object	<p>Pensax Parish Council supports Clows Top in objecting to land as a potential site for Travelling Showpeople.</p> <p>Clows Top and the surrounding Parishes have limited areas on which houses can be built due to the rural landscape.</p> <p>This brownfield site should be used for a mixed housing development to enable local people to have some affordable housing in the area.</p> <p>Site is not suitable for Travelling Showpeople due to access problems for large vehicles and cars towing caravans. Traffic on the A456 has increased considerably over the last 10 years, the speed limit of 30mph is not adhered to by the majority of drivers making entry and exit to this land very dangerous. Near misses are witnessed by residents living in this area of village.</p> <p>Clows Top does not have a main sewer connection, this is essential for housing to be built and would be of benefit to the majority of the houses in the village. It is assumed Travelling Showpeople would require a mains sewer but we note the comment in the consultation document stating they need to 'source a connection' whatever that means, this point needs clarification.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				the development of Bewdley as an attractive place for visitors and a centre for tourism, especially as this site is so close to Bewdley's major hotel, as well being inconvenient for shops and other services. It would make more sense to locate this site closer to an area where the travelling show people work.	most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP02425	Habberley Road	Object	<p>I would like to object to a potential site for Travelling show people the land off Habberley Road, Bewdley. I have reached the decision to object to this plan after much consideration, including the social, environmental and economic reasons.</p> <p>Considering the location of all potential sites the site proposed near Habberly Road is the most heavily populated and therefore immediately appears to be the least suitable. The plan also suggests a large number of houses to be built in Bewdley, especially in the Wribbenhall area. Thus the increase in dwellings will result in a growth in the number of families and transportation in the local area. Therefore, I believe this site is not suitable for the purpose suggested as there would be a further increase to the population of the local area and certainly an increase in the amount of large transportation on the roads.</p> <p>The increase in large transportation on the roads of Bewdley would be a very bad idea. The area is an attraction for many people all over the UK, due to the river, buildings, Seven Valley Railway and West Midlands</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

				<p>Safari Park. The roads would not be able to withstand more heavy vehicles in the area.</p> <p>Similarly, the addition of a site for Travelling Showpeople would be a disadvantage to the town, due to the noise pollution of the constant storing, and maintaining of fairground rides and show attractions. This would in turn have a negative impact on the town's shops and a dip in property value.</p> <p>Likewise, the addition of a site for Travelling show people in Bewdley would cause strain on the local areas resources. With an increasing number of houses in Bewdley, it is not possible to house any more residents. This would not be fair for the current residents of the small town, as their quality of life should not be affected via this decision.</p> <p>Another wonderful attraction in Bewdley is the Mercure Hotel; from use of a high quality gym to hosting weddings the hotel attracts visitors to the area. I strongly believe the addition of a Travelling Showpeople site opposite the hotel will have a detrimental impact.</p> <p>It seems both unfair on West Midlands Safari Park and Stourport Fun Fair attractions that have supported us, to allow the opening of a travelling show people site so close to these established attractions. Likewise, due to the current presence of both of these attractions, it seems rather unnecessary to host the travelling show</p>

				<p>people in Bewdley. Surely there is no opportunity in the market anywhere near the Wyre Forest and thus it would be more appropriate for this site somewhere nearer the potential market.</p> <p>In conclusion, I object to the proposal of a policy 8F - Site Provision for Travelling show people of the land off Habberley Road, Bewdley for a variety of reasons.</p>	
	LPP02429	Habberley Road	Object	<p>I am writing to place a formal notice of objection to the proposed travellers' site on Habberley Road. I disagree totally with your strategic review proposals. The road is already ridiculously busy. This would only become worse with any building or development in the area of Habberley Road. Furthermore, the Mercure offers one of the best venues and places to stay in Bewdley. A traveller's site would undoubtedly impact upon their business. Also concerned about the impact on neighbouring residents. I wish to log my objection to your proposal in the strongest of terms.</p>	<p>Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.</p>
	LPP02430	Habberley Road	Object	<p>This proposal needs to be fully explained to the residents of Bewdley. What exactly is proposed for this site? Will it be purely to store circus equipment, or will people be staying there? If the former I object on the grounds of large equipment using Habberley Road and causing congestion on an already busy road and the effect on the environment and if the latter I object to a site for travellers being set up so near to a hotel which brings visitors to the town and surrounding area and will also have an impact on the houses nearby and the</p>	<p>The site was one of 5 consulted on for a specific family of Travelling Showpeople already resident in the district.</p>

