

We were woken up by our neighbours at 5.00am in the morning to tell us we were under water again. We got the water pump out and got it started to pump out the water in the garden before any further damage was done to the interior of our house. However, the water did come in again on this occasion. Our neighbours also brought round another pump, so 2 going for the whole of the day. We have now been flooded off the fields and lane about 7 times. We have lived here for 50 years and are now in our 70s.

Images of the field is where planning is proposed.