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				environment.	
	LPP02456	Habberley Road	Object	<p>I am writing to object to the proposed Travelling Show People site opposite the Mercure Hotel on the B4190 Habberley Road.</p> <p>This land has been designated as Green Belt land for a good reason, to stop the relentless development of the countryside between Kidderminster and Bewdley. This is a very pretty and important ‘green lung’ for those who live in the area, and there are NO excuses for it to be developed. Planning Inspectors have already ruled that there should be no encroachment into the area.</p> <p>Travelling Show People make up a very small percentage of the travelling community and the number of travelling circuses and fairgrounds cannot warrant using this Green Belt land in such a way. Furthermore there can be no guarantees that the site will not simply become a traveller encampment for any of the Gypsy or Roma community. The environmental impact on this area would be immense. There can be no guarantees that what starts as a traveller site does not rapidly become a settled traveller site, with the erection of static caravans and more permanent dwellings.</p> <p>The access to this site is unsuitable from each direction. The B4190 has become a very busy route between Bewdley and Kidderminster, usually used as a rat-run to avoid congestion along the A456. As the plans are</p>	Please see above. This was not proposed as a site for Gypsy or Travellers but for Travelling Showpeople.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>pushed ahead to further develop the Safari Park site, congestion will increase along the A456, and drivers will naturally seek to use quicker routes such as the B4190. Poor visibility and increased traffic will increase the risk of traffic accidents along this route.</p> <p>Residents who live along Trimpley Lane in Bewdley will see a huge decrease in the value of their property. Who is going to recompense the householders who have to put up with devaluation of property, loss of privacy?</p> <p>It is highly unlikely that the Mercure Hotel will want to remain in business overlooking a travellers' camp. Who would want to come and visit the town to spend their time looking at caravans? How many jobs will be lost if the hotel closes? This area needs every job it can get, but the development of this site will bring no jobs to the area, just multiple problems that have no easy solution.</p>	
	LPPO2545	Habberley Road	Object	<p>I feel that allowing this site to be used for Travelling Show People will:</p> <ul style="list-style-type: none"> • Only planning applications with exceptional circumstances should be permitted within the Green Belt and I don't feel this application has exceptional circumstances. • The B4129 is a very busy road and will create highways and traffic issues • There is a high risk that this site will create environmental issues 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

				<p>particular issues arising can be more efficiently and effectively monitored by the authorities.</p> <ul style="list-style-type: none"> The proposed site is directly opposite the Heath Hotel and development of the site would damage the attractiveness of this important leisure and tourism facility with the result of a reduction in its use and a potential loss of income and employment. <p>Taking all these matters into account I request that the Council should not include the Habberley Road site for any development as a site for Travellers in the Local Plan.</p>	The consultation was for a Travelling Showpeople site and the demand for the site is evidenced in the policy.
	LPP02650	Habberley Road	Object	<p>Objects to the Habberley Road site for the following reasons:</p> <ul style="list-style-type: none"> Inappropriate development in the Green Belt. There are other sites under consideration that are not in the Green Belt. It is adjacent to a Bronze Age burial site Traffic. Habberley Road is very busy, almost acting as a bypass from Kidderminster to Bewdley and Stourport. Development at Mecure Hotel, West Midlands Safari Park and South of Habberley Road will cause problems for everyone living along this stretch of road. There is no right turn at Catchems End and the vast majority of people travelling in either direction past this proposed site is 50-60mph and some 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>much faster. This I fear would cause an accident hot spot where ultimately fatalities could occur with heavy show machinery entering and leaving the proposed site.</p> <ul style="list-style-type: none"> • The site is not previously developed land. • There is an abundance of wildlife in the surrounding woods and fields, including deer, badgers, falcons, sparrow hawks and owls, rabbits and squirrels, which would be displaced by allowing such development to go ahead. I also understand there may be some BOP flora which I am unsure of whether this is protected or not, perhaps you could have someone let me know. • There are three more desirable locations: Rear of Ceramaspeed which is owned by the Council; Heath Lane which is already owned by the family; Clows Top which is already in use. 	
	LPPO2666	Habberley Road	Object	<p>I quote from your document 19.4:</p> <ul style="list-style-type: none"> • "where possible Gypsy and Traveller sites should be developed near to housing as part of mainstream residential development" • "traveller site development in open countryside should be strictly limited" • "the site should give adequate consideration for towing caravans to enter, exit and manoeuvre" 	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

LOCAL PLAN REVIEW – PREFERRED OPTION CONSULTATION RESPONSES TO SECTION 8: A DESIRABLE PLACE TO LIVE

Company / Organisation	Response Number	Para / Policy	Type of Response	Summary of Response	Officer Response
				<p>around the site"</p> <p>Habberley road is a fast moving road with a 50 mph section. It is very busy especially in at rush hour as it links Stourbridge, Hagley Wolverhampton, Bridgnorth with Stourport and Worcester without the need to pass through Kidderminster.</p> <p>The site is rural in nature and there is a series of bends at one end of the road - the land falls away from the road and the road itself has only two lanes.</p>	
	LPPO2893	Habberley Road	Object	<p>this proposal is for one family in particular, it would not restrict other travelling show people from using the site. This means that the amount of people and vehicles on the site could grow which in turn will cause more issues to the area including potentially damaging trade of local businesses and damage to the local environment.</p> <p>It will also bring problems to traffic flow as access to and from the site from Habberley Road is not suited to large vehicles coming and going.</p>	The site allocation is for one family of Travelling Showpeople currently resident in the District.
	LPPO3038	Habberley Road	Object	<p>Objections towards the proposed traveller sites in the plan on the B4129 Habberley Road in Bewdley.</p> <p>1. The site will be open to all travelling show people/travellers causing constant movement of traffic on and off the site. This will be extremely dangerous given it is a rural road with lots of properties and houses</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				<p>with families so the noise at all hours would also be unacceptable.</p> <p>2. The B4129 is a rural road which has become busy over the years and with the potential extra traffic, will make it a very dangerous road with accidents waiting to happen.</p> <p>3. If this plan goes ahead, the hotel and golf club will suffer, causing damage to their businesses.</p> <p>4. The development will result in damage to the local environment which is a beautiful area. Wild life will suffer.</p> <p>5. All of the residents who live on this road will be affected by the noise of the travelling community. It will adversely affect the property values.</p> <p>6. The idea of the site is already causing bad feeling in the area and there are bound to be negative tensions if this is given the go ahead.</p> <p>7. There are plenty of brownfield sites available in other larger towns that would be more suitable.</p> <p>8. Tourism would also be affected.</p> <p>9. It further erodes the rural space between Bewdley and Kidderminster which is supposed to be protected to</p>

				maintain the separate identities of the towns.	
	LPP03232	Habberley Road	Object	<p>We DO NOT support the proposal for a transitional travellers site at Habberley Road.</p> <p>The site sits within the Green Belt and is adjacent to a hotel and residential properties</p> <p>The local roads, particularly the corner at Catchems End does not lend itself to coping with fairground attractions etc which are transported on huge vehicles.</p> <p>Spoil the beauty of the green space. Worried about litter left.</p> <p>Furthermore, with a permanent site already in nearby Stourport on Severn, it makes so much more sense to develop a site in Stourport, rather than create a huge ongoing and potentially dangerous traffic problem on a busy, much used B road in Bewdley.</p>	The proposal was for Travelling Showpeople and would be a permanent location for a family already resident in the District.
	LPP03432	Habberley Road	Object	I feel that this land should be used affordable housing for the young people of Bewdley, and not for strangers to the town, there are community housing being built in the area, but the young are unable to purchase these if they are over a certain pay bracket, so youngsters who are in this situation are unable to purchase new properties, as they are either in the higher unaffordable range or the lower which they are unable to purchase	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				There is enough traffic on the Habberley Road without the comings and goings and mess of travellers, why not put it in Stourport or Kidderminster.	
	LPP03558	Habberley Road	Object	<p>The site is in close proximity to popular businesses, Bewdley Pines Golf Course and The Heath Hotel which is the main hotel for tourists to the Georgian Town of Bewdley. The popular visitor site of Habberley Valley with its interesting flora and fauna is also nearby.</p> <p>There is doubt that the site could be used for sole occupancy which could lead to a large development on Green Belt land.</p> <p>Other proposed sites have the infrastructure to cope with large trailers and lorries and would be more suitable for purpose.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP03565	Habberley Road	Object	I wish to object under section 19 of the potential site for show people on the B4190 opposite the Mercure hotel Habberley Road Bewdley, Against previous planning advice Site would be open to ALL travelling people Highway issues Damage to local environment.	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP03742	Habberley Road	Object	<p>Previous planning rulings on this area, Green Belt erosion.</p> <p>Use could not be restricted to one operator thus opening the need for living facilities.</p>	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				Highways issues. Potential damage to local businesses. Environmental damage.	
	LPP04000	Habberley Road	Object	I strongly object to the use of the land opposite the Heath hotel as a site for travelling show people. When the Safari Park has an event the traffic blocks access to Trimpley Lane and Catchems End thus affecting Habberley Valley Road. Traffic is backed up at Catchems End when flooding occurs. Extra people and vehicles will make it even more difficult to turn out of Trimpley Lane. The B4129 is unsuitable for large vehicles. The community, hotel and gymnasium would be negatively affected.	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.
	LPP04022	Habberley Road	Object	I wish to object to the proposed travelling showpeople site on Habberley Road in Bewdley for the following reasons. (1) Whilst the site is similar in size to one where 45 dwellings are proposed, it is naive to think that it is for one temporary user and would become an invitation to others to come to the site. (2) Having already been turned down for previous planning applications on several grounds, it seems a strange decision to now propose this development.	Objection noted. The proposed sites continue to be evaluated to identify the most suitable site and the final proposal for the Travelling Showpeople site will be included in the pre-submission documents.

				<p>(3) Historically local businesses suffer when such a development is allowed and there are several businesses close to the proposed site.</p> <p>(4) Bewdley is a town which relies heavily on tourism, and the potential negative impact on local businesses and the community seem disproportionate to the benefit of supporting a single travelling showperson.</p> <p>Please do not allow this to proceed.</p>
